Introduction

\section*{WARNING}

See the Important Safety and Product Information guide in the product box for product warnings and other important information.
Always consult your physician before you begin or modify any exercise program.

\section*{Device Overview}

\begin{itemize}
  \item \textbf{Touchscreen}: Swipe up or down to scroll through widgets, features, and menus.
    Tap to select.
    Swipe right to go back to the previous screen.
    Swipe right to view the messaging app (\textit{Sending a Message, page 2}).
    During an activity, swipe right to view the watch face and widgets.
    During an activity, double-tap to mark a new lap, start a new set of reps, or advance to the next stage of a workout.
    Hold to view a menu of device settings and options for the current screen.
  \item \textbf{Key}: Press to turn on the device.
    Hold for 2 seconds to view the controls menu, including device power.
    Hold for 5 seconds to request assistance (\textit{Safety and Tracking Features, page 6}).
    Press to return to the watch face from any screen, except during an activity.
    During an activity, press to pause the activity.
  \item \textbf{Touchscreen Tips}:
    \begin{itemize}
      \item Hold your finger on the touchscreen to view an options menu.
      \item Drag up or down to scroll through lists and menus.
      \item Swipe up or down to scroll quickly.
      \item Tap to select a button, a list item, or a menu item.
      \item From the watch face, swipe up or down to scroll through the widgets on the device.
      \item From a widget, tap to view additional widget screens, if available.
      \item During an activity, swipe up or down to view the next data screen.
      \item During an activity, swipe right to view the watch face and widgets, and swipe left to return to the activity data fields.
      \item Perform each menu selection as a separate action.
    \end{itemize}
  \end{itemize}

\section*{Locking and Unlocking the Touchscreen}

You can lock the touchscreen to prevent inadvertent screen touches.

1. Hold the key.

2. Select \( \textcolor{red}{\text{🔒}} \). The touchscreen locks and does not respond to touches until you unlock it.

3. Hold the key to unlock the touchscreen.

\section*{Using the Controls Menu}

The controls menu contains customizable shortcuts, such as locking the touchscreen and turning the device off.

\textbf{TIP}: You can check the Verizon\textsuperscript{\textregistered} network signal strength or Bluetooth\textsuperscript{\textregistered} connection status.

\textbf{NOTE}: You can add, reorder, and remove the shortcuts in the controls menu (\textit{Customizing the Controls Menu, page 17}).

1. From any screen, hold the key for 2 seconds.

2. Select an option.

\section*{Icons}

A flashing icon means the device is searching for a signal. A solid icon means the signal was found or the sensor is connected.

\begin{table}[h]

\textbf{📞} & A white icon indicates that your Bluetooth phone is not connected. It is on standby. & When your phone is not connected, your vívoactive device searches for the 4G LTE network.
\hline
\end{tabular}
\end{table}
Smart Features

Setting Up Your Smartwatch Features
To take full advantage of the vívoactive 3 Music features, complete these tasks.

- Pair your smartphone with the Garmin Connect™ app (**Pairing Your Smartphone**, page 2).
- Activate your vívoactive 3 Music device (**Connecting with Verizon**, page 2).
- Add contacts (**Adding Contacts**, page 2).
- Send a message (**Sending a Message**, page 2).
- Set up safety features using the Garmin Connect app (**Safety and Tracking Features**, page 6).
- Download a music app using the Connect IQ™ store (**Connect IQ Features**, page 4), and download songs onto the watch (**Music**, page 5).
- Connect your Bluetooth headphones (**Connecting Bluetooth Headphones**, page 6).
- Set up your Garmin Pay™ wallet (**Setting Up Your Garmin Pay Wallet**, page 4).

TIP: You should check the battery life and charge the device before leaving on your first phone-free adventure (**Charging the Device**, page 21).

Pairing Your Smartphone
To set up the vívoactive device, it must be paired directly through the Garmin Connect app, instead of from the Bluetooth settings on your smartphone.

1. From the app store on your smartphone, install and open the Garmin Connect app.
2. Select an option to enable pairing mode on your device:
   - If this is the first time you are setting up your device, press the key to manually enter pairing mode.
   - If you previously skipped the pairing process or paired your device with a different smartphone, hold the touchscreen, and select **Settings > Phone > Pair Phone** to manually enter pairing mode.
3. Select an option to add your device to your Garmin Connect account:
   - If this is the first device you have paired with the Garmin Connect Mobile app, follow the on-screen instructions.
   - If you have already paired another device with the Garmin Connect Mobile app, from the settings menu, select **Garmin Devices > Add Device**, and follow the on-screen instructions.

Connecting with Verizon
1. From the Garmin Connect app, select or .
2. Select **Garmin Devices**, and select your vívoactive 3 Music device.
3. Select **Connect with Verizon**.

4. Follow the on-screen instructions.

Adding Contacts
You can add up to 50 contacts from the Garmin Connect app and sync them to your device. Three of these contacts can be used as emergency contacts (**Adding Emergency Contacts**, page 6). Contact emails can be used with the LiveTrack feature.

1. From the Garmin Connect app, select or .
2. Select **Contacts**.
3. Follow the on-screen instructions.

After you add contacts, you must sync your data to apply the changes to your vívoactive 3 Music device (**Using Garmin Connect Mobile**, page 16).

Sending a Message
If you are a Verizon customer and you want to use your iPhone® phone number for messages, you must disable the iMessage® service.

NOTE: Your messaging experience may vary based on your smartphone operating system and how you set up the vívoactive 3 Music device to send messages (**Messaging Options and Behavior**, page 2).

1. From the watch face, swipe right.
2. If you have already set up text messaging, skip to step 6.
3. Select .
4. Follow the on-screen instructions to set up text messaging.
5. From the watch face, swipe right.
6. Select .
7. Select an option:
   - Enter a number, and select .
   - Select one or more contacts, and select **Done**.
8. Select an option:
   - Select and send a quick reply message.
   - You can customize the quick reply messages using your Garmin Connect account (**Device Settings on Your Garmin Connect Account**, page 19).
   - Select to send your location.
   - Select to select and send an emoji.
   - Select to enter a message, and select **Send**.

NOTE: Messages are limited to 160 characters.

Messaging Options and Behavior
This section is provided to help you understand the messaging options and behavior based on your mobile carrier and smartphone operating system.

- **I'm a Verizon customer with an Android™ smartphone**, page 2
- **I'm a Verizon customer with an iPhone device**, page 3
- **I use a different carrier for my Android smartphone**, page 3
- **I use a different carrier for my iPhone device**, page 3

I'm a Verizon customer with an Android™ smartphone
Phone number: You can use your smartphone number as the phone number your vívoactive watch uses to send and receive text messages. Garmin® recommends this option for the most seamless experience. If you do not use your smartphone number, your watch will send and receive text messages using a separate watch phone number.

Text messages using your smartphone number: If you set up the vívoactive watch to send and receive messages using your smartphone number, messages are sent to both your phone and your watch (when your phone is in Bluetooth range or when your phone is outside Bluetooth range and

</tbody>
</table>
your watch is connected to 4G LTE). If you use the Verizon Messages+ app on your phone, the message read state syncs between your phone and watch.

**Text messages using the watch phone number:** If you set up your vivoactive watch to send and receive messages using the watch phone number, the experience is different. Messages sent to the watch phone number appear on the watch (when your phone is in Bluetooth range or when your phone is outside Bluetooth range and your watch is connected to 4G LTE). New messages or replies sent from the watch are sent from the watch phone number. Garmin recommends letting your friends and family know your watch phone number. When your phone is in Bluetooth range and a message is sent to your smartphone number, your watch receives a smart notification, and you can use that smart notification to respond to the message from your smartphone number.

**How do I use the onscreen keyboard?**
The default touchscreen keyboard uses a predictive T9 keyboard. T9 stands for text on 9 keys. You can hold the touchscreen for text entry and language options.

**Connected Features**
Connected features are available for your vivoactive device when you connect the device to a compatible smartphone using Bluetooth technology. Some features require you to install the Garmin Connect app on the connected smartphone. Go to www.garmin.com/apps for more information. Some features are also available when you connect your device to the 4G LTE network.

**Phone notifications:** Displays phone notifications and messages on your vivoactive device.

**LiveTrack:** Allows friends and family to follow your races and training activities in real time. You can invite followers using email or social media, allowing them to view your live data on a Garmin Connect tracking page.

**Activity uploads to Garmin Connect:** Automatically sends your activity to your Garmin Connect account as soon as you finish recording the activity.

**Connect IQ:** Allows you to extend your device features with new watch faces, widgets, apps, and data fields.

**Software Updates:** Allows you to update your device software.

**Weather:** Allows you to view current weather conditions and weather forecasts.

**Bluetooth sensors:** Allows you to connect Bluetooth compatible sensors, such as a heart rate monitor.

**Find my phone:** Locates your lost smartphone that is paired with your vivoactive device and currently within range.

**Find my device:** Locates your lost vivoactive device that is paired with your smartphone and currently within range.

**Phone Notifications**
Phone notifications require a compatible smartphone to be in range and paired with the device. When your phone receives messages, it sends notifications to your device.

**Enabling Bluetooth Notifications**
Before you can enable notifications, you must pair the vivoactive device with a compatible smartphone (Pairing Your Smartphone, page 2).

1. Hold the touchscreen.
2. Select Settings > Connectivity > Phone > Notifications.
3. Select During Activity to set preferences for notifications that appear when recording an activity.
4. Select a notification preference.
5. Select Not During Activity to set preferences for notifications that appear when in watch mode.
6. Select a notification preference.
7. Select Timeout.
8. Select a timeout duration.

**Viewing Notifications**
1. From the watch face, swipe to view the notifications widget.
Connect IQ

Using Do Not Disturb Mode

Receiving an Incoming Phone Call

When you receive a phone call on your connected smartphone, the caller.

• To accept the call, select .
  NOTE: To talk to the caller, you must use your connected smartphone.

• To decline the call, select .
  To decline the call and immediately send a text message reply, select . and select a message from the list.
  NOTE: This feature is available only if your device is connected to an Android smartphone.

Managing Notifications

You can use your compatible smartphone to manage notifications that appear on your vivoactive device.

Select an option:

• If you are using an iPhone device, go to the notifications settings to select the items to show on the device.

• If you are using an Android smartphone, from the Garmin Connect app, select Settings > Smart Notifications.

Turning Off the Bluetooth Smartphone Connection

1 Hold the key to view the controls menu.

2 Select to turn off the Bluetooth smartphone connection on your vivoactive device.
  Refer to the owner’s manual for your mobile device to turn off Bluetooth wireless technology on your mobile device.

Using Do Not Disturb Mode

You can use do not disturb mode to turn off vibrations and the backlight for alerts and notifications. For example, you can use this mode while sleeping or watching a movie.

• To manually turn on or off do not disturb mode, hold the key, and select .

• To automatically turn on do not disturb mode during your sleep hours, go to the device settings in the Garmin Connect Mobile app, and select Sounds & Alerts > Do Not Disturb During Sleep.

Finding Your Phone

You can use this feature to help locate a lost smartphone that is paired using Bluetooth wireless technology and currently within range.

1 Hold the key.

2 Select .
  Signal strength bars appear on the vivoactive screen, and an audible alert sounds on your smartphone. The bars increase as you move closer to your smartphone.

3 Press the key to stop searching.

Connect IQ Features

You can add Connect IQ features to your watch from Garmin and other providers using the Connect IQ website. You can customize your device with watch faces, data fields, widgets, and apps.

Watch Faces: Allow you to customize the appearance of the clock.

Data Fields: Allow you to download new data fields that present sensor, activity, and history data in new ways. You can add Connect IQ data fields to built-in features and pages.

Widgets: Provide information at a glance, including sensor data and notifications.

Apps: Add interactive features to your watch, such as new outdoor and fitness activity types.

Downloading Connect IQ Features

Before you can download features from the Connect IQ app, you must pair your vivoactive device with your smartphone (Pairing Your Smartphone, page 2).

1 From the app store on your smartphone, install and open the Connect IQ app.

2 If necessary, select your device.

3 Select a Connect IQ feature.

4 Follow the on-screen instructions.

Downloading Connect IQ Features Using Your Computer

1 Connect the device to your computer using a USB cable.

2 Go to apps.garmin.com, and sign in.

3 Select a Connect IQ feature, and download it.

4 Follow the on-screen instructions.

Garmin Pay

The Garmin Pay feature allows you to use your watch to pay for purchases in participating stores using credit or debit cards from a participating financial institution.

Setting Up Your Garmin Pay Wallet

You can add one or more participating credit or debit cards to your Garmin Pay wallet. Go to garmin.com/garminpay/banks to find participating financial institutions.

1 From the Garmin Connect app, select or .

2 Select Garmin Devices, and select your vivoactive 3 Music device.

3 Select Garmin Pay > Create Your Wallet.

4 Follow the on-screen instructions.

Paying for a Purchase Using Your Watch

Before you can use your watch to pay for purchases, you must set up at least one payment card.

You can use your watch to pay for purchases in a participating store.

1 Hold the key.

2 Select .

3 Enter your four-digit passcode.
  NOTE: If you enter your passcode incorrectly three times, your wallet locks, and you must reset your passcode in the Garmin Connect Mobile app.

Your most recently used payment card appears.
4 If you have added multiple cards to your Garmin Pay wallet, swipe to change to another card (optional).
5 Within 60 seconds, hold your watch near the payment reader, with the watch facing the reader.
   The watch vibrates and displays a check mark when it is finished communicating with the reader.
6 If necessary, follow the instructions on the card reader to complete the transaction.

TIP: After you successfully enter your passcode, you can make payments without a passcode for 24 hours while you continue to wear your watch. If you remove the watch from your wrist or disable heart rate monitoring, you must enter the passcode again before making a payment.

Adding a Card to Your Garmin Pay Wallet
You can add up to ten credit or debit cards to your Garmin Pay wallet.
1 From the vivoactive device page in the Garmin Connect Mobile app, select Garmin Pay > Settings.
2 Follow the on-screen instructions to enter the card information and add the card to your wallet.

Managing Your Garmin Pay Wallet
You can view detailed information about each of your payment cards, and you can suspend, activate, or delete a card. You can also suspend or delete your whole Garmin Pay wallet.

NOTE: In some countries, participating financial institutions may restrict the wallet features.
1 From the vivoactive device page in the Garmin Connect Mobile app, select Garmin Pay > Manage Your Wallet.
2 Select an option:
   • To suspend a specific card, select the card, and select Suspend.
   • To temporarily suspend all cards in your wallet, select Suspend Wallet.
   You cannot pay using your vivoactive device until you unsuspend at least one card using the app.
   • To unsuspend your suspended wallet, select Unsuspend Wallet.
   • To delete a specific card, select the card, and select Delete.
   The card is completely deleted from your wallet. If you want to add this card to your wallet in the future, you must enter the card information again.
   • To delete all cards in your wallet, select Delete Wallet.
   Your Garmin Pay wallet and all the card information associated with it are deleted. You cannot pay using your vivoactive device until you create a new wallet and add a card.

Changing Your Garmin Pay Passcode
You must know your current passcode to change it. Your passcode cannot be recovered. If you forget your passcode, you must delete your wallet, create a new one, and reenter your card information.
You can change the passcode required to access your Garmin Pay wallet on your vivoactive device.
1 From the vivoactive device page in the Garmin Connect Mobile app, select Garmin Pay > Reset Passcode.
2 Follow the on-screen instructions.
The next time you pay using your vivoactive device, you must enter the new passcode.

Music
NOTE: This section is about three different music playback options.
• Third-party provider music
• Personal audio content
• Music stored on your phone

On a vivoactive 3 Music device, you can download audio content to your device from your computer or from a third-party provider, so you can listen when your smartphone is not nearby. To listen to audio content stored on your device, you must connect headphones with Bluetooth technology.
You can also control music playback on your paired smartphone using your device.

Connecting to a Third-Party Provider
Before you can download music or other audio files to your compatible watch from a supported third-party provider, you must connect to the provider using the Garmin Connect app.
1 From the Garmin Connect app, select ⌁ or ⋯.
2 Select Garmin Devices, and select your device.
3 Select Music.
4 Select Get Music Apps, locate a provider, and follow the on-screen instructions.
   NOTE: If you have already installed a provider, you can select it and follow the on-screen instructions.

Downloading Audio Content from a Third-Party Provider
Before you can download audio content from a third-party provider, you must connect to the Verizon network.
1 Open the music controls widget on the vivoactive device.
2 Select ⋯ > Manage > Music Providers.
3 Select a connected provider, and follow the on-screen instructions.
4 Select a playlist or other item to download to the device.
5 Select Done.
6 Swipe right to exit the menu.
7 When you are prompted to sync with the service, select ✓. The selected playlists and other items are downloaded to the device.

NOTE: Downloading audio content can drain the battery. You may be required to connect the device to an external power source if the battery is low.

Disconnecting from a Third-Party Provider
1 From the Garmin Connect Mobile app, select ⌁ or ⋯.
2 Select Garmin Devices, and select your device.
3 Select Music.
4 Select an installed third-party provider, and follow the on-screen instructions to disconnect the third-party provider from your device.

**Downloading Personal Audio Content**

Before you can send your personal music to your device, you must install the Garmin Express™ application on your computer (www.garmin.com/express).

You can load your personal audio files, such as .mp3 and .aac files, to a vívoactive 3 Music device from your computer.

1 Connect the device to your computer using the included USB cable.
2 On your computer, open the Garmin Express application, select your device, and select Music.
   **TIP:** For Windows® computers, you can select to browse the folder with your audio files. For Apple® computers, the Garmin Express application uses your iTunes™ library.
3 In the My Music or iTunes Library list, select an audio file category, such as songs or playlists.
4 Select the checkboxes for the audio files, and select Send to Device.
5 If necessary, in the vívoactive 3 Music list, select a category, select the checkboxes, and select Remove From Device to remove audio files.

**Connecting Bluetooth Headphones**

To listen to music loaded onto your vívoactive 3 Music device, you must connect headphones using Bluetooth technology.

1 Bring the headphones within 2 m (6.6 ft.) of your device.
2 Enable pairing mode on the headphones.
3 Hold the touchscreen.
4 Select Settings > Sensors & Accessories > Add New > Headphones.
5 Select your headphones to complete the pairing process.

**Listening to Music**

1 Open the music controls widget.
2 Connect your Bluetooth headphones (Connecting Bluetooth Headphones, page 6).
3 Select ... > 🎧.
   **NOTE:** The icon at the top indicates the music source. You can tap to change the source.
4 Select an option:
   - To listen to music from a third-party provider, select the name of the provider.
   - To listen to music downloaded to the watch from your computer, select My Music (Downloading Personal Audio Content, page 6).
   - To listen to music from your smartphone, select Control Music on Phone.
5 Select ... to open the music playback controls.

**Safety and Tracking Features**

**CAUTION**

Incident detection and assistance are supplemental features and should not be relied on as a primary method to obtain emergency assistance. The device and app do not contact emergency services on your behalf.

The vívoactive device has emergency and tracking features that must be set up with the Garmin Connect app.

**NOTICE**

To use these features, you must be connected to the Verizon network or be connected to the Garmin Connect app using Bluetooth technology.

**LiveTrack:** Allows friends and family to follow your races and training activities in real time. You can invite followers using email or social media, allowing them to view your live data on a Garmin Connect tracking page.

**Incident detection:** When the vívoactive device detects an incident during an outdoor walk, run, or bike activity, the device sends a message, LiveTrack link, and GPS location to your emergency contacts.

**Assistance:** Allows you to send an automated text message with your name, LiveTrack link, and GPS location to your emergency contacts.

**Adding Emergency Contacts**

Emergency contact phone numbers are used for the incident detection and assistance features.

1 From the Garmin Connect app, select ☎️ or ... .
2 Select Safety & Tracking > Incident Detection & Assistance > Add Emergency Contact.
3 Follow the on-screen instructions.

**Turning On LiveTrack for GPS Activities**

Before you can start your first LiveTrack session, you must set up contacts in the Garmin Connect app.

1 Press the key.
2 Select an outdoor activity (Outdoor Activities, page 11).
3 Go outside, and wait while the device locates satellites.
4 Select LiveTrack.
5 Select an option:
   - Select Auto Start to start a LiveTrack session each time you start this type of activity.
1. Select **Extend LiveTrack** to extend viewing of the LiveTrack session for 24 hours.
2. Select **LiveTrack Recipients** to view the recipients that you added in the Garmin Connect app.
3. Select **One Time Invite** to select recipients for this activity only.

### Turning Incident Detection On and Off
Before you can enable incident detection on your device, you must set up emergency contacts in the Garmin Connect app (Adding Emergency Contacts, page 6). Your paired smartphone or vívoactive with 4G LTE must be equipped with a data plan and be in an area of network coverage where data is available. Your emergency contacts must be able to receive text messages (standard text messaging rates may apply).

1. From the watch face, hold the touchscreen.
2. Select **Settings > Safety & Tracking > Incident Detection**.

When an incident is detected by your GPS enabled, the contacts will be informed after 30 seconds have elapsed. You must set up emergency contacts in the Garmin Connect app. Before you can request assistance, you must set up emergency contacts in the Garmin Connect app.

### Requesting Assistance
Before you can request assistance, you must set up emergency contacts (Adding Emergency Contacts, page 6).

1. Hold the key.
2. When you feel three vibrations, release the key to activate the assistance feature.

   **TIP:** You can select **Cancel** before the countdown is complete to cancel the message.

### Heart Rate Features
The vívoactive device has a wrist-based heart rate monitor and is also compatible with chest heart rate monitors (sold separately). You can view heart rate data on the watch face. If both wrist-based heart rate and chest heart rate data are available, your device uses the chest heart rate data.

### Wearing the Device
- Wear the device above your wrist bone.

**NOTE:** The device should be snug but comfortable. For more accurate heart rate readings on the vívoactive device, it should not move while running or exercising.

**NOTE:** The optical sensor is located on the back of the device.

### Setting an Abnormal Heart Rate Alert
You can set the device to alert you when your heart rate exceeds a certain number of beats per minute (bpm) after a period of inactivity.

1. Hold the touchscreen.
2. Select **Settings > Sensors & Accessories > Heart Rate > Abnormal HR Alert > Alert Threshold**.
3. Select a heart rate threshold value.

Each time you exceed the custom value, a message appears and the device vibrates.

### Broadcasting Heart Rate to Garmin Devices
You can broadcast your heart rate data from your vívoactive device and view it on paired Garmin devices. For example, you can broadcast your heart rate data to an Edge device while cycling, or to a VIRB action camera during an activity.

**NOTE:** Broadcasting heart rate data decreases battery life.

1. Hold the touchscreen.
2. Select **Settings > Sensors & Accessories > Heart Rate > Broadcast In Activity**.

**Tips for Erratic Heart Rate Data**
If the heart rate data is erratic or does not appear, you can try these tips.

- Clean and dry your arm before putting on the device.
- Avoid wearing sunscreen, lotion, and insect repellent under the device.
- Avoid scratching the heart rate sensor on the back of the device.
- Wear the device above your wrist bone. The device should be snug but comfortable.
- Wait until the heart icon is solid before starting your activity.
- Warm up for 5 to 10 minutes and get a heart rate reading before starting your activity.

**NOTE:** In cold environments, warm up indoors.

- Rinse the device with fresh water after each workout.

### Viewing the Heart Rate Widget
The heart rate widget displays your current heart rate in beats per minute (bpm) and a graph of your heart rate. The graph shows your recent heart rate activity, high and low heart rate, and color-coded bars to indicate the time spent in each heart rate zone (About Heart Rate Zones, page 8).

1. From the watch face, swipe to view the heart rate widget.

2. Tap the touchscreen to view your average resting heart rate (RHR) values for the last 7 days.

**Broadcasting heart rate data decreases battery life.**

1. Hold the touchscreen.
2. Select **Settings > Sensors & Accessories > Heart Rate > Broadcast In Activity**.
3. Select an option:
   - Select **Broadcast In Activity** to broadcast heart rate data during timed activities (Starting an Activity, page 10).
   - Select **Broadcast** to start broadcasting heart rate data now.
Heart Rate Zone Calculations

A heart rate zone is a set range of heartbeats per minute. The five most commonly accepted heart rate zones are numbered from 1 to 5 according to increasing intensity. Generally, heart rate zones are calculated based on percentages of your maximum heart rate.

About Heart Rate Zones

Many athletes use heart rate zones to measure and increase their cardiovascular strength and improve their level of fitness. A heart rate zone is a set range of heartbeats per minute. The five commonly accepted heart rate zones are numbered from 1 to 5 according to increasing intensity. Generally, heart rate zones are calculated based on percentages of your maximum heart rate.

Setting Your Heart Rate Zones

The device uses your user profile information from the initial setup to determine your default heart rate zones. The device has separate heart rate zones for running and cycling. For the most accurate calorie data during your activity, you should set your maximum heart rate. You can also set each heart rate zone. You can manually adjust your zones on the device or using your Garmin Connect account.

About VO2 Max. Estimates

VO2 max. is the maximum volume of oxygen (in milliliters) you can consume per minute per kilogram of body weight at your maximum performance. In simple terms, VO2 max. is an indication of athletic performance and should increase as your level of fitness improves. On the device, your VO2 max. estimate appears as a number and description. On your Garmin Connect account, you can view additional details about your VO2 max. estimate, including your fitness age. Your fitness age gives you an idea of how your fitness compares with a person of the same gender and different age. As you exercise, your fitness age can decrease over time. VO2 max. data is provided by FirstBeat. VO2 max. analysis is provided with permission from The Cooper Institute®. For more information, see the appendix (VO2 Max. Standard Ratings, page 25), and go to www.CooperInstitute.org.

Getting Your VO2 Max. Estimate

The device requires heart rate data and a timed, (up to 15 minutes) brisk walk or run to display your VO2 max. estimate.

1. Hold the touchscreen.
2. Select Settings > Sensors & Accessories > Heart Rate > Off.

Activity Tracking

The activity tracking feature records your daily step count, distance traveled, intensity minutes, floors climbed, calories burned, and sleep statistics for each recorded day. Your calories burned includes your base metabolism plus activity calories. The number of steps taken during the day appears on the steps widget. The step count is updated periodically.

For more information about activity tracking and fitness metric accuracy, go to garmin.com/ataccuracy.

Auto Goal

Your device creates a daily step goal automatically, based on your previous activity levels. As you move during the day, the device shows your progress toward your daily goal.

If you choose not to use the auto goal feature, you can set a personalized step goal on your Garmin Connect account.

Using the Move Alert

Sitting for prolonged periods of time can trigger undesirable metabolic state changes. The move alert reminds you to keep moving. After one hour of inactivity, Move! and the red bar appear. Additional segments appear after every 15 minutes of
inactivity. The device also vibrates if vibration is turned on (System Settings, page 19).

Go for a short walk (at least a couple of minutes) to reset the move alert.

Sleep Tracking
While you are sleeping, the device automatically detects your sleep and monitors your movement during your normal sleep hours. You can set your normal sleep hours in the user settings on your Garmin Connect account. Sleep statistics include total hours of sleep, sleep levels, and sleep movement. You can view your sleep statistics on your Garmin Connect account.

NOTE: Naps are not added to your sleep statistics. You can use do not disturb mode to turn off notifications and alerts, with the exception of alarms (Using Do Not Disturb Mode, page 4).

Intensity Minutes
To improve your health, organizations such as the U.S. Centers for Disease Control and Prevention, the American Heart Association®, and the World Health Organization, recommend at least 150 minutes per week of moderate intensity activity, such as brisk walking, or 75 minutes per week of vigorous intensity activity, such as running.

The device monitors your activity intensity and tracks your time spent participating in moderate to vigorous intensity activities (heart rate data is required to quantify vigorous intensity). You can work toward achieving your weekly intensity minutes goal by participating in at least 10 consecutive minutes of moderate to vigorous intensity activities. The device adds the amount of moderate activity minutes with the amount of vigorous activity minutes. Your total vigorous intensity minutes are doubled when added.

Earning Intensity Minutes
Your vivoactive device calculates intensity minutes by comparing your heart rate data to your average resting heart rate. If heart rate is turned off, the device calculates moderate intensity minutes by analyzing your steps per minute.
- Start a timed activity for the most accurate calculation of intensity minutes.
- Exercise for at least 10 consecutive minutes at a moderate or vigorous intensity level.
- Wear your device all day and night for the most accurate resting heart rate.

Garmin Move IQ™
When your movements match familiar exercise patterns, the Move IQ feature automatically detects the event and displays it in your timeline. The Move IQ events show activity type and duration, but they do not appear in your activities list or newsfeed.

The Move IQ feature can automatically start a timed activity for walking and running using time thresholds you set in the Garmin Connect Mobile app. These activities are added to your activities list.

Activity Tracking Settings
Hold the touchscreen, and select Settings > Activity Tracking.

Status: Turns off the activity tracking features.

Move Alert: Displays a message and the move bar on the digital watch face and steps screen. The device also vibrates to alert you.

Goal Alerts: Allows you to turn on and off goal alerts, or turn them off only during activities. Goal alerts appear for your daily steps goal, daily floors climbed goal, and weekly intensity minutes goal.

Auto Activity Start: Allows your device to create and save timed activities automatically when the Move IQ feature detects you are walking or running. You can set the minimum time threshold in the run or walk settings.

Intensity Minutes: Allows you to set a heart rate zone for moderate intensity minutes and a higher heart rate zone for vigorous intensity minutes. You can also use the default algorithm.

Turning Off Activity Tracking
When you turn off activity tracking, your steps, floors climbed, intensity minutes, sleep tracking, and Move IQ events are not recorded.

1. Hold the touchscreen.
2. Select Settings > Activity Tracking > Status > Off.

Widgets
Your device comes preloaded with widgets that provide at-a-glance information. Some widgets require a Bluetooth connection to a compatible smartphone.

Some widgets are not visible by default. You can add them to the widget loop manually.

Calendar: Displays upcoming meetings from your smartphone calendar.

Calories: Displays your calorie information for the current day.

Floors climbed: Tracks your floors climbed and progress toward your goal.

Golf: Displays golf information for your last round.

Heart rate: Displays your current heart rate in beats per minute (bpm) and a graph of your heart rate.

Intensity minutes: Tracks your time spent participating in moderate to vigorous activities, your weekly intensity minutes goal, and progress toward your goal.

Last sport: Displays a brief summary of your last recorded sport.

Music controls: Provides music player controls for your smartphone or on-device music.

My day: Displays a dynamic summary of your activity today. The metrics include timed activities, intensity minutes, floors climbed, steps, calories burned, and more.

Notifications: Alerts you to incoming calls, texts, social network updates, and more, based on your smartphone notification settings.

Steps: Tracks your daily step count, step goal, and data for previous days.

Stress: Displays your current stress level and a graph of your stress level. You can do a breathing activity to help you relax.

VIRB controls: Provides camera controls when you have a VIRB device paired with your vivoactive device.

Weather: Displays the current temperature and weather forecast.

Viewing Widgets
From the watch face, swipe up or down.
Customizing the Widget Loop
1. Hold the touchscreen.
2. Select Settings > Widgets.
3. Select an option:
   • Select an item to show or hide it from the app list or rearrange the app list.
   • Select Add to add an item to the widget loop.

About My Day
The My Day widget is a daily snapshot of your activity. This is a dynamic summary that updates throughout the day. As soon as you climb a flight of stairs or record an activity, it appears in the widget. The metrics include recorded activities, intensity minutes for the week, floors climbed, steps, calories burned, and more. You can tap the touchscreen for an option to improve accuracy or to view additional metrics.

Viewing the Weather Widget
1. From the watch face, swipe to view the weather widget.
2. Tap the touchscreen to view hourly and daily weather data.
3. Scroll down to view daily weather data.

Heart Rate Variability and Stress Level
Your device analyzes your heart rate variability while you are inactive to determine your overall stress. Training, physical activity, sleep, nutrition, and general life stress all impact your stress level. The stress level range is from 0 to 100, where 0 to 25 is a resting state, 26 to 50 is low stress, 51 to 75 is medium stress, and 76 to 100 is a high stress state. Knowing your stress level can help you identify stressful moments throughout your day. For best results, you should wear the device while sleeping.

You can sync your device with your Garmin Connect account to view your all-day stress level, long-term trends, and additional details.

Using the Stress Level Widget
The stress level widget displays your current stress level and a graph of your stress level for the last several hours. It can also guide you through a breathing activity to help you relax.
1. While you are sitting or inactive, swipe to view the stress level widget.
   TIP: If you are too active for the watch to determine your stress level, a message appears instead of a stress level number. You can check your stress level again after several minutes of inactivity.
2. Tap the touchscreen to view a graph of your stress level for the last four hours.
   Blue bars indicate periods of rest. Yellow bars indicate periods of stress. Gray bars indicate times that you were too active to determine your stress level.
3. To start a breathing activity, swipe up, select Yes, and enter a duration for the breathing activity in minutes.

VIRB Remote
The VIRB remote function allows you to control your VIRB action camera using your device. Go to www.garmin.com/VIRB to purchase a VIRB action camera.

Controlling a VIRB Action Camera
Before you can use the VIRB remote function, you must enable the remote setting on your VIRB camera. See the VIRB Series Owner’s Manual for more information. You must also set the VIRB widget to be shown in the widget loop (Customizing the Widget Loop, page 10).
1. Turn on your VIRB camera.
2. On your vivoactive device, swipe to view the VIRB widget.
3. Wait while the device connects to your VIRB camera.
4. Select an option:
   • To record video, tap the touchscreen.
     The video counter appears on the vivoactive screen.
   • To stop recording video, tap the touchscreen.
   • To take a photo, swipe right, and tap the touchscreen.

Apps and Activities
Your device includes a variety of preloaded apps and activities.

Apps: Apps provide interactive features for your device, such as navigating to saved locations.

Activities: Your device comes preloaded with indoor and outdoor activity apps, including running, cycling, strength training, golfing, and more. When you start an activity, the device displays and records sensor data, which you can save and share with the Garmin Connect community. For more information about activity tracking and fitness metric accuracy, go to garmin.com/ataccuracy.

Connect IQ Apps: You can add features to your watch by installing apps from the Connect IQ mobile app (Connect IQ Features, page 4).

Starting an Activity
When you start an activity, GPS turns on automatically (if required).
1. Press the key.
2. If this is the first time you have started an activity, select the checkbox next to each activity to add to your favorites, and select Done.
3. Select an option:
   • Select an activity from your favorites.
   • Select , and select an activity from the extended activity list.
4. If the activity requires GPS signals, go outside to an area with a clear view of the sky.
   TIP: If GPS appears on a gray background, the activity does not require GPS signals.
5. Wait until Ready appears on the screen.
   The device is ready after it establishes your heart rate, acquires GPS signals (if required), and connects to your wireless sensors (if required).
6. Press the key to start the activity timer.
   The device records activity data only while the activity timer is running.

Tips for Recording Activities
• Charge the device before starting an activity (Charging the Device, page 21).
• Swipe up or down to view additional data pages.
Stopping an Activity
1 Press the key.
2 Select Done.
3 Select an option:
   • To discard the activity, select ✗.
   • To save the activity, select ✓.

Adding a Custom Activity
You can create a custom activity and add it to the activity list.
1 Press the key.
2 Select 🌈 ➔ ✪ ➔ Create.
3 Select an activity type.
4 If necessary, edit the activity app settings (Activities and App Settings, page 17).
5 When you are finished editing, select Done.
6 Select an option:
   • To add the activity to your favorites list, select ✓.
   • To add the activity to the extended list, select ✗.

Adding or Removing a Favorite Activity
The list of your favorite activities appears when you press the key from the watch face, and it provides quick access to the activities you use most. The first time you press the key to start an activity, the device prompts you to select your favorite activities. You can add or remove favorite activities at any time.
1 Hold the touchscreen.
2 Select Settings ➔ Activities & Apps.
   Your favorite activities appear at the top of the list with a white background. Other activities appear in the extended list with a black background.
3 Select an option:
   • To add a favorite activity, select the activity, and select Add Favorite.
   • To remove a favorite activity, select the activity, and select Remove Favorite.

Indoor Activities
The vívoactive device can be used for training indoors, such as running on an indoor track or using a stationary bike. GPS is turned off for indoor activities.
When running or walking with GPS turned off, speed, distance, and cadence are calculated using the accelerometer in the device. The accelerometer is self-calibrating. The accuracy of the speed, distance, and cadence data improves after a few outdoor runs or walks using GPS.
TIP: Holding the handrails of the treadmill reduces accuracy. You can use an optional foot pod to record pace, distance, and cadence.
When cycling with GPS turned off, speed and distance are not available unless you have an optional sensor that sends speed and distance data to the device (such as a speed or cadence sensor).

Recording a Strength Training Activity
You can record sets during a strength training activity. A set is multiple repetitions (reps) of a single move.
1 Press the key.
2 Select Strength.
3 Press the key to start the activity timer.
4 Start your first set.
   The device counts your reps. Your rep count appears when you complete at least 6 reps.
   TIP: The device can only count reps of a single move for each set. When you want to change moves, you should finish the set and start a new one.
5 Double tap the touchscreen to finish the set.
   The watch displays the total reps for the set. After several seconds, the rest timer appears.
6 If necessary, hold the touchscreen, select Edit Last Set, and edit the number of reps.
7 When you are done resting, double tap the touchscreen to start your next set.
8 Repeat for each strength training set until your activity is complete.
9 After your last set, press the key to stop the timer.
10 Select Done ➔ ✗ to finish and save the activity.

Calibrating the Treadmill Distance
To record more accurate distances for your treadmill runs, you can calibrate the treadmill distance after you run at least 1.5 km (1 mi.) on a treadmill. If you use different treadmills, you can manually calibrate the treadmill distance on each treadmill or after each run.
1 Start a treadmill activity (Starting an Activity, page 10), and run at least 1.5 km (1 mi.) on the treadmill.
2 After you complete your run, press the key, and select Done.
3 Select an option:
   • To calibrate the treadmill distance the first time, select ✓. The device prompts you to complete the treadmill calibration.
   • To manually calibrate the treadmill distance after the first-time calibration, select • • • ➔ Calibrate.
4 Check the treadmill display for the distance traveled, and enter the distance on your device.

Outdoor Activities
The vívoactive device comes preloaded with apps for outdoor activities, such as running and biking. GPS is turned on for outdoor activities. You can add apps using default activities, such as cardio or rowing.

Going for a Run
Before you can use a wireless sensor for your run, you must pair the sensor with your device (Pairing Your Wireless Sensors, page 20).
1 Put on your wireless sensors, such as a foot pod or heart rate monitor (optional).
2 Press the key.
3 Select Run.
4 When using optional wireless sensors, wait while the device connects to the sensors.
5 Go outside, and wait while the device locates satellites.
6 Press the key to start the activity timer.
   The device records activity data only while the activity timer is running.
7 Start your activity.
8 Swipe up or down to scroll through data screens.
9 After you complete your activity, press the key, and select ✓ to save the activity.

Going for a Ride
Before you can use a wireless sensor for your ride, you must pair the sensor with your device (Pairing Your Wireless Sensors, page 20).
1 Pair your wireless sensors, such as a heart rate monitor, speed sensor, or cadence sensor (optional).
2 Press the key.
3 Select Bike.
4 When using optional wireless sensors, wait while the device connects to the sensors.
5 Go outside, and wait while the device locates satellites.
6 Press the key to start the activity timer.
   The device records activity data only while the activity timer is running.
7 Start your activity.
8 Swipe up or down to scroll through data screens.
9 After you complete your activity, press the key, and select ☑ to save the activity.

Viewing Your Ski Runs
Your device records the details of each downhill skiing or snowboarding run using the auto run feature. This feature is turned on by default for downhill skiing and snowboarding. It automatically records new ski runs based on your movement. The timer pauses when you stop moving downhill and when you are on a chairlift. The timer remains paused during the chairlift ride. You can start moving downhill to restart the timer. You can view run details from the paused screen or while the timer is running.

1 Start a skiing or snowboarding activity.
2 Hold the touchscreen.
3 Select View Runs.
4 Select and to view details of your last run, your current run, and your total runs.
   The run screens include time, distance traveled, maximum speed, average speed, and total descent.

Going for a Pool Swim
NOTE: Heart rate is not available while swimming.
1 Press the key.
2 Select Pool Swim.
3 Select your pool size, or enter a custom size.
4 Press the key to start the activity timer.
   The device records activity data only while the activity timer is running.
5 Start your activity.
   The device automatically records swim intervals and lengths.
6 Press the key when you rest.
   The display inverts color, and the rest screen appears.
7 Press the key to restart the interval timer.
8 After you complete your activity, hold the key to stop the activity timer, and hold the key again to save the activity.

Setting the Pool Size
1 Press the key.
2 Select Pool Swim > Pool Size.
3 Select your pool size, or enter a custom size.

Swim Terminology
Length: One trip down the pool.
Interval: One or more consecutive lengths. A new interval starts after a rest.
Stroke: A stroke is counted every time your arm wearing the device completes a full cycle.
Swolf: Your swolf score is the sum of the time for one pool length and the number of strokes for that length. For example, 30 seconds plus 15 strokes equals a swolf score of 45. Swolf is a measurement of swimming efficiency and, like golf, a lower score is better.
NOTE: Do not use the PinPointer feature while in a golf cart. Interference from the golf cart can affect the accuracy of the compass.
1 Press the key.
2 Select ⦿.
   The arrow points to the pin location.

Viewing Layup and Dogleg Distances
You can view a list of layup and dogleg distances for par 4 and 5 holes.
1 Press the key.
2 Select ⦿.
   NOTE: Distances and locations are removed from the list as you pass them.

Viewing Hazards
You can view distances to hazards along the fairway for par 4 and 5 holes. Hazards that affect shot selection are displayed individually or in groups to help you determine the distance to layup or carry.
1 From the hole information screen, press the key, and select ⦿.
   • The distances to the front 1 and back 2 of the nearest hazard appear on the screen.
   • The hazard type 3 is listed at the top of the screen.
   • The green is represented as a half circle 4 at the top of the screen. The line below the green represents the center of the fairway.
   • Hazards 5 are shown below the green in approximate locations relative to the fairway.
2 Swipe to view other hazards for the current hole.

Measuring a Shot with the Garmin AutoShot™ Feature
Your vivoactive device features automatic shot detection and recording. Each time you take a shot along the fairway, the device records your shot distance so you can view it later (Viewing Your Shot History, page 13).
TIP: Automatic shot detection works best when you wear the device on your leading wrist and make good contact with the ball. Putts are not detected.
1 Begin playing a round.
   When the device detects a shot, your distance from the shot location appears in the banner 1 at the top of the screen.
   TIP: You can tap the banner to hide it for 10 seconds.
2 Walk or drive to your ball.
3 Make your next shot.
   The device records the distance of your last shot.

Keeping Score
1 While playing golf, press the key.
2 Select ⦿.
3 If necessary, hold the touchscreen to set up scoring or change par for the hole.
4 Swipe up or down to change holes.
5 Tap the center of the screen.
6 Select ⦿ or ⦿ to set the score.

Setting the Scoring Method
You can change the method the device uses to keep score.
1 From the scorecard, hold the touchscreen.
2 Select Golf Settings > Scoring > Scoring Method.
3 Select a scoring method.

About Stableford Scoring
When you select the Stableford scoring method (Setting the Scoring Method, page 13), points are awarded based on the number of strokes taken relative to par. At the end of a round, the highest score wins. The device awards points as specified by the United States Golf Association.

The scorecard for a Stableford scored game shows points instead of strokes.

<table>
<thead>
<tr>

Tracking Golf Statistics
When you enable statistics tracking on the device, you can view your statistics for the current round (Viewing Your Round Summary, page 13). You can compare rounds and track improvements using the Garmin Golf™ app.
1 From the scorecard, hold the touchscreen.
2 Select Golf Settings > Scoring > Stat Tracking.

Recording Golf Statistics
Before you can record statistics, you must enable statistics tracking (Tracking Golf Statistics, page 13).
1 From the scorecard, tap the center of the screen.
2 Set the number of strokes taken, and select Next.
3 Set the number of putts taken, and select Done.
4 Select an option:
   • If your ball hit the fairway, select ⦿.
   • If your ball missed the fairway, select ⦿ or ⦿.

Viewing Your Shot History
1 After playing a hole, press the key.
2 Select ⦿ to view information for your last shot.
3 Select ⦿ to view information about each shot for a hole.

Viewing Your Round Summary
During a round, you can view your score, statistics, and step information.
1 Press the key.
2 Select ⦿.

Ending a Round
1 Press the key.
2 Select End.
Setting Up Your User Profile
You can update your gender, birth year, height, weight, wrist, and heart rate zone (Setting Your Heart Rate Zones, page 8) settings. The device uses this information to calculate accurate training data.

1 Hold the touchscreen.
2 Select Settings > User Profile.
3 Select an option.

Fitness Goals
Knowing your heart rate zones can help you measure and improve your fitness by understanding and applying these principles.
- Your heart rate is a good measure of exercise intensity.
- Training in certain heart rate zones can help you improve cardiovascular capacity and strength.

Golf Settings
From the watch face, hold the touchscreen, and select Settings > Activities & Apps > Golf > Golf Settings.

- Scoring: Allows you to set the scoring options (Scoring Settings, page 14).
- Driver Distance: Sets the average distance the ball travels on your drive.
- Big Numbers: Changes the size of the numbers on the hole view screen.

Scoring Settings
From the watch face, hold the touchscreen, and select Settings > Activities & Apps > Golf > Golf Settings > Scoring.

- Status: Sets score keeping to on or off automatically when you start a round. The Always Ask option prompts you when you begin a round.
- Stat Tracking: Enables statistics tracking for the number of putts, greens in regulation, and fairways hit while playing golf.
- 2 Players: Sets the scorecard to keep score for two players.
  NOTE: This setting is only available during a round. You must enable this setting each time you begin a round.
- Scoring Method: Changes the method the device uses to keep score.

Garmin Golf App
The Garmin Golf app allows you to upload scorecards from your compatible Garmin device to view detailed statistics and shot analyses. Golfers can compete with each other at different courses using the Garmin Golf app. More than 41,000 courses have leaderboards that anyone can join. You can set up a tournament event and invite players to compete.

The Garmin Golf app syncs your data with your Garmin Connect account. You can download the Garmin Golf app from the app store on your smartphone.

Training
Setting Up Your User Profile
You can update your gender, birth year, height, weight, wrist, and heart rate zone (Setting Your Heart Rate Zones, page 8) settings. The device uses this information to calculate accurate training data.

1 Hold the touchscreen.
2 Select Settings > User Profile.
3 Select an option.

Fitness Goals
Knowing your heart rate zones can help you measure and improve your fitness by understanding and applying these principles.
- Your heart rate is a good measure of exercise intensity.
- Training in certain heart rate zones can help you improve cardiovascular capacity and strength.

If you know your maximum heart rate, you can use the table (Heart Rate Zone Calculations, page 8) to determine the best heart rate zone for your fitness objectives.

If you do not know your maximum heart rate, use one of the calculators available on the Internet. Some gyms and health centers can provide a test that measures maximum heart rate. The default maximum heart rate is 220 minus your age.

Workouts
Your device can guide you through multiple-step workouts that include goals for each workout step, such as distance, time, reps, or other metrics. Your device includes several preloaded workouts for multiple activities, including strength, cardio, running, and biking. You can create and find more workouts and training plans using Garmin Connect and transfer them to your device.

You can create a scheduled training plan using the calendar in Garmin Connect and send the scheduled workouts to your device.

Following a Workout
Your device can guide you through multiple steps in a workout.

1 Press the key.
2 Select an activity.
3 Select Workouts.
  NOTE: This option appears only when you have workouts loaded on your device for the selected activity.
4 Select a workout.
5 Select Do Workout.
6 Press the key to start the activity timer.

The device briefly displays the goals for the first step of your workout.

7 After you complete the workout step, double-tap the touchscreen to start the next step.

A summary of the workout step appears. After several seconds, the rest timer and the goals for the next step appear.

8 While resting, swipe down to view notes and additional details about the next workout step (optional).
9 Double-tap the touchscreen to start the next step.
10 Repeat steps 6 through 9 until you complete all of the steps in the workout.

TIP: If you want to stop the workout early, you can press the key to stop the activity timer.

11 If necessary, select ➔ to end the cool down step.
12 After you complete your activity, press the key, and select ☑ to save the activity.

Using Garmin Connect Training Plans
Before you can download and use a training plan from Garmin Connect, you must have a Garmin Connect account (Garmin Connect, page 16), and you must pair the vivoactive device with a compatible smartphone.

1 From the Garmin Connect Mobile app, select Training > Training Plans > Find a Plan.
2 Select and schedule a training plan.
3 Select ⏴, and follow the on-screen instructions.
4 Review the training plan in your calendar.

Starting Today’s Workout
After you send a training plan to your device, the Garmin Coach widget appears in your widget loop.

1 From the watch face, swipe to view the Garmin Coach widget.
If a workout for this activity is scheduled for today, the device shows the workout name and prompts you to start it.

2 Select a workout.
3 Select View to view the workout steps, and swipe right when you are finished viewing the steps (optional).
4 Select Do Workout.
5 Follow the on-screen instructions.

Viewing Scheduled Workouts
You can view workouts scheduled in your training calendar and start a workout.
1 Press the key.
2 Select an activity.
3 Select Workouts > Training Calendar.
   Your scheduled workouts appear, sorted by date.
4 Select a workout.
5 Select an option:
   • To view the steps for the workout, select View.
   • To start the workout, select Do Workout.

Adaptive Training Plans
Your Garmin Connect account has an adaptive training plan and Garmin coach to fit your training goals. For example, you can answer a few questions and find a plan to help you complete a 5 km race. The plan adjusts to your current level of fitness, coaching and schedule preferences, and race date. When you start a plan, the Garmin Coach widget is added to the widget loop on your vívoactive device.

Personal Records
When you complete an activity, the device displays any new personal records you achieved during that activity. Personal records include your fastest time over several typical race distances and longest run or ride.

Viewing Your Personal Records
1 Hold the touchscreen.
2 Select My Stats > Records.
3 Select a sport.
4 Select a record.
5 Select View Record.

Restoring a Personal Record
You can set each personal record back to the one previously recorded.
1 Hold the touchscreen.
2 Select My Stats > Records.
3 Select a sport.
4 Select a record to restore.
5 Select Previous > Yes.
   NOTE: This does not delete any saved activities.

Clearing a Personal Record
1 Hold the touchscreen.
2 Select My Stats > Records.
3 Select a sport.
4 Select a record to delete.
5 Select Clear Record > Yes.
   NOTE: This does not delete any saved activities.

Clearing All Personal Records
1 Hold the touchscreen.
2 Select My Stats > Records.
   NOTE: This does not delete any saved activities.

Navigation
You can use the GPS navigation features on your device to save locations, navigate to locations, and find your way home.

Saving Your Location
Before you can navigate to a saved location, your device must locate satellites.
A location is a point that you record and store in the device. If you want to remember landmarks or return to a certain spot, you can mark a location.
1 Go to the place where you want to mark a location.
2 Press the key.
3 Select Navigate > Save Location.
   After the device acquires GPS signals, the location information appears.
4 Select Save.
5 Select an icon.

Deleting a Location
1 Press the key.
2 Select Navigate > Saved Locations.
3 Select a location.
4 Select Delete > Yes.

Navigating to a Saved Location
Before you can navigate to a saved location, your device must locate satellites.
1 Press the key.
2 Select Navigate > Saved Locations.
3 Select a location, and select Go To.
4 Press the key to start the activity timer.
5 Move forward.
   The compass appears. The compass arrow points toward the saved location.
   TIP: For more accurate navigation, orient the top of the screen toward the direction in which you are moving.

Navigating Back to Start
Before you can navigate back to start, you must locate satellites, start the timer, and start your activity.
At any time during your activity, you can return to your starting location. For example, if you are running in a new city, and you are unsure how to get back to the trail head or hotel, you can navigate back to your starting location. This feature is not available for all activities.
1 Hold the touchscreen.
2 Select Navigation > Back to Start.
   The compass appears.
3 Move forward.
   The compass arrow points toward your starting point.
   TIP: For more accurate navigation, orient your device toward the direction in which you are navigating.

Stopping Navigation
• To stop navigation and continue your activity, hold the touchscreen, and select Stop Navigation.
Calibrate the electronic compass outdoors. To improve heading accuracy, do not stand near objects that influence magnetic fields, such as vehicles, buildings, and overhead power lines. Your device was already calibrated at the factory, and the irregular compass behavior, for example, after moving long distances or after extreme temperature changes, you can manually calibrate the compass.

1 Hold the touchscreen.
2 Select Settings > Sensors & Accessories > Compass > Calibrate > Start.
3 Follow the on-screen instructions.

TIP: Move your wrist in a small figure eight motion until a message appears.

Garmin Connect
Your Garmin Connect account allows you to track your performance and connect with your friends. It gives you the tools to track, analyze, share, and encourage each other. You can record the events of your active lifestyle, including runs, walks, rides, swims, hikes, golf games, and more.

You can create your free Garmin Connect account when you pair your device with your phone using the Garmin Connect Mobile app. You can also create an account when you set up the Garmin Express application (www.garmin.com/express).

Store your activities: After you complete and save a timed activity with your device, you can upload that activity to your Garmin Connect account and keep it as long as you want.

Analyze your data: You can view more detailed information about your fitness and outdoor activities, including time, distance, heart rate, calories burned, cadence, an overhead map view, and pace and speed charts. You can view more detailed information about your golf games, including scorecards, statistics, and course information. You can also view customizable reports.

NOTE: To view some data, you must pair an optional wireless sensor with your device (Pairing Your Wireless Sensors, page 20).

History
Your device stores up to 14 days of activity tracking and heart rate monitoring data, and up to seven timed activities. You can view your last seven timed activities on your device. You can synchronize your data to view unlimited activities, activity tracking data, and heart rate monitoring data on your Garmin Connect account (Using Garmin Connect Mobile, page 16) (Using Garmin Connect on Your Computer, page 16).

When the device memory is full, your oldest data is overwritten.

Using History
1 Hold the touchscreen.
2 Select History > Activities.
3 Select an activity.
4 Select an option:
   - Scroll to view additional information about the activity.
   - Select Laps to view additional information about each lap.
   - Select Sets to view additional information about each weight lifting set.
   - Select Intervals to view additional information about each swim interval.
   - Select HR Zones to view your time in each heart rate zone.
   - Select Delete to delete the selected activity.

Viewing Your Time in Each Heart Rate Zone
Before you can view heart rate zone data, you must complete an activity with heart rate and save the activity.

Viewing your time in each heart rate zone can help you adjust your training intensity.
1 Hold the touchscreen.
2 Select History > Activities.
3 Select an activity.
4 Select HR Zones.

Track your progress: You can track your daily steps, join a friendly competition with your connections, and meet your goals.

Share your activities: You can connect with friends to follow each other's activities or post links to your activities on your favorite social networking sites.

Manage your settings: You can customize your device and user settings on your Garmin Connect account.

Using Garmin Connect Mobile
After you pair your device with your smartphone (Pairing Your Smartphone, page 2), you can use the Garmin Connect Mobile app to upload all of your activity data to your Garmin Connect account.
1 Verify the Garmin Connect Mobile app is running on your smartphone.
2 Bring your device within 10 m (30 ft.) of your smartphone. Your device automatically syncs your data with the Garmin Connect Mobile app and your Garmin Connect account.

Using Garmin Connect on Your Computer
The Garmin Express application connects your device to your Garmin Connect account using a computer. You can use the Garmin Express application to upload your activity data to your Garmin Connect account and to send data, such as workouts or training plans, from Garmin Connect website to your device. You can also install device software updates and manage your Connect IQ apps.
1 Connect the device to your computer using the USB cable.
Customizing Your Device

Changing the Watch Face
You can choose from several preloaded watch faces or use a Connect IQ watch face that is downloaded to your device (Connect IQ Features, page 4). You can also customize a preloaded watch face or create a new one (Creating a Custom Watch Face, page 17).
1. From the watch face, hold the touchscreen.
2. Select Watch Face.
3. Swipe up or down to scroll through the available watch faces.
4. Tap the screen to select the watch face.
5. Select Apply to activate the displayed watch face.

Creating a Custom Watch Face
You can customize the style and data fields for the watch face.
1. From the watch face, hold the touchscreen.
2. Select Watch Face.
3. Select an option:
   • To customize an existing watch face, select the watch face, and select Customize.
   • To create a new watch face, swipe to the bottom of the watch face list, and select Create New.
4. Swipe up or down to scroll through the analog and digital dials, and tap the screen to select the displayed dial.
5. Select each data field you want to customize, and select the data to display in it.
   A green border indicates the customizable data fields for this dial.
6. Swipe left to customize the watch face hands.
   NOTE: This option is available only for analog dials.
7. Swipe up or down to scroll through the hand styles, and tap the screen to select the displayed hands.
8. Swipe left, and select an accent color.
9. Select ✔.
10. Select Done.
   The device sets the new watch face as your active watch face.

Customizing the Controls Menu
You can add, remove, and change the order of the shortcut menu options in the controls menu (Using the Controls Menu, page 1).
1. Hold the key.
   The controls menu appears.
2. Hold the touchscreen.
   The controls menu switches to edit mode.
3. Select the shortcut you want to customize.
4. Select an option:
   • To change the location of the shortcut in the controls menu, select the location where you want it to appear, or drag the shortcut to a new location.
   • To remove the shortcut from the controls menu, select ![delete icon].
5. If necessary, select + to add a shortcut to the controls menu.

NOTE: This option is available only after you remove at least one shortcut from the menu.

Activities and App Settings
These settings allow you to customize each preloaded activity app based on your needs. For example, you can customize data pages and enable alerts and training features. Not all settings are available for all activity types.
Press the key, select an activity, and select Settings.

Accent Color: Sets the accent color of each activity to help identify which activity is active.
Alerts: Sets the training alerts for the activity (Alerts, page 17). 
Auto Activity Start: Sets the minimum time threshold for automatically detecting and recording a timed activity. This feature is available for walking and running only.
Auto Pause: Sets the device to stop recording data when you stop moving or when you drop below a specified speed (Using Auto Pause, page 18).
Auto Run: Enables the device to detect ski runs automatically using the built-in accelerometer.
Auto Scroll: Enables you to move through all of the activity data screens automatically while the timer is running (Using Auto Scroll, page 18).
Background: Sets the background color of each activity to black or white.
Data Screens: Enables you to customize data screens and add new data screens for the activity (Customizing the Data Screens, page 17).
GPS: Sets the mode for the GPS antenna. Using the GPS + GLONASS or GPS + GALILEO options provides increased performance in challenging environments and faster position acquisition. Using the GPS and another satellite together can reduce battery life more than using the GPS option only.
Laps: Sets the options for the Auto Lap feature (Marking Laps Using the Auto Lap Feature, page 18), and turns on the manual lap function (Turning On the Manual Lap Function, page 18).
Pool Size: Sets the pool length for pool swimming.

Customizing the Data Screens
You can customize data screens based on your training goals or optional accessories. For example, you can customize one of the data screens to display your lap pace or heart rate zone.
1. Press the key.
2. Select an activity.
3. Select Settings > Data Screens.
4. Select one or more options:
   • To adjust the style and number of data fields on each data screen, select Layout.
   • To customize the fields on a data screen, select the screen, and select Edit Data Fields.
   • To show or hide a data screen, select the toggle switch next to the screen.
   • To show or hide the heart rate zone gauge screen, select HR Zone Gauge.

Alerts
You can set alerts for each activity, which can help you to train toward specific goals. Some alerts are available only for specific activities. Some alerts require optional accessories, such as a heart rate monitor or cadence sensor. There are three types of alerts: event alerts, range alerts, and recurring alerts.
Event alert: An event alert notifies you once. The event is a specific value. For example, you can set the device to alert you when you burn a specified number of calories.
Range alert: A range alert notifies you each time the device is above or below a specified range of values. For example, you can set the device to alert you when your heart rate is below 60 beats per minute (bpm) and over 210 bpm.

Recurring alert: A recurring alert notifies you each time the device records a specified value or interval. For example, you can set the device to alert you every 30 minutes.

<table>
<thead>
<tr>
<th>Alert Name</th>
<th>Alert Type</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td>Cadence</td>
<td>Range</td>
<td>You can set minimum and maximum cadence values.</td>
</tr>
<tr>
<td>Calories</td>
<td>Event, recurring</td>
<td>You can set the number of calories.</td>
</tr>
<tr>
<td>Custom</td>
<td>Recurring</td>
<td>You can select an existing message or create a custom message and select an alert type.</td>
</tr>
<tr>
<td>Distance</td>
<td>Recurring</td>
<td>You can set a distance interval.</td>
</tr>
<tr>
<td>Heart Rate</td>
<td>Range</td>
<td>You can set minimum and maximum heart rate values or select zone changes.</td>
</tr>
<tr>
<td>Pace</td>
<td>Range</td>
<td>You can set minimum and maximum pace values.</td>

</tbody>
</table>

Setting an Alert

1. Press the key.
2. Select an activity.
3. Select Settings > Alerts.
4. Select an option:
   • To add a new alert for the activity, select Add New.
   • To edit an existing alert, select the alert name.
5. If necessary, select the type of alert.
6. Select a zone, enter the minimum and maximum values, or enter a custom value for the alert.
7. If necessary, turn on the alert.

For event and recurring alerts, a message appears each time you reach the alert value (Alerts, page 17). For range alerts, a message appears each time you exceed or drop below the specified range (minimum and maximum values).

Auto Lap

Marking Laps Using the Auto Lap Feature
You can set your device to use the Auto Lap feature to mark a lap at a specific distance automatically. This feature is helpful for comparing your performance over different parts of an activity (for example, every 1 mile or 5 kilometers).

1. Press the key.
2. Select an activity.
4. Select an option:
   • To turn the Auto Lap feature on or off, select the toggle switch.
   • To adjust the distance between laps, select Auto Lap.

Each time you complete a lap, a message appears that displays the time for that lap. The device also vibrates if vibration is turned on (System Settings, page 19).

Turning On the Manual Lap Function
You can mark laps at any time or distance by double tapping the touchscreen during timed activities such as running and biking.

1. Press the key.
2. Select an activity.
   • NOTE: This feature is not available for all activities.

Each time you mark a lap, a message appears that displays the time for that lap. The device also vibrates if vibration is turned on (System Settings, page 19).

The lap function stays on for the selected activity until you turn off the lap function.

Using Auto Pause
You can use the Auto Pause feature to pause the timer automatically when you stop moving or when your pace or speed drops below a specified value. This feature is helpful if your activity includes stop lights or other places where you need to slow down or stop.

1. Press the key.
2. Select an activity.
3. Select Settings > Auto Pause.
   • NOTE: This feature is not available for all activities.
4. Select an option:
   • To pause the timer automatically when you stop moving, select When Stopped.
   • To pause the timer automatically when your pace drops below a specified value, select Pace.
   • To pause the timer automatically when your speed drops below a specified value, select Speed.

Using Auto Scroll
You can use the auto scroll feature to cycle through all of the data screens automatically while the timer is running.

1. Press the key.
2. Select an activity.
3. Select Settings > Auto Scroll.
   • NOTE: This feature is not available for all activities.
4. Select a display speed.

Phone and Bluetooth Settings
Hold the touchscreen, and select Settings > Connectivity > Phone.

Status: Displays the current Bluetooth connection status and allows you to turn Bluetooth technology on or off.

Notifications: The device turns smart notifications on and off automatically based on your selections (Enabling Bluetooth Notifications, page 3).

Pair Phone: Connects your device with a compatible smartphone equipped with Bluetooth technology.

Connected Alerts: Alerts you when your paired smartphone connects and disconnects.

Stop LiveTrack: Allows you to stop a LiveTrack session while one is in progress.

4G LTE Settings
Hold the touchscreen, and select Settings > Connectivity > 4G LTE.

Status: Displays the current 4G LTE connection status and allows you to turn 4G LTE on or off.
Customizing Your Device

**Connected Alerts**: Alerts you when 4G LTE connects and disconnects.

**System Settings**

Hold the touchscreen, and select **Settings > System**.

- **Auto Lock**: Automatically locks the touchscreen to prevent inadvertent screen touches. You can press the key to unlock the touchscreen.
- **Language**: Sets the language of the device interface.
- **Time**: Sets the time format and source for local time (Time Settings, page 19).
- **Date**: Allows you to manually set the date and date format.
- **Backlight**: Sets the backlight mode, timeout, and brightness (Backlight Settings, page 19).
- **Vibration**: Turns vibration on or off and sets the vibration intensity.
- **Do Not Disturb**: Turns on or off do not disturb mode.
- **Units**: Sets the measurement units used to display data (Changing the Units of Measure, page 19).
- **Data Recording**: Sets how the device records activity data. The Smart recording option (default) allows for longer activity recordings. The Every Second recording option provides more detailed activity recordings, but may require you to charge the battery more frequently.
- **USB Mode**: Sets the device to use media transfer mode or Garmin mode when connected to a computer.
- **Reset**: Allows you to reset the default settings or delete personal data and reset the settings (Restoring All Default Settings, page 23).
  
  **NOTE**: If you have set up a Garmin Pay wallet, restoring default settings also deletes the wallet from your device.

- **Software Update**: Allows you to check for software updates.
- **About**: Displays the unit ID, software version, regulatory information, and license agreement.

**Time Settings**

Hold the touchscreen, and select **Settings > System > Time**.

- **Time Format**: Sets the device to show time in a 12-hour or a 24-hour format.
- **Time Source**: Allows you to set the time manually or automatically based on your paired mobile device.
- **Set Time with GPS**: Allows the device to set the time of day automatically based on your GPS position.

**Time Zones**

Each time you turn on the device and acquire satellites or sync with your smartphone, the device automatically detects your time zone and the current time of day.

**Setting the Time Manually**

By default, the time is set automatically when the vívoactive device is paired with a mobile device.

1. Hold the touchscreen.
2. Select **Settings > System > Time > Time Source > Manual**.
3. Select **Time**, and enter the time of day.

**Setting the Alarm**

1. Hold the touchscreen.
2. Select **Clocks > Alarms > Add New**.
3. Select **Time**, and enter a time.
4. Select **Repeat**, and select an option.

**Deleting an Alarm**

1. Hold the touchscreen.
2. Select **Clocks > Alarms**.

3. Select an alarm, and select **Remove**.

**Starting the Countdown Timer**

1. Hold the touchscreen.
2. Select **Clocks > Timer**.
3. Enter the time.
4. Select **Start**.
5. If necessary, select the touchscreen for more options.

**Using the Stopwatch**

1. Hold the touchscreen.
2. Select **Clocks > Stopwatch**.
3. Press the key.

**Backlight Settings**

Hold the touchscreen, and select **Settings > System > Backlight**.

- **Mode**: Sets the backlight to turn on when you interact with the device, which includes receiving a notification or using the key or touchscreen.
- **Gestures**: Sets the backlight to turn on when you rotate your wrist toward your body to view the device. You can use the Only During Activity option to use this feature only during timed activities.
- **Timeout**: Sets the length of time before the backlight turns off.
- **Brightness**: Sets the brightness level of the backlight. During an activity, the backlight uses the brightest setting.

**Changing the Units of Measure**

You can customize units of measure for distance, pace and speed, elevation, weight, height, and temperature.

1. Hold the touchscreen.
2. Select **Settings > System > Units**.
3. Select a measurement type.
4. Select a unit of measure.

**Garmin Connect Settings**

You can change your device settings from your Garmin Connect account, using either the Garmin Connect Mobile app or the Garmin Connect website. Some settings are available only using your Garmin Connect account and cannot be changed on your device.

- In the Garmin Connect Mobile app, select the image of your device, and select **Device Settings**.
- On the Garmin Connect website, from the device's widget, select **Device Settings**.

After customizing settings, sync your data to apply the changes to your device (Using Garmin Connect Mobile, page 16, Using Garmin Connect on Your Computer, page 16).

**Device Settings on Your Garmin Connect Account**

From your Garmin Connect account, select your device to view the device settings.

**NOTE**: Some settings appear in a subcategory in the settings menu. App or website updates may change these settings menus.

**Activity Tracking**: Turns activity tracking features on and off.

**Appearance**: Allows you to change the watch face, widgets, and shortcuts that appear in the controls menu (Customizing the Controls Menu, page 17).

**Auto Activity Start**: Allows your device to create and save timed activities automatically when the Move IQ feature detects you have been walking or running for a minimum time threshold. You can set the minimum time threshold for running and walking.
Automatic App Updates: Allows your device to receive Connect IQ app updates automatically.

Data Recording: Sets how the device records activity data. The Smart recording option (default) allows for longer activity recordings. The Every Second recording option provides more detailed activity recordings, but may require you to charge the battery more frequently.

Date Format: Sets the month and day format.

Distance: Sets the device to display the distance traveled in kilometers or miles.

Goals: Allows you to set a custom goal for daily steps and floors climbed. You can use the Auto Goal setting to allow your device to determine your step goal automatically. You can also set the weekly intensity minutes goal.

Goal Animations: Allows you to turn on and off goal animations, or turn them off only during activities. Goal animations appear for your daily steps goal, daily floors climbed goal, and weekly intensity minutes goal.

Heart Rate Zones: Allows you to estimate your maximum heart rate and determine custom heart rate zones.

Language: Sets the language of the device interface.

Move Alert: Displays a message and the move bar on the digital watch face and steps screen. The device also vibrates if vibrations are turned on.

Move IQ: Allows you to turn on and off Move IQ events. The Move IQ feature automatically detects activity patterns, such as walking, running, cycling, swimming, and elliptical training.

Preferred Activity Tracker: Sets this device to be your primary activity tracking device when more than one device is connected to the app.

Relax Reminders: Allows you to turn on and off a message that appears when your stress level is elevated.

Sounds & Alerts: Allows you to customize alarms and phone notifications. You can also turn on and off the Do Not Disturb During Sleep feature.

Text Responses: Allows you to customize the list of automatic text message responses. Based on your messaging setup, this feature may not be available (Messaging Options and Behavior, page 2).

Time Format: Sets the device to display time in a 12-hour or 24-hour format.

Wrist Worn On: Allows you to customize which wrist the device is worn on.

NOTE: This setting is used for strength training and gestures.

User Settings on Your Garmin Connect Account
From your Garmin Connect account, select Settings > User Settings.

TIP: Some user settings are available in the vivoactive Device Settings menu.

Personal Information: Allows you to enter your personal details, such as birth date, gender, height, and weight.

Sleep: Allows you to enter your normal sleep hours.

Stride Length: Allows your device to more accurately calculate the distance traveled using your custom step length for walking and running. You can enter a known distance and the number of steps it takes to cover the distance, and Garmin Connect can calculate your step length.

Units: Allows you to set statute or metric units of measure.

Wireless Sensors
Your device can be used with wireless ANT+ or Bluetooth sensors. For more information about compatibility and purchasing optional sensors, go to buy.garmin.com.

Pairing Your Wireless Sensors
The first time you connect a wireless ANT+ or Bluetooth sensor to your Garmin device, you must pair the device and sensor. After they are paired, the device connects to the sensor automatically when you start an activity and the sensor is active and within range.

TIP: Some ANT+ sensors pair with your device automatically when you start an activity with the sensor turned on and near the device.

1. Move at least 10 m (33 ft.) away from other wireless sensors.
2. If you are pairing a heart rate monitor, put on the heart rate monitor.
3. Hold the touchscreen.
5. Bring the device within 3 m (10 ft.) of the sensor, and wait while the device pairs with the sensor.

Foot Pod
Your device is compatible with the foot pod. You can use the foot pod to record pace and distance instead of using GPS when you are training indoors or when your GPS signal is weak. The foot pod is on standby and ready to send data (like the heart rate monitor).

After 30 minutes of inactivity, the foot pod powers off to conserve the battery. When the battery is low, a message appears on your device. Approximately five hours of battery life remain.

Calibrating Your Foot Pod
Before you can calibrate your foot pod, you must pair your device with the foot pod (Pairing Your Wireless Sensors, page 20).

Manual calibration is recommended if you know your calibration factor. If you have calibrated a foot pod with another Garmin product, you may know your calibration factor.

1. Hold the touchscreen.
3. Adjust the calibration factor:
   - Increase the calibration factor if your distance is too low.
   - Decrease the calibration factor if your distance is too high.

Improving Foot Pod Calibration
Before you can calibrate your device, you must acquire GPS signals and pair your device with the foot pod (Pairing Your Wireless Sensors, page 20).

The foot pod is self-calibrating, but you can improve the accuracy of the speed and distance data with a few outdoor runs using GPS.

1. Stand outside for 5 minutes with a clear view of the sky.
2. Start a running activity.
3. Run on a track without stopping for 10 minutes.
4. Stop your activity, and save it.

Based on the recorded data, the foot pod calibration value changes, if necessary. You should not need to calibrate the foot pod again unless your running style changes.
Using an Optional Bike Speed or Cadence Sensor

You can use a compatible bike speed or cadence sensor to send data to your device.

- Pair the sensor with your device (Pairing Your Wireless Sensors, page 20).
- Set your wheel size (Calibrating Your Speed Sensor, page 21).
- Go for a ride (Going for a Ride, page 11).

Calibrating Your Speed Sensor

Before you can calibrate your speed sensor, you must pair your device with a compatible speed sensor (Pairing Your Wireless Sensors, page 20).

Manual calibration is optional and can improve accuracy.

1 Hold the touchscreen.
2 Select Settings > Sensors & Accessories > Speed/Cadence > Wheel Size.
3 Select an option:
   - Select Auto to automatically calculate your wheel size and calibrate your speed sensor.
   - Select Manual, and enter your wheel size to manually calibrate your speed sensor (Wheel Size and Circumference, page 25).

Situational Awareness

Your vívoactive device can be used with Varia smart bike lights and rearview radar to improve situational awareness. See the owner’s manual for your Varia device for more information.

NOTE: You may need to update the vívoactive software before pairing Varia devices (Updating the Software Using Garmin Connect Mobile, page 21).

tempe

The tempe is an ANT+ wireless temperature sensor. You can attach the sensor to a secure strap or loop where it is exposed to ambient air, and therefore, provides a consistent source of accurate temperature data. You must pair the tempe with your device to display temperature data from the tempe.

Device Information

Charging the Device

WARNING
This device contains a lithium-ion battery. See the Important Safety and Product Information guide in the product box for product warnings and other important information.

NOTICE
To prevent corrosion, thoroughly clean and dry the contacts and the surrounding area before charging or connecting to a computer. Refer to the cleaning instructions in the appendix.

1 Plug the small end of the USB cable into the charging port on your device.
2 Plug the large end of the USB cable into a USB charging port.
3 Charge the device completely.

Product Updates

On your computer, install Garmin Express (www.garmin.com /express). On your smartphone, install the Garmin Connect Mobile app.

This provides easy access to these services for Garmin devices:

- Software updates
- Course updates
- Data uploads to Garmin Connect
- Product registration

Updating the Software Using Garmin Connect Mobile

Before you can update your device software using the Garmin Connect Mobile app, you must have a Garmin Connect account, and you must pair the device with a compatible smartphone (Pairing Your Smartphone, page 2).

Sync your device with the Garmin Connect Mobile app (Using Garmin Connect Mobile, page 16).

When new software is available, the Garmin Connect Mobile app automatically sends the update to your device. The update is applied when you are not actively using the device. When the update is complete, your device restarts.

Updating the Software Using Garmin Express

Before you can update your device software, you must download and install the Garmin Express application and add your device (Using Garmin Connect on Your Computer, page 16).

1 Connect the device to your computer using the USB cable.
   When new software is available, the Garmin Express application sends it to your device.
2 After the Garmin Express application finishes sending the update, disconnect the device from your computer. Your device installs the update.

Viewing Device Information

You can view the unit ID, software version, regulatory information, and license agreement.

1 Hold the touchscreen.
2 Select Settings > System > About.

Viewing E-label Regulatory and Compliance Information

The label for this device is provided electronically. The e-label may provide regulatory information, such as identification numbers provided by the FCC or regional compliance markings, as well as applicable product and licensing information.

1 Hold the touchscreen.
2 Select Settings > System > About.

*The device withstands pressure equivalent to a depth of 50 m. For more information, go to www.garmin.com/waterrating.

Device Care

**NOTICE**
Avoid extreme shock and harsh treatment, because it can degrade the life of the product.

Avoid pressing the keys under water.

Do not use a sharp object to clean the device.

Never use a hard or sharp object to operate the touchscreen, or damage may result.

Avoid chemical cleaners, solvents, and insect repellents that can damage plastic components and finishes.

Thoroughly rinse the device with fresh water after exposure to chlorine, salt water, sunscreen, cosmetics, alcohol, or other harsh chemicals. Prolonged exposure to these substances can damage the case.

Do not store the device where prolonged exposure to extreme temperatures can occur, because it can cause permanent damage.

**Cleaning the Device**

**NOTICE**
Even small amounts of sweat or moisture can cause corrosion of the electrical contacts when connected to a charger. Corrosion can prevent charging and data transfer.

1. Wipe the device using a cloth dampened with a mild detergent solution.
2. Wipe it dry.
3. After cleaning, allow the device to dry completely.

**TIP:** For more information, go to www.garmin.com/fitandcare.

Replacing the Bands

The device is compatible with 20 mm wide, standard, quick-release bands. Go to buy.garmin.com, or contact your Garmin dealer for information about optional accessories.

1. Slide the quick-release pin on the spring bar to remove the band.
2. Insert one side of the spring bar for the new band into the device.
3. Slide the quick-release pin, and align the spring bar with the opposite side of the device.
4. Repeat steps 1 through 3 to replace the other band.

Troubleshooting

Is my smartphone compatible with my device?
The vívoactive device is compatible with smartphones using Bluetooth wireless technology.

Go to www.garmin.com/ble for compatibility information.

My phone will not connect to the device
If your phone will not connect to the device, you can try these tips.

- Turn off your smartphone and your device, and turn them back on again.
- Enable Bluetooth technology on your smartphone.
- Update the Garmin Connect app to the latest version.
- Remove your device from the Garmin Connect app to retry the pairing process.
- If you are using an Apple device, you should also remove your device from the Bluetooth settings on your smartphone.
- If you bought a new smartphone, remove your device from the Garmin Connect app on the smartphone you intend to stop using.
- Bring your smartphone within 10 m (33 ft.) of the device.
- On your smartphone, open the Garmin Connect app, select ☰ or ●●●, and select Garmin Devices > Add Device to enter pairing mode.
- Hold the touchscreen, and select Settings > Connectivity > Phone > Pair Phone.

My headphones will not connect to the device
If your headphones were previously connected to your smartphone using Bluetooth technology, they may connect to your smartphone before connecting to your device. You can try these tips.

- Turn off Bluetooth technology on your smartphone.
- Refer to the owner's manual for your smartphone for more information.
- Stay 10 m (33 ft.) away from your smartphone while connecting headphones to your device.
- Pair your headphones with your device (Connecting Bluetooth Headphones, page 6).

My music cuts out or my headphones do not stay connected
When using a vívoactive 3 Music device connected to headphones using Bluetooth technology, the signal is strongest when there is a direct line of sight between the device and the antenna on the headphones.

- If the signal passes through your body, you may experience signal loss or your headphones may become disconnected.
- It is recommended to wear your headphones with the antenna on the same side of your body as your vívoactive 3 Music device.

My device is in the wrong language
You can change the device language selection if you have accidentally selected the wrong language on the device.

1. Hold the touchscreen.
2. Scroll down to the last item in the list, and select it.
3 Scroll down to the last item in the list, and select it.
4 Scroll down to the second item in the list, and select it.
5 Select your language.

**My device does not display the correct time**
The device updates the time and date when it syncs with your smartphone or when the device acquires GPS signals. You should sync your device to receive the correct time when you change time zones, and to update for daylight saving time.

1 Hold the touchscreen, and select Settings > System > Time.
2 Verify the Auto option is enabled.
3 Select an option:
   • Confirm that your smartphone displays the correct local time, and sync your device to the smartphone (*Using Garmin Connect Mobile*, page 16).
   • Select Set Time with GPS, go outdoors to an open area with a clear view of the sky, and wait while the device acquires satellite signals.
   
   The time and date are updated automatically.

**Maximizing Battery Life**
You can do several things to extend the life of the battery.

• Reduce the backlight timeout (*Backlight Settings*, page 19).
• Reduce the backlight brightness (*Backlight Settings*, page 19).
• Turn off Bluetooth technology when you are not using connected features (*Turning Off the Bluetooth Smartphone Connection*, page 4).
• Turn off 4G LTE when you are not using the features (*Using the Controls Menu*, page 1).
• Turn off activity tracking (*Activity Tracking*, page 8).
• Limit the smartphone notifications the device displays (*Managing Notifications*, page 4).
• Stop broadcasting heart rate data to paired Garmin devices (*Broadcasting Heart Rate to Garmin Devices*, page 7).
• Turn off wrist-based heart rate monitoring (*Turning Off the Wrist-based Heart Rate Monitor*, page 8).

**Restarting the Device**
If the device stops responding, you may need to restart it.

NOTE: Restarting the device may erase your data or settings.

1 Hold the key for 15 seconds.
   The device turns off.
2 Hold the key for one second to turn on the device.

**Restoring All Default Settings**
You can reset all of the device settings to the factory default values.

1 Hold the touchscreen.
2 Select Settings > System > Reset.
3 Select an option:
   • To reset all of the device settings to the factory default values and delete all user-entered information and activity history, select Delete Data and Reset Settings.

   NOTE: If you have set up a Garmin Pay wallet, this option deletes the wallet from your device. If you have music stored on your device, this option deletes your stored music.
   • To reset all of the device settings to the factory default values and save all user-entered information and activity history, select Reset Default Settings.

**Acquiring Satellite Signals**
The device may need a clear view of the sky to acquire satellite signals.

1 Go outdoors to an open area.
   The front of the device should be oriented toward the sky.
2 Wait while the device locates satellites.
   It may take 30–60 seconds to locate satellite signals.

**Improving GPS Satellite Reception**
• Frequently sync the device to your Garmin Connect account:
  ◦ Connect your device to a computer using the USB cable and the Garmin Express application.
  ◦ Sync your device to the Garmin Connect Mobile app using your Bluetooth enabled smartphone.
While connected to your Garmin Connect account, the device downloads several days of satellite data, allowing it to quickly locate satellite signals.
• Take your device outside to an open area away from tall buildings and trees.
• Remain stationary for a few minutes.

**Activity Tracking**
For more information about activity tracking accuracy, go to garmin.com/ataccuracy.

**My step count does not seem accurate**
If your step count does not seem accurate, you can try these tips.

• Wear the device on your non-dominant wrist.
• Carry the device in your pocket when pushing a stroller or lawn mower.
• Carry the device in your pocket when actively using your hands or arms only.

   NOTE: The device may interpret some repetitive motions, such as washing dishes, folding laundry, or clapping your hands, as steps.

**The floors climbed amount does not seem accurate**
Your device uses an internal barometer to measure elevation changes as you climb floors. A floor climbed is equal to 3 m (10 ft.).

• Avoid holding handrails or skipping steps while climbing stairs.
• In windy environments, cover the device with your sleeve or jacket as strong gusts can cause erratic readings.

**Improving the Accuracy of Intensity Minutes and Calories**
You can improve the accuracy of these estimates by walking or running outside for 15 minutes.

1 From the watch face, swipe to view the My Day widget.
2 Select 🏃.
3 Follow the on-screen instructions.

**The temperature reading is not accurate**
Your body temperature affects the temperature reading for the internal temperature sensor. To get the most accurate temperature reading, you should remove the watch from your wrist and wait 20 to 30 minutes.

You can also use an optional tempe external temperature sensor to view accurate ambient temperature readings while wearing the watch.
Getting More Information

- Go to support.garmin.com for additional manuals, articles, and software updates.
- Go to www.garmin.com/intosports.
- Go to www.garmin.com/learningcenter.
- Go to buy.garmin.com, or contact your Garmin dealer for information about optional accessories and replacement parts.

Appendix

Data Fields

Some data fields require ANT+ accessories to display data.

24-Hour Max.: The maximum temperature recorded in the last 24 hours.
24-Hour Min.: The minimum temperature recorded in the last 24 hours.

30s Avg. Vertical Speed: The 30-second moving average of vertical speed.
500m Pace: The current rowing pace per 500 meters.
Average Cadence: Cycling. The average cadence for the current activity.
Average Cadence: Running. The average cadence for the current activity.
Average Distance Per Stroke: The average distance traveled per stroke during the current activity.
Average HR: The average heart rate for the current activity.
Average HR %Max.: The average percentage of maximum heart rate for the current activity.
Average Lap Time: The average lap time for the current activity.
Average Pace: The average pace for the current activity.
Average Speed: The average speed for the current activity.
Average Stroke Rate: The average number of strokes per minute (spm) during the current activity.
Average Strokes/Length: The average number of strokes per length during the current activity.
Average SWOLF: The average swolf score for the current activity. Your swolf score is the sum of the time for one length plus the number of strokes for that length (Swim Terminology, page 12).
Avg. 500m Pace: The average rowing pace per 500 meters for the current activity.

Cadence: Cycling. The number of revolutions of the crank arm. Your device must be connected to a cadence accessory for this data to appear.

Cadence: Running. The steps per minute (right and left).
Calories: The amount of total calories burned.
Distance: The distance traveled for the current track or activity.
Distance Per Stroke: The distance traveled per stroke.
Elapsed Time: The total time recorded. For example, if you start the timer and run for 10 minutes, then stop the timer for 5 minutes, then start the timer and run for 20 minutes, your elapsed time is 35 minutes.
Elevation: The altitude of your current location above or below sea level.
Floors Climbed: The total number of floors climbed up for the day.
Floors Descended: The total number of floors climbed down for the day.
Floors per Minute: The number of floors climbed up per minute.

Heading: The direction you are moving.
Heart Rate: Your heart rate in beats per minute (bpm). Your device must be connected to a compatible heart rate monitor.
HR %Max.: The percentage of maximum heart rate.
HR Zone: The current range of your heart rate (1 to 5). The default zones are based on your user profile and maximum heart rate (220 minus your age).
Interval Distance: The distance traveled for the current interval.
Interval Distance Per Stroke: The average distance traveled per stroke during the current interval.
Interval Lengths: The number of pool lengths completed during the current interval.
Interval Pace: The average pace for the current interval.
Interval Stroke Rate: The average number of strokes per minute (spm) during the current interval.
Interval Strokes: The total number of strokes for the current interval.
Interval Strokes/Length: The average number of strokes per length during the current interval.
Interval SWOLF: The average swolf score for the current interval.
Interval Time: The stopwatch time for the current interval.
Lap 500m Pace: The average rowing pace per 500 meters for the current lap.
Lap Cadence: Cycling. The average cadence for the current lap.
Lap Cadence: Running. The average cadence for the current lap.
Lap Distance: The distance traveled for the current lap.
Lap HR: The average heart rate for the current lap.
Lap HR %Max.: The average percentage of maximum heart rate for the current lap.
Lap Pace: The average pace for the current lap.
Laps: The number of laps completed for the current activity.
Lap Speed: The average speed for the current lap.
Lap Steps: The number of steps during the current lap.
Lap Time: The stopwatch time for the current lap.
Last Interval Distance Per Stroke: The average distance traveled per stroke during the last completed interval.
Last Interval Stroke Rate: The average number of strokes per minute (spm) during the last completed interval.
Last Interval Strokes: The total number of strokes for the last completed interval.
Last Interval Time: The stopwatch time for the last completed interval.
Last Lap 500m Pace: The average rowing pace per 500 meters for the last lap.
Last Lap Cadence: Cycling. The average cadence for the last completed lap.
Last Lap Cadence: Running. The average cadence for the last completed lap.
Last Lap Distance: The distance traveled for the last completed lap.
Last Lap Pace: The average pace for the last completed lap.
Last Lap Speed: The average speed for the last completed lap.
Last Lap Time: The stopwatch time for the last completed lap.
Last Length Pace: The average pace for your last completed pool length.
Last Length Stroke Rate: The average number of strokes per minute (spm) during the last completed pool length.
Last Length Strokes: The total number of strokes for the last completed pool length.
**Last Length SWOLF**: The swolf score for the last completed pool length.

**Lengths**: The number of pool lengths completed during the current activity.

**Maximum Speed**: The top speed for the current activity.

**Pace**: The current pace.

**Speed**: The current rate of travel.

**Steps**: The number of steps during the current activity.

**Stroke Rate**: The number of strokes per minute (spm).

**Strokes**: The total number of strokes for the current activity.

**Sunrise**: The time of sunrise based on your GPS position.

**Sunset**: The time of sunset based on your GPS position.

**Temperature**: The temperature of the air. Your body temperature affects the temperature sensor.

**Time in Zone**: The time elapsed in each heart rate or power zone.

**Time of Day**: The time of day based on your current location and time settings (format, time zone, daylight saving time).

**Timer**: The stopwatch time for the current activity.

**Total Ascent**: The total elevation distance ascended during the activity or since the last reset.

**Total Descent**: The total elevation distance descended during the activity or since the last reset.

**Vertical Speed**: The rate of ascent or descent over time.

**VO2 Max. Standard Ratings**
These tables include standardized classifications for VO2 max. estimates by age and gender.

**Wheel Size and Circumference**
Your speed sensor automatically detects your wheel size. If necessary, you can manually enter your wheel circumference in the speed sensor settings.

The tire size is marked on both sides of the tire. This is not a comprehensive list. You can also measure the circumference of your wheel or use one of the calculators available on the internet.
