The symbol of the crossed-out wheeled bin indicates that within the countries in the European Union, this product, and any enhancements marked with this symbol, cannot be disposed as unsorted waste but must be taken to separate collection at their end- of-life.

DISPOSAL OF BATTERY

Please check local regulations for disposal of batteries. The battery should never be placed in municipal waste. Use a battery disposal facility if available.

GUIDELINE FOR HEADPHONE AND EARPHONE

To prevent possible hearing damage, please do not listen at high volume levels for long periods.

REGISTER YOUR PHONE

Please register your phone at http://sonimxperience.com/registration_portal/portal/registration.php to receive product information and updates.

Sonim devices are covered by a 3-Year comprehensive warranty. The battery is covered by a 1-Year limited warranty.

Congratulations on the purchase of a Sonim XP8 (XP8800) mobile phone! This phone is LTE smartphone enabled and has an intuitive feature-rich user interface, which allows you to make the best use of offered functions.

PHONE MODELS COVERED

This user guide covers Sonim XP8 phone with the model number XP8800.

SONIM SUPPORT INFORMATION

For additional product and support information, visit www.sonimtech.com.

USE THE GUIDE EFFECTIVELY

Familiarize yourself with the terminology and symbols used in the guide to help you use your phone effectively.

HOME SCREEN	This is the screen displayed when the phone is in standby mode.
TOUCH & HOLD	Touch and hold an item on the screen by touching it and not lifting your finger until an action occurs.
DRAG	Touch and hold an item for a moment and then, without lifting your finger, move your finger on the screen until you reach the target position.
SWIPE OR SLIDE	Quickly move your finger across the surface of the screen, without pausing when you first touch. For example, you can slide a home screen left or right to view the other home screens.
DOUBLE TAP	Tap quickly twice on a web page, map or other screen to zoom. For example, double-tap a web page in Browser to zoom in, and double-tap again to zoom out.
PINCH	In some applications, you can zoom in and out by placing two fingers on the screen at once and pinching them together or spreading them apart.

SAFETY GUIDELINES

Please read and understand the following safety guidelines before you use the phone. These guidelines provide details to enable you to operate your phone safely and conform to any legal requirements regarding the use of cellular phones.

Do not use the phone at a refueling point. Observe restrictions when using radio equipment at fuel depots, chemical plants or where blasting operations are in progress.

Electrical interference may obstruct the use of your phone. Observe restrictions in hospitals and near medical equipment.

Switch off your cellular phone when in an aircraft. Wireless phones can cause interference or danger to an aircraft. In an aircraft, the phone can be used in flight mode.

Do not expose the device to high temperatures (in excess of 55°C).

Adhere to road safety laws. Do not hold/ use a phone while you are driving; find a safe place to stop first. Use hands-free microphone while you are driving.

Avoid using the phone in close proximity to personal medical devices, such as pacemakers and hearing aids.

Use only Sonim XP8800 approved charging equipment to charge your phone and avoid damage to your phone.

The symbol of the crossed-out wheeled bin indicates that this product, and any enhancements marked with this symbol, can not be disposed as unsorted waste but must be taken to separate collection at their end-of-life.

Ensure that only qualified personnel install or repair your phone.

The Sonim XP8800 is water-proof and can be submerged to 2 meters for 30 minutes.

- Ensure to close the audio connector and SIM slot properly. This will prevent the deposit of water droplets on the connectors, when the phone is immersed in water.
- Water droplets may condense under the display cover if the phone is immersed in water with significant drop in temperature. This does not indicate water leakage. The droplets will disappear at room temperature.

The Sonim XP8800 is dust-resistant, rugged and shock-resistant. However, it is not dust-proof or unbreakable if subjected to overwhelming impact. For best results and long product life, one should protect the Sonim XP8800 from salt water, dust and strong impacts.

SAFETY GUIDELINES 6

HEARING AID COMPATIBILITY (HAC) REGULATIONS FOR MOBILE PHONES

In 2003, the FCC adopted rules to make digital wireless telephones compatible with hearing aids and cochlear implants. Although analog wireless phones do not usually cause interference with hearing aids or cochlear implants. digital wireless phones sometimes do because of electromagnetic energy emitted by the phone's antenna, back light, or other components. Your phone is compliant with FCC HAC regulations (ANSI C63.19-2011). While some wireless phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise and phones also vary in the amount of interference they generate. The wireless telephone industry has developed a rating system for wireless phones to assist hearing device users in finding phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that are rated have the rating on their box or a label located on the box. The ratings are not guarantees. Results will vary depending on the user's hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

This phone has been tested and rated for use with hearing aids for some of the wireless technologies that it uses. However, there may be some newer wireless technologies used in this phone that have not been tested yet for use with hearing aids. It is important to try the different features of this phone thoroughly and in different locations, using your hearing aid or cochlear implant, to determine if you hear any interfering noise. Consult your service provider or the manufacturer of this phone for information on hearing aid compatibility. If you have questions about return or exchange policies, consult your service provider or phone retailer.

M-Ratings: Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings.

T-Ratings: Phones rated T3 or T4 meet FCC requirements and are likely to be more usable with a hearing device's telecoil ("T Switch" or "Telephone Switch") than unrated phones. T4 is the better/ higher of the two ratings. (Note that not all hearing devices have telecoils in them.)

Your phone meets the M4/T4 level rating.

Hearing devices may also be rated. Your hearing device manufacturer or hearing health professional may help you find this rating. For more information about FCC Hearing Aid Compatibility, please go to http://www.fcc.gov/cgb/dro.

This phone has been tested and rated for use with hearing aids for some of the wireless technologies that it uses. However, there may be some newer wireless technologies used in this phone that have not been tested yet for use with hearing aids. It is important to try the different features of this phone thoroughly and in different locations, using your hearing aid or cochlear implant, to determine if you hear any interfering noise. Consult your service provider or the manufacturer of this phone for information on hearing aid compatibility. If you have questions about return or exchange policies, consult your service provider or phone retailer.

AVOID HIGH TEMPERATURES

Leaving the device in hot or cold places, such as in a closed car in summer or winter conditions, reduces the capacity and lifetime of the battery. For the best results, try to use the device between -20°C and +55°C (-4°F and 131°F). A device with a hot or cold battery may not work temporarily, even when the battery is fully charged. Battery performance is particularly limited in temperatures well below freezing.

PERSONAL MEDICAL DEVICES

Mobile phones may affect the operation of cardiac pacemakers and other implanted equipment. Please avoid placing the mobile phone over the pacemaker, for example in your breast pocket. When using the mobile phone, place it at the ear opposite the pacemaker. If a minimum distance of 15 cm (6 inches) is kept between the mobile phone and the pacemaker, the risk of interference is limited. If you suspect that interference is taking place, immediately turn off your mobile phone. Contact your cardiologist for more information. For other medical devices, consult your physician and the manufacturer of the device. Comply with instructions to switch off the device or deactivate the RF transmitter when required, especially when posted in hospitals and airplanes. Equipment used in these places may be sensitive to radio waves emitted from the device and adversely affect their operation. Also, observe restrictions at gas stations or other areas with flammable atmosphere or when close to electro-explosive devices.

CHILD SAFETY

Do not allow children to play with your mobile phone or its accessories. Keep it out of their reach. They could hurt themselves or others, or could accidentally damage the mobile phone or accessories. Your mobile phone and its accessories may contain small parts, which could be detached and create a choking hazard.

EMERGENCY CALLS

Mobile phones operate using radio signals, which cannot guarantee connection under all conditions. Therefore you should never rely solely upon any mobile phone for essential communications (e.g. medical emergencies). Emergency calls may not be possible in all areas, on all cellular networks, or when certain network services and/or mobile phone features are in use. Check with your local service provider.

WARNING

It is not allowed to connect any external devices to all ports/interface (USB, Top x-pand and side connector) in Hazardous area.

SAFETY GUIDELINES

BATTERY SAFETY WARNING FOR IEEE1725

Do not disassemble or open crush, bend or deform, puncture or shred.

Do not modify or re manufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, expose to fire, explosion or other hazard.

Only use the battery for the system for which it is specified.

Only use the battery with a charging system that has been qualified with the system per CTIA Certification Requirements for Battery System Compliance to IEEE 1725. Use of an unqualified battery or charger may present a risk of fire, explosion, leakage, or other hazard.

Do not short circuit a battery or allow metallic conductive objects to contact battery terminals.

Promptly dispose of used batteries in accordance with local regulations.

Replace the battery only with another battery that has been qualified with the system per this standard, IEEE-Std-1725. Use of an unqualified battery may present a risk of fire, explosion, leakage or other hazard. Only authorized service providers shall replace battery. (If the battery is non-user replaceable).

Battery usage by children should be supervised.

Avoid dropping the phone or battery. If the phone or battery is dropped, especially on a hard surface, and the user suspects damage, take it to a service center for inspection.

HAZARDOUS LOCATION USAGE WARNING

Improper battery use may result in a fire, explosion or other hazard.

CHARGING SAFETY WARNING

The equipment shall only be charged when in the non-hazardous area using a charger specifically supplied for use with the unit USB cable and AC charger S42A02(US plug)/ S42A00(EU plug)/ S42A01(UK plug).

DC5 V/2A pin recommend to use charger with SELV function.

BATTERY USAGE

Sonim XP8 phone comes with a removable battery. For any battery related queries, contact Sonim customer support.

- Use only a Sonim XP8800 certified battery that is designed for this phone model.
- The use of other batteries may void the warranty terms of your phone and cause damage.
- It is recommended to protect the battery from extreme temperature environments and moisture.
- Please keep the battery out of the reach of children.

INSERTING THE BATTERY

1. UNSCREW COVER

To open the battery cover, rotate the battery cover screw in a counter clockwise direction. Sometimes, the battery cover may be tight and some extra effort is required to open it. You can use the screwdriver provided to open the screw.

2. LIFT THE COVER

Lift the back cover to reveal the battery slot.

3. INSERT BATTERY

Insert the battery and flush into the battery slot such that the metallic contacts at the bottom of the battery are aligned with the metallic contacts within the battery compartment.

4. CLOSE COVER

Close the battery cover. Rotate the battery cover screws in clockwise direction. You can use the screwdriver provided to tighten the screws. Ensure not to over-tighten the screws.

DISPOSAL OF BATTERY

Please check local regulations for disposal of batteries. The battery should never be placed in municipal waste. Use a battery disposal facility if available.

CHARGING THE BATTERY

The battery delivered with your mobile phone is not fully charged.

We recommend that you charge your mobile for 5 hours before you use your mobile phone for the first time.

Only the power supplies with outputs meet the SELV requirements can be used for charging. The maximum allowable input voltage for the phone is 9v.

There is a risk of explosion while charging if the battery has been replaced by an incorrect type.

If the battery is completely out of charge, it can take several minutes for the charging icon to Appear when the charger is connected.

WARNING

ONLY THE BATTERY CAN BE REPLACED IN NON-HAZARDOUS LOCATION.

1. INSERT CHARGER

Insert the charger plug into a power outlet.

2. CONNECT TO THE PHONE

The charging port is located in the lower side of the phone, below the back cover. Insert the charger connector to the charging port.

BATTERY USAGE 10

3. CHARGING ANIMATION/ICON

- If the battery is being charged when the phone is switched off, a battery charging animation with current battery level is displayed.
- If the battery is being charged while the phone is switched on, the battery icon on the status bar shows the animation indicating that the battery is being charged.
- After the battery is fully charged the charging animation stops and you can disconnect the charger from the phone.

TIPS TO EXTEND THE BATTERY LIFE

Follow these tips to extend your phone's battery life.

- If you are not using Wi-Fi, Bluetooth, or GPS, use the Settings to turn them off. The GPS setting is located in Settings > Personal > Location.
- Set screen brightness to Low and set a shorter Sleep timeout (15 seconds). The display settings are located in Settings > Device > Display.
- If you are traveling and do not have access to mobile data or Wi-Fi network, switch to Airplane mode. Select Airplane mode from Quick Settings.

VERIFYING AND OPTIMIZING BATTERY USAGE

You can check the battery usage status and also close some applications to save battery power. In the all application screen, select **Settings** () > **Battery** ().

The current battery level (charging or not charging) is displayed on the top of the screen. The discharge graph on the top of the screen shows the battery level over time since you last charged the device, and how long you have been running on battery power.

The list at the bottom of the screen shows the breakdown of battery usage for individual apps and services. Touch any listed items for more details. The details screen for some apps includes buttons that allow you to adjust settings affecting power usage, or stop the application completely.

If you stop some apps or services, your device may not work correctly.

BATTERY USAGE 11

YOUR SIM/MEMORY CARD

Purchase a SIM card from a mobile operator. The SIM card associates your network services (for example, phone number, data services, and so on) with your phone.

REMOVING THE BACK COVER

1. UNSCREW COVER

To open the battery cover, rotate the battery cover screw in an counter clockwise direction.

REMOVING THE BATTERY

1. UNSCREW COVER

After removing the back cover, remove the battery by using Sonim screw driver tool.

2. LIFT THE COVER

Lift the back cover to reveal the battery slot.

3. USE SONIM SCREWDRIVER

You can use the Sonim provided screwdriver tool to open the screws.

YOUR SIM/MEMORY CARD 12

INSERTING THE SIM CARD

1. UNSCREW COVER

Use the provided Sonim screwdriver to unscrew the battery cover screw on the back of the phone.

2. LIFT THE COVER

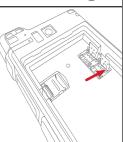

Remove the battery cover and the battery.

3. INSERT SIM CARD

Slide the silver clip and insert the SIM card. Lock the silver clip.

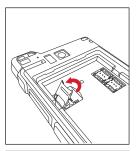

INSERTING MEMORY CARD

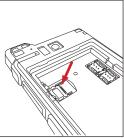

1. SLIDE THE SILVER CLIP

Slide (push forward) and lift the silver clip over the designated slot.

2. PLACE THE MEMORY CARD

Place the memory card in the designated slot and close the silver clip.

3. USE SONIM SCREWDRIVER

You can use the Sonim provided screwdriver tool to open the screws.

YOUR SIM/MEMORY CARD 13

USING YOUR SONIM XP8 15

SWITCHING ON THE PHONE

Press and hold **Power** button for 2 seconds.

When the phone is switched on, it tries to register with the network. After successful registration, the name of the service provider is displayed.

Ensure that a valid SIM card is inserted in your phone.

SETTING UP YOUR PHONE

For instructions on using your phone's buttons, charger, battery, and other hardware features, check the printed Quick Start Guide provided along with your phone.

The first time you turn on your device, it will take you through the steps to get the set up. You will be prompted to do the following:

- 1. Choose the language you want your phone to use.
- Connect to a Wi-Fi network or your cellular data network.
- 3. Sign-in with your Google Account.

If you have Gmail account, use the same e-mail address and password to sign-in. By signing in, all your e-mail, contacts, calendar events, and other data associated with that account will be synced to your phone. If you have more than one Google Account, you can add them later.

If you do not have a Google Account, you can create one during the setup process. You can also skip this step and create later.

MANAGING HOME SCREEN

After you complete the phone setup, the home screen is displayed. The home screen is the beginning point to access all the device's features.

Device comes equipped with pre-installed screen protector for added protection.

- Message/Alert Notifications
- 2. Service Indicator and Signal Strength bar
- 3. Battery charge indicator and time
- 4. Home screen
- 5. Application Grid or Menu

PHONE OPERATIONS WITHOUT SIM CARD

You can perform the following operations without inserting a SIM card in your phone.

- Make an emergency call.
- View and modify all settings except few data usage and mobile network related settings.
- Activate and share files through Bluetooth.
- Access the Internet using Wi-Fi connectivity.
- Access your phonebook, multimedia files, all tools

YOUR SONIM XP5S 17

and applications.

View and modify your profile settings.

SETTING UP AND USING LOCK SCREEN

You must lock your phone to protect it from unauthorized access.

- From Home screen, tap on System settings or select Menu > Settings ().
- Scroll down and select Security (), located under Personal settings.
- Select Screen lock and select one of the following options to configure phone:
 - None: Disables the screen lock.
 - Swipe: When the screen is locked, slide your finger from bottom to top to unlock it.
 - Pattern: When enabled, enter you own pattern.
 When the phone is locked, unlock it using the
 pattern. When the phone screen is locked, you
 can answer an incoming call, without unlocking
 the screen.
 - PIN: When enabled, enter you own PIN value.
 When the phone is locked, unlock it using the PIN.
 When the phone screen is locked, you can answer an incoming call, without unlocking the screen.
 - Password: When enabled, enter you own Password. When the phone is locked, unlock it using the password. When the phone screen is locked, you can answer an incoming call, without unlocking the screen.

CHANGING THE WALLPAPER

You can set an image or a photo stored in your phone as your home screen wallpaper. To change the wallpaper, select from one of the following Wallpaper collections.

- Long tap on Home screen > Wallpapers. Select Wallpapers from the pop-up.
 - **My photos:** includes photos and screenshots taken using the phone's camera.
 - Wallpapers: Tap on System settings > Display
 > Wallpapers. It includes images that are preloaded with the phone.

CAPTURING A SCREENSHOT

You can take the screenshot of the current screen and it is stored in your phone's photos. To take a screenshot:

- Ensure that the image to be captured is displayed on the current screen.
- 2. Press the **Power** and **Volume** down button simultaneously. The screenshot is captured and stored in the **Photos**. A screen **Capture** () icon is also displayed on the notification bar.

YOUR SONIM XP5S 18

SUGGESTIONS

Your Android device offers suggestions and reminders about the features and you can easily remove them from the Settings.

FINISH SETTING UP YOUR DEVICE

You can transfer data, add Google account and many more.

PAY FASTER WITH GOOGLE

You can save payment information to your Google account for easier online checkout process.

SUGGESTIONS 19

NETWORKS AND INTERNET

WI-FI

Wi-Fi is a wireless network technology that can provide Internet access at distance up to 100 feet, depending on the Wi-Fi router and surroundings.

You can access Internet when you connect your XP8 to a Wi-Fi network. To connect your phone to a Wi-Fi network;

- From Notifications or App menu, tap on Settings
 (a).
- 2. Tap on Network & Internet ().
- Set the Wi-Fi to ON position located under Wireless & networks settings.
 A list of Wi-Fi access points present within your phone's accessible range are displayed.
- 4. Select your preferred network. Enter the WEP/ WPS/WPA key (if it is a secured network) and select Connect. To verify the password before connecting, enable Show password.

It is always recommended to make your Wi-Fi network connection secure and also to connect your phone to a secure network.

ADD NETWORK

- 1. On Wi-Fi screen, tap on Add network (+).
- Enter the Network name and select the Security from the drop-down list. You can set the network password.
- Tap on Advanced options. The settings such as Proxy and IP settings can be updated using the drop-down list.
- 4. Tap on **Save** to save the network settings.

CONNECT TO NETWORK

- 1. Long press on connected network.
- 2. Tap on Connect to network.
- 3. Enter the network password.
- The other network setting details such as Advanced options, Proxy, IP settings can be updated.
- Tap on CONNECT to get connected to the network.

WI-FI PREFERENCES

- Turn on Wi-Fi automatically: To use this option, select a network rating provider.
- Open network notification: Enable this option get a notification when a high-quality public network is available.
- Advanced: On the Wi-Fi screen, tap Option (1) > Advanced. The following options are displayed:
 - Install certificates: You can browse a certificate for installation.
 - Network rating provider:
 - Wi-Fi Direct: Select Option key > Searching to search for the peer devices and also select Rename device to rename the device
 - WPS Push Button: Press the WPS Push Button in your router, when prompted.
 - **WPS Pin Entry:** Enter the given PIN number on your Wi-Fi router.
 - MAC address: A MAC (Media Access Control) address is displayed.
 - IP address: IP (Internet Protocol) address is displayed.

MOBILE NETWORK

- From Notifications or App menu, tap on Settings
 (3).
- 2. Tap on Network & Internet > Mobile network
- Select SIM Slot 1 and the following options are displayed:
 - **Mobile data:** Turn **On** to enable mobile data. Using mobile data, you can access Internet.
 - Data Roaming Access: Turn ON to enable data roaming to connect to data services while roaming.
 - **Data usage:** Mobile data usage for a particular time frame is displayed.
 - Advanced:
 - Preferred network type: The options displayed are: Global, LTE and LTE/ GSM /UMTS.
 - Network:
 - Automatically select network: Turn ON to connect to the selected network automatically.
 - Network: The network name is displayed.
 - Access Point Names: Tap on Access Point Names (APN) to view and edit the network access points. Tap on the (+) icon to add a new access point. Tap on Options (1) to reset to default.

NETWORK AND INTERNET 20

DATA USAGE

Data usage refers to the amount of data utilized by your phone during data transfers through the Internet. The data usage charges are dependent of the wireless plan provided by your service provider.

To monitor your data usage, adjust your data usage settings.

- From Notifications or App menu, tap on Settings
 ().
- 2. Tap on Network & Internet > Data usage (),
- 3. Under **Usage**, you can view the data usage for a particular time frame.
- 4. Turn on **Data saver** to access unrestricted data.
- 5. Select Wi-Fi > Wi-Fi data usage to check the data usage for a particular time frame.
- Tap on Network Restrictions to view the metered networks listed.

HOTSPOT & TETHERING

Hotspot and Tethering provides Internet to other devices through your mobile data connection. Apps can also create a hotspot to share content with nearby devices.

USB TETHERING

Using USB tethering, you can share phone's Internet connection via USB.

- From Notifications or App menu, tap on Settings
 ().
- Tap on Network & Internet > Hotspot & tethering ().
- 3. Turn on USB tethering.

MOBILE HOTSPOT

Mobile hotspot uses mobile data from your data plan whenever you are not connected to Wi-Fi.

- From Notifications or App menu, tap on Settings
 ().
- 2. Tap on Network & Internet > Hotspot & tethering (()).
- Turn ON to enable the mobile hotspot. A message window is displayed. Tap on OK to continue. When this option is disabled, you cannot share Internet or content with other devices.

SETUP MOBILE HOTSPOT

You can set up a hotspot using your mobile device.

1. From Notifications or App menu, tap on Settings

- (🔯).
- 2. Tap on Network & Internet > Hotspot & tethering (()).
- 3. Tap on Set up Mobile hotspot.
- 4. Enter the following details:
 - **Network name:** Enter the network name.
 - Security: Select the desired security from the drop-down list.
 - Password: The password must have at least 8 characters.
 - Select AP Band: Select AP Band from the dropdown list.
- **5.** Tap on **Save** to save the mobile hotspot.

MOBILE HOTSPOT PREFERENCES

- From Notifications or App menu, tap on Settings
 (3).
- 2. Tap on Network & Internet > Hotspot & tethering (()).
- 3. Tap on Mobile Hotspot Preferences.
- **4.** Tap on **Timeout settings**. Select the desired time from the listed options.
- Under Connected Devices, the list of devices which are connected to the mobile hotspot are displayed.

BLUETOOTH TETHERING

You can share the phone's Internet connection via Bluetooth.

- From Notifications or App menu, tap on Settings
 (3).
- 2. Tap on Network & Internet > Hotspot & tethering (()).
- 3. Turn ON to enable Bluetooth tethering.

WIRELESS EMERGENCY ALERTS

- From Notifications or App menu, tap on Settings
 ().
- 2. Tap on Network & Internet > Wireless Emergency alerts.
- 3. Alerts:
 - Extreme threats: Check this option to display alerts for extreme threats to life and property.
 - Severe threats: Check this option to get the alerts for severe threats to life and property.
 - Area update broadcasts: Check this option to show update information in SIM status.
 - AMBER alerts: Check this option to get the child abduction emergency bulletins.
 - Allow alerts: Check this option to receive emergency notifications.

NETWORK AND INTERNET 21

- Alert reminder sound: You can set any of the following alert reminder sound: Once, Every 2 minutes, Every 15 minutes and Off.
- Vibrate: Check this option to set the device on vibration during alert.
- **Speak alert message:** Check this option to use text-to-speech to speak emergency alert messages.
- 4. Settings for India:
 - Show channel 60 broadcasts: Channel 60 is used in India for operator specific information when this option is checked.

VPN

- From Notifications or App menu, tap on Settings
 (3).
- 2. Tap on Network & Internet > VPN ().
- 3. Tap on the icon (+) to add a new VPN profile.
- In Edit VPN profile screen, enter the Name, Type (select from the drop-down list), and the server address.
- 5. Enter Username and password.
- 6. Select Save.

ROAMING

You can activate roaming when you are outside your home network.

- From Notifications or App menu, tap on Settings ().
- Tap on Network & Internet > Roaming. The following options are displayed:
 - Roaming Mode: You can set the Roaming mode from the given options.
 - Roaming Settings:
 - Roaming Guards: Roaming guard notifies you when you are using voice, data, or messages services while roaming domestically and/or internationally.

AIRPLANE MODE

When your phone is set in airplane mode, network connectivity or mobile data connectivity is disabled. But you can access your camera, medial files and other features that do not require mobile data connectivity.

To activate airplane mode:

- From Notifications or App menu, tap on Settings ().
- 2. Tap on Network & Internet > Airplane mode .
- 3. Turn on Airplane mode (\(\lambda \).

CONNECTED DEVICES

BLUETOOTH

Bluetooth is a short-range wireless communication technology used to communicate between the devices over a distance of about 8 meters.

- You can perform the following tasks using Bluetooth paired devices.
- Transfer media files and contacts between connected mobile devices using Bluetooth.
- Use Bluetooth connected headphones for playing media file.
- Bluetooth headset can be used during call.

PAIRING A BLUETOOTH DEVICE

To activate Bluetooth and pair your XP3 device with other Bluetooth devices:

- 1. From Notifications or App menu, tap on Settings (♥) > Connected devices (♥).
- Tap and enable Bluetooth (*).
 A list of accessible Bluetooth devices are displayed.
 Ensure that Bluetooth is activated on the other device as well.
- 3. Tap on Pair new device (old) to pair a new device. Available devices are listed.
- Select the desired device from the list. It starts pairing with the selected device. A confirmation message is displayed to pair the device. Select PAIR.

DEVICE NAME

- From Notifications or App menu, tap on Settings
 (♥) > Connected devices (▼).
- 2. Tap and enable Bluetooth (*).
- Tap on Device name. Rename this device screen is displayed. You can change the name and tap on Rename.

RECEIVED FILES

- From Notifications or App menu, tap on Settings
 (◎) > Connected devices (□).
- 2. Tap and enable **Bluetooth** (*).

 Bluetooth received transfer history is displayed.

CAST

- From Notifications or App menu, tap on Settings
 (☑) > Connected devices (☑).
- 2. Tap on Cast ().

NFC

When NFC (Near-Field Communication) is a set of communication protocols that enable two electronic devices one of which is usually a portable device such as a smart phone, to establish communication by bringing them within 4 cm of each other.

- From Notifications or App menu, tap on Settings
 (◎) > Connected devices (□) > NFC (□).
- Turn ON NFC to allow data exchange when your device touches another device.

ANDROID BEAM

- From Notifications or App menu, tap on Settings
 (◎) > Connected devices (□□) > Android Beam
 (□□).
- Turn ON Android Beam. You can beam an app content to another NFC capable device by holding the devices close together.

PRINTING

- 1. From Notifications or App menu, tap on Settings (♥) > Connected devices (♥) > Printing (♠).
- Tap on Print services > Default Print Service
 Turn On the Default Print Service.
- Tap on Add services (+). Google Play screen is displayed. You can sign in with your Google credentials and add any desired service.

USB

USB is a plug-and-play interface that allows a computer to communicate with peripheral and other devices.

- From Notifications or App menu, tap on Settings
 (◎) > Connected devices (□) > USB (♣).
- 2. You can use USB for the following tasks:
 - Charge this device: Tap on this option to use the USB to charge the connected device.
 - Supply power: Tap on this option to charge the connected device. This option works only with devices that support USB charging.
 - Transfer files: Tap on this option to transfer the data from one device to another device.
 - Transfer photos (PTP): Tap on this option to transfer photos.
 - Use device as MIDI: Tap on this option to use your

- device as Musical Instrument Digital Interface (MIDI) interface to control parameters of an electronic instruments.
- System Update: Tap on this option to us the USB connection to update the software.

When you connect the XP8 phone to the PC, it is shown as a drive and not as a device.

CONNECTED DEVICES 23

APPS & NOTIFICATIONS

APPS INFO

- From Notifications or App menu, tap on Settings
 (☑) > Apps & notifications (:::).
- Tap on App info.The list of apps installed on the device are displayed.
- 3. Tap on All apps. You can view All apps, Installed apps and Disabled apps.
- 4. Tap on Options () and the following options are displayed:
 - Show system: System based apps are displayed.
 - Hide system: System based apps are hidden.
 - Reset app preferences: You can reset all the preferences set for the apps.

NOTIFICATIONS

- From Notifications or App menu, tap on Settings
 (☑) > Apps & notifications (:::).
- Tap on Notifications.
- Tap on App notifications. Tap on the desired app and turn on the notification.
- 4. Tap on On the lock screen. There are two options:
 - Show all notification content
 - Don't show notification at all
- Tap on Allow notification dots and turn it On to get a notification when you have an unread notification.
- Turn On Blink light to receive a LED notification light even when your device screen is off.
- 7. Turn On Flash call alert to receive an alert when there is an incoming call.
- 8. Turn On Flash notification alert to use camera flash light for missed events.
- Tap on Default notification sound. Tap on the desired ringtone from the list. You can also add a new ringtone using the option Add ringtone (+).

APP PERMISSIONS

- From Notifications or App menu, tap on Settings
 > Apps & notifications (::::).
- Tap on App permissions. App permissions govern what your app is allowed to do and access.

ADVANCED

- From Notifications or App menu, tap on Settings
 > Apps & notifications (:::).
- Tap on Advanced and the following options are displayed:
 - **Default apps:** The default apps are listed.
 - Wireless Emergency alerts: For more information, refer to "Wireless Emergency Alerts" on page 21.
 - Special app access: Tap on this option to view different settings.

APPS & NOTIFICATIONS 24

BATTERY SETTINGS

BATTERY

- From Home screen or App menu, tap on Settings
 (◎) > Battery (■).
 - The graphic image of battery charging level is displayed.
 - Last Full charge displays the time when the battery is fully charged.
 - Screen usage since full charge displays the time duration the screen is used since the battery the fully charged.
- Under Power management the following options are displayed:
 - Batter saver: Set the Battery saver to On by selecting the option given for Turn On automatically:
 - Never
 - at 5% battery
 - at 15% battery

Battery saver turns off automatically when your device is charging.

- Battery percentage: Turn On this option to view the battery percentage in status bar.
- Adaptive brightness: Enable this option to optimize brightness level for available light.
- Battery Blink Light: Enable this option to keep the LED blinking while the battery is charging.
- Sleep: You can set the following time frame to set the screen to sleep mode: 15 seconds, 30 seconds, 1 minute, 2 minutes, 5 minutes, 10 minutes and 30 minutes.
- Ambient display: Tap on Ambient display. Enable New notifications to wake the screen when you receive notifications.
- 3. Under App usage since full charge, battery usage (in percentage) for each app is displayed.
- 4. On the Battery screen, tap on Option (1) > Battery optimization. From the drop-down list, you can select All apps or Not optimized apps.
 - On the Battery screen, tap on Option (:) > Show full device usage to view the complete device battery usage.
 - On the Battery screen, tap on Option (i) > Show app usage to view the battery usage of apps.

DISPLAY SETTINGS

DISPLAY

- From Notifications or App menu, tap on Settings
 (๑) > Display (♠).
- Set the following options to configure your phone's display:

To learn more about Smart Lock, from the **Smart** Lock screen, tap on the **Options** () > **How** it works. Tap on Help and the Google support window is displayed. You can check for the required information.

PRIVACY

- 1. The following options are displayed under **Privacy**:
 - Location: Set the Mode to one of the following options:
 - High accuracy: uses AGPS, Wi-Fi, mobile networks, and other sensors to get the highest accuracy location for your device. It uses location help to estimate your location faster and more accurately.
 - Battery saving: allows your device to estimate your location using low battery-intensive location sources, such as Wi-Fi and mobile networks. It uses location help to estimate your location faster and more accurately.
 - Device only: allows your device to estimate your location using GPS only. It uses the satellite information to provide location information. This mode may use more battery power and take longer time to determine your location.
 - App-level permissions: The list of different apps which are enabled/disabled are displayed. Tap on Options
 - Scanning: The following options are displayed:
 - Wi-Fi scanning: Turn ON this option to improve location services by allowing the system apps and services to detect Wi-Fi networks at any time.
 - Bluetooth scanning: Turn ON this option to improve location services by allowing the system apps and services to detect Bluetooth devices at any time.
- Under Location services, the following options are displayed:
 - Accelerated Location: Tap on Agree to improve

- location performance and battery saving.
- Google Location History: Turn ON the location history:
 - This device: Turn on to view the last reported location date.
 - Other devices on this account: The other devices which are connected via Bluetooth are listed here and the date of the last location is also reported.
- Google Location Sharing: To share your real-time location, open the Google Maps and sign in.
- You can view the apps which have requested your location recently under Recent location requests.
- Enable Show password to display the password characters as you type in.
- Device admin apps: You can select any of the listed apps as a device admin app by checking the box next to the app.
- Tap on SIM card lock. The following two options are displayed:
 - Lock SIm card: If you turn ON this option, you require a PIN to use the phone.
 - Change SIM PIN: You can change the SIM PIN by entering the new PIN number.
- 7. Encryption U& credentials:
 - Encrypt phone: By default, the phone is already encrypted.
 - Credential storage:
 - Storage type: Displays the storage type.
 - Trusted credentials: You can view and verify the system and user certificates.
 - User credentials: You can view and modify stored credentials.
 - Install from SD card: Install from SD card: You can view and install new user certificates from SD card.
 - Clear credentials: You can remove all certificates.
- 8. Trust agents: To use this option, a screen lock should be set.
- **9. Screen pinning:** Turn on to use screen pinning to keep the current screen in view until you unpin.
- 10.Apps with usage access: Select the app and select center key to enable/disable the Permit usage access.

SECURITY & LOCATION SETTINGS 29

USERS AND ACCOUNTS

USERS

- From Notifications or App menu, tap on Settings
 (◎) > Users & accounts (►).
- Tap on You (owner). Change the Profile info and tap on OK.
- 3. Tap on Guest > Settings () and enable Turn on phone calls.
- Tap on Add user (+). You can set up a new user. The device will recognize up to three users:
 You (owner of the device), New user and Guest.

ACCOUNTS FOR OWNER

- From Notifications or App menu, tap on Settings
 (☺) > Users & accounts (☒).
- 2. Tap on Add account (+). You can add the following accounts:
 - Duo
 - Duo Preview
 - Exchange
 - Google
 - Personal (IMAP)
 - Personal (POP3)

EMERGENCY INFORMATION

- From Notifications or App menu, tap on Settings
 (♥) > Users & accounts (♥).
- 2. Tap on Accounts for Owner > Emergency information.
- **3.** Tap on **Medical information > Edit information.** Enter the following information:
 - Name
 - Address
 - Blood type
 - Allergies
 - Medications
 - Organ donor
 - Medical notes

Medical information and emergency contacts can help first responders in an emergency.

DELETING CALL HISTORY

- 1. From **Home** screen or **App** screen, tap on **Phone** ().
- 2. Tap on Call History (()).
- Tap on Options (*) > Call History > again tap on Options (*) > Clear call history to delete the call history.
- Tap and select the call log to be deleted and tap on CLEAR.
- A confirmation message is displayed to delete the selected call log. Tap on **OK** to delete the call log. The selected call log is deleted.

MANAGING CALL SETTINGS

You can change the incoming call ring tone, set phone to vibrate while ringing and also activate voicemail, and other settings in Call settings screen.

Your phone uses sounds and vibrations to communicate with you, including ringtones, notifications, alarms, and navigation feedback. You can customize any of these sounds, as well as controlling their volume and the volume for music, videos, games, and other media.

The following settings are displayed:

DISPLAY OPTIONS

- 1. From **Home** screen or **App** screen, tap on **Phone**
- 2. Tap on Options (;) > Settings > Display options.

MANAGING CALL SETTINGS 39

- Sort by: You can sort the contacts by First name or Last name.
- Name format: You have two options to display the contact name:
 - First name first
 - Last name first

SOUNDS AND VIBRATION

- Phone Ringtone: To change the phone ringtone,
- Tap on Device settings > Sound () > Phone ringtone.
- Select the required ringtone from the list and tap on OK.

The ringtone is changed.

OR

- From Home screen or Apps menu, select Phone ().
- 2. Tap on Options (;) > Settings > Sounds and vibration.
- 3. Tap on Phone ringtone.
- Select the required ringtone from the list and tap on OK.

The ringtone is changed.

- Also vibrate for calls: If this option is checked, device is set to vibrate mode when a call is received.
- **Dialpad tones:** Check this option to set the tone for the dialpad when numbers are dialed.
- Dialpad tone length: You can set the dialpad tone length to Normal or Long.
- Call end tone: Check this option to set a tone for call ending.

QUICK RESPONSES

The quick responses are the messages that can be used to reject the call with a message.

- From Home screen or Apps menu, select Phone ().
- Tap on Options (;) > Settings > Quick responses.

The list of quick responses are displayed.

- 3. Tap on the required quick responses from the list to edit that particular message and tap on **OK** to save the message to the list.
- 4. While an incoming call arrives, touch the message icon to open a list of quick responses or the option to write your own message. Touch one of the messages to send it to the caller immediately

and the call gets disconnected.

5. Tap on Options (≥) > Restore defaults.

CALLS

Calling accounts

- 1. From **Home** screen or **Apps** menu, select **Phone** ().
- 2. From Call History screen, tap on Options () > Settings > Calling accounts.

SIP settings

SIP accounts:

To add a SIP account and configure your incoming and outgoing preferences:

- Tap on Calling accounts > SIP settings > SIP accounts.
- 2. On SIP accounts screen, tap on Add SIP account () to configure a new SIP account.
- Enter the following details and tap on Save to save the account:

- Location permission is denied: For more information, refer to "Privacy" on page 29.

SENDING MESSAGES

SMS and MMS are convenient and inexpensive means of communication. You can send a text message to other people via SMS service. MMS allows you to send messages by including multimedia content such as pictures, audio files, video files, and so on.

You can use the Messaging in your phone to send an SMS and MMS message to other mobile phones or any other equipment that can receive SMS and MMS.

The MMS feature will be available only if subscribed from your network operator.

To access the message app, from **Home** screen select **Message+** (...).

MESSAGE+

You can send SMS and MMS messages to contacts in your phonebook and to new numbers that are not present in the phonebook.

- 1. To start messaging, from **Home** screen, tap on **Message+** (☑). **Message+** screen is displayed.
- Tap on Start Messaging.
 Make sure your phone number is correct. A text message is sent on your number to authenticate.
- Enter your phone number. Tap on Next. A progress bar is displayed.
- 4. A Welcome screen is displayed. You can create a public profile which helps the Message+ users identify you. Your name and picture will be displayed when you send or reply to a message or get invited to a group. Information in your profile is visible to all Message+ users, including users not in your contacts.
- **5.** You have two options to create a public profile:
 - No, I Don't want a Public Profile
 - Yes, I want a Public Profile
- **6.** Select the desired option to have a public profile. A screen with all the messages is displayed.
- Tap on New message (②). A pop-up screen is displayed; Message+ will now request permission. Please select "allow" on the following prompts.
- 8. Tap **OK**. Tap on **Allow** to give Message+ to access the device's location.
- A new message screen is displayed. Tap on Choose contact () icon next to To field. You can choose a desired contact or search a contact

using **Search** () button.

10.Enter the message. To add an attachment, tap on (→) icon and the following options are displayed:

USING APPLICATIONS

CAMERA

The Sonim XP8 has a rear camera with 12MP fixed focus for taking pictures. The pictures are saved in Photos.

- 1. From App screen, tap on Camera ().
- 2. Select Camera mode to set the following modes:
 - Normal (): To shoot a picture in normal mode, tap on soft key to capture the picture. Use Volume
 Up and Down key or pinch with fingers to Zoom in and Zoom out.
 - Video (): Tap on Video button to enable the video mode and start the recording. You can pause the recording in the middle by using Pause soft key () symbol.
 - Tap on **Toggle** button () to toggle between camera and video mode.
- 3. On the Camera screen, tap on Option (

) > Settings (

). The following options are displayed:
 - Under Still camera > Picture size and the following picture sizes are displayed. Select the required size.
 - 12M pixels
 - 8M pixels
 - 5M pixels
 - 3M pixels
 - 2M pixels
 - 1M pixels
 - VGA
 - Under Still camera > Picture quality and the following options are displayed:
 - Low
 - Standard
 - High
 - Under Still camera > Exposure and the following options re displayed:
 - -2, -1.5, -1, -0.5, 0, +0.5, +1, +1.5, +2
 - Tap on Still camera > White balance and the following options are displayed:
 - Auto
 - Incandescent
 - Fluorescent
 - Daylight
 - Cloudy
 - Tap on Still camera > Shutter Sound and you can enable/disable this option.

CALENDAR

The Calendar helps you to set appointments, schedule reminders and alerts and repeat them if required. You can also view your saved tasks on a daily or weekly basis.

To access calendar;

- 1. From App screen, tap on Calendar ().
- To change the calendar view, tap on Option menu () and you can view the calendar in Day, 3 Day, Week, and Month format.
- 3. Tap on Add () icon to add the following in your calendar:
 - **Goal:** You can choose a goal and the calendar schedules sessions for your goals.
 - Reminder: You can set a reminder to call, email, text. check-in, reservation.
 - Event: You can add an event in the calendar and tap on Save to save the event.
- 4. Tap on Option (≡) > Settings to view the settings. The options are; Events from Gmail, Events, Reminders, Birthday and Holidays which are synced with you Email account.
- 5. Tap on Option () > Refresh to sync the calendar.

CLOCK

You can view the time of major cities in different time zones using this function. You also have the option to use **Daylight Saving Time** (DST).

- 1. From App screen, tap on Clock ().
- **2.** Tap on **Clock** (**(()**).
- Select World clock icon () located at the bottom of the screen. To view the list of cities and the current time, enter the first few alphabets to get the list of cities. Tap on the city name and the selected city and the current time is added to the Clock.
 - The local time in the home city is displayed in the upper half of the screen.
 - To set the home city, select the required city from the list. It is added to the selected cities list. The selected city is set as the home city.

ALARM

You can set an alarm for a particular time.

- 1. From App screen, tap on Clock ().
- 2. Tap on Alarm icon () on the top of the screen.
- 3. Tap on Add () to add a new alarm and tap on OK.
- 4. Set the following items:

- Check the box next to Repeat to set the alarm on all the days in a week.
- Tap on **Default ringtone** and select the required ringtone.
- You can enable the device to Vibrate when the alarm is set.
- You can name the **Label**.
- You can **Delete** the selected alarm.

The alarm will work even when the phone is set in silent mode.

TIMER

- 1. From App screen, tap on Clock () > Timer ().
- **2.** The following actions can be performed:
 - RESET, START, STOP, DELETE, ADD TIMER and Label

STOPWATCH

- 1. From App screen, tap on Clock () > Stopwatch ().
- 2. Select **START** and **STOP** to run the stop watch.
- 3. Tap on **RESET** to reset the stopwatch time.
- Tap on SHARE to share the file via any of the media.
- 5. Tap on **LAP** to count the time duration for each lap.

CALCULATOR

The default calculator in this phone is designed to perform simple mathematical calculations.

- 1. From App screen, tap on Calculator (1.).
- 2. Tap on the left arrow mark to go to the Advanced panel.
- 3. To enter the numbers, tap the numeric soft keys.
- To use mathematical operators, touch the respective operation soft keys on the keypad.
- After performing the calculations, tap = for the final result.

SOUND RECORDER

You can record voice memos using the sound recorder. To access the sound recorder.

- 1. From App screen, tap on Sound Recorder ().
 - To record an audio file, tap on **Record** ().
 - To stop the recording, select **Stop** ().
 - To save the voice memo, tap on **Save**.
 - To exit without saving, tap on Discard.
 - To play the recorded file instantly, on the Sound Recorder home screen, tap on Option (i≡) and

the Recording list is opened. Tap on the required recorder.

FILE MANAGER

You can view/edit/delete/share the files stored in the phone through File Manager.

- 1. From App screen, tap on File Manager ().
- 2. On the **File manager** screen, tap on **Option** (1) to view the following Actions:
 - Properties: View the properties of the folder.
 - Refresh: Refresh the folder.
 - New folder: Create a new folder.
 - New file: Create a new file.
 - Select all: Selects all the folders.
 - Deselect all: Deselects the folder when they are selected.
 - Add to bookmarks: Bookmarks are added.
 - Copy selection here: You can copy the folder to same or different folder and the copied files/folders are saved.
 - Move selection here: You can move the folder to selected destination.
 - Delete selection: Selected folder is deleted and you cannot undo this action.
 - Set as home: You can set the selected folder as home folder.
 - Add shortcut: Shortcut is created for selected folder on the home screen.

SIM TOOLKIT

SIM Toolkit commonly known as STK is a standard of the GSM system which enables the SIM to initiate actions which can be used for various value added services.

It displays the Operator specific services.

To access the SIM Toolkit,

- From App screen, tap on SIM Toolkit ().
- It displays the SIM provider and the respective services details.

USING APPLICATIONS 49

DOWNLOADS

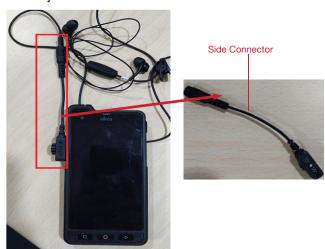

You can download and install/view your android applications/media files, when your phone is connected to the Internet through Wi-Fi or mobile data connection. You can also download files from Gmail or other sources.

- To manage application downloads, tap on Downloads () on App screen.
- Use the **Downloads** app to view, open, or delete the downloaded files.
- At the top of the screen, tap on the icon () to sort your downloads by name, by date modified, or by size.

FM RADIO

You can listen to the radio through FM radio. A wired headset should be connected to enabling FM radio.

- 1. From App screen, tap on FM Radio (6).
- 2. A message Please plug in a Headset to use FM
- 3. Radio is displayed. Connect a wired Headset with the side connector to enable FM Radio. FM radio icon (♠) and headset icon (♠) are displayed on the Notification bar.
 - Side Connector: As the Sonim XP8 device does not support the jack, side connector is used to plug-in the jack and listen to FM radio over the headset.

- 4. Tap on **Option** () > **Scan** to scan all the stations. Available channels are displayed.
- Tap on Start Recording to record the audio which is broadcasted on the radio to listen to the same later.
- Tap on Stop Recording to stop the audio recording.

- 7. Tap on **Option** () > **Setting** and the following options are displayed:
 - Regional Band: The regional band with frequency range is displayed.
 - Channel Spacing:
 - Lower Freq Limit (in MHz)
 - Higher Freq Limit (in MHz)
 - Audio Output Mode: Select any of the following options as a output mode: Stereo or Mono
 - Alternate Frequency: Check this option to enable/ disable the auto selection of alternate frequency.
 - **Record Duration:** You can set the time duration for recording in the following time frame:
 - 5 minutes
 - 15 minutes
 - 30 minutes
 - Until stopped
- Revert to Factory Defaults: This option deletes all the settings including Presets. Select OK to confirm.
- 8. Tap on Sleep. You can turn off the radio after a selected time frame:
 - 15 minutes
 - 30 minutes
 - 45 minutes
 - 1 Hour
- Tap on All Channels. The available channels/ stations are displayed with the station serial number. For example, first station in the list is displayed as Station:1.
 - Long tap on the required station/channel and the following options are displayed:
 - Station #: Each station/channel is given a serial number in the list.
 - Rename: You can rename the station/channel name.
 - Delete: A confirmation message is displayed to delete the selected channel/station. Tap on Delete and the channel/station is deleted form the list.

USING APPLICATIONS 50

REGULATORY INFORMATION- USA MARKET

RF EXPOSURE INFORMATION (SAR)

This device meets the government's requirements for exposure to radio waves.

This device is designed and manufactured not to exceed the emission limits for exposure to radio frequency (RF) energy set by the Federal Communications Commission of the U.S. Government.

The exposure standard for wireless device employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6W/kg. *Tests for SAR are conducted using standard operating positions accepted by the FCC with the device transmitting at its highest certified power level in all tested frequency bands. Although the SAR is determined at the highest certified power level, the actual SAR level of the device while operating can be well below the maximum value. This is because the device is designed to operate at multiple power levels so as to use only the poser required to reach the network. In general, the closer you are to a wireless base station antenna, the lower the power output.

- When tested for use at the ear is 1.37W/kg
- When worn on the body, as described in this user guide, is 1.39 W/kg (Body-worn measurements differ among device models, depending upon available accessories and FCC requirements.),

While there may be differences between the SAR levels of various devices and at various positions, they all meet the government requirement.

The FCC has granted an Equipment Authorization for this model device with all reported SAR levels evaluated as in compliance with the FCC RF exposure guidelines. SAR information on this model device is on file with the FCC and can be found under the Display Grant section of www.fcc.gov/oet/ea/fccid after searching on FCC: WYPPG4032.

For body worn operation, this device has been tested and meets the FCC RF exposure guidelines for use with an accessory that contains no metal and be positioned a minimum of 1 cm from the body. Use of other accessories may not ensure compliance with FCC RF exposure guidelines. If you do not use a body-worn accessory and are not holding the device at the ear, position the handset a minimum of 1 cm from your body when the device is switched on.

FEDERAL COMMUNICATION COMMISSION INTERFERENCE STATEMENT

This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

- This device may not cause harmful interference, and
- This device must accept any interference received, including interference that may cause undesired operation.

This device has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy, and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

FCC CAUTION

- Any Changes or modifications not expressly approved by the party responsible for compliance could void the user's authority to operate the equipment.
- The antenna(s) used for this transmitter must not be co-located or operating in conjunction with any other antenna or transmitter.
- The country code selection is for non-US model only and is not available to all US model. Per FCC regulation, all Wi-Fi product marketed in US must

fixed to US operation channels only.

 Operations in the 5.15-5.25GHz band are restricted to indoor usage only.

INDUSTRY CANADA STATEMENT (IC: 8090A-PC4000)

This device complies with Industry Canada licenseexempt RSS standard(s). Operation is subject to the following two conditions:

- This device may not cause interference, and
- This device must accept any interference, including interference that may cause undesired operation of the device.

Le présent appareil est conforme aux CNR d'Industrie Canada applicables aux appareils radio exempts de licence. L'exploitation est autorisée aux deux conditions suivantes:

- l'appareil ne doit pas produire de brouillage, et
- l'utilisateur de l'appareil doit accepter tout brouillage radioélectrique subi, même si le brouillage est susceptible d'en compromettre le fonctionnement.

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

- This device complies with RSS-310 of Industry Canada. Operation is subject to the condition that this device does not cause harmful interference. Cet appareil est conforme à la norme RSS-310 d'Industrie Canada. L'opération est soumise à la condition que cet appareil ne provoque aucune interférence nuisible.
- This device and its antenna(s) must not be colocated or operating in conjunction with any other antenna or transmitter, except tested built-in radios.
- Cet appareil et son antenne ne doivent pas être situés ou fonctionner en conjonction avec une autre antenne ou un autre émetteur, exception faites des radios intégrées qui ont été testées.
- The County Code Selection feature is disabled for products marketed in the US/ Canada.
 La fonction de sélection de l'indicatif du pays est désactivée pour les produits commercialisés aux États-Unis et au Canada.
