User Guide

LG LANCET™ for Android™
Before you begin using your new phone

Included in the box with your phone are separate information leaflets. These leaflets provide you with important information regarding your new device. Please read all of the information provided. This information will help you to get the most out of your phone, reduce the risk of injury, avoid damage to your device, and make you aware of legal regulations regarding the use of this device.

It’s important to review the Product Safety and Warranty Information guide before you begin using your new phone. Please follow all of the product safety and operating instructions and retain them for future reference. Observe all warnings to reduce the risk of injury, damage, and legal liabilities.

Phone Overview
Front View

1. **Earpiece** Lets you hear callers and automated prompts.
2. **Front Camera** Use to take pictures and record videos of yourself. You can also use this for video chatting. Keep it clean for optimal performance.
3. **Proximity Sensor** Senses proximity toward other objects (such as your head) so that tap commands are not accidentally activated during a call or when carried inside a pocket. It also employs an ambient sensor which measures the surrounding light and adjusts the LCD brightness to provide a vivid screen.

**NOTE** Don’t block the sensor or near the sensor to avoid problems with the touch screen.

**NOTES**
- All screen shots in this guide are simulated. Actual displays may vary.
- Instructions to perform tasks in this guide are based on the default settings and may change depending on the mode and software version on your phone.
4. **Rear Camera** Use to take photos and record videos. Keep it clean for optimal performance.

5. **Power/Lock Key** Press to turn off the screen backlight and lock the screen, or turn the screen backlight back on. Press and hold to turn the phone on/off, restart it, and activate/deactivate Airplane mode.

6. **Speaker** Use to listen to audio (e.g., music, videos, sound clips, speakerphone, etc.) from the rear speaker instead of the earpiece.

7. **Volume Keys** Press to adjust the ringer, the media volumes, or the in-call volume during a call. They also access shortcuts when enabled in the Settings menu.

**TIPS**

- With the screen backlight off (asleep), you can press the **Volume Down Key** twice to activate the **Camera** app.
- With the screen backlight off (asleep), you can press the **Volume Up Key** twice to access the **QuickMemo+** app.

8. **Flash** Brightens up the captured image or recorded video when you turn on the flash.
9. **3.5mm Headset Jack** Allows you to plug in an optional headset for convenient, hands-free conversations. You can also plug in headphones to listen to music.

10. **USB/Charger Port** Allows you to connect the phone and the USB cable for use with the charger adapter, or other compatible accessories.

11. **Microphone** Transmits your voice to the other caller. It’s also used for voice-activated functions.

**Help**

The Help app allows you to quickly and conveniently view information about your phone, including how-to videos, Icon glossary, etc.

To access Help, tap the **Home Button** 🏛️ > the **Apps** icon 🎞️ > **Help** 📚.

**Setting Up Your Phone**

**Step 1. Remove the Back Cover**

With the phone facing down, insert your fingernail into the slot located on the lower left of the back cover and lift the cover up gently.
Step 2. Insert the Battery
Insert the battery, making sure to align the gold contacts. Press down gently to secure the battery.

Step 3. Replace the Back Cover
Place the cover over the back of the phone, then press down along the edges to secure the cover.
Step 4. Charge the Phone

Before turning on your phone, fully charge the battery. Be sure to use the USB cable and charger adapter that came with your phone. Correctly orient the USB cable plug before inserting it in the USB/Charger Port to avoid damage to your phone. See Charging Your Phone on pages 12 and 13 for more information.

NOTE It’s important to fully charge the battery before initial use of the phone to maximize the battery’s lifetime.
Removing the Battery and SIM Card

Removing the battery
1. With the phone facing down, insert your fingernail into the slot located on the lower left of the back cover and lift the cover up gently.

2. Use the fingertip cutout at the bottom of the battery compartment to lift the battery out.

Removing the SIM card
The SIM card is pre-installed in your smartphone. If you need to replace your SIM card, refer to the following instructions.
1. Turn the phone off, then remove the back cover and the battery (as demonstrated in the previous instructions).
2. Locate the slot for the SIM card (the lower of the two slots above the upper-right corner of the battery compartment) and gently slide the SIM card out to remove it.
Inserting and Removing a Memory Card

Inserting a microSD card
1. Remove the back cover (as demonstrated in the previous instructions).

2. Position the microSD card (sold separately) with the label side facing up and the gold contacts toward the slot, then carefully slide it into the upper slot until it's secured in place.

NOTE The microSD card can be easily damaged by improper operation. Please be careful when inserting, removing, or handling it.

To remove the microSD card
1. Unmount the microSD card.

   ▶ Tap the Home Button ○ > touch and hold the Recent Apps Button □ > Settings > Storage > Unmount SD card.

2. Remove the back cover and locate the microSD card slot (as demonstrated in the previous instructions).

3. Carefully pull the microSD card out to remove it.
To unmount the microSD card

It’s important to unmount the microSD card prior to removing it from the phone to avoid damage to it or the data saved on the card.
1. Tap the Home Button ○ > touch and hold the Recent Apps Button □.
2. Tap Settings > Storage.
3. Tap Unmount SD card.

Charging Your Phone

Your phone comes with a USB cable and a charger adapter. You can connect them together and charge from a power outlet, or you can use the USB cable alone to charge from your computer. Correctly orient the plugs before insertion to avoid damaging your phone and cable.

**NOTE**  Please only use an approved charging accessory to charge your LG phone. Improper handling of the USB/Charger Port, as well as the use of an incompatible charger, may cause damage to your phone and void the warranty.

1. Correctly orient the USB cable with the charger adapter, and connect them. As shown below, both the USB logo on the USB cable and the LG logo on the adapter will face toward you.

![USB Cable and Charger Adapter Diagram](image)

2. The USB/Charger Port is located at the bottom of the phone. Correctly orient the cable’s plug with the port before plugging it in. As shown below, the USB logo on the cable will face upward.

3. Plug the charger adapter into an electrical outlet to begin charging.
Charging with the USB Cable

You can use your computer to charge your phone. To be able to charge with the USB cable, you need to have the necessary USB drivers installed on your PC first. Connect one end of the USB cable to the USB/Charger Port on your phone (as shown above) and connect the other end to a USB port on your PC. It’s best to use the rear USB port when connecting to a desktop PC. The USB hub should be powered by an external power source.

NOTE You may experience a slower charging rate when charging from your computer.

Optimizing Battery Life

You can extend your battery’s life between charges by turning off features that run in the background. You can also monitor how apps and system resources consume battery power.

Tips to extend the life of your battery

- Reduce the screen brightness and set a shorter screen timeout.
- Turn off radio communications (such as Wi-Fi, Bluetooth®, GPS, etc.) that you’re not actively using. (Note that the GPS receiver is only turned on when you’re using an app that makes use of it.)
- Turn off automatic syncing for Gmail, Calendar, Contacts, and other apps if you don’t need it.

NOTES • Allowing other devices to use your device’s hotspot connection will drain your battery more quickly.
• If you accidently press the Power/Lock Key while the phone is in your pocket, the proximity sensor prevents the screen from turning on in order to save battery power.
To check the battery charge level
Tap the Home Button > touch and hold the Recent Apps Button > Settings > Battery.

- The battery level (as a percentage of fully charged) and the battery status (Charging or Discharging) is displayed at the top of the screen.
- Checkmark the Battery percentage on Status Bar checkbox to display the percentage of remaining battery charge on the Status Bar next to the battery icon.
- Tap Battery saver to view and/or modify your Battery saver settings.

To monitor and control what uses the battery
The Battery usage screen allows you to see which apps are consuming the most battery power. Information on this screen allows you to identify downloaded apps you may want to turn off when not being used, so you can get the most out of your battery power.

- Tap the Home Button > touch and hold the Recent Apps Button > Settings > Battery > Battery usage.
  
  OR

- Tap the Home Button > touch and hold the Recent Apps Button > Settings > About phone > Battery > Battery usage.

The top of the Battery usage screen displays a usage graph and below it, battery usage times. It lists all of the apps or services using battery power from the greatest amount of energy used to the least amount.

- Tap an app or service in the Battery usage screen to see details about its power consumption. Different apps or services offer different kinds of information, and they may even include options to modify the settings so you can reduce power consumption by that app (or stop running the app).

Battery saver
Battery saver changes certain settings to conserve battery power until you can recharge your phone. If you turn Battery saver On, it will automatically activate when the battery charge level drops to the level you set. If Battery
saver is off, you’ll be prompted to turn on Battery saver when the battery reaches low levels.

- Tap the Home Button > touch and hold the Recent Apps Button > Settings > Battery > Battery saver.

- From the Battery saver screen, select to activate Battery saver immediately, or when the charge drops to 5% or 15%. If you turn off Battery saver, when the battery charge becomes low, a notification prompts you to turn it on.

- After you modify the Battery saver settings to your preferences, tap the switch to toggle it On (blue) or Off (gray).

### Turning Your Phone On and Off

**Turning your phone on**

- Press and hold the Power/Lock Key on the back of the phone for a couple of seconds until the screen turns on.

**Turning your phone off**

1. Press and hold the Power/Lock Key on the back of the phone until the Phone options menu appears.
2. Tap Power off in the Phone options menu.
3. Tap OK to confirm that you want to turn off the phone.

**Turning the screen on using the KnockON feature**

The KnockON feature allows you to double-tap the screen to easily turn the screen on or off.

- Quickly double-tap the center of the dark screen to turn on the backlight and display the Lock screen.

- Quickly double-tap the Status Bar, an empty area on the Home screen, or the Lock screen to turn the screen off.

**NOTES**

- The backlight will not turn on if the proximity sensor is covered.
- When the screen is off and you double-tap the screen with Knock Code activated, the Knock Code grid is displayed for you to enter your Knock Code.
Turning the screen on using the Knock Code feature

If your Lock screen unlock sequence is set to a Knock Code, tap your Knock Code on the darkened screen to automatically turn on the backlight and unlock the screen at the same time.

**TIP** When the screen is in timeout and a Knock Code is set, pressing the Power/Lock Key (on the back of the phone) displays the Lock screen (e.g., to check the time). You can tap your Knock Code to unlock the screen or press the Power/Lock Key again (or double-tap the Status Bar) to turn the backlight back off.

**NOTES**
- Entering the incorrect Knock Code 6 times and you’ll be prompted you to enter your backup PIN to unlock your phone.
- Use a fingertip instead of a fingernail to tap your Knock code on the screen.

Setting up the Knock Code feature

1. Tap the Home Button ➤ touch and hold the Recent Apps Button ➤ Lock screen settings.
2. Tap Select screen lock ➤ Knock Code.
3. Tap the squares in a pattern (from 3 to 8 taps) to set your Knock Code, tap DONE, enter it again, then tap CONFIRM.

To unlock the phone

If you don’t use the phone for a while, the screen and backlight will turn off to conserve battery power. To unlock the phone’s default Lock screen:

**NOTE** The default Lock screen simply locks the screen to prevent unintentional actions. For more security to guard against unauthorized use, you can set an unlock requirement (such as a Knock Code, pattern, PIN, password) that will need to be entered to unlock it.

1. Turn the screen on.
   - Press the Power/Lock Key (on the back of the phone).
   **NOTE** Avoid covering the proximity sensor when turning the screen on. Doing so, immediately turns the screen off.
   **OR**
   - Quickly double-tap the center of the screen (KnockON).
2. From the center of the screen, swipe in any direction to unlock it.
   - To use a shortcut, swipe the shortcut icon (at the bottom of the screen) in any direction. The screen will unlock and launch the app.

**Your Google Account**

You must sign into a Google Account to use Gmail, Hangouts, Google Calendar, and other Google apps; to download apps from Play Store; to back up your settings to Google servers; and to take advantage of other Google services on your phone.

**IMPORTANT**

- If you don’t sign into a Google Account during setup, you’re prompted to sign in or to create a Google Account the first time you start an app that requires one, such as Gmail or Play Store.
- When you sign in, you’re prompted to enter your username and password using the on-screen keyboard.
- After you sign in, your contacts, Gmail messages, Calendar events, and other information from these apps and services on the web are synchronized with your phone.
- If you have an enterprise account through your company or other organization, your IT department may have special instructions on how to sign in to that account.

**Setting up your Google Account**

If you use Setup Wizard to set up your Google Account, it guides you through the following steps.

1. On your phone, launch an application that requires a Google Account (such as Play Store or Gmail).
2. Enter your email and tap NEXT.
   - **NOTE** If you don’t already have a Google Account, tap Create a New Account and follow the on-screen prompts to create your new account.
3. Enter your password and tap NEXT.
4. Follow the rest of the instructions on the screen.
   
   Your Gmail, Google Contacts, and Google Calendar events will all be synchronized with your phone automatically.
The Basics

Anti-Theft Guide

You can set up your device to prevent other people from using it if it’s been reset to factory settings without your permission. For example, if your device is lost, stolen, or wiped, only someone with your Google account or screen lock information can use the device.

All you need to make sure your device is protected is:

- **Set a screen lock**: If your device is lost or stolen but you have a screen lock set, the device can’t be erased using the Settings menu unless your screen is unlocked.

- **Add your Google account on your device**: If your device is wiped but you have your Google account on it, the device can’t finish the setup process until your Google account information is entered again.

After your device is protected, you’ll need to either unlock your screen or enter your Google account password if you need to do a factory reset. This ensures that you or someone you trust is doing the reset.

**NOTE**  Do not forget your Google account and password you had added to your device prior to performing a factory reset. If you can’t provide the account information during the setup process, you won’t be able to use the device at all after performing the factory reset.

Touch Screen

Your touch screen provides an excellent way to interact with and use your Android™ phone. With the touch of your finger, you can download and use available apps, make menu selections, and access data saved to your phone.

**Touch or tap** A single finger touch selects items. For example, tap an icon (e.g., an app, widget, or folder), tap words (e.g., menu selection or to answer an on-screen question), or touch letters and numbers to type.

**NOTE**  Don’t press too hard on the screen. It’s sensitive enough to detect a light, firm tap.

**Touch and hold** Touch an item on the screen and don’t lift your finger until an action occurs. For example, to open a context menu for a contact, touch and hold the contact entry until the menu pops up.
Drag  Touch and hold an item for a moment and then, without lifting your finger, move your finger on the screen until you reach the target position. For example, you can drag items on the Home screen to reposition them.

Swipe, slide, or flick  Move your finger quickly across the surface of the screen, without pausing when you first touch it (so you don’t drag an item instead). For example, you can browse through the Home screens by swiping left and right, slide the screen up or down to scroll through a list, or remove an app from the Recent apps screen by flicking its graphic off the screen.

Double-tap  Tap the screen twice quickly to zoom, highlight text, or turn the screen on/off. For example, quickly double-tap a section of a web page to zoom that section to fit the width of the screen and control the zoom in Maps and in other apps. Double-tap a word to highlight it. Double-tap can also activate the KnockON feature to turn the screen on or off. Double-tap also activates a new event in the Calendar app.

NOTE  The Accessibility settings shortcuts and Touch zoom accessibility features use a triple-tap.

Pinch-to-zoom  Use your index finger and thumb in a pinch motion (to zoom out) or spread motion (to zoom in) when using Chrome, a map, photos, the rear camera lens, the Contacts list, the Favorites list, the Groups list, the Messaging list, and a music list. Spread apart to make screen information larger (easier to see and read), or pinch together to view more area and information. The pinch gesture also changes the Home screen. Pinch in on the Home screen to change to mini panel view, then spread apart to return to the full screen view. Spread apart on the Home screen to hide all of your Home screen items, then pinch in to redisplay them.

Rotate the screen  From many apps and menus, the orientation of the screen adjusts to the phone’s physical orientation by rotating the screen. You can deactivate this function in the Display settings menu.
Getting to Know the Home Screen

The Home screen is your starting point to access all of the features on your phone using simple motions on the screen. It’s comprised of multiple panels (swipe horizontally to switch). You can customize all of your Home screen panels with app shortcuts, icons, widgets, and other features.

Status Bar
Shows device status information, including the time, signal strength, battery status, and notification icons.

App Icon
Tap an icon (app, widget, folder, etc.) to open and use it.

Quick Access Bar
Icons that provide easy, one-touch access to the functions used most often.

Apps Icon
Tap here to open the Applications screen to view all of your installed apps.

Home Touch Buttons
Displayed on all screens, these buttons allow you to easily navigate within the device software.

Quick Access Bar icons
The Quick Access Bar is located on all of your Home screen panels to allow quick and easy access to the apps you use most often.

Modifying the Quick Access Bar icons
- **Rearrange**: Touch and hold the icon to move, then drag it to another position in the Quick Access Bar.
- **Add**: Open the Applications screen, then drag the icon you want onto the Quick Access Bar.
- **Delete**: Touch and hold the icon to delete, then drag it to the Remove bar that appears at the top of the screen.
Home Touch Buttons

The Home Touch Buttons are displayed in a bar at the bottom of all of the screens to provide easy navigation within the device software.

☐ Back Button: Tap to back up one step at a time and close on-screen items such as pop-up messages, the on-screen keyboard, etc.

☐ Home Button: Tap to immediately return to the Home screen. Touch and hold it to access the Google Now shortcut.

☐ Recent Apps Button: Tap to display the apps you recently used as well as all of your open websites. Touch and hold it to access available options for the current screen or app.

Modifying the Home Touch Buttons

You can change which buttons are displayed in the Home Touch Buttons Bar, as well as how they’re displayed.

1. Tap the Home Button ☐ > touch and hold the Recent Apps Button ☐ > Settings > Display > Home touch buttons.

2. Select the modification you want to change.

   ▶ Tap Button combination to select which Home Touch Buttons you want in the bar and their location within the bar. Choose from the Back Button, the Home Button, the Recent Apps Button, the Notification Button, and the QuickMemo+ Button.

   ▶ Tap Color to set the button color. Choose White or Black.

To return to the Home screen

▶ Tap the Home Button ☐ at any time, from any app.
To view other Home screen panels

- Swipe (or flick) your finger left or right across the Home screen. The Home screen is comprised of four sliding panels, but you can add up to eight panels to allow more space for icons, widgets, shortcuts, and other items.

![Home Screen Panel Indicator](image)

The white dot (above the Quick Access Bar) indicates the current Home screen panel.

- Tap any of the Home screen panel indicator dots (above the Quick Access Bar) to immediately jump to that panel.

- Pinch in on the Home screen to display the mini panel view, then tap the Home screen panel you want to access.

**Mini Panel View**

![Mini Panel View](image)

Mini panel view allows direct access to any of the Home screen panels and also allows you to manage them. You can add, delete, and rearrange the panel order as well as set the default Home screen panel.
Pinch in on any of the Home screen panels to change from full screen view to mini panel view. From mini panel view you have the following options:

- To go directly to any panel, simply tap the one you want.
- To add another panel, tap the Add panel icon.
- To delete a panel, touch and hold the panel to delete, drag it to the Remove bar at the top of the screen, then lift your finger.
- To rearrange your panels, touch and hold the panel to move, drag it on top of the panel position where you want it, then lift your finger. The moved panel takes that position and the remaining panels shift accordingly.
- To set another panel as the default Home screen, tap the Default icon at the upper-right corner of the mini panel you want to be your default Home screen panel.

**NOTE** Changing the default Home screen panel does not change its position with the other panels, but its Default icon turns blue.

**Hiding items on the Home screen**

Place two fingers on the screen, then spread them apart to hide the items on your Home screen so that only your wallpaper, the Status Bar, and the Home Touch Buttons Bar are displayed. To redisplay your Home screen with all of its icons and widgets, pinch in on the screen or tap the Back Button.

**NOTE** The device automatically reverts to the full screen view after screen timeout.
Using Dual View

Slide the screen right or left to view different Home screen panels.

- **Item List**: Touch and hold an icon, then drag it onto the panel where you want it.
- **Category Tabs**: Tap a category to display its available items.

Dual view allows you to easily add items to any of the Home screen panels. Touch and hold an empty spot on a Home screen panel to view your Home screen on top and selections (Apps tab, Widgets tab, or Wallpapers tab) on the bottom. Flick sideways to scroll through the Home screen panels to display the panel you want. Tap the type of item you want to add (from the categories tabs at the bottom of the screen), then flick sideways to scroll through the available choices. Simply tap the item you want to automatically add it to the panel viewed at the top of the screen.

**NOTE**  The Quick Access Bar isn’t displayed while in Dual view.

To return to the full screen view, tap the **Back Button</b>** or tap one of the Home screen panels.

**NOTE**  The device automatically reverts to full screen view after screen timeout.
**Home screen version**

EasyHome is a more simplified version of the Home screen that you can choose to use on your phone.

Tap the **Home Button** ○ > touch and hold the **Recent Apps Button** □ > **Home screen settings** > **Select Home** > **EasyHome**.

The EasyHome Home screen has three panels.

Its main panel has 8 application icons that you can use with a single tap. Touch and hold one to remove or replace it. The top right of the screen displays the date and time. Tap it to access the **Clock** app. The top left of the screen displays a Weather widget. Tap it to access the **Weather** app.

- Swipe to the right on the main panel to access a panel you can customize with call/text message shortcuts for the contacts you set and also open your call history. Tap **Call logs** to open the Phone app’s **Recent** tab that lists all of your recent calls. Tap one of the 12 Contact shortcut locations, then tap the contact you want to set. After a shortcut is set, tap it to use it or delete it.

- Swipe to the left on the main panel to access a panel you can customize with additional app shortcuts and also open the Applications screen. Tap **View all apps** to open the Applications screen with all of your installed apps. To add an app icon, tap the **Add** icon +, then tap the app you want.

**To change back to the Android Home screen**

Tap the **Home Button** ○ > touch and hold the **Recent Apps Button** □ > **System settings** > **Home screen** > **Select Home** > **Home**.
**Apps: How to View, Open, and Switch**

All of the apps on your phone, including any apps that you downloaded and installed from Play Store or other sources, are grouped together on the Applications screen, which you access from your Home screen. If you have more apps than can fit on the Applications screen, you can slide the screen left or right to view more.

**Applications screen options**

You can change the look of your Applications screen.

1. Tap the **Home Button** ☺️ > the **Apps** icon ☰️, then tap the **Apps** tab, if necessary.
2. Tap the **Menu** icon 📖 to access the following Applications screen options:

- **View apps by:** Tap to sort your apps either in alphabetical order, by downloaded date, or custom.

- **Show small/large icons:** Tap to change the size (large or small) for the icons displayed in the Applications screen.

- **Hide/Show apps:** Tap to set which app icons will be displayed in your Applications screen. Checkmark the icons you want to hide, then tap the Checkmark icon 🔄.

- **Edit/Uninstall apps:** Tap to view app information or move apps on the screen. Tap an app icon to view its information. Touch and hold an app, then drag it to move it.

- **Home screen settings:** Tap to access the Home screen settings menu.

### Opening an app

- Open an app simply by tapping its icon on the screen.

  **TIP** You can customize your Home screen with the app icons you use most often. Apps are located on the Applications screen, but you can copy any app icon to your Home screen for faster, more convenient access. No matter where the icon is, on the Applications screen or your Home screen, just tap it to open and use it.

### Opening multiple apps

1. Tap an app icon to open it.

2. Tap the **Home Button** 🔄.

   **NOTE** If the app icon you want is on your Home screen, simply tap the icon to open and use it.

3. Tap the **Apps** icon 📚.

4. Tap the **Apps** tab (if necessary), then tap the icon for the other app you want to open.

### Switching between multiple apps

1. Tap the **Recent Apps Button** 📚. A screen opens and displays screenshot tabs of all of the apps (and websites) that are currently open.
The Basics

2. Tap the app you want to use, tap the Close icon on the app to close it, or tap the Back Button to return to the current screen.

Adding items to the Home screen
1. Tap the Home Button > the Apps icon, then tap the Apps tab, if necessary.

   NOTE You can tap the Widgets tab (at the top of the screen) to place a widget on the Home screen.

2. Touch and hold the icon you want to add to your Home screen. The Applications screen closes and the Home screen is displayed.

3. Drag the icon to where you want it on the screen, then lift your finger.

Moving apps to other Home screen panels
You can move app icons to any Home screen panel. Touch and hold, then drag the icon to the left or right edge of the screen to advance to the other panels before lifting your finger.

Customizing an app icon on your Home screen
You can create your own custom app icon(s) using the images in your Gallery. Your customized app icon(s) are only applied to icons on your Home screen. The Applications screen is not affected.
1. Touch and hold the icon you want to customize, then release the icon. An editing icon appears at the upper-right corner of the app icon.

**NOTE** If an icon you placed can be resized, you'll see a blue box around the icon after you touch, hold and release it. Drag the edges of the box to resize it.

2. Tap the app icon (while the edit icon is still displayed).

3. Tap the icon design you want from the available icon choices, then tap OK.

**OR**

Tap the *Add new* icon set the size for the icon, then tap OK. Select the image you want to use for the app, crop the image (if necessary), then tap OK.

**NOTE** Your custom photo icons are saved so you can easily select them for any of your icon images. Tap the *Delete* icon to remove any of your custom photo icons.

### Changing an icon into a widget

Some app icons can be resized into a widget. Touch and hold the icon you want, then release the icon. A blue frame appears around the icon if it can be resized (if it can't, only the Edit icon is displayed). Drag the corners of the frame to size it as you want.
Text Input Methods

The on-screen keyboard displays automatically on the screen when you need to enter text. To manually display the on-screen keyboard, simply tap a text field where you want to enter text.

Selection Box
Tap a displayed item to insert it in the text field.

Tap to enter text by voice. Touch and hold for clip tray entry (or you can access keyboard settings).

Toggles between 123/SYM mode and ABC mode.

Modifying your LG keyboard characteristics

Tap the Home Button > touch and hold the Recent Apps Button > Settings > Language & input > the Settings icon (next to LG Keyboard) > Keyboard height and layout.

- The QWERTY layout setting allows you to select the default buttons on either side of the Space button.
- The Keyboard height setting allows you to change the size ratio between the keyboard (including the size of its buttons) and the screen.

</table>

**NOTE** Enable the Path input setting to use this feature.
Text input settings
To change your text input settings and see the dictionary of terms you’ve used, tap the Home Button ○ > touch and hold the Recent Apps Button □ > Settings > Language & input. From this menu you can change the language for your phone’s software, set your keyboard input (including setting multiple languages and how it reacts), set Google voice settings, set your voice search and text-to-speech output preferences, as well as the set the pointer reaction time. See the Settings section for more information about the keyboard settings.

Languages
You can set only one default language for your phone, but you can set multiple languages used for the on-screen keyboard.

To change the default language
- Tap the Home Button ○ > touch and hold the Recent Apps Button □ > Settings > Language & input > Language > tap the language you want.

To add additional languages for your keyboard
- Tap the Home Button ○ > touch and hold the Recent Apps Button □ > Settings > Language & input. Tap the Settings icon • (to the right of LG Keyboard), tap Input language and keyboard layout, then checkmark the languages you want the keyboard to be able to use.
Capturing a Screenshot

Press and hold the Volume Down Key and the Power/Lock Key at the same time for 2 seconds to capture a screenshot of the current screen.

To view the captured image, tap the Home Button > the Apps icon > Gallery > the Screenshots folder.

Using QuickMemo+ to capture a screenshot

On the screen you want to capture, drag the Status Bar downward and tap the QuickMemo+ icon (in the Quick settings bar).

Phone’s Status Icons

The Status Bar appears at the top of every screen. It displays icons indicating that you’ve received notifications (on the left) and icons indicating the phone’s status (on the right), along with the current time.

The following icons may appear in the Status Bar.

Managing Notifications

Notification icons report the arrival of new messages, calendar events, alarms, as well as ongoing events, such as when you’re on a call. When you receive a notification, the notification icon will be displayed in the Status Bar. You can open the Notifications panel to view a list of all of your recent notifications. Depending on your settings, you may hear a notification sound, and/or see a notification light (at the upper-left corner of the phone), and/or the phone may vibrate.
To open the Notifications panel

Touch and drag the Status Bar to the bottom of the screen.

The Notifications panel displays a list of your current notifications, organized into ongoing and event-based notifications. The Quick settings bar (at the top of the panel) allows you to quickly and easily change commonly used settings.

**NOTE** You can also access the complete Settings menu from this panel by tapping the **Settings** icon.

To respond to a notification

1. Open the Notifications panel. Your current notifications are listed in the panel, each with a brief description.

2. Tap a notification to view it.

   The Notifications panel will close and the app that corresponds to your selection will open. For example, new voicemail notifications dial your voicemail box and Gmail notifications open the Gmail app so you can read your new messages.
Quick settings on the Notifications panel

The top of the Notifications panel includes a Quick settings bar. The icons in this bar provide a quick, convenient way to change settings without accessing any apps. If you set more than five icons on the bar, swipe left and right to scroll through the list.

Customizing the Quick settings bar icons

You can set the order of the icons displayed in the Quick settings bar as well as which icons are displayed.

1. Open the Notifications panel, then tap the **Edit** icon (at the right side of the Quick settings bar).

   - Drag one of the icon handles at the right side of the screen to move its icon to another position in the Quick settings bar.

   - Checkmark each of the items you want to appear in the Quick settings bar.

   **NOTE**  Changing the checkmarks reorganizes the icons in the Quick settings bar.

2. Tap the **Back Button** to return to the Notifications panel.
Searching Your Phone and the Web

You can search for information on your phone and on the web using the Google search app.

Some apps, such as Gmail, Contacts, and Chrome, have the ability to search for contents within those specific apps.

You can conduct the search by typing in the search terms or saying what you’re looking for. As you enter text, the search app can provide suggestions so you don’t necessarily have to type out your full request.

Phone and Web search using text entry

1. Tap the Google Search Widget on the Home screen.

   Google Now opens automatically and you can use the on-screen keyboard to search or tap the Microphone icon to say what you’re looking for.

   Voice Search
   Tap here to search by voice.

   Search Box
   Tap here to type your search request.
2. Enter the text you’re searching for in the search box.

As you type, search results from your phone, previous search terms, and web search suggestions appear. Tap an item to activate that search result.

3. Tap the **Search button** on the on-screen keyboard to search for the text you entered in the search box.

*TIP* The bottom of the search results screen includes a search category bar. You can scroll through them, then tap one to display your results using only that category.

**Google Search Options menu**

From the Search app, touch and hold the **Recent Apps Button** to access **Settings** and **Help & feedback**.

**Search preference settings**

You can use the Search preference settings to configure some aspects of web search and what phone features you want to include in your searches. To access these settings:

1. From the Search app, touch and hold the **Recent Apps Button > Settings**.

2. Select **Accounts & privacy, Search language, Voice, Phone search, Now cards**, or **About** then adjust the settings as necessary.
Setting Your Lock Screen

There are several Lock screen types allowing you to lock your phone so that only you can unlock it to make calls, access your data, buy apps, and otherwise prevent unauthorized use.

Setting a Screen Lock for the First Time

1. Tap the Home Button > touch and hold the Recent Apps Button > Lock screen settings.
2. Tap Select screen lock.
3. Tap Swipe, Knock Code, Pattern, PIN, or Password.

**Swipe:** A swipe motion in any direction on the screen will unlock the screen. This is the default Lock screen that simply guards against unintentional actions.

**Knock Code:** Unlocks the screen using a tapping a sequence on the screen’s 2x2 grid. (When the screen is in timeout, the 2x2 grid is invisible, but the grid is displayed on the Knock Code Lock screen.) The first time you set a Knock Code, you’ll see a tutorial with instructions on how to create it. Tap a sequence on the 2x2 grid (from 3 to 8 taps), then tap DONE. Tap your sequence again and tap CONFIRM.

**NOTE** You’re prompted to create a Backup PIN as a safety measure in case you forget your Knock Code unlock sequence.

**Pattern:** Unlocks the screen using a pattern you draw with your finger. The first time you set an unlock pattern, you’ll see a tutorial with instructions on how to create it. Read the tutorial, then tap NEXT. Draw your pattern (connect at least 4 dots) and tap NEXT. Then redraw your pattern and tap CONFIRM.

**NOTE** You’re prompted to create a Backup PIN as a safety measure in case you forget your unlock pattern sequence.

**PIN** Unlocks the screen with a number sequence. Enter a PIN (at least 4 digits) and tap NEXT. Reenter your PIN and tap OK to confirm it.

**Password** Unlocks the screen with an alphanumeric sequence. Enter a password (at least 4 characters) and tap NEXT. Re-enter your password and tap OK to confirm it.
From then on, any time you want to unlock the screen, you’ll need to perform the unlock action you set (swipe, Knock Code, pattern, PIN, or password) to gain access to it.

Changing Your Screen Lock

1. Tap the Home Button > touch and hold the Recent Apps Button > Lock screen settings.
2. Tap Select screen lock.
3. Confirm your unlock information (if necessary).
4. Tap the desired screen lock option.
5. You’re prompted to enter your screen unlock sequence (and Backup PIN, if necessary).

NOTES
• If you’ve set up a Microsoft Exchange account, you might only be able to use a password.
• After 5 unsuccessful attempts to unlock your phone, you’re prompted to enter a text phrase to confirm that you’re trying to unlock your phone.
• You have 10 opportunities to enter your unlock sequence. After 10 unsuccessful attempts, your phone will automatically perform a factory data reset and all of your personal files will be erased. You will be warned after the 9th unsuccessful attempt.
• If you’ve set a Knock Code, after 6 unsuccessful attempts, you’re prompted to enter your Backup PIN to unlock your phone.

Security lock timer

If a security lock is enabled, you can set the delay time after the screen darkens due to inactivity before the screen automatically locks and requires you to enter your unlock sequence.

1. Tap the Home Button > touch and hold the Recent Apps Button > Lock screen settings.
2. Tap Security lock timer, then tap the setting you want to use.

Power button instantly locks

If a security lock is enabled, checkmark the Power button instantly locks checkbox to override the Security lock timer setting and lock the screen as soon as you press the Power/Lock Key (on the back of the phone).
1. Tap the Home Button 🏛 > touch and hold the Recent Apps Button 🔎 > Lock screen settings.

2. Checkmark the Power button instantly locks checkbox.

**The Lock screen wallpaper**

You can set the Lock screen wallpaper separately from your Home screen wallpaper.

1. Tap the Home Button 🏛 > touch and hold the Recent Apps Button 🔎 > Lock screen settings.

2. Tap Wallpaper.
   - Tap Wallpaper gallery to select one of the available wallpaper images.
   - Tap Gallery to select an image from your Gallery.
**Wi-Fi**

With Wi-Fi, you can use high-speed Internet access within the coverage of the wireless access point (AP). Enjoy wireless Internet using Wi-Fi, without extra charges.

**Connecting to Wi-Fi networks**

To use Wi-Fi on your phone you need to access a wireless access point or ‘hotspot’. Some access points are open and you can simply connect to them. Others are hidden or use security features. You must configure your phone to be able to connect to them. Turn off Wi-Fi when you’re not using it to extend the life of your battery.

**Turning Wi-Fi on and connecting to a Wi-Fi network**

1. Tap the **Home Button** > **Apps icon** > **Settings** > **Wi-Fi**.
2. Tap the **Wi-Fi switch** to turn Wi-Fi on and start scanning for available Wi-Fi networks.
3. Tap **SEARCH** to see a list of active and in-range Wi-Fi networks.
   - Secured networks are indicated by a lock icon.
4. Tap a network to connect to it.
   - If the network is secured, you’re prompted to enter a password or other credentials. (Ask your network administrator for details.)

The Status Bar displays icons that indicate your Wi-Fi status.

**Wi-Fi Direct**

Wi-Fi Direct provides a direct connection between Wi-Fi enabled devices without requiring an access point.

**Turning on Wi-Fi Direct**

1. Tap the **Home Button** > **Apps icon** > **Settings** > **Wi-Fi**.
2. Tap the **Menu icon** > **Advanced Wi-Fi** > **Wi-Fi Direct**.

**NOTE** When in this menu, your device is visible to other visible Wi-Fi Direct devices nearby.
Connecting to Networks and Devices

**Bluetooth**

You can use Bluetooth to send data by running a corresponding application, but not from the Bluetooth menu as on most other mobile phones.

**NOTES**
- LG is not responsible for the loss, interception, or misuse of data sent or received via the Bluetooth wireless feature.
- Always ensure that you share and receive data with devices that are trusted and properly secured. If there are obstacles between the devices, the operating distance may be reduced.
- Some devices, especially those that are not tested or approved by Bluetooth SIG, may be incompatible with your device.

**Turning on Bluetooth and pairing your phone with a Bluetooth device**

You must pair your device with a Bluetooth device before you connect to it.

1. Tap the **Home Button** > the **Apps** icon > **Settings** > **Bluetooth**.
2. Tap the **Bluetooth** switch to turn Bluetooth on, then tap **SEARCH** to view the devices within your phone’s range.
3. Choose the device you want to pair with from the list.

Once the pairing is successful, your device will connect to the device.

**Send data using the Bluetooth wireless feature**

1. Open the item you want to send, then tap the **Sharing** icon.
   
   **OR**

   Touch and hold the item you want to send, then select **Share**.

   **OR**

   Open the item you want to send, then tap the **Menu** icon > **Share**.

2. Tap **Bluetooth** to share via Bluetooth.

   **NOTE**  The method for selecting an option may vary by data type.
3. Search for and pair with a Bluetooth-enabled device.
Receive data using the Bluetooth wireless feature

1. Tap the Home Button > the Apps icon > Settings > Bluetooth.
2. Tap the Bluetooth switch to turn Bluetooth on.
3. Pair the devices and tap ACCEPT when you receive a Bluetooth Authorization Request to accept the file(s).

PC connections with a USB cable

You can connect your phone to your PC to charge it and transfer items to the PC from the phone (and vice versa).

Transferring music, photos and videos using the Media device (MTP) mode

1. Connect your phone to a PC using the USB Cable (power cord) included with your phone.
2. If you haven’t installed the LG Android Platform Driver on your PC, you will need to manually change the settings. Tap the Home Button > the Apps icon > Settings > Storage > the Menu icon > USB PC connection > Media sync (MTP).
3. You can now view the mass storage content on your PC and transfer the files.

Synchronize with Windows Media Player

Ensure that Windows Media Player is installed on your PC.

1. Use the USB Cable to connect the phone to a PC on which Windows Media Player has been installed.
2. Select the Media sync (MTP) option (in the Options menu of the Storage setting).
3. When connected, a pop-up window will appear on the PC. Select the Windows Media Player option to synchronize music files.
4. Edit or enter your device’s name in the pop-up window (if necessary).
5. Select and drag music files to the sync list.

- The following requirements must be satisfied to synchronize with Windows Media Player.

<table>
<thead>
<tr>
<th>Item</th>
<th>Requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>OS</td>
<td>Microsoft Windows XP SP2, Vista or higher</td>
</tr>
<tr>
<td>Window Media Player version</td>
<td>Windows Media Player 10 or higher</td>
</tr>
</tbody>
</table>

- If the Windows Media Player version is older than 10, install version 10 or newer.

**PC connections with a USB cable for Mac OS X users**

You can transfer media contents to your Mac OS X PC from the phone and vice versa by setting up the Android File Transfer program.

1. Download and install the Android File Transfer program from the android.com website for Mac Users (http://www.android.com/filetransfer/).

2. Connect your phone to your computer, and double click the AFT (Android File Transfer program) application to start it up.

3. You can view the media contents, drag and drop the media file to and from the phone (or PC).
Placing and Ending Calls

The Phone app allows you to dial phone numbers manually or make calls from your phone’s memory. Manually dial calls using the Dial tab. Dial from your phone’s memory using the Recent calls tab, the Contacts tab, the Favorites tab, or the Groups tab.

To open the Phone app

- Tap the Home Button > the Phone icon.

Moving between the Phone app tabs

Tap any of the Phone app tabs (Dial, Recent, Contacts, Favorites, and Groups) at the top of the screen to view that tab. You can also swipe the screen horizontally to scroll to the other tabs. The current tab is displayed in white.

Modifying the Phone app tabs

You can rearrange the order of the Phone app tabs and/or delete the Favorites and Groups tabs.

1. Tap the Home Button > the Phone icon.
2. Tap the Menu icon , then tap Edit tabs.
   - Drag a tab handle to move it to the position where you want it in the list.
   - Tap the Favorites or Groups checkbox (checkmark displays the tab, no checkmark deletes it from the Phone app tabs bar).
3. When you’re finished making changes, tap SAVE.

To place a call by dialing

1. Tap the Home Button > the Phone icon > Dial tab.
2. Use the dialpad to enter the number you want to call.

- Tap the **Delete** button \( \times \) to erase digits one by one.
- To erase the entire number, touch and hold the **Delete** button \( \times \).
- To dial an international number, touch and hold \( 0+ \) to enter the plus ( + ) symbol. Then enter the international prefix for the country, followed by the full phone number.

3. Tap the **Call** button \( \text{📞} \) (on the dialpad) to dial the number that you entered.

- Press the **Volume Keys** to adjust the call volume.
- Use the on-screen buttons to enter additional numbers, place the call on hold to take another incoming call, add another call, use the speakerphone, end the call, and other options.
- You can use other phone features while the call is underway. If you open another app, the **Ongoing call** icon appears on the screen for the duration of the call.

**NOTE** If you opened other apps while on a call, you’ll need to return to the Call screen to end the call. To return to the Call screen, simply tap the **Ongoing call** icon (at the upper-left corner of the screen). You can also tap the **Home Button** \( \bigcirc \), then tap the **Phone** icon \( \text{📞} \) or drag the Status Bar down and tap the Current call notification on the Notifications panel.
You can make High Definition Voice and Video Calls with this phone when you add Advanced Calling to your line. Visit VerizonWireless.com/AdvancedCalling to learn how.

**To end a call**

- Simply tap the **End** button on the Call screen to end the call.

If you accessed other device functions while the call was in progress, there are several ways to return to the Call screen to end the call.

- Tap the **Ongoing call** icon (at the upper-left corner of the screen).
- Tap the **Home Button**, then tap the **Phone icon**.
  
  **TIP** If necessary, you can drag the **Ongoing call** icon to move it somewhere else the screen while using other device functions.

- Drag the Status Bar down, then tap the Current call notification on the Notifications panel.

**NOTE** You can also press the **Power/Lock Key** to end the call, if you activated this feature in the Call settings (tap the **Menu** icon in the Phone app).

**Calling numbers in your phone’s memory**

You can place calls using information stored in your phone. Anywhere you see a **Call icon** next to a number, tap it to automatically dial it.

**Speed dialing**

If you set up Speed dials in the Contacts app, you can dial a number by simply touching and holding the Speed dial number on the dialpad.

- Tap the **Home Button > the Phone icon > Dial tab**, then touch and hold the Speed dial number.

**Direct dialing**

A Direct dial widget is like a speed dial button on your Home screen. Tap it to automatically call the number you set (for example, your home phone number).

**To place a Direct dial widget on your Home screen**

1. Touch and hold an empty area on your Home screen.
2. Tap the **Widgets** tab > **Direct dial**.

3. Tap the contact in your Contacts list.

   **TIP** You can change the look of each Direct dial widget for easy identification. Touch, hold, and release the Direct Dial widget, then tap it. Select a theme icon or a photo icon, then tap **OK**.

### Answering or Rejecting Calls

When you receive a phone call, the Incoming call screen opens with the caller ID and any additional information about the caller that you’ve saved in the Contacts list. All incoming calls are recorded in the **Recent** tab.

**To answer a call**

- If the screen is unlocked, simply tap the **Answer** icon 🔄.
- If the screen is locked, swipe the **Answer** icon 🔄 in any direction to answer the call.
- If you were already on a call, tap the **Answer** icon 🔄 which places the first call on hold and connects the new call.

**NOTE** To silence the incoming call ringer, press either of the **Volume Keys**.
To ignore a call and divert it to voicemail

- If the screen is unlocked, simply tap the Ignore icon.
- If the screen is locked, swipe the Ignore icon in any direction to ignore the call.
- The caller is sent directly to your voicemail box to leave a message.

NOTE To silence the incoming call ringer, press either of the Volume Keys.

To ignore a call and send a text message

To display the Ignore with message option on the incoming call screen, enable it in the Settings menu.

1. Tap the Home Button > the Phone icon > the Menu icon > Call settings.
2. Tap the Allow ignore with message switch to toggle it On (blue).

TIP Tap Allow ignore with message to manage your text message choices.

To use the Ignore with message option, select it (tap or swipe its icon) on the incoming call screen, then tap the Send icon next to the text message you want to send in place of answering the call.
TIP If you tap one of the text messages instead, the Messaging app opens so you can modify the text before sending it to the caller.

NOTE This feature can only be used to send a message to another mobile phone. It’s not applicable to incoming landline calls.

Working With the Recent Tab

The Recent tab records all of the calls you’ve dialed, received, or missed. It offers a convenient way to redial a number, return a call, or add a number to your Contacts.

To open the Recent tab

- Tap the Home Button > the Phone icon.

The Recent tab lists your calls chronologically by phone number. The number in parenthesis indicates the number of calls recorded for that phone number.

Viewing call entry details

Open the Recent tab, then tap an entry to view all of the entries for that phone number. Calls are listed chronologically and each one includes the call type (received left, dialed right, missed , and ignored ), the date, the time of the call, and the phone number’s home location.
Filtering your list of calls
To view a specific call list, from the Recent tab, tap the Menu icon \(\text{Menu}\), then tap Filter. Tap the call type you want to view.
Tap the Back Button \(\leftarrow\) to return to the Recent tab screen.

To dial a number in the Recent tab
- From the Recent tab, tap the Call icon \(\text{Call}\) at the right of the call entry.
- From the Recent tab, tap the image to the left of the call entry to view all of the contact’s numbers saved in your phone’s memory. Tap a phone number to dial it.

**TIP** To insert an area code when you’re traveling, touch and hold the entry, then tap Copy call number in the context menu. Change to the Dial tab, touch and hold the phone number field, tap Paste, then edit the number as necessary before tapping the Call button \(\text{Call}\) on the keypad.

To add a number from the Recent tab to your Contacts
1. Open the Recent tab, then touch and hold the call entry.
2. Tap Add to Contacts in the context menu.
3. Tap New contact or Update contact and save it as necessary.

Clearing your Recent calls
You can delete the entire list of Recent calls at once or selectively delete entries.
1. Open the Recent tab.
2. Tap the Menu icon \(\text{Menu}\).
   - Tap Clear to select entries to remove from the list. Checkmark the entries to delete, tap CLEAR, then YES.
   - Tap Clear all to remove all of the entries from the list. Tap YES to confirm you want to Clear the entire list.

**NOTE** You can also select a specific number to be deleted. Touch and hold an entry in the Recent tab. Tap Clear all logs of this number, then tap YES to confirm.
Calling Your Contacts

Instead of manually dialing phone numbers using the dialpad, you can use your Contacts list to dial quickly and easily. You can also quickly call a contact using Quick Contact or Direct dial icons that you placed on your Home screen.

If you have contacts on the web, they’re synchronized with your phone when you first synchronize with your Google™ Account.

To call a contact
1. Tap the Home Button > the Contacts icon 📞.
2. Tap the contact you want to call, then tap the contact’s phone number you want to call.
   
   **TIP** If the entry only has one phone number saved, simply tap the Call icon 📞 next to the entry to dial it.

To call a favorite contact
1. Tap the Home Button > the Contacts icon 📞, then tap the Favorites tab.
2. Tap the contact you want to call.
3. Tap the contact’s phone number you want to call.

Instant List

Instant list is displayed on the Dial tab to help you use the information stored in your phone without needing to search for it first. Once you begin entering numbers, Instant list displays entries from your Contacts list or Recent calls that match the sequence you entered.

Sequence matches

Your phone searches for the entered sequence within the area code, prefix, or last digits. The matching number sequence is displayed within the number in blue text. The name and type of number (i.e., Mobile, Work, etc.) associated with the number you entered is displayed above the dialpad.

When there are multiple matches, the Instant list displays the number of
matches in your phone’s memory. Tap the Instant list icon 📚 on the right side of the screen to view the entire list of matching entries.

Selecting an Instant list entry
Tap an entry in the Instant list to insert it on the dialpad and tap the Call button 📞(on the dialpad) to dial it.

Options During a Call

Managing Multiple Calls
Contact your wireless service provider to find out which call services are supported.

To switch between current calls
- Tap the Swap calls button 📞 on the Call screen.
  The current call will be placed on hold and you’ll be connected with the other call.

**NOTE**  Swap Calls feature is only available when Advanced Calling is enabled.
To set up a conference call

Contact your wireless service provider to find out whether they support conference calls and how many participants you can include.

1. Place a call to the first participant.
2. When you’re connected, tap the Add call button on the Call screen.
3. Enter a phone number.
   - Use the Phone app tabs to select a saved number, then tap the Call icon.
   - OR
   - Use the buttons on the dialpad to manually enter a number, then tap the Call button.
4. After you’re connected, tap the Merge calls button (on the Call screen). The participant is added to the conference call.
Listening to Your Voicemail

When you have a new voicemail message, the Voicemail notification icon appears in the Status Bar. If you haven’t set up your voicemail number, or if you need to change it, you can do that in the Call settings (tap the Menu icon in the Phone app).

To listen to your Voicemail

- Open the Notifications panel and tap New voicemail.
- OR
- Tap the Voicemail icon on the Home screen.
- OR
- Tap the Home Button > the Phone icon > Dial tab > the Voicemail button (on the dialpad).

To set up your Voicemail

Typically, your carrier’s voicemail system guides you through the process of listening to and managing your voicemail. The first time you call your voicemail, it also guides you through the process of recording greetings, setting a password, etc.

1. Tap the Home Button > the Phone icon > Dial tab.
2. Tap the Voicemail button (on the dialpad) to dial your voice mailbox.
3. Follow the setup tutorial.
   - Enter a password.
   - Record a voice signature and greetings for your voice mailbox.
Chrome

The Chrome app allows you to access the Internet from your phone. Access and selections within this feature are dependent upon your service provider. For specific information on Internet access through your phone, contact your service provider.

**NOTES**
- You may incur additional charges for accessing the web and downloading media. For details, contact your service provider.
- Chrome may differ from this user guide due to updates via Play Store.

Viewing web pages

1. Tap the **Home Button** > the **Apps** icon > **Google** folder > **Chrome** or tap the **Chrome** icon directly on the Quick Access Bar.

2. Tap the URL input field to access a web page. Enter the web address (URL) of the web page, then tap the **Go** button on the on-screen keyboard.

   - When you begin entering text in the URL input field, suggestions appear below the address bar.

   **NOTE** You can change the search engine for your searches. From the **Chrome** app, tap the **Menu** icon > **Settings** > **Search engine**. Tap the search engine you want to use.
Search within a web page
1. While viewing the page, tap the Menu icon ➤ > Find in page.
2. Type the text you’re looking for in the find bar at the top of the screen.
   Matches are highlighted on the page (current match in orange and other found matches in yellow).

   - The find bar displays the total number of matches. Tap the up ↑ and down ↓ arrows in the find bar to go to each match.
   - Found matches are also indicated in the scroll column along the right side of the screen. Tap any of the highlights to jump directly to that match.

Searching the web by voice
Tap the address bar, tap the Close icon x in the bar, tap the Microphone icon ⌊, say a keyword, then tap one of the search results that appear.

Adding and viewing bookmarks
To add bookmarks, while viewing the page you want to bookmark, tap the Menu icon ➤ , then tap the Bookmark icon ☆.

To open a bookmarked web page, tap the Menu icon ➤ > Bookmarks and select the desired page.

Browse with tabs
You can easily browse several web pages simultaneously. Create multiple tabs for the sites you want, then tap the Recent Apps Button □ and tap the tab you want to access to switch between them.

Create a new tab
From the Chrome app, tap the Menu icon ➤ then tap New tab (or New incognito tab).
The New Tab page
Tap an icon at the bottom of the new tab screen to help you open the page that you want quickly.

- ★ Bookmarks The sites that you’ve bookmarked are listed here. Tap one to visit the site using the new tab you created. Touch and hold a bookmark to open a context menu to access Open in new tab, Open in incognito tab, Edit bookmark, and Delete bookmark.

- 🕒 Recent tabs Your recent websites are listed here including the ones on this device, recently closed, and on your other devices.

Download files
1. Touch and hold a download link.
2. In the context menu that appears, tap Save link.

To view downloaded files:
Tap the Home Button ○ > the Apps icon ☰ > LG folder > Downloads 📁.
- To open a downloaded file, tap it.
- To view earlier downloads, tap the heading date you want to view.
- To share downloads, tap the Share icon ⭕, checkmark the ones to share, then tap SHARE and choose a sharing method from the list.
- To clear files from your download history, tap the List icon 📊 > checkmark the entries to clear, tap CLEAR, then YES to confirm.
- Tap the Menu icon ☐ (at the upper-left of the screen) to switch the download file sort criteria.

Chrome Settings
To access the settings specific to the Chrome app:
1. From the Chrome app, tap the Menu icon ☐.
2. Tap Settings.
Contacts

The Contacts app allows you to store names, phone numbers, and other information in your phone’s memory. Entries are listed alphabetically. You can scroll through the list, or select the Favorites tab or Groups tab.

Use the Contacts app to add, view, and communicate with your friends, acquaintances, and associates.

To open your Contacts app

1. Tap the Home Button > the Contacts icon.

   NOTE You can also tap the Contacts tab from the Phone app.

If you have a new phone and haven’t added any contacts yet, hints will be displayed to help you start adding contacts to your phone.

Contacts list

When you open the Contacts app, your contacts list is displayed. The alphabet is displayed vertically along the right side of the screen with a blue bar that indicates where you are in the list.

In case of Emergency contacts is displayed above your list of contacts. Add up to 5 emergency entries from your contacts list. These are entries that someone can contact on your behalf in the event of an emergency, whether or not the phone is locked.

To add ICE entries

1. Tap the Home Button > the Contacts icon.
2. Tap In Case of Emergency contacts (at the top of the list).
3. Tap the Add entry icon.
4. Checkmark the entry (or entries) to add to your ICE list, then tap DONE.

ICE Information

In addition to your emergency contacts, you can enter personal information about you (such as medical record number, allergies, medications, special
instructions, etc.) that can be accessed in case of an emergency. To add your personal information:

1. From the emergency contacts screen, tap the Information icon.
2. Tap the Add icon, enter your information, then tap SAVE.

To search for a contact

1. Tap the Home Button > the Contacts icon.
2. Tap the Search contacts box and enter the contact name. Matches are displayed as you begin to type.

Searching your online contacts simultaneously

You can search for your contacts simultaneously from all of your online accounts.

To set your phone to search simultaneously, open the Contacts app, tap the Menu icon > Contacts settings > checkmark the Online search checkbox.

To open a list of your favorite contacts

- Open the Contacts app and tap the Favorites tab.
  Favorites lists the contacts you’ve designated as your favorites (at the top of the screen) and entries you’ve contacted frequently (at the bottom of the screen). While viewing the Favorites tab, tap the Menu icon then tap Grid view (or List view) to change how your favorites are displayed.

To open your groups list

- Open the Contacts app and tap the Groups tab.
  Groups displays your contacts by category (at the top of the screen) and your accounts (at the bottom of the screen).

To view details about a contact

1. Open the Contacts app.
2. Tap the contact whose details you want to view.
3. The information you entered for the contact is displayed. The following options are available (depending on the types of information saved).

- The **Dial** icon \( \text{📞} \) places a call to the number.
- The **Message** icon \( \text{✉️} \) starts a message.
- The **Email** icon \( \text{✉️} \) starts an email.
- The **Menu** icon \( \text{☰} \) accesses the following menu options: **Refresh**, **Delete**, **Share**, **Forward**, **Merge**, **Set as default**, **Export**, **Add to Home screen**, and **All calls to voice mail**.

**Adding Contacts**

You can add contacts on your phone and synchronize them with the contacts in your Google™ Account, Microsoft Exchange account, or other accounts that support syncing contacts.

Since your contacts can come from a variety of sources, the Contacts app attempts to join new information with existing similar contact entries to create a single entry. You can also manage that process manually by joining or splitting entries.
To add a new contact
1. Open the Contacts app.
2. Tap the New contact icon.
3. If you have more than one account with contacts, select the account where you want to save the contact by tapping the Accounts field (at the top of the screen).

   **NOTE** To change the account later, edit the entry, tap the account (at the top of the screen), then tap the account you want it assigned to.

4. Enter the contact’s name.
5. Tap a category of contact information, such as phone number or email address, to enter that kind of information about your contact.
   - Tap a category’s Add new icon to add more than one entry for that category. For example, in the phone number category, enter a work number and add a home number. Tap the label field to the right of the entered information to open a drop-down menu of preset labels. For example, HOME or WORK for a phone number.
   - Tap Add another field to add additional fields including Phonetic name, Organization, IM, Notes, Nickname, Website, and Events.
6. Personalize the contact entry.
   - Set a ringtone to identify calls from this contact.
   - Set the color of the notification LED (located at the upper-left corner of your phone) to identify notifications from this contact.
   - Tap the Picture frame icon to select a picture to identify the name in your list of contacts and in other apps.
7. When you’re finished, tap SAVE.

Editing a Contacts entry
1. Open the Contacts app, then tap the contact entry you want to edit.
2. Tap the Edit icon.
3. Edit the entry as needed, then tap SAVE.
Favorites Contacts
The Favorites tab contains a short list of the contacts you communicate with most often.

Adding or removing contacts in your Favorites list
1. Open the Contacts app, then tap a contact to view its details.
2. Tap the star at the top right of the screen.
   ▶ A gold-colored star indicates a Favorite.
   ▶ A gray-colored star indicates a normal contact.

Merging and separating contacts
When you have two or more entries for the same contact, you can merge them into a single entry. You can also separate contacts that were merged.
1. Open the Contacts app, then tap the contact entry you want to join with another entry.
2. Tap the Menu icon.
3. Tap Merge.
4. Tap a suggested entry or tap Show all contacts to select another entry.
Once entries have been merged, Separate is included in the Options menu to allow you to separate the joined entries.
1. Open the Contacts app, then tap the contact entry you want to separate.
2. Tap the Menu icon.
3. Tap Separate.
4. Tap YES.
Setting Speed Dials

Designating multiple speed dials
1. Open the Contacts app, then tap the Menu icon.
2. Tap Speed dial.
3. Tap the speed dial number to assign, then tap the Contact entry for it.
4. Repeat selecting a speed dial number and the desired Contact entry as necessary.

Transfer type
When you want to send your contacts entries, you can combine them all into one file or you can send separate vCard files.

To set the transfer type, from the Contacts app, tap the Menu icon > Contacts settings > Transfer type.

- **Send as one file**: This setting combines all of your contacts into one file. It allows a faster transfer, but some devices can’t receive contact information sent using this option.
- **Send separately**: This setting sends each contact as a separate vCard file. It allows all devices to receive your files.
Messaging

Three apps are preloaded on your phone that allow you to send messages. The Messaging app ☎️, the Message+ app 📝, and the Hangouts app 📺. Only one can be set as your default messaging app. Tap the Home Button ⏪ > the Apps icon ☺️ > Settings 📦 > More > Default message app to set your choice.

To open the Messaging app

- Tap the Home Button ⏪ > the Apps icon ☺️ > LG folder > Messaging 📩.

  NOTE  The Messaging app must be set as the default messaging app in order to use it. If Messaging is not your default app, a pop-up will appear. Tap YES to set it.

Using the Messaging app

To use the Messaging features, you must set it as the default messaging app.

  NOTE  You can view your messages in the Messaging app without setting it as your default app, but you can’t create a message.

- Tap the New message icon + to start a new text or multimedia message.

  Tap here to create a new message.

- Tap an existing message thread to open it.

- Tap the Menu icon ☑️ to access Search, Delete, and Settings.

  NOTE  Pinch in (or spread apart) on your list of messages to resize it for easier viewing or navigation.
To delete a message thread from the Messaging window
1. Touch and hold the message thread.
2. Tap Delete in the context menu that opens.
3. Tap YES to confirm you want to delete the message thread.

To send a text message
1. Open the Messaging app (set it as your default, if necessary), then tap the New message icon.
2. Enter the recipient(s) in the To box.
   - Tap the Contacts icon, then select one or more entries from your Contacts list.
   - Enter a name (or a partial number) then tap a suggestion displayed from your Contacts list.
   - Enter a number manually for phone numbers not in your Contacts list.
3. Tap the text box, then enter your message.
   A character counter is displayed in the message box to let you know how many more characters you can type and also the number of pages in the message.

If you tap the Back Button while composing a message, it’s automatically saved as a draft. The Draft icon on the right side of the message thread indicates a pending draft message to the recipient. Tap the message to resume composing it.
4. Tap the **Send** button to send the message.
   Your message is displayed and responses appear in the same window, creating a message thread with that contact.

**To create and send a multimedia message**

1. Open the **Messaging** app (set it as your default messaging app, if necessary), then tap the **New message** icon 📩.

2. Enter the recipient(s) in the **To** box.
   - Tap the Contacts icon 👥 then select one or more entries from your Contacts list.
   - Enter a name (or a partial number or email address), then tap a suggestion displayed from your Contacts list.
   - Enter a number or email address manually.

3. Tap the text box, then enter your message.

4. Tap the **Menu** icon ☰️ > **Add subject** to add a message subject.
   The subject text appears above the body text in bold letters.

5. Tap the **Attachment** icon 📌 to open a dialog box where you can choose the type of media file to attach to the message.

   **NOTE** To delete an attachment, simply tap the **Delete** icon ✗ on the attached file.

6. Tap the **Send MMS** button to send the message.

**Receiving and viewing messages**

If you’re working in a message window, messages that you receive from that contact are displayed. Otherwise, you receive a new message notification and a new message icon 📬 appears in the Status Bar. When you tap the new message notification, the Message screen opens where you can reply to the message. If the **New message pop-up** setting is activated, you’ll receive a pop-up notification on the current screen which you can use to directly reply.

If the Auto-retrieve setting isn’t checkmarked, tap **Download** to view the full message.
If the message contains a media file, tap the Play button to view, watch, or listen to it. Touch and hold the media file to open a context menu with additional options.

To respond to messages you receive

While viewing the received message, tap the text box at the bottom of the screen, complete your response as necessary, then tap the Send button.

Changing Messaging Settings

To change the Messaging settings, open the Messaging app (set it as your default, if necessary), tap the Menu icon > Settings.

The Notifications settings menu includes the following options: Notifications, New message pop-up, Preview, Notification sound, Vibrate, and Repeat alert.

The Text messages menu includes the following options: Delivery reports, Manage SIM card messages, and Priority.

The Multimedia messages menu includes the following options: Delivery reports, Allow delivery reports, Auto-retrieve, Roaming auto-retrieve, and Priority.

Group Conversation: Allows you to enable/disable group conversations.

The General settings menu includes the following options: Quick messages, Send message with Enter key, Signature, Callback number, Delete old messages, Text message limit, Multimedia message limit, and Save to.
Email

The Email app allows you to read email from services other than Gmail™. The following account types are supported: Microsoft Exchange, Outlook, Yahoo! Mail, AOL Mail, Verizon, and other accounts.

To open the Email app

Tap the Home Button ☛ > the Apps icon ☰ > Email ☞ or tap the Email icon ❭ directly from the Home screen.

The first time you open the Email app, a setup wizard opens to help you add an email account. After the initial setup, the Email app displays the contents of your Inbox.

NOTE You can also add your email account(s) using the Accounts menu in the Settings app.

The Accounts list

The Accounts list displays all of your email accounts.

Open the Email app. Tap the Accounts List icon ❮ (at the upper-left corner of the screen) to display a list of all of your email accounts. You can also swipe horizontally from the left side of the screen to open your Accounts list.

- A identifying color is displayed on the left of each account. Tap an account to toggle between displaying and hiding its folders. The number of unread mail is displayed next to each account’s Inbox.

Using the Email app

- Tap the Compose icon ✉ to compose a new message.
- Tap the Accounts List icon ❮ to switch between your email accounts.
- Tap the checkbox next to a message, then you can tap MARK AS READ/UNREAD, MOVE TO, or DELETE. You can also tap the Select all icon ☐ to select all of your messages at once, then tap the action to apply to all of them.
- Tap the Favorite icon ★ next to an email message to designate it as an important or favorite message.
Communication

- Swipe a message off the screen to the left or right to delete the message.
- Tap the Menu icon to open the Options menu to access Sort by, Download list over Wi-Fi, and Settings.
- Drag downward from the top of the Inbox list to refresh the list.

Message search
Tap the Search icon enter the text you’re looking for, then tap one of the displayed results.

Reading Your Email
You can read your email from the Inbox, or from other folders within each individual account. Tap a message entry to open it.

NOTE If you enable the Auto-rotate screen setting, the Email app is displayed in a split-screen format when the phone is held horizontally. Your Inbox (or any other selected folder) is displayed on the left side of the screen. Tap an email to open and display its contents on the right side of the screen.

To read an email
1. Open the Email app, then tap the Accounts list icon.
2. Tap Inbox under Combined view to display all of your messages from all of your accounts together or tap Inbox under the account you want to view.

NOTE When new email arrives, a notification appears in the Status Bar. Drag the Status Bar downward and tap the email notification.

To add an account
- From the Email app, tap the Menu icon > Settings > Add account. Then, configure the new email account settings as necessary.
Changing Email Settings

- To change the Email settings, open the Email app, tap the Menu icon > Settings.

General settings

The General settings menu includes the following options: Email preview, Conversation view, Split view, Set default account, VIP settings, Save to, Ask before deleting, Auto-advance, and Load images.

Accounts

Tap an account in the list to modify the settings that apply only to that account including Account name, Your name, Signature, Edit signature, Notifications, Notification sound, Vibrate, Auto-sync email, Sync schedule, Email sync period, Message size limit, and Advanced settings.

Voicemail

The Voicemail app allows the management of voicemail directly from the phone rather than accessing voicemail via traditional methods.

Voicemail can display a list of your messages allowing you to choose which message(s) to listen to or delete, without having to dial into your mailbox and listen to voice instructions or prior messages.

To be able to use Voicemail

1. Tap the Home Button > the Apps icon > Verizon folder icon > Voice Mail or tap Voice Mail directly on the Home screen.

   NOTE Listening to voicemail and setting up your voicemail service depends on subscription to the visual mail service. When you tap the Voicemail button on the dialpad, and you’ve subscribed to the visual mail service, the Visual Voicemail app will be launched. If you’re not subscribed, you’ll be dialed into your traditional voicemail box.

2. The first time you access the Voicemail app, you’ll have to subscribe to the Visual Voicemail service to be able to use it.

3. After subscription to the Visual Voicemail service, you’ll be prompted to enter the password. To change the password, call voicemail (dial *86).
4. Your voicemail entries will be displayed in your Inbox.
   While viewing the voicemail list, you can select an entry (see step 5). For additional options, tap the Menu icon.

5. Tap a voicemail entry to listen to it. Then you can tap Call back, Save, Delete, or Speaker.

6. If you decide to reply with a voicemail or forward it. The buttons at the bottom of the screen allow you to record, stop, or cancel the message.

---

**Gmail**

When you open the Gmail app, the most recent conversations are displayed at the top of your Inbox list. All of your conversations are displayed in your Inbox unless you delete, archive, or filter them.

**To open the Gmail app**

Tap the Home Button > the Apps icon > the Google folder > Gmail or tap the Google folder > Gmail on the Home screen.

**Your Gmail Inbox**

The current Google Account is displayed in the header at the top of the Inbox. If you have more than one account, you can switch accounts to view the messages in each Inbox.

Conversations with new messages are displayed with bold subject lines. To read a message in a conversation, tap its subject line text.

The letter icon (or contact photo) next to a Gmail message allows you to select it and choose an action from the icons at the top of the screen.

The Favorite icon next to a Gmail message allows you to designate it as a favorite message.

**Gmail Inbox icons**

Use the following icons while viewing your Gmail label, access Gmail Settings, and view Help & feedback.

- Accounts and labels: Tap to change to another account or label.
Compose: Tap to begin a new Gmail message.

Search: Tap to search within your Gmail messages.

NOTE You can also drag the screen downward from the top of the Gmail message list to refresh and check for new email.

Message search
Tap the Search icon, enter the text you’re looking for, then tap the Search button on the on-screen keyboard.

Adding another Google Account
Tap the Home Button > touch and hold the Recent Apps Button > Settings > Accounts > ADD ACCOUNT > Google. Enter your Google Account information, as necessary.

To switch accounts
Gmail displays conversations and messages from one account at a time. If you set up more than one email account on your phone, you can easily switch between them.

From your Gmail Inbox, tap the Accounts and labels icon (at the upper-left corner of the Inbox header), tap the current account, then tap the account that contains the email you want to read.

NOTE The number of unread messages is displayed to the right of each account and folder.
Navigating in the Gmail app

While viewing your Inbox:

- Swipe the screen up and down to scroll through your list of messages.
- Tap the Compose icon 🖊️ to start a new Gmail message.
- Tap the Search icon 🔍 to search within the Gmail app.
- Swipe a Gmail message off the screen to the left or right to quickly and easily archive the message. Tap UNDO to restore it to your Inbox.
- Tap the letter icon (or contact photo) to the left of one or more messages, then tap the Delete icon 🗑️ to delete the selected messages.
- Tap the letter icon (or contact photo) to the left of one or more messages, then tap the Menu icon 🔄 to select Move to, Change labels, Add star, Mark important, Mute, or Report spam.

While viewing a message, swipe the screen left and right to scroll through all of your messages and use the icons in the header at the top of the screen:

- Tap the Gmail icon ⬅️ to return to your Gmail Inbox.
- Tap the Delete icon 🗑️ to move the email to the trash folder.
- Tap the Mark unread icon 🔄️ to return the message to an unread state.
- Tap the Menu icon 🔄️ to access Move to, Change labels, Mark important (or Mark not important), Mute, Add star, and Report spam.

If you’re viewing a message or another label, tap the Back Button ⬅️ until you return to your Inbox.

Reading Your Messages

From your Gmail Inbox, tap a conversation that contains the message you want to read.

The conversation opens to the first new (unread) message, or to the first starred message, if you’ve previously starred a message in the conversation.
While viewing a message, you can tap the message action icons on the Gmail Inbox header or the message header to access the following options:

**Gmail Inbox header icons**

The Gmail Inbox header icons include the Gmail Inbox icon ⬅️, the Archive icon ☑️, the Delete icon ❌, the Mark read/unread icon 📥️, and the Menu icon ☰️.

**Gmail message header icons**

- Tap the Contact’s picture to open the Quick Contact options.
- Tap the Favorite icon ⭐️ to mark it as a favorite.
- Tap the Reply icon ⬅️ to reply to the sender.
- Tap the Menu icon ☰️ to reply to all, forward the message, star the message, or print the message.

**To reread a message**

When you open a conversation, messages that you’ve already read are minimized into a tab that indicates the number of hidden messages.

1. From your Gmail Inbox, tap the conversation you want to view.
2. Tap the contact name to open that message.
While reading a message you can tap the **Mark unread** icon 🔄 (in the Gmail Inbox header) to return a read message to the unread state. For example, to remind yourself to read it again later.

**Composing and Sending a Message**

You can compose and send a message to people or groups with Gmail addresses or other email addresses.

**To compose and send a message**

1. Tap the **Home Button** ○ > the **Google** folder 📦 > Gmail 📧 > the **Compose** icon ✒.

   **NOTE** If you set up more than one email account on your phone and want to send the message from a different account, tap the current Google Account (at the top of the screen), then tap the account you want to use.

2. Enter a recipient’s address.
   
   As you enter text, matching addresses are offered from your Contacts list. You can tap a suggested address or continue entering text to enter a new one.

3. Tap the **Arrow** icon ✅ (in the To field), to add Cc and Bcc fields so you can copy or blind copy additional recipients.

4. Enter a subject for the message in the Subject field.

5. Enter your email text in the Compose email field (below the Subject).

6. Tap the **Attachment** icon 📄, then tap **Attach file** to add an attachment from your phone’s memory. Tap **Insert from Drive** to insert files from Google Drive. Tap the **Remove** icon ✗ on the attachment to remove it from your message.

7. Tap the **Send** icon ➡ to send your message.

   **NOTE** If you aren’t ready to send the message, tap the **Menu** icon ⚙, then tap **Save draft** or simply tap the **Back Button** ⏽.
Replying to or Forwarding a Message

Continue an email conversation by replying to a message or by forwarding it without changing the Subject text. Change the Subject text to start a new conversation.

**NOTE** The conversation text and previous messages are also included in your reply (or forwarded) message.

**To reply to or forward a message**

1. Open the message you want to reply to or forward.

2. On the message header, tap the **Reply** icon or tap the **Menu** icon, then tap **Reply all, Forward, Add star and Print**.
   - Add others to an ongoing conversation by replying to all and then adding the new person’s address(es) to the reply.

3. Compose your Gmail message as necessary.

4. Tap the **Send** icon to send your Gmail message.
   - **NOTE** You can change the message action after you’ve started the message. Simply tap the current action (at the top left of the message header), then tap the one you want. For example, if you chose Reply but decide you want to Reply all instead.

**Gmail account settings**

1. Tap the **Home Button** > the **Google** folder > Gmail > the **Accounts and labels** icon (at the upper-left corner of the screen).

2. Tap **Settings**.

3. Tap **General settings** to change the settings for all accounts. Tap an account to change the settings that only apply to it.
   - The **General settings** menu includes the following options: Gmail default action, Conversation view, Swipe actions, Sender image, Reply all, Auto-fit messages, Auto-advance, Confirm before deleting, Confirm before archiving, and Confirm before sending.

   Tap the **Menu** icon in the **General settings** to access Manage Accounts, Clear search history, Clear picture approvals, and Help & feedback.
Specific Gmail account settings include the following options: Inbox type, Inbox categories, Notifications, Inbox sound & vibrate, Signature, Vacation responder, Sync Gmail, Days of mail to sync, Manage labels, Download attachments, and Images.

**NOTE** Other email accounts may have additional specific settings.

Tap the **Menu** icon in the account’s settings to access **Manage Accounts** and **Help & feedback**.

---

**Hangouts**

Use the Hangouts app to have real-time text conversations with your friends.

**To Open the Hangouts app**

- Tap the **Home Button** > the **Google folder** > **Hangouts**.

**To sign out of Hangouts**

- Tap the **Hangouts Options** icon > **Settings** > tap your account > Sign out.

**Navigating in Hangouts**

- Tap the **Hangouts Options** icon to access **Snooze notifications**, **Invites**, **Archived**, **Blocked people**, **Settings**, and **Help & feedback**.

- Tap the **Chatting list** icon to open your Chatting list which lists all of your contacts from all of the Google Accounts that you’ve added.

- Tap the **Chats** icon to open the Chats screen.

**NOTE** You can also swipe horizontally to switch between your Chatting list and the Chats screen.

**Chatting with Friends**

1. Tap the **Home Button** > the **Google folder** > **Hangouts**.
2. Select a friend from the Chatting list.
Tap the name of the person in your contacts list. If your friend is not yet on Hangouts, your friend will receive an SMS inviting them to Hangouts.

**OR**

Tap the text field to enter a name, email, number, or circle.

3. Tap the message box, then enter your message.

**NOTE** Before you enter the text for your message, you can tap the Attach icon (to the right of the message) to attach a photo, video, location, or sticker.

4. Tap the Send icon ➤ (on the right side of the message).

**NOTE** You can tap the Call icon to call the friend, or tap the Video icon to start a video chat with your friend.

**Chat Options menu**

From a chat, tap the Menu icon to access the following options: People & options, New group conversation, Turn history off, Archive, Delete, and Help & feedback.

**Blocking your Friends**

- To block a friend from exchanging messages with you, tap the friend in the Chats screen. Tap the Menu icon > People & options. Tap Block, then tap BLOCK.

- To remove a friend from the blocked list, tap the Hangouts Options icon . Tap Blocked people, then tap Unblock next to the friend.

**NOTE** You can also unblock a friend by tapping Archived. Tap the blocked friend in the archived conversations list, then tap UNBLOCK.

**Changing Hangouts Settings**

- To change the Hangouts settings, open the Hangouts app, tap the Hangouts Options icon > Settings.
Camera

You can use the Camera app to take and share pictures and videos. The video feature is integrated on the camera viewfinder to take pictures and record video with a single tap. Your phone comes with a 8 megapixel camera that lets you capture sharp pictures and videos. It has many state-of-the-art features such as gesture shot, burst shot, still photo capture while recording video, and much more. These features will allow you to easily and creatively capture your world.

NOTE  
Be sure to clean the protective lens cover with a microfiber cloth before taking pictures. A lens cover with smudges from fingers can cause blurry pictures with a "halo" effect.

To open the Camera app

- Tap the Home Button ⊗ > the Apps icon ⊗ > Camera ⊗.

  OR

- Tap Camera ⊗ from the Home screen.

  OR

- With the backlight off, press the Volume Down Key ⊔ twice.

  TIP  
If you’ve set your phone to use the Swipe unlock method, from the Lock screen, simply drag the Camera icon ⊗ upward to open the Camera app.

The Auto camera viewfinder icons

- Lens Swap – Switches between the rear-facing camera lens and the front-facing camera lens.
- Flash – Indicates the current flash mode. Tap it to toggle through the flash modes.
- Menu – Tap to display and hide the camera options on the screen.
- Gallery – Accesses your Gallery to view your saved photos and videos. Tap it to display the last photo or video you captured.
- Record – Starts recording a video.
- Capture – Takes a picture.
- Back – Closes the Settings or exits the Camera app.
- Settings – Displays the camera’s Auto mode settings. See Additional settings.
Taking Pictures

Taking pictures with your phone’s built-in camera is as simple as choosing a subject, pointing the lens, and tapping a button icon. When you take a picture, the Multi-point Auto-focus (AF) function operates automatically to allow you to capture a clear image.

To take a picture:
1. Tap the Home Button > Camera.
2. Frame your subject on the screen.
   - The green squares indicate that the camera has focused.
   - Place two fingers on the screen and spread them apart to zoom in (a zoom bar indicates the zoom level) and pinch in to zoom back out.
3. Tap the Capture button, if available. Otherwise, tap the subject to take the picture. Your picture will be automatically saved to the Gallery.

   **NOTE** The captured image retains the orientation in which it was taken. If you hold the phone both vertically and horizontally to take pictures, you’ll need to rotate the phone to view full screen images in the Gallery app.

   **TIP** While viewing a photo, you can tap the Menu icon, then tap Rotate to manually change its orientation.

Record Videos

In addition to taking pictures, you can record, view, and send videos with your phone’s built-in video camera.

1. Tap the Home Button > Camera.
2. Frame your subject on the screen.
3. Tap the Video Capture button to start recording the video.
   - The length of the recording is displayed at the upper-left corner of the screen.
   - You can tap the Capture button to take pictures while you’re recording video.
You can use the pinch gesture to use the dynamic zoom feature while you’re recording video. Spread your fingers on the screen to zoom in and pinch to zoom back out.

You can tap the Pause button  to pause your video recording. Then, resume your recording by tapping the Record button .

4. Tap the Stop button  to stop recording. Your video will be automatically saved to the Gallery.

Additional Settings

The camera is set to automatically take high quality photos and videos, but additional adjustments can be made when using Auto mode. Tap the Settings icon  to access these additional settings. Tap one to toggle through its available settings. Tap the Settings icon  again to exit the settings.

Indicates the aspect ratio set for the photo or video.
For photos, choose from 1:1, 4:3, and 16:9.
For videos, choose from HD and FHD.

Enables the Voice command function.

Disables the Voice command function.

Enables a 3 second delay after the Capture button  is tapped.

Enables a 10 second delay after the Capture button  is tapped.

Disables the delay capture function.

Displays an overlay grid to help you align your photos and videos horizontally and/or vertically for better composition. Tap it to toggle it on or off.

NOTE Tap the Help icon  to view additional information to help you use the camera.

Interval shot

You can take Interval shots from the Auto camera mode using the front camera lens. Touch and hold the Capture button  to automatically take 4 selfies in a row.
**Burst shot**

You can take Burst shots from the Auto camera mode using the rear camera lens. Touch and hold the Capture button to take a barrage of photos in a row until the Capture button is released. The viewfinder displays the number of shots taken. When viewing Burst shots in the Gallery, tap the Burst play icon to display each shot in sequence (similar to a viewing flipbook).

**Gesture shot**

The Gesture shot feature allows you to take a picture with a hand gesture using the front camera.

**To take photos with a gesture**

1. Activate the front camera lens.
2. Activate a gesture shot by raising your hand, with an open palm, until the front camera detects it (a box appears on the screen).
3. Make a fist.
   - Make a fist to start a countdown before a single shot is taken.
   - Make 2 fists actions to take multiple shots.

**NOTE** You can also take a single photo by making a fist, then opening your palm.
4x zoom
You can change the zoom level for your photos using the pinch-to-zoom feature. Spread your fingers on the screen to zoom in and pinch in to zoom back out.

The zoom feature gives you the ability to zoom up to 4 times the normal view. This feature operates automatically while zooming in and out.

**NOTE** Use a steady hand. This feature does not work with some functions. Objects can be overlapped when taking a picture of fast-moving subjects.

View Your Pictures
The Gallery is where you can access your gallery of stored camera images. You can view them in a slideshow, share them with your friends, as well as delete and edit them.

1. Tap the **Home Button** > the **Apps** icon > **Gallery**.
2. Select an album and tap an image to view your picture.

Viewing your pictures and videos
The Gallery is where you can access your gallery of stored camera images. You can view your photos in a slideshow, create a collage, share your photos and videos with your friends, as well as manage them (delete, edit, etc.). You can access your photos and videos stored in your phone's internal memory, microSD card (external memory), or albums connected with your Google Account.

1. Tap the **Home Button** > the **Apps** icon > **Gallery**.
   - Swipe up or down to view more albums.
   - Tap the **Gallery Menu** icon (at the upper-left corner of the screen) to access **Albums**, **Videos** and **Favorites** to view your images and videos.
2. Tap an album to open it and view its contents. (The pictures and videos in the album are displayed in chronological order.)
3. Tap an image to view it. Then you can swipe horizontally to browse through your images.
To share your pictures and videos
1. Open an album to view its contents, then tap the Share icon.
2. Tap each file you want to share. When the checkmarks are set, tap SHARE, select how to share the file(s), then complete as necessary.

To delete pictures and videos
1. Open an album to view its contents, then tap the Delete icon.
2. Tap each file you want to delete. When the checkmarks are set, tap DELETE, then tap YES to confirm.

To play a video
1. Tap the Home Button > the Apps icon > Gallery.
   - Scroll up or down to view more albums.
2. Tap a video in an album to play it.
   
   **NOTE** If you set the default app for video playback in the pop-up, video playback will begin as soon as you tap a video in an album. Otherwise, you’ll need to choose the app each time.

   - Tap the video while it’s playing to view the playback controls.
   - While playing a video, the timeline allows you to jump to that part of the video. When using the Photos app, simply tap the timeline. When using the Videos app, tap the timeline, then tap the preview window.
   - While playing a video, press the Volume Keys to adjust the volume.

   **NOTE** The recording retains the orientation in which it was taken. If you hold the phone both vertically and horizontally to take pictures and record video, you’ll need to rotate the phone to view full screen images in the Gallery app.

Live Zoom
Live Zoom is available when using the Videos app for playback. It allows you to zoom in or zoom out on a portion of a video while it’s being played to make the desired section appear larger or smaller.

While viewing a video, use your index finger and thumb in a pinching or spreading motion on the screen to zoom in or out.
NOTE You don’t need to press too hard; the screen is sensitive enough to pick up a light, but firm touch.

**Gallery**

Open the **Gallery** app to view albums of your pictures and videos.

**To open the Gallery app**

- Tap the **Home Button** ☰ > the **Apps icon 📱** > **Gallery 📷**.

**Viewing your albums**

The Gallery app presents all of the pictures and videos stored in your phone, including those you’ve taken with the Camera app and those you downloaded from the web or other locations. When another app saves a picture, it automatically creates a download folder to contain the picture (e.g., capturing a screen shot creates the Screenshot folder).

- Tap an album to open it and view its contents.
- Tap a picture or video in an album to view it.
- Tap the **Menu icon ☰** to open the Options menu to access **New album**, **Delete**, **Set preferred albums**, and **Settings**.
- Tap the **Camera icon 📸** to return to the Camera app.
- Tap the **Gallery Menu icon 📷** (in the upper-left corner of the screen) to open the Gallery menu to access **Albums**, **Videos** and **Favorites**.
To share an album

You can share the entire contents of your albums.

1. Tap the **Home Button** 🛎 > the **Apps** icon 📲 > **Gallery** 📷.
2. Touch and hold the desired album, tap **Share**, select the app to use to share your images, then complete the sending method as necessary.

Gallery Options

The Gallery app presents all of the pictures and videos stored in your phone, including those you’ve taken with the Camera app and those you downloaded from the web or other locations.

1. Tap the **Home Button** 🛎 > the **Apps** icon 📲 > **Gallery** 📷 to view the images stored in your phone’s internal memory and on a MicroSD card (external storage).
   - Drag up or down to view more albums.
2. Tap an album to open it and view its contents. (The pictures and videos in the album are displayed in chronological order.)
3. Tap a picture in an album to view it.

While viewing an album the following icons are displayed at the top of the screen:

- 📷 Camera: Opens the Camera.
• **Share**: Allows you to select one (or more) photos to share. After selecting the file(s), tap **SHARE** to open the available sharing options (such as Messaging or Bluetooth).

• **Delete**: Allows you to select one (or more) photos to delete. After selecting the file(s), tap **DELETE**, then **YES** to delete the selected picture(s).

• **Menu**: Opens the albums Options menu which includes **Move**, **Copy**, **Slideshow**, and **Rotate**.

  - Tap a picture in an album then tap the **Menu** icon ✴️ to open its Options menu which includes the following options: **Set image as**, **Move**, **Copy**, **Copy to Clip Tray**, **Slideshow**, **Rotate**, **Crop**, **Add location**, **Rename**, **Print**, and **Details**.

  - Tap a picture in an album, then tap the **Favorite** icon ⭐️ to mark it as a favorite.

  - Tap the **Back Button** ⬅️ (or the **Gallery Menu** icon ← at the upper-left corner of the screen) to return to the previous screen.

### Assign Pictures

After taking a picture, assign it as a picture ID for a Contacts entry or as the background image (wallpaper) for your Home screen or Lock screen.

1. Tap the **Home Button** ⚡️ > the **Apps** icon 📱 > **Gallery** 📸.
2. Tap an album and tap an image to view it.
3. With the picture displayed, tap the **Menu** icon ✴️ > **Set image as**.
4. Select an option.

  - **Home screen** assigns the picture as the background image. Crop the image and tap **OK** to assign the picture.

  - **Contact photo** assigns the picture to a Contact entry as a picture ID. Tap an entry from Contacts, crop the image, then tap **OK** to assign the picture.
- **Lock screen wallpaper** assigns the picture as the background image for your Lock screen. Crop the image, then tap OK to assign the picture.

- **Wallpaper** assigns the picture as the background image. Tap SET WALLPAPER to assign the picture.

**Working with photos**

Use the **Gallery** app to view your pictures and edit them.

**To view and browse photos**

1. Tap the **Home Button** > the **Apps** icon > **Gallery**.
2. Open an album and tap a picture.
3. Tap the screen to display the icon bar and the Home Touch Buttons Bar. The following options are available.
   - Tap the **Menu** icon to open the Options menu to access Set image as, Move, Copy, Copy to Clip Tray, Slideshow, Rotate, Crop, Add/Remove location, Rename, Print, or Details.
   - Tap the **Delete** icon to delete the picture.
   - Tap the **Share** icon, tap the sharing method, then complete as necessary to share the picture.
   - Tap the **Camera** icon to switch to camera mode.
   - Tap the **Edit** icon to open the editing screen which allows you to change the picture (such as cropping, rotating, tuning, adding effects, and more).
   - Tap the **Favorites** icon to set the picture to your Favorites folder.
Music

Your phone has a music player that lets you play all of your favorite tracks. To access the music player, tap the Home Button > the Apps icon > Music 🎵.

Add music files to your phone

Start by transferring music files to your phone:

- Transfer music using Media sync (MTP).
- Download from the Web.
- Synchronize your phone to a computer.
- Receive files via Bluetooth.

Transfer music using Media sync (MTP)

1. Connect the phone to your PC using the USB Cable.

2. Select the Media sync (MTP) option. Your phone will appear as another hard drive on your computer. Click on the drive to view it. Copy the files from your PC to the drive folder.

3. When you’re finished transferring files, swipe the Status Bar downward and tap USB connected > Charge phone. You may now safely unplug your phone.
Playing a song
1. Tap the **Home Button** > the **Apps icon** > **Music**.
2. Tap the **Songs** tab (Music tabs are displayed across the top of the screen).
3. Tap the song you want to play.

**TIP** To find a song, you can tap the **Search icon** at the top of the screen or tap the letter the song begins with using the alphabet listed along the right side of the screen.

**Music player icons**

<p>| | |</p>
<table>
<thead>
<tr>
<th></th>
<th></th>
</tr>
</thead>
<tbody>
<tr>
<td>1</td>
<td>Tap to set the current song as a favorite (toggle it on or off).</td>
</tr>
<tr>
<td>2</td>
<td>Tap to see the current playlist.</td>
</tr>
<tr>
<td>3</td>
<td>Tap to access the Music player Options menu.</td>
</tr>
<tr>
<td>4</td>
<td>Tap to set the shuffle mode (toggle it on or off).</td>
</tr>
<tr>
<td>5</td>
<td>Tap to set the repeat mode (on, off, or same song).</td>
</tr>
</tbody>
</table>
Tap to manage the music volume. The pop-up window also allows you to modify all phone sounds and set music interruptions. The **Volume Keys** on the back of the phone will also to adjust the volume.

**Tap to go back to the beginning of the song. Tap 3 times to return to the previous song. Touch and hold to rewind in 3 second increments.**

**Tap to pause playback.**

**Tap to resume playback.**

**Tap to skip to the next track on the album or in the playlist. Touch and hold to fast-forward in 3 second increments.**

**Tap to set available audio effects.**

**Other music player options**

- Touch and hold any song in the music library to access its context menu which can include: **Play**, **Add to playlist**, **Delete**, **Share**, **Set as ringtone**, and **Search**.

- Tap the **Menu** icon in the music library to access its Options menu which can include: **Cloud**, **Select to play**, **Add to playlist**, **Delete**, **Share**, and **Settings**.

**Turning the music player off**

To stop the music player, swipe the Status Bar downward, then tap the **Close** icon in the upper-right corner of the Music notification.

**NOTES**

- Some file formats are not supported, depending on the device software.
- If the file size exceeds the available memory, an error can occur when you open files.
- Music file copyrights may be protected by international treaties and national copyright laws. Therefore, it may be necessary to obtain permission or a license to reproduce or copy music. In some countries, national laws prohibit private copying of copyrighted material. Before downloading or copying the file, check the national laws of the relevant country concerning the use of such material.
To use a song as a ringtone

You can use a song as your phone ringtone, in place of one of the ringtones that come with the phone.

- Touch and hold a song in the Music library list. In the context menu that opens, tap Set as ringtone, then tap Phone ringtone or Caller ringtones.

  OR

- On the music player screen, tap the Menu icon, tap Set as ringtone, then tap Phone ringtone or Caller ringtones.

Working with Playlists

You can create playlists to organize your music files into sets of songs, which you can play in the order you set or in a shuffle.

To create a playlist

1. From the Music library, tap the Music Menu icon (in the upper-left corner of the screen), then tap Playlists.

2. Tap the New icon.

3. Enter a name for the playlist and tap OK.

4. Select the songs you want to add to a playlist, then tap ADD. The new playlist is added to the Playlist tab.

To add a song to a playlist

1. From the Music library, touch and hold the song you want to add to a playlist.

2. In the context menu that opens, tap Add to playlist, then tap the name of the playlist you want to add it to.

To remove a song from a playlist

1. Open a playlist.

2. Touch and hold the song you want to remove, then tap Remove from playlist in the context menu that appears.
To delete a playlist
1. Open the Playlists library.
2. Touch and hold the playlist, then tap **Delete** in the context menu that appears.
3. Tap **YES** to confirm.

To rename a playlist
1. Open the Playlists library.
2. Touch and hold the playlist, then tap **Rename** in the context menu that appears.
3. Enter a name, then tap **OK**.

To delete multiple songs
- Open the Music library screen, tap the **Songs** tab, tap the **Menu** icon, then tap **Delete**. Checkmark each of the songs you want to delete, tap **DELETE**, then tap **YES** to confirm.

**NOTE** Tap the **Menu** icon from another Music tab to delete one or more of the items in that selected tab.

---

**Play Store**

Play Store allows you to browse and search for free and paid applications.

**To open the Play Store app**
- Tap the **Home Button** > the **Apps** icon > **Play Store** or tap the **Play Store** icon on the Home screen.

**To get help with Play Store**

Play Store Help web pages are available from all Play Store screens.
- Swipe from the left edge of the screen to the right, then tap **Help & Feedback**.

The Chrome app opens to the Play Store Help page, with links to many help topics.
To open a screen with details about an app

- At any time while browsing in Play Store, tap an app to open its details screen.

The App details screen includes a description, ratings, comments, and related information about the app. From this screen, you can download, install, uninstall, rate the app, and more.

**Downloading and Installing Apps**

When you find an app you want, you can install it on your phone.

To download and install an app

**NOTE** Before you can download a paid app, you must set up a billing arrangement.

1. Tap the Home Button > Play Store.
2. Tap a category from the homepage or tap the Search icon (in the top right corner of the screen) to search for an app.
3. Tap INSTALL or the Price button to download the selected app.
4. If you agree with the app’s access requirements, tap ACCEPT.
5. The app will be downloaded and installed.
Play Store Options
On the Play Store homepage, drag the left edge of the screen to the right to access Store home, My apps, My wishlist, People, My account, Redeem, Settings, Help & Feedback, and About Google.

Your Wishlist
While viewing an app (or music, games, etc.), tap the Wishlist icon at the top of the screen to add it to your wishlist for future reference.

YouTube™

Opening YouTube and Watching Videos
You can browse, search for, view, upload, and rank YouTube videos on your phone with the YouTube app.

To open the YouTube app
Tap the Home Button > the Apps icon > Google folder > YouTube.

> Search for and tap a video to watch it.
> Tap the Menu icon for the YouTube Options menu (Settings, Privacy policy, Help & feedback, and Sign in/out).
> Tap the YouTube Menu icon (at the upper-left corner of the screen) to select What to Watch and other YouTube options.

To search for videos
1. Tap the Search icon (at the top of the main YouTube screen).
2. Enter the text to search for or tap the Microphone icon to search by voice.
3. Tap a suggestion below the search box or tap the Search button on the keyboard.
4. Scroll through the search results and tap a video to watch it.
QuickMemo+

Use the QuickMemo+ feature to capture a screen shot and use it to write a memo.

To access the QuickMemo+ feature

1. While viewing the screen you want to capture, drag the Status Bar downward, then tap the QuickMemo+ icon 📊.

2. Select the desired tool from the toolbar (Pen type, Color, and Eraser). Then create a memo using a fingertip to draw or erase pen marks (don’t use your fingernail or any other rigid object).

3. Tap the Save icon 📑 to save the memo or tap the Back Button ⇐ to exit at anytime without saving it.

NOTE Tap the toolbar handle 📉 (at the top of the screen) to display or hide the QuickMemo+ toolbar options.
Using QuickMemo+ options

The following options are available when using QuickMemo+.

<table>
<thead>
<tr>
<th>Icon</th>
<th>Option</th>
</tr>
</thead>
<tbody>
<tr>
<td>✓</td>
<td>Tap to save your memo.</td>
</tr>
<tr>
<td>⇐</td>
<td>Tap to undo the most recent action.</td>
</tr>
<tr>
<td>⇈</td>
<td>Tap to redo the most recently deleted action.</td>
</tr>
<tr>
<td>✒</td>
<td>Tap to insert text into your memo.</td>
</tr>
<tr>
<td>🎨</td>
<td>Tap to select the pen type, color, and transparency.</td>
</tr>
<tr>
<td>🗑️</td>
<td>Tap to erase pen marks you’ve made on the memo.</td>
</tr>
<tr>
<td>🧧</td>
<td>Tap to hide or display the toolbar.</td>
</tr>
</tbody>
</table>

Viewing saved memos

Tap the Home Button ⏪ > the Apps icon 📦 > Gallery 🖼 and then select the QuickMemo+ album.

OR

Tap QuickMemo+ 🖱️ in the Applications screen and select the desired memo.

Capturing a screen shot

To capture a screen shot without the QuickMemo+ feature, press both the Power/Lock Key (on the back of the phone) and the Volume Down Key (on the back of the phone) at the same time. The captured image is automatically saved in the Gallery app in the Screenshots folder.
Clock

You use the Clock app to access the Alarms, Timer, World clock, and Stopwatch functions. Access these functions by tapping the tabs across the top of the screen or swiping horizontally across the screen.

Setting an alarm

1. Tap the Home Button > the Apps icon > Clock > the Alarms tab > the Add icon.
2. Set the desired alarm time. Tap the hour (or minutes), then tap the time you want on the clock graphic. Tap the Keypad icon to set the time using a keypad instead of the clock graphic.
4. Tap SAVE.

NOTE To access (and change) the alarm settings from the alarm list screen, tap the Menu icon then tap Settings.

Activating your alarm(s)

1. Open the Clock app and tap the Alarms tab (if necessary).
2. Tap the gray Alarm clock icon to the right side of the alarm you want to activate. The icon turns blue when it’s set.

Timer

The Timer tab can alert you with an audible signal when a set amount of time has passed.

1. Open the Clock app, then select the Timer tab.
2. Set the desired time on the timer.
3. Tap the Start button to start the timer.
4. Tap the Stop button to stop the timer.
Setting the World Clock

The World clock tab allows you to set up a list of cities to easily check current times in other time zones with a quick glance.

1. Open the Clock app, then select the World clock tab.
2. Tap the New City icon, search through the available cities, then tap the one you want.

Stopwatch

The Stopwatch tab allows you to use your device as a stopwatch.

1. Open the Clock app, then select the Stopwatch tab.
2. Tap the Start button to initiate the stopwatch.
   - Tap the Lap button to record lap times.
3. Tap the Stop button to stop timing.

Calculator

Using your calculator

1. Tap the Home Button > the Apps icon > Calculator.
2. Tap the number keys to enter numbers.
3. For simple calculations, tap the numbers and function (+, -, x) or ÷), then tap the Result button.

NOTES
- For more complex calculations, you can switch to the Scientific calculator. Simply rotate the phone sideways, or tap the Menu icon then tap Scientific calculator.
- To view the calculation history, tap the Menu icon then tap Calculation history.
Calendar

Viewing Your Calendar and Events

The Calendar app allows you to track your schedule of events (that you created or that you’ve been invited to), organized by day, week, month, year, or agenda. Tap the Calendar Menu icon to switch calendar views or access your Tasks list.

When you first set up your phone, you configured it to use an existing Google Account or you created a new account. The first time you open the Calendar app on your phone, it displays any existing calendar events from your Google Account on the web.

Adding an event to your calendar

1. Tap the Home Button > the Apps icon > Calendar.
2. Tap the Calendar menu icon at the upper-left corner to change the calendar view (Day, Week, Month, Year, or Agenda).
3. Tap the date you want to add an event to and tap the New event icon.
4. Tap the Event name field and enter the event name.
5. Tap the Location field and enter the location. Check the date and enter the time you wish your event to start and finish.
6. Mark the All day box, if applicable.
7. Tap More to enter additional options such as REPEAT, GUESTS, Description, REMINDERS, SHOW ME AS, and PRIVACY, as necessary.
8. Tap SAVE to save the event in the calendar.

TIP To quickly save an event, simply touch and hold the date on the calendar.
Maps

The Maps app allows you to find places and get directions.

To open the Maps app

- Tap the Home Button \( \odot \) > the Apps icon \( \odot \) > Google folder \( \square \) > Maps

Maps navigation

- Drag across the screen to move across a displayed map.
- Pinch-to-zoom to zoom in or out of the map view.
Maps icons

Tap Search Box to open the keyboard to enter your search request.

- Red markers indicate search matches.
- Tap a marker to view the location information. You can call the establishment, save the location as a favorite, and view its website.

Tap to get directions to a destination.

- Use the starting point to insert Your location or select from recent Map history.
- Get directions by Car, Transit, or Walking.
- Tap the estimated time to view the directions in text format (instead of map view).
- When viewing directions, tap the Menu icon to change the map view (All traffic, Satellite, and Terrain).

Tap to access map layers, Tips & tricks, Settings, Help and Send feedback.

Tap to display your current location on the map.

File Manager

Use the File Manager app to manage your folders and files stored in your phone.

File Manager makes it easy to view and manage your files. Simply tap a file type (All files, Music files, Image files, Video files, Document files, then tap on the necessary folders to find your files.

To open the File Manager app

Tap the Home Button > the Apps icon > LG folder > File Manager.
File Manager Options
Open the **File Manager** app > tap **All files** > the **Internal storage** or **SD card** folder to access to the following File Manager options (at the bottom of the screen):

- **(JSONObject)**: Allows you to create a new folder.
- **(JSONObject)**: Allows you to move files and folders to another folder.
- **(JSONObject)**: Allows you to copy files and folders to another folder.
- **(JSONObject)**: Allows you to delete files and folders.

Tap the **Menu** icon ‌‌ to access the **Sort by, View by, Share, Zip, Show/Hide hidden files, and Exit.**

Searching in File Manager
Open the **File Manager** app, tap **All files**, then tap the **Search** icon ‌‌ to search for your files or information.
Settings

The Settings app allows you to customize and personalize your phone by setting how its screens look, how it notifies you, how it reacts, and a lot more.

NOTE Settings that are specific to an app are accessed through its own Settings menu within the app. For example, the Chrome app has settings specific to your Internet access.

To open the Settings app

- Tap the Home Button > the Apps icon > Settings.
  
  OR

- Tap the Home Button > touch and hold the Recent Apps Button > Settings.

Viewing settings

Tap the Menu icon at the upper-right corner of the Settings app, then tap Tab view (or List view).

- List view Scroll up and down through the list.
- Tab view Swipe left and right or tap the tab you want.

NOTE The instructions to perform tasks in this guide are based on the default List view setting.

WIRELESS NETWORKS

The Wireless Networks category allows you to configure and manage your device’s wireless radio communications.

Airplane mode

Tap the switch to toggle it On or Off. On disables all wireless connections.

Wi-Fi

Tap the switch to toggle it On or Off. On connects to a Wi-Fi network (from your list of available, detected networks). Tap Wi-Fi to access the following settings to manage your Wi-Fi connection(s).
WI-FI NETWORKS
Displays all of the Wi-Fi networks that are within access range.
Tap one to connect to it. Touch and hold one to open its Options menu.

SEARCH Searches for nearby Wi-Fi networks.

Menu icon 📀 Accesses the Wi-Fi Options menu.

Add Wi-Fi Allows you to manually add a Wi-Fi network by entering its name (SSID), security, and password.

Saved Wi-Fi Displays your saved Wi-Fi networks allowing you to manage them.

Advanced Wi-Fi Provides additional specific Wi-Fi connection settings.

NOTIFICATIONS

Wi-Fi notifications Enable this option to be notified if Wi-Fi networks are available nearby.

Show Wi-Fi pop-up Enable this option to be notified when a Wi-Fi network is available when you launch an app.

USEFUL SETTINGS

Manage networks Allows you to specify the order in which your Wi-Fi networks will be detected.

Keep Wi-Fi on when screen is off Allows you to set the Wi-Fi status when the screen is off.

Allow Wi-Fi scanning Enable this option to let Google’s location service and other apps scan for networks, even when Wi-Fi is off.

Avoid bad Wi-Fi connections Enable this option to use the mobile network whenever the Wi-Fi network you’re connected to doesn’t have an internet connection. (Data usage may apply.)

CONNECTION

Wi-Fi Direct Allows you to connect with Wi-Fi devices without any access point.
Connect by WPS button Provides information to connect to a secured Wi-Fi network with a WPS button.

Connect by WPS PIN Provides the WPS PIN to connect to a secured Wi-Fi network.

PERSONAL

Install certificates Allows you to install certificates from storage.

INFORMATION

MAC address Displays your phone’s MAC address (which may need to be entered in the router to connect to some wireless networks with MAC filters).

IP address Displays your phone’s IP address.

Help Displays information about Wi-Fi networks.

Bluetooth

Tap the switch to toggle it On or Off. On allows you to pair and connect with other Bluetooth devices.

Tap Bluetooth (with Bluetooth on) to use and manage your Bluetooth devices.

Lancet for Android Displays your phone’s name and visibility status.

AVAILABLE DEVICES

Displays all of the Bluetooth devices that are within your phone’s range. Tap one to pair and connect.

SEARCH Searches for nearby Bluetooth devices.

Menu icon Accesses the Bluetooth Options menu.

Edit phone name Allows you to change your phone name for easy identification when pairing and connecting.

Received files Displays a list of the files received via a Bluetooth device.

Help Displays information about Bluetooth features.
Settings

Data usage

Menu icon  
Accesses the Data usage Options menu.

Display in MB/GB  
Changes the data usage units.

Restrict background data  
Enable this option to restrict the data that runs in the background.

Show Wi-Fi usage  
Displays a Wi-Fi tab (in addition to the Mobile tab) to view your Wi-Fi data usage.

Mobile hotspots  
Displays the networks that can be used as mobile hotspots. Turn on Wi-Fi and search, if necessary.

Mobile networks  
Allows you to set specific Mobile network settings.

Advanced Calling

Allows you to learn about HD calls using your device, then activate Advanced Calling on your phone.

Share & connect

CONNECTION

Printing  
Allows you to set up wireless printer(s).

PRINT SERVICES

Cloud Print  
Searches for available printers.

More

TETHERING

USB tethering  
Tap the switch to toggle it On or Off. On allows you to share your phone’s mobile data connection using a USB connection. This setting is gray if not connected via USB.

Mobile Hotspot  
Tap the switch to toggle it On or Off. On allows you to use your device as a Mobile Hotspot for other devices to use your mobile network connection.

Set up Mobile Hotspot  
Allows you to enter the SSID and key for your mobile hotspot.
Manage connections Sets the device(s) allowed to use your hotspot connection.

Timeout Allows you to set when to turn off your hotspot.

CONNECTED DEVICES

Displays all connected devices.

Bluetooth tethering Tap the switch to toggle it On or Off. On shares the phone’s Internet connection with other Bluetooth devices.

Help Displays help information regarding connecting other devices to your phone’s Internet connection.

NETWORK

Mobile networks Allows you to set various mobile network settings.

Default messaging app Allows you to set which app to use as your default messaging app.

VPN Allows you to set up VPNs (Virtual Private Networks). Choose Basic VPN or LG VPN.

DEVICE

The Device category allows you to configure and manage the general device functions such as sound and display options.

Sound & notification

BASIC

Sound profile Allows you to set whether your device emits sound or just vibrates.

SOUND

Volume Allows you to set individual volume levels for ringtone and notifications, touch feedback, and other media.

Ringtone Allows you to set the ringtone for calls. You can also add and delete ringtones.
VIBRATION
Sound with vibration Enable this option to emit sound as well as vibration.
Vibration type Allows you to set the vibration pattern.

NOTIFICATIONS
Interruptions Allows you to set the parameters for allowing notifications to interrupt your current task.
Lock screen Allows you to set the level of privacy for notifications displayed on your Lock screen.
Apps Allows you to set notifications for individual apps including preventing them from displaying notifications and setting priority.

ADVANCED SETTINGS
Notification sound Allows you to set the sound heard for new notifications. You can also add and delete notification sounds.
Vibrate on tap Enable this option to feel a vibration when you tap the screen.
Sound effects Allows you to set when a sound is emitted to notify you of an event. Enable Dialpad sounds, Touch sound, Screen lock sound, Sound when roaming, and set the Emergency tone behavior.
Message/call voice notifications Tap the switch to toggle it on or off. On allows your phone to automatically read your incoming calls and/or messages out loud. Tap Message/call voice notifications to modify your notification settings for Calls, Messages, Read messages, and Language.

Display
FONT
Font type Allows you to set the type used for the phone software.
Font size Allows you to set the size of the type used for the phone software.
BASIC SETTINGS

**Brightness** Allows you to set the brightness for the screen or you can checkmark its automatic setting.

**Auto-rotate screen** Enable this option to allow the screen to rotate automatically based on its orientation.

**Screen timeout** Allows you to set the amount of time before the screen times out due to inactivity to your conserve power.

**Home touch buttons** Allows you to set the buttons displayed at the bottom of all screens. Set which ones are displayed, their position, and what they look like.

ADVANCED SETTINGS

**Daydream** Tap the switch to toggle it on or off. Tap **Daydream** to choose which screensaver is displayed when the phone is sleeping while docked and/or charging.

**Motion sensor calibration** Allows you to improve the accuracy of the tilt and speed of the phone’s sensor.

**Home screen**

**Select Home** Allows you to set the layout (standard Android layout or a simplified layout) for the Home screen.

SCREEN

**Wallpaper** Allows you to set your Home screen background (wallpaper). Select it from Wallpaper gallery, Gallery, Live wallpapers, Multi-photo, and Photos.

**Screen swipe effect** Allows you to set the effect when you swipe to change screens.

**Allow Home screen looping** Enable this option to allow continuous Home screen panel scrolling (loop back to the first panel after the last panel).

**Allow apps list looping** Enable this option to allow continuous Applications screen scrolling (loop back to the first screen after the last screen).
TIPS

Help Displays information regarding the Home screen items and functions.

Lock screen

SCREEN SECURITY

Select screen lock Allows you to set how to secure your phone from unintentional and/or unauthorized use.

Smart Lock Allows you to set trusted devices, places and/or faces that will allow your phone will remain unlocked.

Screen swipe effect Allows you to set the effect seen when you swipe across the Lock screen.

The Security lock settings depend on the Lock type. The following settings may also be displayed.

Hidden pattern Enable this option to display the unlock dot pattern when (and where) you tap the Lock screen.

Make pattern visible Enable this option to make your pattern visible while drawing it.

Hidden PIN Enable this option to display the keypad when you tap the Lock screen.

Randomize PIN entry Sets the keypad to random numbers so that someone watching cannot detect your PIN from your hand movements.

Hidden password Enable this option to display the keyboard when you tap the Lock screen.

CUSTOMIZE

Wallpaper Allows you to set the background for your Lock screen.

Shortcuts Allows you to set the shortcuts at the bottom of the Swipe Lock screen.

Contact info for lost phone Allows you to set text to be displayed on the Lock screen to easily identify the phone’s owner.
LOCK TIME

**Security lock timer** Allows you to set the amount of time before the screen automatically locks after the backlight turns off (timeout due to inactivity).

**Power button instantly locks** Enable this option to instantly lock the screen when the Power/Lock Key is pressed. This setting overrides the Security lock timer setting.

**Storage**

**INTERNAL STORAGE**

**Total space** Displays the total amount of space and the available space in your phone’s internal memory in text and with a color-coded bar graph (unused space is gray). Corresponding apps and the amount of space they use is listed under each device user.

**SD CARD**

**Total space** Displays the total amount of space and the remaining available space in your memory card.

**Mount/Unmount SD card** Allows you to mount or unmount your microSD card.

**Erase SD card** Allows you to erase all of the data on your microSD card.

**NOTE** Tap the **Menu** icon to change the units (MB or GB) or access USB PC connection.

**Battery**

**BATTERY INFORMATION**

The current battery status is displayed including the percentage of remaining charge and charging state.

**Battery usage** Displays battery usage information including a graph and app usage details.

**Battery percentage on Status Bar** Enable this option to display the battery level as a percentage on the Status Bar next to the battery icon.
### BATTERY SAVER

**Battery saver** Tap the switch to toggle it On or Off. Tap **Battery saver** to adjust its settings.

### Application manager

Swipe left and right to view the **DOWNLOADED** tab, **ON SD CARD** tab, **RUNNING** tab, or **ALL** tab.

Tap an entry to view more information, tap **Stop** (or **Force stop**), then **YES** to stop the app from running.

### PERSONAL

The Personal category allows you to configure, manage, and secure your personal information.

#### Location

Tap the switch at the top of its screen to toggle it On or Off.

On enables sharing your location when you search for information and use location-based apps, such as Maps.

**E911 Location** E911 Location cannot be turned off on any mobile phone.

**Mode** Allows you to set the mode that establishes your location. This setting is gray if the Location switch is off.

### RECENT LOCATION REQUEST

Displays all of the apps that have requested access to your location. Tap one to view details.

### LOCATION SERVICES

**Camera** Enable this option to automatically tag photos and videos with their location as identified by your phone.

**Google Location History** Allows you to enable or disable Location Reporting and Location History. When enabled, Google periodically stores and uses your phone’s most recent location data in connection with your Google Account.
**Security**

**Content lock** Allows you to set a lock type (password or pattern) for your QuickMemo+ files. Once set, you can change it and backup your account from here.

**ENCRYPTION**

**Encrypt phone** Allows you to encrypt your phone data for security. Each time you turn on your phone, a PIN or password will be required to decrypt your data.

**Encrypt SD card storage** Allows you to encrypt or decrypt external microSD card data. Encrypted data is not accessible on other devices.

**SIM CARD LOCK**

**Set up SIM card lock** Allows you to lock your SIM card with a PIN or password. After it’s set, you can change it from here.

**PASSWORDS**

**Password typing visible** Enable this option to briefly show each character of the password as you type it so you can see what you’ve entered.

**PHONE ADMINISTRATION**

**Phone administrators** Allows you to view and selectively deactivate phone administrators.

**Unknown sources** Enable this option to allow installation of non-Play Store apps.

**Verify apps** Enable this option to disallow or warn before installation of apps that may cause harm to your phone.

**CREDENTIAL STORAGE**

**Storage type** Displays the current storage type.

**Certificate management** Allows you to manage your security certificates.

**Trusted credentials** Allows apps to access your phone’s encrypted store of secure certificates, related passwords, and other credentials.
It includes a **System** tab and a **User** tab. Credential storage is used to establish some kinds of VPN and Wi-Fi connections.

**Install from storage** Allows you to install a secure certificate from storage.

**Clear credentials** Allows you to delete all secure certificates and related credentials and erases the secure storage’s own password. You’re prompted to confirm you want to clear this data.

**ADVANCED SETTINGS**

**Trust agents** Allows you to view and selectively deactivate Trust agents.

**Screen pin** Tap the switch at the top of its screen to toggle it on or off. On allows only the current app to be used. This is helpful when allowing children to use your phone.

**App usage access** Allows you to enable or disable the apps that can view your phone’s app usage.

**Accounts**

**Auto-sync data** Enable this option to automatically sync all accounts you’ve added on your phone.

**ACCOUNTS**
Displays all of your added accounts. Tap one to view and/ or manage (e.g., change details, access, sync settings, etc.) it.

**ADD ACCOUNT** Allows you to add accounts to your phone.

**Language & input**

**Language** Allows you to set the language for your phone’s software.

**KEYBOARD & INPUT METHODS**

**Default** Displays the name of the default keyboard.

**LG Keyboard** Tap its Settings icon to change the LG keyboard settings.

**MY KEYBOARD**

Input language and keyboard layout  Allows you to set multiple keyboard languages to enter text.

Keyboard height and layout  Allows you to adjust various height and layout options for your keyboard to make it easier for you to use. These options include QWERTY layout and Keyboard height.

Keyboard theme  Allows you to set the keyboard color.

SMART INPUT

Path input  Enable this option to enter a word by drawing a path through all of its letters.

Word suggestions  Tap the switch to toggle it On or Off. On shows predicted words in the selection box as you type. Tap Word suggestions for additional options that include Emoticons, Next word, Personal dictionary, Update word suggestions, and Clear suggestion history.

Auto-correction  Allows you to set your level of automatic word correction.

More  Allows you to set other keyboard options to enhance your text input. Options include Vibrate on keypress, Sound on keypress, Pop-up on keypress, Auto-capitalization, Auto-punctuation, and Touch and hold time.

Help  Displays information regarding text input.

Google voice typing  Enable this option to enable voice input. Tap its Settings icon to change its settings.

Language  Allows you to set the language(s) supported with Google voice typing.

“OK Google” detection  Allows you to set when saying “OK Google” will start a Google voice search.

Speech output  Allows you to set when to use speech output.

Offline speech recognition  Allows you to manage downloaded languages.
Block offensive words  Toggle this setting On or Off. On will hide recognized offensive text.

Bluetooth headset  Toggle this setting On or Off. On will record audio through a connected Bluetooth headset.

SPEECH

Voice search  Allows you to set various voice search options.

Text-to-speech output  Allows you to set the preferred speech engine, speech rate, and pitch change. You can listen to an example and view the default language status.

MOUSE/TRACKPAD

Pointer speed  Allows you to set the pointer speed on a slide bar.

Reverse buttons  Set to reverse the mouse buttons to use primary button on right.

Backup & reset

LG BACKUP

LG Backup  Allows you to copy data from a previous device to a new device. You can also back up data or restore data from a previous back up.

GOOGLE BACKUP

Back up my data  Enable this option to automatically backup your data to Google servers.

Backup account  Allows you to identify which account(s) to backup. You can also add new accounts.

Automatic restore  Enable this option to automatically restore your device to its previous state when you reinstall an app.
RESET

**Factory data reset** Allows you to erase all of the data on the phone. Read the warning, then tap **RESET PHONE**. Tap **Delete all** to confirm and reset the phone.

**Reset settings** Allows you to restore the default system settings.

SYSTEM

→ **Shortcut key**
Tap the switch at the top of its screen to toggle it On or Off. On enables shortcuts activated by the **Volume Keys**. When this setting is enabled and the phone is locked or in timeout:

- Press the **Volume Up Key** twice to open the **QuickMemo+** app.
- Press the **Volume Down Key** twice to launch the **Camera** app.

← **Date & time**

**BASIC**

Enable the **Auto-date & time** option or tap **Set date** and/or **Set time** to use a date/time other than the one provided by the network.

Enable the **Auto-time zone** option or tap **Select time zone** to use a time zone other than the one provided by the network.

**TIME FORMAT**

**Use 24-hour format** Enable this option to display the time using the 24-hour format (e.g., 13:00 instead of 1:00 PM).

**Accessibility**

**CATEGORIES**

**Vision** Sets options for people with impaired sight.

- **TalkBack** On provides verbal feedback when you tap the screen. Tap the switch to toggle it On or Off. To select an item, tap it, then double-tap it. To scroll, use three fingers to swipe across the screen. Tap **TalkBack** to access and adjust the TalkBack settings.
When a headset is connected, passwords can be heard as they are entered unless the settings are changed to read passwords aloud without a headset.

**Message/call voice notifications** On enables your phone to automatically read your incoming calls and/or messages outloud. Tap the switch to toggle it On or Off. Tap **Message/call voice notifications** to modify your notification settings for Calls, Messages, Read messages, and Language.

**Lower screen brightness** Enable this option to dim the backlight.

**Font size** Allows you to set the size of the text.

**Touch zoom** On allows you to triple-tap the screen to zoom in and out. Tap the switch to toggle it On or Off.

**Screen color inversion** Enable this option to invert the screen colors for higher contrast.

**Screen color adjustment** On allows you to adjust the screen’s hue and contrast. Tap the switch to toggle it On or Off. Tap **Screen color adjustment** to adjust it.

**Screen color filter** On allows you to change color filters. Tap the switch to toggle it On or Off.

**Power key ends call** Enable this option to enable the **Power/Lock Key** to end a call.

**Hearing** Sets options for people with impaired hearing.

**Captions** On allows your phone to display caption text. Tap the switch to toggle it On or Off. Tap **Captions** to access and adjust its settings.

**Flash alerts** Enable this option to enable the camera’s flash to blink to notify you of incoming calls and notifications.

**Turn off all sounds** Enable this option to silence all phone sounds including sounds from the earpiece.

**Audio type** Allows you to set the audio type.

**Sound balance** Move the slider on the bar to set the sound balance between the left and right channel.
Dexterity and interaction Sets options for people with impaired motor skills.

**DEXTERITY**

**Touch feedback time** Allows you to set the touch and hold delay time.

**Touch assistant** On displays a Touch assistant icon which allows you to use its touch icons instead of hardware keys. Tap the switch to toggle it On or Off.

**Screen timeout** Allows you to set the amount of time before the backlight turns off automatically.

**INTERACTION**

**Touch control areas** On allows you to restrict access to a select portion of the screen. Tap the switch to toggle it On or Off.

**GENERAL**

**Accessibility features shortcut** On allows quick, easy access to selected features when you triple-tap the Home Button. Tap the switch to toggle it On or Off. Tap Accessibility to set the features you want activated.

**Auto-rotate screen** Enable this option to automatically rotate the screen based on the phone’s orientation.

**SERVICES**

**Switch Access** On allows you to enable switch access to selected features. Tap the switch at the top of its screen to toggle it On or Off. Tap OK, then tap SETTINGS to set it up.
About phone
View information about your phone including Phone name, Network, Status, Battery, Hardware info, Software info, Legal info, and Patent information.

System updates
Check for new system update Allows you to check for any available updates for your phone.
Show system update history Allows you to view your system update history.
LAST SYSTEM UPDATE: Displays your last update information.
**WARNING:** This product contains chemicals known to the State of California to cause cancer and birth defects or reproductive harm.

Call (800) 243-0000 for more information.

*Wash hands after handling.*

**HAC**

This phone has been tested and rated for use with hearing aids for some of the wireless technologies that it uses. However, there may be some newer wireless technologies used in this phone that have not been tested yet for use with hearing aids. It is important to try the different features of this phone thoroughly and in different locations, using your hearing aid or cochlear implant, to determine if you hear any interfering noise. Consult your service provider or the manufacturer of this phone for information on hearing aid compatibility. If you have questions about return or exchange policies, consult your service provider or phone retailer.

Any changes or modifications not expressly approved in this user guide could void your warranty for this equipment. Use only the supplied antenna. Use of unauthorized antennas (or modifications to the antenna) could impair call quality, damage the phone, void your warranty and/or violate FCC regulations.

Don’t use the phone with a damaged antenna. A damaged antenna could cause a minor skin burn. Contact your local dealer for a replacement antenna.

**FCC RF Exposure Information**

**WARNING!** Read this information before operating the phone.

In August 1996, the Federal Communications Commission (FCC) of the United States, with its action in Report and Order FCC 96-326, adopted an updated safety standard for human exposure to Radio Frequency (RF) electromagnetic energy emitted by FCC regulated transmitters. Those guidelines are consistent with the safety standard previously set by both U.S. and international standards bodies. The design of this phone complies with the FCC guidelines and these international standards.
Body-worn Operation
This device was tested for typical body-worn operations with the back of the phone kept 0.39 inches (1cm) between the user’s body and the back of the phone. To comply with FCC RF exposure requirements, a minimum separation distance of 0.39 inches (1cm) must be maintained between the user’s body and the back of the phone. Any belt-clips, holsters, and similar accessories containing metallic components may not be used. Body-worn accessories that cannot maintain 0.39 inches (1cm) separation distance between the user’s body and the back of the phone, and have not been tested for typical body-worn operations may not comply with FCC RF exposure limits and should be avoided.

Caution
Use only the supplied antenna. Use of unauthorized antennas (or modifications to the antenna) could impair call quality, damage the phone, void your warranty and/or violate FCC regulations.

Don’t use the phone with a damaged antenna. A damaged antenna could cause a minor skin burn. Contact your local dealer for a replacement antenna.

Part 15.19 statement
This device complies with part 15 of the FCC Rules. Operation is subject to the following two conditions:

(1) This device may not cause harmful interference.

(2) This device must accept any interference received, including interference that may cause undesired operation.

Part 15.21 statement
Changes or modifications that are not expressly approved by the manufacturer could void the user’s authority to operate the equipment.

Part 15.105 statement
This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference
in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation.

If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

- Reorient or relocate the receiving antenna.
- Increase the separation between the equipment and receiver.
- Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.
- Consult the dealer or an experienced radio/TV technician for help.

The phone by LG operates on Verizon’s 4G LTE network, based on Long Term Evolution (LTE) technology and Mobile Broadband 4G networks in the United States*. Now you can connect easily at high speeds to the Internet, your corporate Intranet, and your email while you’re away from the office.

* Service not available everywhere. Visit website (verizonwireless.com/4G) for a complete list of available areas.
* Information subject to change.

**Consumer Information About Radio Frequency Emissions**

Your wireless phone, which contains a radio transmitter and receiver, emits radio frequency energy during use. The following consumer information addresses commonly asked questions about the health effects of wireless phones.
Are wireless phones safe?

Scientific research on the subject of wireless phones and radio frequency ("RF") energy has been conducted worldwide for many years, and continues. In the United States, the Food and Drug Administration ("FDA") and the Federal Communications Commission ("FCC") set policies and procedures for wireless phones. The FDA issued a website publication on health issues related to cell phone usage where it states, “The scientific community at large … believes that the weight of scientific evidence does not show an association between exposure to radiofrequency (RF) from cell phones and adverse health outcomes. Still the scientific community does recommend conducting additional research to address gaps in knowledge. That research is being conducted around the world and the FDA continues to monitor developments in this field. You can access the joint FDA/FCC website at http://www.fda.gov (under “c” in the subject index, select Cell Phones > Research). You can also contact the FDA toll-free at (888) 463-6332 or (888) INFO-FDA. In June 2000, the FDA entered into a cooperative research and development agreement through which additional scientific research is being conducted. The FCC issued its own website publication stating that “there is no scientific evidence that proves that wireless phone usage can lead to cancer or a variety of other problems, including headaches, dizziness or memory loss.” This publication is available at http://www.fcc.gov/cgb/ cellular.html or through the FCC at (888) 225-5322 or (888) CALL-FCC.

What does “SAR” mean?

In 1996, the FCC, working with the FDA, the U.S. Environmental Protection Agency, and other agencies, established RF exposure safety guidelines for wireless phones in the United States. Before a wireless phone model is available for sale to the public, it must be tested by the manufacturer and certified to the FCC that it does not exceed limits established by the FCC. One of these limits is expressed as a Specific Absorption Rate, or “SAR.” SAR is a measure of the rate of absorption of RF energy in the body. Tests for SAR are conducted with the phone transmitting at its highest power level in all tested frequency bands. Since 1996, the FCC has required that
the SAR of handheld wireless phones not exceed 1.6 watts per kilogram, averaged over one gram of tissue.

Although the SAR is determined at the highest power level, the actual SAR value of a wireless phone while operating can be less than the reported SAR value. This is because the SAR value may vary from call to call, depending on factors such as proximity to a cell site, the proximity of the phone to the body while in use, and the use of hands-free devices. For more information about SARs, see the FCC’s OET Bulletins 56 and 65 at http://www.fcc.gov/Bureaus/Engineering_Technology/Documents/bulletins or visit the Cellular Telecommunications Industry Association website at http://www.ctia.org/consumer_info/index.cfm/AID/10371. You may also wish to contact the manufacturer of your phone.

**Can I minimize my RF exposure?**

If you are concerned about RF, there are several simple steps you can take to minimize your RF exposure. You can, of course, reduce your talk time. You can place more distance between your body and the source of the RF, as the exposure level drops off dramatically with distance. The FDA/FCC website states that “hands-free kits can be used with wireless phones for convenience and comfort. These systems reduce the absorption of RF energy in the head because the phone, which is the source of the RF emissions, will not be placed against the head. On the other hand, if the phone is mounted against the waist or other part of the body during use, then that part of the body will absorb more RF energy. Wireless phones marketed in the U.S. are required to meet safety requirements regardless of whether they are used against the head or against the body. Either configuration should result in compliance with the safety limit.” Also, if you use your wireless phone while in a car, you can use a phone with an antenna on the outside of the vehicle. You should also read and follow your wireless phone manufacturer’s instructions for the safe operation of your phone.

**Do wireless phones pose any special risks to children?**

The FDA/FCC website states that “the scientific evidence does not show a danger to users of wireless communication devices, including children.”
The FDA/FCC website further states that “some groups sponsored by other national governments have advised that children be discouraged from using wireless phones at all”. For example, the Stewart Report from the United Kingdom [“UK”] made such a recommendation in December 2000. In this report a group of independent experts noted that no evidence exists that using a cell phone causes brain tumors or other ill effects. [The UK’s] recommendation to limit cell phone use by children was strictly precautionary; it was not based on scientific evidence that any health hazard exists. A copy of the UK’s leaflet is available at http://www.dh.gov.uk (search “mobile”), or you can write to: NRPB, Chilton, Didcot, Oxon OX11 ORQ, United Kingdom. Copies of the UK’s annual reports on mobile phones and RF are available online at www.iegmp.org.uk and http://www.hpa.org.uk/radiation/ (search “mobile”). Parents who wish to reduce their children’s RF exposure may choose to restrict their children’s wireless phone use.

Where can I get further information about RF emissions?

Consumer Information on SAR

(Specific Absorption Rate)

This model phone meets the government’s requirements for exposure to radio waves. Your wireless phone is a radio transmitter and receiver. It is designed and manufactured not to exceed the emission limits for exposure to Radio Frequency (RF) energy set by the Federal Communications Commission of the U.S. Government. These limits are part of comprehensive guidelines and establish permitted levels of RF energy for the general population. The guidelines are based on standards that were developed by independent scientific organizations through periodic and thorough evaluation of scientific studies. The standards include a substantial safety margin designed to assure the safety of all persons, regardless of age and health.

The exposure standard for wireless mobile phones employs a unit of measurement known as the Specific Absorption Rate, or SAR. The SAR limit set by the FCC is 1.6 W/kg. Tests for SAR are conducted using standard operating positions specified by the FCC with the phone transmitting at its highest certified power level in all tested frequency bands. Although SAR is determined at the highest certified power level, the actual SAR level of the phone while operating can be well below the maximum value. Because the phone is designed to operate at multiple power levels to use only the power required to reach the network, in general, the closer you are to a wireless base station antenna, the lower the power output.

Before a phone model is available for sale to the public, it must be tested and certified to the FCC that it does not exceed the limit established by the government-adopted requirement for safe exposure. The tests are performed in positions and locations (e.g., at the ear and worn on the body) as required by the FCC for each model.

The highest SAR values are:

- Head: 1.15 W/kg
- Body-worn/Hotspot: 1.29 W/kg
(Body-worn measurements differ among phone models, depending upon available accessories and FCC requirements).

While there may be differences between SAR levels of various phones and at various positions, they all meet the government requirement for safe exposure.

The FCC has granted an Equipment Authorization for this model phone with all reported SAR levels evaluated as in compliance with the FCC RF emission guidelines. SAR information on this model phone is on file with the FCC and can be found under the Display Grant section of http://www.fcc.gov/oet/ea/fccid after searching on FCC ID ZNFVW820. Additional information on Specific Absorption Rates (SAR) can be found on the Cellular Telecommunications Industry Association (CTIA) website at http://www.ctia.org/.

* In the United States and Canada, the SAR limit for mobile phones used by the public is 1.6 watts/kg (W/kg) averaged over one gram of tissue. The standard incorporates a substantial margin of safety to give additional protection for the public and to account for any variations in measurements.

**FCC Hearing-Aid Compatibility (HAC) Regulations for Wireless Devices**

On July 10, 2003, the U.S. Federal Communications Commission (FCC) Report and Order in WT Docket 01-309 modified the exception of wireless phones under the Hearing Aid Compatibility Act of 1988 (HAC Act) to require digital wireless phones be compatible with hearing-aids. The intent of the HAC Act is to ensure reasonable access to telecommunications services for persons with hearing disabilities.

While some wireless phones are used near some hearing devices (hearing aids and cochlear implants), users may detect a buzzing, humming, or whining noise. Some hearing devices are more immune than others to this interference noise, and phones also vary in the amount of interference they generate.
The wireless telephone industry has developed a rating system for wireless phones, to assist hearing device users to find phones that may be compatible with their hearing devices. Not all phones have been rated. Phones that are rated have the rating on their box or a label located on the box.

The ratings are not guarantees. Results will vary depending on the user’s hearing device and hearing loss. If your hearing device happens to be vulnerable to interference, you may not be able to use a rated phone successfully. Trying out the phone with your hearing device is the best way to evaluate it for your personal needs.

M-Ratings: Phones rated M3 or M4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. M4 is the better/higher of the two ratings.

T-Ratings: Phones rated T3 or T4 meet FCC requirements and are likely to generate less interference to hearing devices than phones that are not labeled. T4 is the better/higher of the two ratings.

Hearing devices may also be rated. Your hearing device manufacturer or hearing health professional may help you find this rating. Higher ratings mean that the hearing device is relatively immune to interference noise. The hearing aid and wireless phone rating values are then added together. A sum of 5 is considered acceptable for normal use. A sum of 6 is considered for best use.

In the above example, if a hearing aid meets the M2 level rating and the wireless phone meets the M3 level rating, the sum of the two values equal M5. This should provide the hearing aid user with “normal usage” while using their hearing aid with the particular wireless phone. “Normal usage” in this context is defined as a signal quality that’s acceptable for normal operation.
The M mark is intended to be synonymous with the U mark. The T mark is intended to be synonymous with the UT mark. The M and T marks are recommended by the Alliance for Telecommunications Industries Solutions (ATIS). The U and UT marks are referenced in Section 20.19 of the FCC Rules. The HAC rating and measurement procedure are described in the American National Standards Institute (ANSI) C63.19 standard.

To ensure that the Hearing Aid Compatibility rating for your phone is maintained, secondary transmitters such as Bluetooth® and WLAN components must be disabled during a call.

For information about hearing aids and digital wireless phones:

**Wireless Phones and Hearing Aid Accessibility**
http://www.accesswireless.org/

**Gallaudet University, RERC**
http://tap.gallaudet.edu/Voice/

**FCC Hearing Aid Compatibility and Volume Control**
http://www.fcc.gov/cgb/dro/hearing.html

**The Hearing Aid Compatibility FCC Order**

**Hearing Loss Association of America [HLAA]**
http://hearingloss.org/content/telephones-and-mobile-devices

**Caution:**

**Avoid potential hearing loss.**

Prolonged exposure to loud sounds (including music) is the most common cause of preventable hearing loss. Some scientific research suggests that using portable audio devices, such as portable music players and cellular telephones, at high volume settings for long durations may lead to permanent noise-induced hearing loss. This includes the use of headphones (including headsets, earbuds and Bluetooth® or other wireless
Safety devices. Exposure to very loud sound has also been associated in some studies with tinnitus (a ringing in the ear), hypersensitivity to sound and distorted hearing. Individual susceptibility to noise-induced hearing loss and other potential hearing problems varies.

The amount of sound produced by a portable audio device varies depending on the nature of the sound, the device, the device settings and the headphones. You should follow some commonsense recommendations when using any portable audio device:

- Set the volume in a quiet environment and select the lowest volume at which you can hear adequately.
- When using headphones, turn the volume down if you cannot hear the people speaking near you or if the person sitting next to you can hear what you are listening to.
- Do not turn the volume up to block out noisy surroundings. If you choose to listen to your portable device in a noisy environment, use noise-cancelling headphones to block out background environmental noise.
- Limit the amount of time you listen. As the volume increases, less time is required before your hearing could be affected.
- Avoid using headphones after exposure to extremely loud noises, such as concerts, that might cause temporary hearing loss. Temporary hearing loss might cause unsafe volumes to sound normal.
- Do not listen at any volume that causes you discomfort. If you experience ringing in your ears, hear muffled speech or experience any temporary hearing difficulty after listening to your portable audio device, discontinue use and consult your doctor.
TIA Safety Information

The following is the complete TIA Safety Information for wireless handheld phones.

Exposure to Radio Frequency Signal

Your wireless handheld portable phone is a low power radio transmitter and receiver. When ON, it receives and sends out Radio Frequency (RF) signals.

In August, 1996, the Federal Communications Commissions (FCC) adopted RF exposure guidelines with safety levels for handheld wireless phones. Those guidelines are consistent with the safety standards previously set by both U.S. and international standards bodies:

- ANSI C95.1 (1992) *
- NCRP Report 86 (1986)
- ICNIRP (1996)

Those standards were based on comprehensive and periodic evaluations of the relevant scientific literature. For example, over 120 scientists, engineers, and physicians from universities, government health agencies, and industry reviewed the available body of research to develop the ANSI Standard (C95.1).

The design of your phone complies with the FCC guidelines (and those standards)

Antenna Care

Use only the supplied or an approved replacement antenna. Unauthorized antennas, modifications, or attachments could damage the phone and may violate FCC regulations.

Phone Operation

NORMAL POSITION: Hold the phone as you would any other telephone with the antenna pointed up and over your shoulder.
Safety

Tips on Efficient Operation
For your phone to operate most efficiently:

Don’t touch the antenna unnecessarily when the phone is in use. Contact with the antenna affects call quality and may cause the phone to operate at a higher power level than otherwise needed.

Electronic Devices
Most modern electronic equipment is shielded from RF signals. However, certain electronic equipment may not be shielded against the RF signals from your wireless phone.

Pacemakers
The Health Industry Manufacturers Association recommends that a minimum separation of six (6) inches be maintained between a handheld wireless phone and a pacemaker to avoid potential interference with the pacemaker. These recommendations are consistent with the independent research by and recommendations of Wireless Technology Research. Persons with pacemakers:

• Should ALWAYS keep the phone more than six (6) inches from their pacemaker when the phone is turned ON;
• Should not carry the phone in a breast pocket;
• Should use the ear opposite the pacemaker to minimize the potential for interference;
• Should turn the phone OFF immediately if there is any reason to suspect that interference is taking place.

Hearing Aids
Some digital wireless phones may interfere with some hearing aids. In the event of such interference, you may want to consult your service provider (or call the customer service line to discuss alternatives).

Other Medical Devices
If you use any other personal medical device, consult the manufacturer of your device to determine if it is adequately shielded from external RF
energy. Your physician may be able to assist you in obtaining this information.

Health Care Facilities
Turn your phone OFF in health care facilities when any regulations posted in these areas instruct you to do so. Hospitals or health care facilities may use equipment that could be sensitive to external RF energy.

Vehicles
RF signals may affect improperly installed or inadequately shielded electronic systems in motor vehicles. Check with the manufacturer or its representative regarding your vehicle. You should also consult the manufacturer of any equipment that has been added to your vehicle.

Posted Facilities
Turn your phone OFF in any facility where posted notices so require.

Aircraft
FCC regulations prohibit using your phone while in the air. Switch OFF your phone before boarding an aircraft.

Blasting Areas
To avoid interfering with blasting operations, turn your phone OFF when in a “blasting area” or in areas posted: “Turn off two-way radio”. Obey all signs and instructions.

Potentially Explosive Atmosphere
Turn your phone OFF when in any area with a potentially explosive atmosphere and obey all signs and instructions. Sparks in such areas could cause an explosion or fire resulting in bodily injury or even death.

Areas with a potentially explosive atmosphere are often, but not always marked clearly. Potential areas may include: fueling areas (such as gasoline stations); below deck on boats; fuel or chemical transfer or storage facilities; vehicles using liquefied petroleum gas (such as propane or butane); areas where the air contains chemicals or particles (such as grain,
dust, or metal powders); and any other area where you would normally be advised to turn off your vehicle engine.

**For Vehicles Equipped with an Air Bag**

An air bag inflates with great force. **DO NOT** place objects, including either installed or portable wireless equipment, in the area over the air bag or in the air bag deployment area. If in-vehicle wireless equipment is improperly installed and the air bag inflates, serious injury could result.

**Safety Information**

Please read and observe the following information for safe and proper use of your phone and to prevent damage.

⚠️ **Caution**

Violation of the instructions may cause minor or serious damage to the product.

- Do not disassemble or open crush, bend or deform, puncture or shred.
- Do not modify or remanufacture, attempt to insert foreign objects into the battery, immerse or expose to water or other liquids, expose to fire, explosion or other hazard.
- Only use the battery for the system for which it is specified.
- Only use the battery with a charging system that has been qualified with the system per CTIA Certification Requirements for Battery System Compliance to IEEE1725. Use of an unqualified battery or charger may present a risk of fire, explosion, leakage, or other hazard.
- Do not short circuit a battery or allow metallic conductive objects to contact battery terminals.
- Replace the battery only with another battery that has been qualified with the system per this standard, IEEE-Std-1725. Use of an unqualified battery may present a risk of fire, explosion, leakage or other hazard. Only authorized service providers shall replace battery (If the battery is non-user replaceable).
• Promptly dispose of used batteries in accordance with local regulations.

• Battery usage by children should be supervised.

• Avoid dropping the phone or battery. If the phone or battery is dropped, especially on a hard surface, and the user suspects damage, take it to a service center for inspection.

• Improper battery use may result in a fire, explosion or other hazard.

**Charger and Adapter Safety**

• The charger and adapter are intended for indoor use only.

• Insert the battery charger vertically into the wall power socket.

• Only use the LG-approved battery charger. Otherwise, you may cause serious damage to your phone.

• Use the correct adapter for your phone when using the battery charger abroad.

**Battery Information and Care**

• Always unplug the charger from the wall socket after the phone is fully charged to save unnecessary power consumption of the charger.

• Please read the manual for the specified charger to learn how to charge it.

• Do not damage the power cord by bending, twisting, or heating. Do not use the plug if it is loose as it may cause electric shock or fire.

• Do not place any heavy items on the power cord. Do not allow the power cord to be crimped as it may cause electric shock or fire.

• Unplug the power cord prior to cleaning your phone, and clean the power plug pin when it’s dirty. When using the power plug, ensure that it’s firmly connected. If not, it may cause excessive heat or fire. If you put your phone in a pocket or bag without covering the receptacle of the phone (power plug pin), metallic articles (such as a coin, paperclip or pen) may short-circuit the phone. Always cover the receptacle when not in use.
• Recharge the battery after long periods of non-use to maximize battery life. Battery life will vary due to usage pattern and environmental conditions.

• Please use only an approved charging accessory to charge your LG phone. Improper handling of the charging port, as well as the use of an incompatible charger, may cause damage to your phone and void the warranty.

• The charging temperature range is regulated between 32°F (0°C) and 104°F (40°C). Do not charge the battery outside of the recommended temperature range. Charging outside this range might cause excessive heat generation, serious battery damage, and deterioration of battery’s characteristics and cycle life.

• Do not use or leave the phone in direct sunlight or in a car heated by sunshine. The battery may generate excessive heat, smoke, or flame. It also might cause deterioration of battery’s characteristics or cycle life.

• If skin or clothing is smeared with liquid from the battery, wash with fresh water. It may cause the skin inflammation.

• Please take your phone to an authorized service center immediately if this occurs.

• Do not handle the phone with wet hands while charging. It may cause an electric shock or seriously damage your phone.

• Do not place or answer calls while charging the phone as it may short-circuit the phone and/or cause electric shock or fire.

• The charger and adapter are intended for indoor use only.

• Insert the battery charger horizontally into the wall power socket.

• Talking on your phone for an extended period of time may reduce call quality due to heat generated during use.

• Do not use harsh chemicals (such as alcohol, benzene, thinners, etc.) or detergents to clean your phone as this could cause a fire.
• Do not place or answer calls while charging the phone as it may short-circuit the phone and/or cause electric shock or fire.

**Explosion, Shock, and Fire Hazards**

• Do not put your phone in a place subject to excessive dust and keep the minimum required distance between the power cord and heat sources.

• Unplug the power cord prior to cleaning your phone, and clean the power plug pin when it’s dirty.

• When using the power plug, ensure that it’s firmly connected. If not, it may cause excessive heat or fire.

• If you put your phone in a pocket or bag without covering the receptacle of the phone (power plug pin), metallic articles (such as a coin, paperclip or pen) may short-circuit the phone and may cause an explosion. Always cover the receptacle when not in use.

**General Notice**

• Do not place items containing magnetic components such as a credit card, phone card, bank book, or subway ticket near your phone. The magnetism of the phone may damage the data stored in the magnetic strip.

• Talking on your phone for a long period of time may reduce call quality due to heat generated during use.

• When the phone is not used for a long period time, store it in a safe place with the power cord unplugged.

• Using the phone in proximity to receiving equipment (i.e., TV or radio) may cause interference to the phone.

• Do not use the phone if the antenna is damaged. If a damaged antenna contacts skin, it may cause a slight burn. Please contact an LG Authorized Service Center to replace the damaged antenna.

• Do not immerse your phone in water, liquid, or expose to high humidity. If the phone is expose to liquid, turn it off immediately and bring it to an LG Authorized Service Center.
• Do not paint your phone.

• The data saved in your phone might be deleted due to careless use, repair of the phone, or upgrade of the software. Please backup your important phone numbers (Ringtones, text messages, voice messages, pictures, and videos could also be deleted.) The manufacturer is not liable for damage due to the loss of data.

• When you use the phone in public places, set the ringtone to vibration so you don’t disturb others.

• Do not turn your phone on or off when putting it to your ear.

• Use accessories, such as earphones and headsets, with caution. Ensure that cables are tucked away safely.

**FDA Consumer Update**

The U.S. Food and Drug Administration’s Center for Devices and Radiological Health Consumer Update on Mobile Phones:

1. **Do wireless phones pose a health hazard?**

The available scientific evidence does not show that any health problems are associated with using wireless phones. There is no proof, however, that wireless phones are absolutely safe. Wireless phones emit low levels of Radio Frequency (RF) energy in the microwave range while being used. They also emit very low levels of RF when in standby mode. Whereas high levels of RF can produce health effects (by heating tissue), exposure to low level RF that does not produce heating effects causes no known adverse health effects. Many studies of low level RF exposures have not found any biological effects. Some studies have suggested that some biological effects may occur, but such findings have not been confirmed by additional research. In some cases, other researchers have had difficulty in reproducing those studies, or in determining the reasons for inconsistent results.
2. What is the FDA's role concerning the safety of wireless phones?

Under the law, the FDA does not review the safety of radiation-emitting consumer products such as wireless phones before they can be sold, as it does with new drugs or medical devices. However, the agency has authority to take action if wireless phones are shown to emit Radio Frequency (RF) energy at a level that is hazardous to the user. In such a case, the FDA could require the manufacturers of wireless phones to notify users of the health hazard and to repair, replace, or recall the phones so that the hazard no longer exists.

Although the existing scientific data do not justify FDA regulatory actions, the FDA has urged the wireless phone industry to take a number of steps, including the following:

- Support needed research into possible biological effects of RF of the type emitted by wireless phones;
- Design wireless phones in a way that minimizes any RF exposure to the user that is not necessary for device function; and
- Cooperate in providing users of wireless phones with the best possible information on possible effects of wireless phone use on human health.

The FDA belongs to an interagency working group of the federal agencies that have responsibility for different aspects of RF safety to ensure coordinated efforts at the federal level. The following agencies belong to this working group:

- National Institute for Occupational Safety and Health
- Environmental Protection Agency
- Occupational Safety and Health Administration
- National Telecommunications and Information Administration

The National Institutes of Health participates in some interagency working group activities, as well.

The FDA shares regulatory responsibilities for wireless phones with the Federal Communications Commission (FCC). All phones that are sold in the
United States must comply with FCC safety guidelines that limit RF exposure. The FCC relies on the FDA and other health agencies for safety questions about wireless phones.

The FCC also regulates the base stations that the wireless phone networks rely upon. While these base stations operate at higher power than do the wireless phones themselves, the RF exposures that people get from these base stations are typically thousands of times lower than those they can get from wireless phones. Base stations are thus not the subject of the safety questions discussed in this document.

3. What kinds of phones are the subject of this update?

The term “wireless phone” refers here to handheld wireless phones with built-in antennas, often called “cell”, “mobile”, or “PCS” phones. These types of wireless phones can expose the user to measurable Radio Frequency (RF) energy because of the short distance between the phone and the user’s head.

These RF exposures are limited by FCC safety guidelines that were developed with the advice of the FDA and other federal health and safety agencies. When the phone is located at greater distances from the user, the exposure to RF is drastically lower because a person’s RF exposure decreases rapidly with increasing distance from the source. The so-called “cordless phones,” which have a base unit connected to the telephone wiring in a house, typically operate at far lower power levels, and thus produce RF exposures far below the FCC safety limits.

4. What are the results of the research done already?

The research done thus far has produced conflicting results, and many studies have suffered from flaws in their research methods. Animal experiments investigating the effects of Radio Frequency (RF) energy exposures characteristic of wireless phones have yielded conflicting results that often cannot be repeated in other laboratories. A few animal studies, however, have suggested that low levels of RF could accelerate the development of cancer in laboratory animals. However, many of the studies that showed increased tumor development used animals that had been genetically engineered or treated with cancer-causing chemicals so as to be
Safety

pre-disposed to develop cancer in the absence of RF exposure. Other studies exposed the animals to RF for up to 22 hours per day. These conditions are not similar to the conditions under which people use wireless phones, so we do not know with certainty what the results of such studies mean for human health. Three large epidemiology studies have been published since December 2000. Between them, the studies investigated any possible association between the use of wireless phones and primary brain cancer, glioma, meningioma, or acoustic neuroma, tumors of the brain or salivary gland, leukemia, or other cancers. None of the studies demonstrated the existence of any harmful health effects from wireless phone RF exposures. However, none of the studies can answer questions about long-term exposures, since the average period of phone use in these studies was around three years.

5. What research is needed to decide whether RF exposure from wireless phones poses a health risk?

A combination of laboratory studies and epidemiological studies of people actually using wireless phones would provide some of the data that are needed. Lifetime animal exposure studies could be completed in a few years. However, very large numbers of animals would be needed to provide reliable proof of a cancer promoting effect if one exists. Epidemiological studies can provide data that is directly applicable to human populations, but ten or more years follow-up may be needed to provide answers about some health effects, such as cancer. This is because the interval between the time of exposure to a cancer-causing agent and the time tumors develop — if they do — may be many, many years. The interpretation of epidemiological studies is hampered by difficulties in measuring actual RF exposure during day-to-day use of wireless phones. Many factors affect this measurement, such as the angle at which the phone is held, or which model of phone is used.

6. What is the FDA doing to find out more about the possible health effects of wireless phone RF?

The FDA is working with the U.S. National Toxicology Program and with groups of investigators around the world to ensure that high priority animal
studies are conducted to address important questions about the effects of exposure to Radio Frequency (RF) energy.

The FDA has been a leading participant in the World Health Organization International Electro Magnetic Fields (EMF) Project since its inception in 1996. An influential result of this work has been the development of a detailed agenda of research needs that has driven the establishment of new research programs around the world. The project has also helped develop a series of public information documents on EMF issues.

The FDA and the Cellular Telecommunications & Internet Association (CTIA) have a formal Cooperative Research And Development Agreement (CRADA) to do research on wireless phone safety. The FDA provides the scientific oversight, obtaining input from experts in government, industry, and academic organizations. CTIA-funded research is conducted through contracts with independent investigators. The initial research will include both laboratory studies and studies of wireless phone users. The CRADA will also include a broad assessment of additional research needs in the context of the latest research developments around the world.

7. How can I find out how much Radio Frequency energy exposure I can get by using my wireless phone?

All phones sold in the United States must comply with Federal Communications Commission (FCC) guidelines that limit Radio Frequency (RF) energy exposures. The FCC established these guidelines in consultation with the FDA and the other federal health and safety agencies. The FCC limit for RF exposure from wireless phones is set at a Specific Absorption Rate (SAR) of 1.6 watts per kilogram (1.6 W/kg). The FCC limit is consistent with the safety standards developed by the Institute of Electrical and Electronic Engineering (IEEE) and the National Council on Radiation Protection and Measurement. The exposure limit takes into consideration the body’s ability to remove heat from the tissues that absorb energy from the wireless phone and is set well below levels known to have effects. Manufacturers of wireless phones must report the RF exposure level for each model of phone to the FCC. The FCC website (http://www.fcc.gov/oet/rfsafety) gives directions for locating the FCC identification
number on your phone so you can find your phone’s RF exposure level in the online listing.

8. What has the FDA done to measure the Radio Frequency energy coming from wireless phones?

The Institute of Electrical and Electronic Engineers (IEEE) is developing a technical standard for measuring the Radio Frequency (RF) energy exposure from wireless phones and other wireless handsets with the participation and leadership of FDA scientists and engineers. The standard, “Recommended Practice for Determining the Spatial-Peak Specific Absorption Rate (SAR) in the Human Body Due to Wireless Communications Devices: Experimental Techniques”, sets forth the first consistent test methodology for measuring the rate at which RF is deposited in the heads of wireless phone users. The test method uses a tissue-simulating model of the human head. Standardized SAR test methodology is expected to greatly improve the consistency of measurements made at different laboratories on the same phone. SAR is the measurement of the amount of energy absorbed in tissue, either by the whole body or a small part of the body. It is measured in watts/kg (or milliwatts/g) of matter. This measurement is used to determine whether a wireless phone complies with safety guidelines.

9. What steps can I take to reduce my exposure to Radio Frequency energy from my wireless phone?

If there is a risk from these products — and at this point we do not know that there is — it is probably very small. But if you are concerned about avoiding even potential risks, you can take a few simple steps to minimize your exposure to Radio Frequency (RF) energy. Since time is a key factor in how much exposure a person receives, reducing the amount of time spent using a wireless phone will reduce RF exposure. If you must conduct extended conversations by wireless phone every day, you could place more distance between your body and the source of the RF, since the exposure level drops off dramatically with distance. For example, you could use a headset and carry the wireless phone away from your body or use a wireless phone connected to a remote antenna. Again, the scientific data does not demonstrate that wireless phones are harmful. But if you are
concerned about the RF exposure from these products, you can use measures like those described above to reduce your RF exposure from wireless phone use.

10. What about children using wireless phones?

The scientific evidence does not show a danger to users of wireless phones, including children and teenagers. If you want to take steps to lower exposure to Radio Frequency (RF) energy, the measures described above would apply to children and teenagers using wireless phones. Reducing the time of wireless phone use and increasing the distance between the user and the RF source will reduce RF exposure.

Some groups sponsored by other national governments have advised that children be discouraged from using wireless phones at all. For example, the government in the United Kingdom distributed leaflets containing such a recommendation in December 2000. They noted that no evidence exists that using a wireless phone causes brain tumors or other ill effects. Their recommendation to limit wireless phone use by children was strictly precautionary; it was not based on scientific evidence that any health hazard exists.

11. What about wireless phone interference with medical equipment?

Radio Frequency (RF) energy from wireless phones can interact with some electronic devices. For this reason, the FDA helped develop a detailed test method to measure Electro Magnetic Interference (EMI) of implanted cardiac pacemakers and defibrillators from wireless telephones. This test method is now part of a standard sponsored by the Association for the Advancement of Medical Instrumentation (AAMI). The final draft, a joint effort by the FDA, medical device manufacturers, and many other groups, was completed in late 2000. This standard will allow manufacturers to ensure that cardiac pacemakers and defibrillators are safe from wireless phone EMI.

The FDA has tested hearing aids for interference from handheld wireless phones and helped develop a voluntary standard sponsored by the Institute of Electrical and Electronic Engineers (IEEE). This standard specifies test methods and performance requirements for hearing aids and wireless
phones so that no interference occurs when a person uses a “compatible” phone and a “compatible” hearing aid at the same time. This standard was approved by the IEEE in 2000.

The FDA continues to monitor the use of wireless phones for possible interactions with other medical devices. Should harmful interference be found to occur, the FDA will conduct testing to assess the interference and work to resolve the problem.

12. Where can I find additional information?

For additional information, please refer to the following resources:

FDA web page on wireless phones (http://www.fda.gov/cellphones/)

Federal Communications Commission (FCC) RF Safety Program (http://www.fcc.gov/oet/rfsafety)

International Commission on Non-Ionizing Radiation Protection (http://www.icnirp.de)

World Health Organization (WHO) International EMF Project (http://www.who.int/emf)

National Radiological Protection Board (UK) (http://www.hpa.org.uk/radiation/)

Driving

Check the laws and regulations on the use of wireless phones in the areas where you drive and always obey them. Also, if using your phone while driving, please observe the following:

• Give full attention to driving – driving safely is your first responsibility;

• Use hands-free operation, if available;

• Pull off the road and park before making or answering a call if driving conditions or the law require it.
10 Driver Safety Tips

Your wireless phone gives you the powerful ability to communicate by voice almost anywhere, anytime. An important responsibility accompanies the benefits of wireless phones, one that every user must uphold.

When operating a car, driving is your first responsibility. When using your wireless phone behind the wheel of a car, practice good common sense and remember the following tips:

1. Get to know your wireless phone and its features such as speed dial and redial. Carefully read your instruction manual and learn to take advantage of valuable features most phones offer, including automatic redial and memory. Also, work to memorize the phone keypad so you can use the speed dial function without taking your attention off the road.

2. When available, use a hands-free device. A number of hands-free wireless phone accessories are readily available today. Whether you choose an installed mounted device for your wireless phone or a speaker phone accessory, take advantage of these devices if available to you.

3. Make sure you place your wireless phone within easy reach and where you can reach it without removing your eyes from the road. If you get an incoming call at an inconvenient time, if possible, let your voicemail answer it for you.

4. Suspend conversations during hazardous driving conditions or situations. Let the person you are speaking with know you are driving; if necessary, suspend the call in heavy traffic or hazardous weather conditions. Rain, sleet, snow, and ice can be hazardous, but so is heavy traffic. As a driver, your first responsibility is to pay attention to the road.

5. Don’t take notes or look up phone numbers while driving. If you are reading an address book or business card, or writing a “to-do” list while driving a car, you are not watching where you are going. It is common sense. Do not get caught in a dangerous situation because you are reading or writing and not paying attention to the road or nearby vehicles.
6. Dial sensibly and assess the traffic; if possible, place calls when you are not moving or before pulling into traffic. Try to plan your calls before you begin your trip or attempt to coincide your calls with times you may be stopped at a stop sign, red light, or otherwise stationary. But if you need to dial while driving, follow this simple tip – dial only a few numbers, check the road and your mirrors, then continue.

7. Do not engage in stressful or emotional conversations that may be distracting. Stressful or emotional conversations and driving do not mix; they are distracting and even dangerous when you are behind the wheel of a car. Make people you are talking with aware you are driving and if necessary, suspend conversations which have the potential to divert your attention from the road.

8. Use your wireless phone to call for help. Your wireless phone is one of the greatest tools you can own to protect yourself and your family in dangerous situations – with your phone at your side, help is only three numbers away. Dial 911 or other local emergency number in the case of fire, traffic accident, road hazard, or medical emergency. Remember, it’s a free call on your wireless phone!

9. Use your wireless phone to help others in emergencies. Your wireless phone provides you a perfect opportunity to be a “Good Samaritan” in your community. If you see an auto accident, crime in progress or other serious emergency where lives are in danger, call 911 or other local emergency number, as you would want others to do for you.

10. Call roadside assistance or a special wireless non-emergency assistance number when necessary. Certain situations you encounter while driving may require attention, but are not urgent enough to merit a call for emergency services. But you can still use your wireless phone to lend a hand. If you see a broken-down vehicle posing no serious hazard, a broken traffic signal, a minor traffic accident where no one appears injured or a vehicle you know to be stolen, call roadside assistance or other special non-emergency wireless number

The above tips are meant as general guidelines. Before deciding to use your mobile device while operating a vehicle, it is recommended that you consult your applicable jurisdiction’s local laws or other regulations regarding such use. Such laws or other regulations may prohibit or
otherwise restrict the manner in which a driver may use his or her phone while operating a vehicle.

Notice: Open Source Software
To obtain the source code under GPL, LGPL, MPL, and other open source licenses, that is contained in this product, please visit http://opensource.lge.com.

In addition to the source code, all referred license terms, warranty disclaimers and copyright notices are available for download.

LG Electronics will also provide open source code to you on CD-ROM for a charge covering the cost of performing such distribution (such as the cost of media, shipping, and handling) upon email request to opensource@lge.com. This offer is valid for three (3) years from the date on which you purchased the product.
Please check to see if any issues you’ve encountered with your phone are described in this section, before taking the phone in for service or calling a service representative.

ARBITRATION NOTICE: THIS LIMITED WARRANTY CONTAINS AN ARBITRATION PROVISION THAT REQUIRES YOU AND LG TO RESOLVE DISPUTES BY BINDING ARBITRATION INSTEAD OF IN COURT, UNLESS YOU CHOOSE TO OPT OUT. IN ARBITRATION, CLASS ACTIONS AND JURY TRIALS ARE NOT PERMITTED. PLEASE SEE THE SECTION TITLED “PROCEDURE FOR RESOLVING DISPUTES” BELOW.

Warranty Laws
The following laws govern warranties that arise in retail sales of consumer goods:

- The California Song-Beverly Consumer Warranty Act [CC §§1790 et seq],
- The California Uniform Commercial Code, Division Two [Com C §§2101 et seq], and
- The federal Magnuson-Moss Warranty Federal Trade Commission Improvement Act [15 USC §§2301 et seq; 16 CFR Parts 701–703]. A typical Magnuson-Moss Act warranty is a written promise that the product is free of defects or a written promise to refund, repair, or replace defective goods. [See 15 USC §2301(6).] Remedies include damages for failing to honor a written warranty or service contract or for violating disclosure provisions. [See 15 USC §2310(d).] Except for some labeling and disclosure requirements, the federal Act does not preempt state law. [See 15 USC §2311.]

1. WHAT THIS WARRANTY COVERS:
LG offers you a limited warranty that the enclosed subscriber unit and its enclosed accessories will be free from defects in material and workmanship, according to the following terms and conditions:

(1) The limited warranty for the product extends for TWELVE (12) MONTHS beginning on the date of purchase of the product with valid proof of purchase, or absent valid proof of purchase, FIFTEEN (15) MONTHS from date of manufacture as determined by the unit’s manufacture date code.

(2) The limited warranty extends only to the original purchaser of the product and is not assignable or transferable to any subsequent purchaser/end user.
(3) This warranty is good only to the original purchaser of the product during the warranty period as long as it is in the U.S., including Alaska, Hawaii, U.S. Territories and Canada.

(4) The external housing and cosmetic parts shall be free of defects at the time of shipment and, therefore, shall not be covered under these limited warranty terms.

(5) Upon request from LG, the consumer must provide information to reasonably prove the date of purchase.

(6) The customer shall bear the cost of shipping the product to the Customer Service Department of LG. LG shall bear the cost of shipping the product back to the consumer after the completion of service under this limited warranty.

2. WHAT THIS WARRANTY DOES NOT COVER:

(1) Defects or damages resulting from use of the product in other than its normal and customary manner.

(2) Defects or damages from abnormal use, abnormal conditions, improper storage, exposure to moisture or dampness, unauthorized modifications, unauthorized connections, unauthorized repair, misuse, neglect, abuse, accident, alteration, improper installation, or other acts which are not the fault of LG, including damage caused by shipping, blown fuses, spills of food or liquid.

(3) Breakage or damage to antennas unless caused directly by defects in material or workmanship.

(4) That the Customer Service Department at LG was not notified by consumer of the alleged defect or malfunction of the product during the applicable limited warranty period.

(5) Products which have had the serial number removed or made illegible.

(6) This limited warranty is in lieu of all other warranties, express or implied either in fact or by operations of law, statutory or otherwise, including, but not limited to any implied warranty of marketability or fitness for a particular use.

(7) Damage resulting from use of non LG approved accessories.

(8) All plastic surfaces and all other externally exposed parts that are scratched or damaged due to normal customer use.

(9) Products operated outside published maximum ratings.

(10) Products used or obtained in a rental program.

(11) Consumables (such as fuses).
3. WHAT LG WILL DO:
LG will, at its sole option, either repair, replace or refund the purchase price of any unit that does not conform to this limited warranty. LG may choose at its option to use functionally equivalent re-conditioned, refurbished or new units or parts or any units. In addition, LG will not re-install or back-up any data, applications or software that you have added to your phone. It is therefore recommended that you back-up any such data or information prior to sending the unit to LG to avoid the permanent loss of such information.

4. STATE LAW RIGHTS:
No other express warranty is applicable to this product. THE DURATION OF ANY IMPLIED WARRANTIES, INCLUDING THE IMPLIED WARRANTY OF MARKETABILITY, IS LIMITED TO THE DURATION OF THE EXPRESS WARRANTY HEREIN. LG SHALL NOT BE LIABLE FOR THE LOSS OF THE USE OF THE PRODUCT, INCONVENIENCE, LOSS OR ANY OTHER DAMAGES, DIRECT OR CONSEQUENTIAL, ARISING OUT OF THE USE OF, OR INABILITY TO USE, THIS PRODUCT OR FOR ANY BREACH OF ANY EXPRESS OR IMPLIED WARRANTY, INCLUDING THE IMPLIED WARRANTY OF MARKETABILITY APPLICABLE TO THIS PRODUCT.

Some states do not allow the exclusive limitation of incidental or consequential damages or limitations on how long an implied warranty lasts; so these limitations or exclusions may not apply to you. This warranty gives you specific legal rights and you may also have other rights which vary from state to state.

5. HOW TO GET WARRANTY SERVICE:
If you experience any problems with either the Bluetooth headset or the mobile handset, in each case as may be covered by this limited warranty, you need only return the affected device. For example, if a problem exists with the Bluetooth headset, please DO NOT return your mobile handset with the headset. Likewise, if a problem exists with the mobile handset, please DO NOT return the Bluetooth Headset with the handset.

To obtain warranty service, please call or fax to the following telephone numbers from anywhere in the continental United States:
LIMITED WARRANTY STATEMENT

Tel. 1-800-793-8896 or Fax. 1-800-448-4026
Or visit http://us.lgservice.com. Correspondence may also be mailed to:
LG Electronics Service- Mobile Handsets, P.O. Box 240007, Huntsville, AL 35824

DO NOT RETURN YOUR PRODUCT TO THE ABOVE ADDRESS.
Please call or write for the location of the LG authorized service center nearest you and for the procedures for obtaining warranty claims.
PROCEDURE FOR RESOLVING DISPUTES:

ALL DISPUTES BETWEEN YOU AND LG ARISING OUT OF OR RELATING IN ANY WAY TO THIS LIMITED WARRANTY OR THE PRODUCT SHALL BE RESOLVED EXCLUSIVELY THROUGH BINDING ARBITRATION, AND NOT IN A COURT OF GENERAL JURISDICTION. BINDING ARBITRATION MEANS THAT YOU AND LG ARE EACH WAIVING THE RIGHT TO A JURY TRIAL AND TO BRING OR PARTICIPATE IN A CLASS ACTION.

Definitions. For the purposes of this section, references to “LG” mean LG Electronics MobileComm U.S.A., Inc., its parents, subsidiaries and affiliates, and each of their officers, directors, employees, agents, beneficiaries, predecessors in interest, successors, assigns and suppliers; references to “dispute” or “claim” shall include any dispute, claim or controversy of any kind whatsoever (whether based in contract, tort, statute, regulation, ordinance, fraud, misrepresentation or any other legal or equitable theory) arising out of or relating in any way to the sale, condition or performance of the product or this Limited Warranty.

Agreement to Binding Arbitration and Class Action Waiver. You and LG agree to resolve any claims between us only by binding arbitration on an individual basis, unless you opt out as provided below. Any dispute between you and LG shall not be combined or consolidated with a dispute involving any other person’s or entity’s product or claim. More specifically, without limitation of the foregoing, any dispute between you and LG shall not under any circumstances proceed as part of a class or representative action. Instead of arbitration, either party may bring an individual action in small claims court, but that small claims court action may not be brought on a class or representative basis.

Arbitration Rules and Procedures. To begin arbitration of a claim, either you or LG must make a written demand for arbitration. The arbitration will be administered by the American Arbitration Association (AAA) and will be conducted before a single arbitrator under the AAA’s Consumer Arbitration Rules that are in effect at the time the arbitration is initiated.
(referred to as the “AAA Rules”) and under the procedures set forth in this section. The AAA Rules are available online at www adr.org/consumer. Send a copy of your written demand for arbitration, as well as a copy of this provision, to the AAA in the manner described in the AAA Rules. You must also send a copy of your written demand to LG at LG Electronics, USA, Inc. Attn: Legal Department-Arbitration 1000 Sylvan Avenue Englewood Cliffs, NJ 07632. If there is a conflict between the AAA Rules and the rules set forth in this section, the rules set forth in this section will govern. This arbitration provision is governed by the Federal Arbitration Act. Judgment may be entered on the arbitrator’s award in any court of competent jurisdiction. All issues are for the arbitrator to decide, except that issues relating to the scope and enforceability of the arbitration provision and to the arbitrability of the dispute are for the court to decide. The arbitrator is bound by the terms of this provision.

Governing Law: The law of the state of your residence shall govern this Limited Warranty and any disputes between us except to the extent that such law is preempted by or inconsistent with applicable federal law.

Fees/Costs. You do not need to pay any fee to begin an arbitration. Upon receipt of your written demand for arbitration, LG will promptly pay all arbitration filing fees to the AAA unless you seek more than $25,000 in damages, in which case the payment of these fees will be governed by the AAA Rules. Except as otherwise provided for herein, LG will pay all AAA filing, administration and arbitrator fees for any arbitration initiated in accordance with the AAA Rules and this arbitration provision. If you prevail in the arbitration, LG will pay your reasonable attorneys’ fees and expenses to the extent required by applicable law. If the arbitrator finds either the substance of your claim or the relief sought in the demand is frivolous or brought for an improper purpose (as measured by the standards set forth in Federal Rule of Civil Procedure 11(b)), then the payment of all arbitration fees will be governed by the AAA Rules. In such a situation, you agree to reimburse LG for all monies previously disbursed by it that are otherwise your obligation to pay under the AAA
Rules. Except as otherwise provided for, LG waives any rights it may have to seek attorneys’ fees and expenses from you if LG prevails in the arbitration.

Hearings and Location. If your claim is for $25,000 or less, you may choose to have the arbitration conducted solely on the basis of (1) documents submitted to the arbitrator, (2) through a telephonic hearing, or (3) by an in-person hearing as established by the AAA Rules. If your claim exceeds $25,000, the right to a hearing will be determined by the AAA Rules. Any in-person arbitration hearings will be held at a location within the federal judicial district in which you reside unless we both agree to another location or we agree to a telephonic arbitration.

Opt Out. You may opt out of this dispute resolution procedure. If you opt out, neither you nor LG can require the other to participate in an arbitration proceeding. To opt out, you must send notice to LG no later than 30 calendar days from the date of the first consumer purchaser’s purchase of the product by either: (i) sending an e-mail to optout@lge.com, with the subject line: “Arbitration Opt Out” or (ii) calling 1-800-980-2973. You must include in the opt out e-mail or provide by telephone: (a) your name and address; (b) the date on which the product was purchased; (c) the product model name or model number; and (d) the IMEI or MEID or Serial Number, as applicable (the IMEI or MEID or Serial Number can be found (i) on the product box; (ii) on a label on the back of the product beneath the battery, if the battery is removable; or (iii) from the settings menu via the following path: Settings > About phone > Status). You may only opt out of the dispute resolution procedure in the manner described above (that is, by e-mail or telephone); no other form of notice will be effective to opt out of this dispute resolution procedure. Opting out of this dispute resolution procedure will not affect the coverage of the Limited Warranty in any way, and you will continue to enjoy the full benefits of the Limited Warranty. If you keep this product and do not opt out, then you accept all terms and conditions of the arbitration provision described above.
