Before you begin
This guide provides information you need to start using your new phone.
First, verify with your system administrator that the IP network is ready for phone configuration. Also be sure to read the Quick Start Guide, which can be found in your phone package, before you set up and use the phone. As you read this guide, keep in mind that some features are only configurable by your system administrator or determined by your phone environment. As a result, some features may not be enabled or may be operated differently on your phone. Additionally, the examples and graphics in this guide may not directly reflect what is displayed or is available on your phone screen.

Getting started with your phone
Before you use your phone, take some time to get familiar with its features and user interface.
The terms “the phone” and “your phone” refer to any of the IP phones. Unless specifically noted in this guide, all phone models are operated in similar ways.
Topics:
• Hardware overview
• Screen and icons
• Navigating menus and fields
• Entering information

Hardware overview
Understanding the phone hardware helps you easily use the phone’s features.
Topics:
• VZP59 hardware
• Power LED indicator
• Camera LED indicator

Screen and icons
The user screens and icon indicators can help you navigate and understand important information about the phone’s status.

Topics:
- Control center and notification center
- Idle screen
- Video call screen
- Icons in the status bar
- Line key icons

Control center and notification center
The control center or notification center allows you to access some features or view important notifications quickly.

Procedure:
Swipe down from the top of the screen.
### Home screen

On the Home screen, you can view the phone's current state, add line keys, and access the Dialing, Directory and History screens.

#### Topics:
- Home screen
- Second idle screen

### Idle screen

The phone has two idle screens by default. You can swipe left or right to switch among different idle screens.

You can add a new idle screen by moving an application or widget to the right side of the third idle screen. This idle screen will be deleted automatically if there is no application or widget on it.

### Related topic:

Managing applications and widgets
Second idle screen
The second idle screen displays the phone’s system applications by default.

### Item Description

Entering information
The phone provides an onscreen keyboard, phone keypad and dial pad to enter data. The phone keypad and dial pad provide a standard key layout, which enables you to use existing or familiar key positions.

Topics:
• Using the onscreen keyboard
• Using the phone keypad and dial pad

Using the onscreen keyboard
You can enter information into text fields using the touch screen. Following are tips for using the onscreen keyboard:

If you want to: Description
Position the cursor. Tap to the position.
Select all characters. 1. Long-tap the entered character(s) 2. Do one of the following: • Tap Select All on the top of the phone screen • Drag or to select all characters
Cut/Copy characters. 1. Long-tap the entered character(s) 2. Drag or to select the characters you want to cut/copy 3. Tap Cut/Copy on the top of the phone screen 4. Long-tap the desired field 5. Tap Paste
Delete multiple characters at a time. 1. Long-tap the entered character(s) 2. Drag or to select the characters you want to delete 3. Tap
Replace characters. 1. Drag your finger to highlight the characters you want to replace 2. Tap the desired character

Using the onscreen keyboard

Call features

You can place and answer calls, ignore incoming calls, transfer a call to someone else, conduct a conference call and perform other basic call features.

Topics:
• Placing calls
• Answering calls
• Switching among the handset, speakerphone and headset modes
• Audio-only/video call selection
• Switching between the call screen and idle screen
• Options during a video call
• Capturing a screenshot
• Disabling call waiting
• Silencing or rejecting incoming calls
• Ending calls
• Redialing a call automatically
• Muting/Unmuting audio
• Holding and resuming calls
• Redirecting incoming calls
• Transferring calls
• Conference calls
• Call recording

Placing calls

You can use your phone to easily place calls in a variety of ways.

Topics:
• Placing a call from the dialer
• Placing multiple calls
• Placing a call with a Speed Dial key
• Placing a call back to the last incoming number
• Redialing a number
• Placing an international call
• Placing a call from the call history
• Placing a call from the directory
• Placing an anonymous call

Placing a call from the dialer

The dialer enables you to enter a number to place a call, and it displays a list of previously placed calls or contacts in your directory.

You can also select the desired contact from the search list, the placed call list or the directory.

Procedure:

1. Do one of the following:
   • Start typing a phone number
   • Tap the desired line key
   • Pick up the handset, press the Speakerphone key 📲 or the Headset key 🎧

2. Enter a number

3. Select Send
Related topic:
Switching among the handset, speakerphone and headset modes

Placing multiple calls
When you are in a call, you can hold your current call and place a new call.
Procedure:
1. Do one of the following:
   • Tap a line key. The active call is placed on hold
   • Press the Hold key or tap Hold to place the original call on hold
   • Tap New Call
2. Enter the desired number or select a contact
3. Select Send

Placing a call with a Speed Dial key
You can quickly dial a number by using a Speed Dial key.
Procedure:
1. Swipe left or right to go to the second idle screen
2. Long-tap the desired line key and drag it to Edit at the top of the screen.
3. Select Speed Dial from the Type field
4. Select the desired line from the Account ID field
5. Optional: Enter the string that will appear on the phone screen in the Label field
6. Enter the contact number that you want to dial out directly in the Value field
7. Enter the key sequence that you want to send via DTMF in the Extension field
8. Tap ✔

Redialing a number
The phone keeps a record of all placed calls. You can recall the contact you recently called.
Procedure:
1. Press the Redial key. The phone screen displays the placed calls list
2. Tap the desired record
Tip: Press the Redial key twice to recall the contact you called.

Placing an international call
Procedure:
1. Long-tap the 0 digit key on the phone keypad until the plus sign (+) appears
2. Enter the phone number with the country code
3. Tap Send

Placing a call from the call history
You can place calls to contacts from the History list, which contains the calls that were recently placed, answered, missed or forwarded
Procedure:
1. Tap or navigate to Menu>History. The phone screen displays all call records
2. Select the desired call list
3. Tap the desired entry

Placing a call from the directory
You can place a call to a contact directly from your directory.
Procedure:
1. Tap ☑ or navigate to Menu>History. The phone screen displays all call records
2. Select the desired directory
3. If the contact was added to a specified contact group, you can select the desired contact group
4. Tap the desired contact
If the selected contact has multiple numbers, tap the desired number to dial out.

Related topic:
Searching for contacts

Placing an anonymous call
You can hide your name and number when you place a call. The recipient will receive an anonymous call without caller identity.
Before you begin:
Contact your system administrator to find out if this feature is available on your phone, and to get the anonymous call on code or off code if required.

Procedure:
This feature is for calling numbers outside of the enterprise. When dialing a number, prefix the number you are dialing with **67 followed by 10-digit phone number.
The recipient will be informed that there is an anonymous call.

Answering calls
When you receive a call, you can choose to answer it manually or automatically.

Topics:
• Answering a call
• Answering a call when in a call
• Answering a call automatically

Answering a call
When you receive an incoming call, the phone rings and the screen displays information about the incoming call. You can choose to answer the incoming call.

Procedure:
1. Do one of the following:
   • Pick up the handset
   • Press the Speakerphone key
   • Press the Headset key
   • Tap Answer or the line key

The call is answered in the speakerphone (hands-free) mode by default.

Related topic:
Switching among the handset, speakerphone and headset modes

Answering a call when in a call
You can answer a call when there is already an active call on your phone.

When you are in an active call and an incoming call arrives on the phone, a call waiting tone beeps, and the incoming call information is displayed.

Procedure:
Select Answer. The active call is placed on hold, and the incoming call becomes active.

Note: You can disable the call waiting feature to reject the incoming call automatically during a call.

Related topic:
Disabling call waiting

If the recipient enables the anonymous call rejection feature, you may be prompted that they do not accept calls from anonymous numbers.
**Answering a call automatically**

Auto answer enables you to automatically answer an incoming call in speakerphone (hands-free) mode when your phone is idle.

**Procedure:**
1. Swipe left or right to go to the second idle screen
2. Navigate to **Settings > Features > Auto Answer**
3. Select the desired line
4. Select **On** in the desired line
5. Tap ✅

   If the auto answer feature is enabled for the default account, the auto answer icon appears on the phone screen.

**Tip:** You can also swipe down from the top of the screen to enter the control center, tap **Auto Answer** to enter the Auto Answer setting screen and then enable the feature for the desired line.

**Disabling call waiting**

If the call waiting feature is disabled, when there is already a call, the new incoming call will be rejected automatically.

**Before you begin:**
Check with your system administrator to determine whether the call waiting on code or off code is required and get the code if necessary.

**Procedure:**
1. Swipe left or right to go to the second idle screen
2. Navigate to **Settings > Features > Call Waiting**
3. Select **Off** in the Call Waiting field
4. Select **Off** in the Play Tone field
5. Optional: Enter the call waiting on code or off code respectively in the On Code or Off Code field
6. Tap ✅

**Switching among the handset, speakerphone and headset modes**

You can select the desired mode before placing a call, or can alternate among speakerphone, headset and handset modes during a call.

When using the speakerphone or the headset, the LED indicator glows green.

**Procedure:**
During the call, pick up the handset, and press either the **Speakerphone** key or the **Headset** key to switch to the speakerphone, or press the **Speakerphone** key to switch to the speakerphone.

**Note:** Your system administrator can disable the handset, speakerphone (hands-free) or headset mode.

**Audio-only/video call selection**

You can choose to establish an audio-only call or a video call while dialing or ringing, or toggle between an audio-only call and a video call. This feature should be preconfigured by your system administrator.

**Topics:**
- Placing an audio-only/video call
- Answering a video call
- Switching between a video call and an audio-only call

**Placing an audio-only/video call**

You can choose to initiate an audio-only call or a video call.

**Procedure:**
1. When the phone is idle, do one of the following:
   - Enter the desired number
   - Tap the line key and enter the desired number

   ![Video Call/Audio Call](image)

   2. Tap **Video Call/Audio Call** to place a video call or audio-only call
Answering a video call

When an incoming video call arrives, you can choose to answer the call with audio-only or video.

Procedure:
When an incoming call arrives, it appears as below:

Tap **Audio** or **Video** to establish an audio-only call or video call.

Switching between a video call and an audio-only call

Your system administrator can give you the option to switch between a video call and an audio-only call during the active call.

Note: You cannot switch between a video call and an audio-only call during a three-way conference, or while the call is placed on hold.

Topics:
- Switching to an audio-only call
- Initiating a video call
- Accepting or ignoring a video call request

Switching to an audio-only call

During the video call, you can switch to the audio-only call quickly.

Procedure:
1. During an active video call, tap if required
2. Tap **Audio Only**. The audio-only call is automatically established

Initiating a video call

During an audio-only call, you can initiate a video call.

Procedure:

During an audio-only call, swipe the soft key area left and then tap **Add Video**.

By default, the video call is automatically established with the other party that is video-enabled.

If the other party can only establish an audio-only call, the phone prompts, “The other end is not available.”

If the other party accepts the video call request, the video call is established; if the other party ignores the request, the screen prompts, “The other end is not available”; if there is no response within 20 seconds, the call is still audio only.

Related topic:
Switching to an audio-only call

Accepting or ignoring a video call request

When the other party initiates a video call during an audio-only call, you can choose to accept or ignore the request.

Procedure:

Tap **Accept** to set up a video call, or tap **Ignore** to return to audio only.

Switching between the call screen and idle screen

During the call, you can access other applications to confirm some issues. After the operation, you can return to the call.

Topics:
- Going back to the idle screen during a call
- Returning to the call screen

Going back to the idle screen during a call

During the call, you can go back to the idle screen to access other applications.

Procedure:

Tap ✅, ✭ or ✧ to go back to the idle screen.

Returning to the call screen

After going back to the idle screen, you can return to the call screen as long as the call has not ended.

Procedure:

Do one of the following when you are in the idle screen:
- Tap ✡
- Tap **Back To Talking** on the top of the phone screen
- Tap the floating video window
Options during a video call
During a video call, you can easily utilize other features to make the call more personalized.

Topics:
• Stop transmitting video during a call
• Changing the video layout during a call
• Previewing the near-site video

Stop transmitting video during a call
When you do not want the phone to transmit your video during a video call, you can stop it.

Procedure:
1. Do one of the following:
   • Unplug the camera
   • Swipe down from the top of the screen in the video call screen and then tap Video

Your phone will not transmit video to your contact, and the far site cannot see you. The icon will be displayed on the near-site video.

Changing the video layout during a call
During video calls, near-site and far-site video images are displayed on the phone screen. You can change the video layout.

The phone supports three video layouts:
• One large, other small: One video image is displayed in a large size while other video images along the right side of the screen are smaller
• Full screen: One video image is displayed full size while other video images are hidden
• Same size: All video images are displayed the same size. This layout is only applicable to SIP-T58A phones

Topics:
• Swapping video
• Hiding the local video window
• Previewing the near-site video

Swapping video
During a video call, you can switch the locations of near-site video and far-site video.

Procedure:
Tap the near-site (small window) video during a video call.

The near-site video will be displayed in the center of the phone screen, and the far-site video will be displayed on the top right of the phone screen.
The following figure shows what the phone screen looks like after you tap the near-site video:

Hiding the local video window
You can hide the local video window during a two-way video conversation.

Procedure:
Tap .

Previewing the near-site video
If you have connected the camera to the phone, you can preview the video of yourself that will be displayed during video calls. During the preview, you can configure camera settings.
Capturing a screenshot
You can capture a screenshot when the phone is idle or during a call.

The screenshots are saved in *.png format in the internal SD card with a name consisting of the prefix “Screenshot” and a date and time stamp. You can view the screenshots via the File Manager or Gallery.

Tip: You can view the screenshots on either the phone itself or on a computer using an application capable of viewing *.png files.

Topics:
• Capturing a screenshot when the phone is idle
• Capturing a screenshot during a call
• Viewing the latest screenshot

Capturing a screenshot when the phone is idle
You can capture a screenshot when the phone is idle for saving a favorite or needed photo.

Procedure:
1. Swipe down from the top of the screen
2. Tap Screenshot

If the screenshot is successfully saved, the message “Screenshot captured” displays in the notification center.

Capturing a screenshot during a call

Procedure:
Do one of the following:
• Press the Message Key
• Swipe down from the top of the screen
• Tap Screenshot

If the screenshot is successfully saved, the message “Screenshot captured” displays in the notification center.

If there is not enough storage space on the internal SD card, you cannot save the screenshot, and the notification center will display the message “Couldn’t capture screenshot.”

Viewing the latest screenshot
If multiple screenshots are successfully saved, you can view the latest screenshot via the notification center.

Procedure:
1. Swipe down from the top of the screen
2. Tap the “Screenshot captured” notification

Silencing or rejecting incoming calls
When you receive an incoming call, you can choose to silence or reject the call instead of answering.

Topics:
• Silencing a call
• Rejecting a call manually
• Rejecting anonymous calls
• Rejecting calls with Do Not Disturb (DND)

Silencing a call
You can silence a call to stop your phone from ringing. Even if you silence the call, the incoming call notification continues to be displayed on your phone.

Procedure:
Select Silence.
Rejecting a call manually

You can reject a call manually; rejected calls may be sent to voice mail. The rejected calls are displayed in the Received Calls list in your History list.

Procedure:
1. Tap Ignore.

Rejecting anonymous calls

You can reject incoming calls from callers who have hidden their identities. As a result, your phone will not ring and you will not be notified of an attempted call.

Before you begin:
Check with your system administrator to determine whether an anonymous call rejection on code or off code is required. If a code is required, get it from your system administrator.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Features > Anonymous Call Rejection
3. Select the desired line
4. Turn on Anonymous Call Rejection
5. Optional: Tap the On Code or Off Code radio box in the Send Anonymous Rejection Code field
6. Enter the anonymous call rejection on code and off code respectively in the On Code and Off Code field beneath the Send Anonymous Rejection Code field
7. Tap ✓

Related topic:
Placing an anonymous call

Ending calls

You can end the current call at any time.

Procedure:
Do one of the following:

• If you are using the handset, tap End Call or hang up the handset
• If you are using the headset, tap End Call
• If you are using the speakerphone, press the Speakerphone key ❌ or tap End Call

Muting/Unmuting audio

When you are in a call, you can mute the audio so that you can hear the other person, but they cannot hear you.

Procedure:
1. Press the Mute key 📮 during a call.
   The Mute key LED glows red
2. Press the Mute key 📮 again to unmute the call
   The Mute key LED goes out

Keep mute

In a meeting room, if incoming calls are answered automatically on your phone, callers may hear your discussion with your colleagues. You can keep the phone in mute to prevent this.

The mute state of your phone persists across calls. The phone stays in the mute state until you unmute the microphone manually or until the phone restarts.

Before you begin:
Check with your system administrator to determine whether the keep mute feature is configured on your phone.

Procedure:
1. Press the Mute key 📮 when the phone is idle.
   The Mute key LED glows red, and the mute icon appears on the idle screen
2. Press the Mute key 📮 again to deactivate the mute state
Holding and resuming calls
You can place an active call on hold and resume the call when you are ready. When you place a call on hold, the held party may hear the music played by their server.

Topics:
- Holding a call
- Resuming a held call

Holding a call
You can place an active call on hold on your phone.

Procedure:
Press the Hold key or tap Hold during a call.

Note: When you have multiple calls and the current call is held, you can tap the call directly to swap to the active call.

Resuming a held call
You can view and resume a held call on the phone.

Procedure:
Press the Hold key or tap Resume.
If multiple calls are placed on hold, select the desired call first.

Note: When you have multiple calls and the current call is active, you can tap the call directly to swap to the held call.

Redirecting incoming calls
When you are not available to answer calls on your phone, you can forward the calls to another phone.

Topics:
- Forwarding all incoming calls to a contact
- Forwarding an incoming call manually
- Forwarding incoming calls with a Forward key

Forwarding all incoming calls to a contact
There are three types of forwarding to a contact:
- Always Forward: Forwards all incoming calls immediately
- Busy Forward: Forwards incoming calls when you are busy in a call
- No Answer Forward: Forwards incoming calls when no one answers the calls

Topics:
- Forwarding all incoming calls on all lines
- Forwarding all incoming calls on a specific line
- Deactivating call forward

Forwarding all incoming calls on all lines
You can forward all incoming calls on the phone.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Features > Call Forward
3. Select the desired forwarding type and tap the On radio box of the corresponding field
4. Enter the contact number to which you want to forward incoming calls in the Forward to field
5. If you select the No Answer Forward option, select the desired ring time to wait before forwarding from the After Ring Time field
6. Optional: Enter the always/busy/no answer forward on code or off code respectively in the On Code or Off Code field
7. Tap

The call forward icon on the idle screen indicates that the call forward is activated.

Tip: You can also swipe down from the top of the screen to enter the control center, and tap Forward to enter the desired Call Forward setting screen according to the current forward type. If you have not configured the call forward type, tapping Forward will turn to the Always Forward setting screen.

Deactivating call forward
You can deactivate call forward when you no longer want to forward your calls.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Features > Call Forward
3. If forwarding is activated for specific lines, select the desired line
4. Select the desired forwarding type and tap the Off radio box
5. Tap

Tip: You can tap > All Lines to activate forwarding for all lines.

Forwarding an incoming call manually
You can manually forward a call to another contact while your phone rings.
Performing a blind transfer
You can transfer a call to another contact immediately without consulting with her/him first.

Topics:
• Performing a blind transfer normally
• Performing a blind transfer conveniently

Performing a blind transfer normally
You can enter the number, or select a contact from the directory or history to perform a blind transfer.

Procedure:
1. Press the Transfer key or tap the Transfer soft key during a call
2. Enter the number to which you want to transfer the call, and then press the Transfer key or tap Transfer. The phone will display a dialog box as seen below:
3. Tap Transfer to complete the transfer. (The call will automatically dial out in about five seconds if you do not tap Transfer)
   • Tap , and then select the desired contact to complete the transfer
   • Tap , and then select the desired list. Tap the desired entry to complete the transfer

Performing a blind transfer conveniently
You can perform a blind transfer conveniently by dragging the far-site window to a target speed dial or Busy Lamp Field (BLF) key, or to another one.
Performing transfer with a Transfer key
By default, you can transfer a call to a specific contact directly using a Transfer key during a call. Your system administrator can also set your phone to perform an attended transfer when using a Transfer key.

Topics:
- Setting a Transfer key
- Performing a blind transfer using a Transfer key

Setting a Transfer key
You can set a line key as a Transfer key, and specify a contact to whom you want to transfer calls for this key.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Features > Dsskey, and then select the desired line key
3. Select Key Event from the Type field
4. Select Transfer from the Key Type field
5. Optional: Enter the string that will display on the touch screen in the Label field
6. Enter the contact number to which you want to transfer the call to in the Value field
7. Tap

Tip: By default, you can drag the line key to the Edit field to set it.

Performing a blind transfer using a Transfer key
After you have set a Transfer key with a specific contact, you can perform a blind transfer by using it.

Before you begin:
Confirm with your system administrator that the Transfer mode is set to perform a blind transfer.

Procedure:
Tap the Transfer key during a call. The call is transferred to the specific contact directly.

Related topics:
- Placing a call with a Speed Dial key
Conference calls
The phone supports local and network conference calls. During a conference call, follow these tips:
• Use the handset or a headset if you’re in an open environment
• Mute your microphone when you are not speaking, especially in noisy environments
• Avoid tapping or rustling papers near the microphone
• Speak in your normal voice without shouting

Topics:
• Local conference
• Network conference

Local conference
Your phone supports up to five parties (including yourself) in a conference call.
You can create mixed conference calls with up to five audio-only and three video participants.
The following figure shows what the phone screen looks like in a mixed conference call with three-way video calls and two-way audio-only calls:

### Setting up a local conference call
You can set up a local conference call with up to four contacts.

Procedure:
1. Place a call to the first party
2. When the first party answers the call, select **Conference** to place a new call. The active call is placed on hold
3. Dial the second party’s number
4. When the second party answers the call, select **Conference** again to invite two the parties to join the conference

### Merging two calls into a conference
You can invite a held call into a conference call with the active call.

Procedure:
1. Place two calls on the phone
2. Do one of the following:
   - Drag one far-site window to another far-site window and then tap **Conference** from the pop-up box
   - Tap the desired call for a conference and ensure that the call is active. Tap **Conference**, and then tap the call on hold call to join the calls in the conference

Topics:
• Setting up a local conference call
• Merging two calls into a conference
• Creating a hybrid conference
• Holding or resuming a conference call
• Muting or unmuting a conference call
• Splitting a conference call
• Managing conference participants
• Ending a conference call
Muting or unmuting a conference call
When you mute the local microphone during a conference call, other participants can hear each other but not you.

Procedure:
1. Press the Mute key to mute the conference
2. Press the Mute key again to unmute the conference

Splitting a conference call
You can split the conference call into individual calls. After the split, the conference call ends, and other parties are held.

Procedure:
Select Split.

Managing conference participants
You can manage the conference participants to make the conference more flexible.

Procedure:
Long-tap the desired party. You can then do the following:
- Select Far Mute to mute the party. The muted party can hear everyone but no one can hear the muted party
- Select Remove to remove the party from the conference call

Ending a conference call
When you end the conference call, the other parties are dropped from the call.

However, the system administrator can set up your phone so that the other two parties remain connected when you end the conference call.

Procedure:
Select End Call.

N-way conferencing
The VZP59 allows you to add up to five participants to a conference call.

Topic:
Setting up an N-way conference

Setting up an N-way conference
You can set up a network conference with multiple parties.

Procedure:
1. Place a call to the first party
2. Tap Conference to place a new call. The active call is placed on hold
3. Enter the number of the second party, and then tap Conference
4. When the second party answers the call, tap Conference to add the second party to the conference

Creating a hybrid conference
You can merge the calls on your phone and a connected mobile phone into a hybrid conference.

There are many ways to create a hybrid conference; the following shows one example.

Before you begin:
Make sure you have connected a mobile phone to your phone.

Procedure:
1. Place a mobile call over Bluetooth on the mobile phone
2. Place a call on the phone
3. Tap Conference
4. Tap the hold call
   The calls are merged into a conference call.

Related topic:
Pairing and connecting a Bluetooth-enabled mobile phone

Holding or resuming a conference call
When you place a conference call on hold, other participants cannot hear each other until you resume the held conference call.

Procedure:
1. Press the Hold key or tap Hold to place the conference on hold
2. Press the Hold key again or tap Resume to resume the held conference call
5. Tap Conference to place a new call. The conference call is placed on hold.

6. Enter the number of the new party, and then tap Conference.

7. When the new party answers the call, tap Conference to add the new party to the conference.

8. Repeat steps 5 to 7 until you add all parties.

The conference is set up after the intended parties answer the call.

**Note:** The procedures for setting up a network conference call on specific servers may be different from the introduction above. Contact your system administrator for more information.

### Call recording

You can record up to 12 hours of audio in one file. By default, the recorded files are saved in the internal SD card.

But if there is a USB flash drive connected to the rear USB port of your phone, the recorded files will be saved in the storage device according to this priority: USB flash drive > internal SD card.

**Topics:**

- Recording a call
- Recording a conference
- Setting a mark when recording a call
- Stopping a recording
- Checking storage space

### Recording a call

You can record the important parts during an active call.

**Procedure:**

During a call, swipe the soft key area left and then tap Record. The phone screen displays a recording icon and recording duration.

---

### Recording a conference

You can record conference calls in the same way as other calls. All conference participants will be recorded.

**Note:**

- If one of the participants holds the conference call, only that participant is recorded. When a conference call is placed on hold, recording of the conference is paused. You can place or answer other calls while the conference is on hold; these calls will be recorded in the same file. When the conference call is resumed, recording of the conference resumes.

- If one of the participants mutes the conference call, only that participant is not recorded.

**Related topics:**

- Recording a call
- Setting a mark when recording a call
- Stopping a recording
- Checking storage space

### Setting a mark when recording a call

You can set a mark when recording a call to mark a special moment. There will be a red flag on this moment when playing the recorded file so that you can drag to it quickly.

**Procedure:**

1. Tap . The icon changes to . The number will increase if you set more marks.

### Stopping a recording

You can stop recording a call before the call ends. The recording also stops when the active call ends. The recording will be saved as an *.aac file in the internal SD card or the USB flash drive automatically.

**Procedure:**

1. Do one of the following:

   - Swipe the soft key area left and then tap Stop during a call. The recording icon and recording duration disappears. The screen displays a message that the call has been recorded successfully.

   - Tap End Call. The recording icon and recording duration disappears, and the phone returns to the idle screen. The screen displays a message that the call has been recorded successfully.

### Checking storage space

You can check the total space or available space on the phone or connected USB flash drive.

**Procedure:**

1. Swipe left or right to go to the second idle screen.

2. Navigate to Settings > Status > Storage.
**Advanced call features**

You can perform some server-dependent tasks on the phone. Contact your system administrator to find out if your phone supports these advanced call features.

**Topics:**
- Call pickup
- Call park and call retrieve
- Busy Lamp Field (BLF)
- BLF list
- Shared line
- Intercom
- Video/Voice mail

**Call pickup**

You can use call pickup to answer someone else’s incoming call on your phone.

The phone supports the following two call pickup features:

- **Directed call pickup:** allows you to pick up incoming calls to another phone
- **Group call pickup:** allows you to pick up incoming calls to any phone within a predefined group

Check with your system administrator to find out if this feature is available on your phone.

**Topics:**
- Picking up a call directly
- Picking up a group call directly
- Picking up a call with a Directed Pickup key
- Picking up a call with a Group Pickup key

**Picking up a call directly**

You can answer a call that rings on another phone.

**Before you begin:**

Make sure your system administrator has enabled directed call pickup and set the directed call pickup code.

**Procedure:**

1. Pick up the handset, press the **Speakerphone** key or tap the line key. The **GPickup** soft key appears on the phone screen
2. Select **GPickup** on your phone when any phone in the group receives an incoming call. The call is answered on your phone
3. **Tip:** When the phone is idle, you can use a Group Pickup key to pick up a group call directly.

**Related topic:**

Picking up a call with a Group Pickup key

**Picking up a call with a Directed Pickup key**

You can easily use a Directed Pickup key to pick up a call to a specific contact’s phone.

**Before you begin:**

Ask your system administrator for the directed call pickup code.

**Procedure:**

1. Tap * or **Unfold Line Keys**
2. Select **GPickup** on your phone when any phone in the group receives an incoming call. The call is answered on your phone
3. **Tip:** When the phone is idle, you can use a Group Pickup key to pick up a group call directly.

**Related topic:**

Picking up a call with a Group Pickup key

**Picking up a group call directly**

When any phone within a predefined group receives an incoming call, you can pick up that call on your phone.

If there are multiple incoming calls on the group at the same time, you can only pick up the first incoming call.

**Before you begin:**

Make sure your system administrator has enabled group call pickup and set the group call pickup code.

**Procedure:**

1. Pick up the handset, press the **Speakerphone** key or tap the line key. The **GPickup** soft key appears on the phone screen
2. Select **GPickup** on your phone when any phone in the group receives an incoming call. The call is answered on your phone

**Related topics:**
- Picking up a call with a Directed Pickup key
- Picking up a remote call by BLF key
- Picking up a remote call by BLF List key

**Call pickup**

You can use call pickup to answer someone else’s incoming call on your phone.

The phone supports the following two call pickup features:

- **Directed call pickup:** allows you to pick up incoming calls to another phone
- **Group call pickup:** allows you to pick up incoming calls to any phone within a predefined group

Check with your system administrator to find out if this feature is available on your phone.

**Topics:**
- Picking up a call directly
- Picking up a group call directly
- Picking up a call with a Directed Pickup key
- Picking up a call with a Group Pickup key
Picking up a call with a Group Pickup key

You can easily select a Group Pickup key to pick up a group call.

**Procedure:**
1. Tap + or **Unfold Line Keys**
2. Select the desired line key
3. Select **Key Event** from the Type field
4. Select **Group Pickup** from the Key Type field
5. Select the desired line from the Account ID field
6. Optional: Enter the string that will appear on the touch screen in the Label field
7. Optional: Enter a contact number you want to pick up a call from in the Value field
8. Tap ✓

**Tip:** By default, you can drag the line key to the Edit field to set it.

When any phone within a predefined group of phones receives an incoming call, you can tap the **Group Pickup** key, and the call will be answered on your phone.

Call park and call retrieve

You can park a call, and then retrieve the call either from your phone or another phone. When a call is parked, it’s placed on hold, and you can continue the call after retrieving it.

**Parking or retrieving a call in the Transfer mode**

You can park the call to the shared parking lot through a blind transfer.

For some servers, the system will return a specific retrieve park number (park retrieve code) after parking successfully.

**Topics:**
- Parking a call in the Transfer mode
- Retrieving a parked call in the Transfer mode

**Parking a call in the Transfer mode**

You can park a call in the Transfer mode directly. When you park a call to the shared parking lot, the call is held on your phone.

**Before you begin:**
Make sure system administrator has set call park in the transfer mode.

**Procedure:**
During a call, swipe the soft key area left and then tap **Park**. The call will be directly transferred to the shared parking lot.

**Tip:** You can use a Call Park key to park a call to a specific shared parking lot directly.

**Related topic:**
Parking or retrieving a call with a Park or Retrieve key

**Retrieving a parked call in the Transfer mode**

You can retrieve a parked call in the Transfer mode from any phone in the same network.

**Before you begin:**
Make sure your system administrator has set call park in the Transfer mode and that there is a call parked on the shared parking lot.

**Procedure:**
1. Pick up the handset, press the **Speakerphone** key or tap the line key
2. Tap **Retrieve Park** on the predialing screen
   The phone will retrieve the parked call from the shared parking lot.

**Tip:** When the phone is idle, you can use a Retrieve key to retrieve a parked call directly.

**Related topic:**
Parking or retrieving a call with a Park or Retrieve key

**Parking or retrieving a call with a Park or Retrieve key**

You can easily use a Park key to park a call to a specific extension or shared parking lot (if the Transfer mode is set), and quickly retrieve this parked call using a Retrieve key.

**Topics:**
- State indicator of the Park/Retrieve key
- Parking a call using a Park key
- Retrieving a parked call using a Retrieve key

**State indicator of the Park/Retrieve key**

You can get the call park/retrieve status by viewing the icon indicator of the Park/Retrieve key.

</table>
Parking a call using a Park key
You can set a line key as a Park key, and specify an extension or a shared parking lot to which you want to park a call for this key. By using the Park key, you can park a call quickly.

Before you begin:
Check with your system administrator to determine whether Transfer mode is set on your phone, and if an account ID is necessary for this key.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Features > Dsskey, and then select the desired line key
3. Select Key Event from the Type field
4. Select Call Park from Key Type field
5. Optional: Select the desired line from the Account ID field
6. Optional: Enter the string that will appear on the touch screen in the Label field
7. Enter the park extension number or the shared parking lot you want to park the call to in the Value field
8. Tap

Tip: By default, you can drag the line key to the Edit field to set it.

During a call, you can tap the Call Park key, and the call will be parked to the desired extension or the shared parking lot directly.

Retrieving a parked call using a Retrieve key
You can set a line key as a Retrieve key, and specify a parked extension or retrieve lot from which you want to retrieve a parked call for this key. By using the Retrieve key, you can retrieve a parked call quickly.

Before you begin:
Check with your system administrator to determine whether Transfer mode is set on your phone, and if an account ID is necessary for this key.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Features > Dsskey
3. Select the desired line key
4. Select Retrieve from the Type field
5. Optional: Select the desired line from the Account ID field
6. Optional: Enter the string that will appear on the touch screen in the Label field
7. Enter the parked extension or the retrieve lot in the Value field
8. Tap

Tip: By default, you can drag the line key to the Edit field to set it.

When there is a call parked on the extension or the shared parking lot, you can tap the Retrieve key on the idle screen, and the call will be retrieved from the parked extension or shared parking lot directly.

Busy Lamp Field (BLF)
You can monitor a specific remote line using a BLF key for status changes on the phone.

Topics:
- Picking up a remote call by BLF key
- Transferring a call by BLF key
- Parking or retrieving a call by BLF key
- Visual alert for monitored lines
- State indicator of remote line by BLF key

State indicator of remote line by BLF key
You can get the monitored line's status by viewing the icon indicator of the BLF key.

</table>
Parking or retrieving a call by BLF key
You can use the BLF key to park a call or retrieve a parked call directly.

**Note:** Check with your system administrator to find out if this feature is available on your phone.

**Topics:**
- Parking a call to a monitored line
- Retrieving a parked call

Parking a call to a monitored line
During the call, you can use the BLF key to park the current call to a monitored line directly.

**Before you begin:**
Make sure your system administrator has set the call park feature in advance.

**Procedure:**
1. During a call, select Park
2. Tap the desired BLF key to park the call to the monitored line

Retrieving a parked call
You can use the BLF key to retrieve a call that is parked to the monitored line.

**Procedure:**
1. Select Retrieve Park on the dialing screen
2. Tap the desired BLF key to retrieve a call that is parked to the monitored line

BLF list
The BLF list feature enables you to monitor a list of users defined by your system administrator, and the respective icons will either flash or glow, depending on the status of monitored lines.

Check with your system administrator to find out if this feature is available on your phone.

**Topics:**
- State indicator of remote line by BLF List key
- Visual alert for monitored lines
- Picking up a remote call by BLF List key
- Transferring a call by BLF List key
- Retrieving a call by a BLF List key
- Barging in an active call by BLF List key

Bluff list
The BLF list feature enables you to monitor a list of users defined by your system administrator, and the respective icons will either flash or glow, depending on the status of monitored lines.

Check with your system administrator to find out if this feature is available on your phone.

**Topics:**
- State indicator of remote line by BLF List key
- Visual alert for monitored lines
- Picking up a remote call by BLF List key
- Transferring a call by BLF List key
- Retrieving a call by a BLF List key
- Barging in an active call by BLF List key

Visual alert for BLF pickup
The visual alert for BLF pickup feature allows your phone to display the caller number when the specified monitored line receives an incoming call.

Check with your system administrator to find out if this feature is available on your phone.

You can pick up the call to the monitored line, place a call to the monitored line, place a new call or go back to the idle screen.

Picking up a remote call by BLF key
When the monitored users are not at their desks and someone rings their lines, you can pick up the desired call simply by tapping the flashing BLF key.

If your system administrator set the directed call pickup code in advance, you can use the BLF key to pick up the call directly. If this code isn’t set already or if you want to set a pickup code for a specific BLF line, you can set a pickup code for the BLF key manually.

**Before you begin:**
Make sure you have edited the BLF key’s Extension field with the directed call pickup code from your system administrator.

**Procedure:**
When the monitored line receives an incoming call, you can tap the BLF key to pick up the call for the monitored line directly.

Transferring a call by BLF key
When there is already an active call on your phone, you can transfer the active call to the monitored line by tapping the BLF key.

The phone transfers the active call differently depending on the Transfer mode via Dsskey feature configured by your system administrator.

**Topics:**
- Performing a blind transfer
- Performing a semi-attended/attended transfer

Performing a blind transfer
During a call, you can transfer the call to the monitored contact in the blind-transfer way.

**Procedure:**
During a call, tap the BLF key of the monitored line to which you want to transfer this call.
Performing a blind transfer
During a call, you can use the BLF List key to perform a blind transfer to the monitored line.

Before you begin:
Check with your system administrator to make sure that the Transfer mode via Dsskey is set to blind transfer.

Procedure:
During a call, tap the BLF List key of the monitored line to which you want to transfer this call.

Performing a semi-attended/attended transfer
During a call, you can use the BLF List key to perform a semi-attended/attended transfer to the monitored line.

Procedure:
1. During a call, tap the BLF List key of the monitored line to which you want to transfer this call. The phone will dial out the number of the monitored line
2. Tap the BLF List key of the monitored user again or tap Transfer to complete the transfer when the monitored user receives ringback or after the monitored user answers the call

Retrieving a call by a BLF List key
You can use the BLF List key to retrieve a call that is parked to the monitored line.

Before you begin:
Check with your system administrator to find out if this feature is available on your phone.

Procedure:
Tap the desired BLF List key to retrieve a call that is parked to the monitored line.

Barging in on an active call by BLF List key
You can use the BLF List key to barge in on a conversation and set up a conference call.

Before you begin:
Check with your system administrator to find out if this feature is available on your phone.

Procedure:
Tap the BLF List key. The phone dials out the barge-in code followed by the monitored line, and then you can join the call. Each of the three parties can hear the other two parties.

Shared line
The One Talk VZP59 phone supports using Shared Call Appearance (SCA) to share a line, so that it can be registered on more than one phone at the same time.

State indicator of remote line by BLF List key
You can get the monitored line's status by viewing the icon indicator of the BLF List key.

Visual alert for monitored lines
The visual alert for monitored lines feature allows your phone to display the caller number when the specified monitored line receives an incoming call.

Check with your system administrator to find out if this feature is available on your phone.

You can pick up the call to the monitored line, place a call to the monitored line, place a new call or go back to the idle screen.

Picking up a remote call by BLF List key
When the monitored user is not at his/her desk and someone rings his/her line, you can pick up the call simply by tapping the flashing BLF List key.

Before you begin:
Check with your system administrator to find out if this feature is available on your phone.

Procedure:
Tap the BLF List key to pick up the call for the monitored line directly.

Transferring a call by BLF List key
When there is already an active call on the IP phones, you can transfer the active call to the monitored user by tapping the BLF List key.

The phone transfers (blind transfer or attended transfer) the active call differently depending on the Transfer mode via Dsskey feature configured by your system administrator.

Topics:
- Performing a blind transfer
- Performing a semi-attended/attended transfer
Your system administrator can set your phone to use the shared line.

**Topics:**
- State indicator of shared line
- Placing calls on a shared line
- Answering calls on a shared line

**State indicator of a shared line**
You can get the shared line's status by viewing the icon indicator of the shared line key.

The following table shows the icon indicators associated with the shared line, and the corresponding descriptions:

<table>
<thead>
<tr>
<th>Icons</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>

</tr>
</tbody>
</table>

**Placing calls on a shared line**
You can place one or multiple calls on a shared line.

The phone places a call on the first shared line key automatically. You can select the desired shared line key first and place a call using this key.

**Related topic:**
Placing calls

**Answering calls on a shared line**
You can answer one or more calls on the shared line.

When an incoming call arrives on the shared line, all the registered phones will ring simultaneously, and the call can be answered on any one of the phones. Incoming calls will be distributed evenly among the available shared line keys.

**Note:** If the number of incoming calls is greater than the configured line keys, the line keys will be used by sequence circulation. Contact your system administrator for more information.

**Related topic:**
Answering calls

**Intercom**
Intercom is a useful feature in an office environment to quickly connect with the operator or a secretary.

Intercom enables you to place an intercom call that is answered automatically on the contact’s phone, as long as the contact is not in an active call.

**Note:** Intercom is not available on all servers. Contact your system administrator for more information.

**Topics:**
- State indicator of the Intercom key
- Placing an intercom call
- Picking up an incoming call from a target extension
- Answering an intercom call

**State indicator of the Intercom key**
You can get the intercom status by viewing the icon indicator of the Intercom key.

The following table shows the icon indicators associated with the Intercom key, and the corresponding descriptions:

<table>
<thead>
<tr>
<th>Icons</th>
<th>Description</th>
</tr>
</thead>
<tbody>
<tr>
<td><img src="image9" alt="Icon" /></td>
<td>The target extension is available.</td>
</tr>
<tr>

<tr>
<td><img src="image12" alt="Icon" /></td>
<td>Target extension fails to register.</td>
</tr>
</tbody>
</table>

**Placing an intercom call**
You can place an intercom call to quickly relay a message to a contact.

The target phone plays a warning tone and automatically answers the call in speakerphone (hands-free) mode by default. When the target phone has an active call, the intercom call is answered automatically after the active call ends.

**Procedure:**
1. Tap **Features**
2. Tap **Intercom**
3. Select the desired line key
4. Select **Intercom** from the Type field
5. Select the desired line from the Account ID field
6. Optional: Enter the string that will display on the touch screen in the Label field
User guide

Intercom allow
The intercom allow feature allows the phone to automatically answer an incoming intercom call. If you disable this feature, the phone will reject incoming intercom calls and send a busy message to the caller.

Note: your system administrator can set a period of delay time before the phone automatically answers intercom calls.

Intercom mute
The intercom mute feature allows the phone to mute the microphone when incoming intercom calls are answered automatically.

Intercom tone
The intercom tone feature allows the phone to play a warning tone before answering an intercom call automatically.

Intercom barge
Intercom barge allows the phone to automatically answer an incoming intercom call while an active call is in progress. The active call will be placed on hold. If you disable this feature, the phone will handle an incoming intercom call like a normal incoming call while there is already an active call on the phone.

Note: To enable the phone to receive a new incoming call when it already has an active call, make sure that the call waiting feature is enabled on the phone in advance.

Procedure:
1. Tap + or Unfold Line Keys
2. Select the desired key
3. Make the desired changes
4. Tap

Related topics:
• Switching among the handset, speakerphone and headset modes
• Muting/Unmuting audio
• Answering a call when in a call

Voice mail
The voice mail feature allows you to leave voice/video mails for someone or listen to your messages on your phone. This feature is set up on the server side and not all servers support this feature.

Topics:
• Setting the voice mail code
• Leaving voice mails
• Listening to voice mails

Intercom allow
The intercom allow feature allows the phone to automatically answer an incoming intercom call. If you disable this feature, the phone will reject incoming intercom calls and send a busy message to the caller.

Note: your system administrator can set a period of delay time before the phone automatically answers intercom calls.

Intercom mute
The intercom mute feature allows the phone to mute the microphone when incoming intercom calls are answered automatically.

Intercom tone
The intercom tone feature allows the phone to play a warning tone before answering an intercom call automatically.

Intercom barge
Intercom barge allows the phone to automatically answer an incoming intercom call while an active call is in progress. The active call will be placed on hold. If you disable this feature, the phone will handle an incoming intercom call like a normal incoming call while there is already an active call on the phone.

Note: To enable the phone to receive a new incoming call when it already has an active call, make sure that the call waiting feature is enabled on the phone in advance.

Procedure:
1. Tap + or Unfold Line Keys
2. Select the desired key
3. Make the desired changes
4. Tap

Related topics:

• Muting/Unmuting audio
• Answering a call when in a call

Voice mail
The voice mail feature allows you to leave voice/video mails for someone or listen to your messages on your phone. This feature is set up on the server side and not all servers support this feature.

Topics:
• Setting the voice mail code
• Leaving voice mails
• Listening to voice mails
Setting the voice mail code
If you want to connect your phone to the message center, you need to set the voice mail code on your phone.

Before you begin:
Get the voice mail code from your system administrator.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Tap \ to launch Message
3. Tap Set Voice Mail
4. Enter the voice mail code (for example, *4) in the desired account field
5. Tap ✔

Leaving voice mails
Procedure:
1. Follow the voice prompts to leave a voice mail
2. Hang up to complete the voice mail

Listening to voice mails
Before you begin:
You need to set the voice mail code in advance.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Tap \ to launch Message
3. Tap View Voice Mail
   The phone screen displays the number of new and old voice mails. You can tap the account to listen to voice mails.

Tip: When the phone prompts that a new voice mail has been received, you can press the Message key ( ) or tap Connect to dial out the voice mail access code directly.

Directory
The phone provides several types of phone directories, which can be customized by your system administrator.

Topics:
• Local directory
• Blacklist
• Remote phone book

Local directory
You can store up to 1,000 contacts and 48 groups in your local directory. You can search, add, edit and delete a contact.

Topics:
• Managing local directory groups
• Managing local directory contacts
• Moving a local directory contact to the blacklist
• Moving a local directory contact to the shared directory
• Searching for contacts

Managing local directory groups
You can manage local directory groups when the phone is idle.

Topics:
• Adding contact groups
• Editing contact groups
• Deleting contact groups

Adding contact groups
To organize your contacts and make them easier to find, you can add additional groups in the local directory.

Procedure:
1. Tap \ > Setting > New Group
2. Enter the desired group name
3. Tap ✔

Editing contact groups
You can edit or add to a group's information.

Procedure:
1. Tap \ > Setting
2. Tap after the desired group
3. Edit the group name
4. Tap ✔

Deleting contact groups
When you delete a contact group, the contacts in the group will not be deleted. You can view the contacts in the All Contacts list.

Procedure:
1. Tap \ > Setting
2. Tap before the desired group name to delete the group
3. Select OK

Managing local directory contacts
You can manage local directory contacts when the phone is idle.
Topics:
- Adding contacts
- Viewing contacts
- Editing contacts
- Deleting a contact
- Deleting all contacts

Adding contacts
When you add a contact to your local directory, you can choose how much information you want to enter for your contact. You are required to enter at least a contact name for each new contact.

Procedure:
1. Tap  
2. If you want to add a contact to the specified contact group, tap the contact group first
3. Tap  
4. Enter your contact’s information
5. Tap the desired account from the Account field
6. Tap the desired photo from the Photo field
7. Tap  

Viewing contacts
You can view contacts from a local directory on your phone.

Procedure:
1. Tap  
2. If you want to view a contact in the specified contact group, tap the contact group first
   The contact names are displayed in alphabetical order.

Editing contacts

Procedure:
1. Tap  
2. If you want to edit a contact from a specific contact group, tap the contact group first
3. Tap  after the desired contact
4. Edit the contact information
5. Tap  

Deleting a contact
You can delete any contact from the local directory.

Procedure:
1. Tap  
2. If you want to delete a contact from the specified contact group, tap the contact group first
3. Tap  after the desired contact
4. Tap Delete. The phone prompts you whether to delete the contact
5. Tap OK

Deleting all contacts
You can delete all contacts from the local directory.

Procedure:
1. Tap  > Setting
2. Tap Select All
3. Tap to delete all contacts
4. Select OK

Moving a local directory contact to the blacklist
You can move a contact in the local directory to the blacklist. Incoming calls from this contact will be rejected automatically.

Procedure:
1. Tap  
2. If you want to select a contact from a specific contact group, tap the contact group first
3. Tap  after the desired contact
4. Tap Blacklist to move this contact to the blacklist
5. Tap OK

Moving a local directory contact to the shared directory
You can move a contact in the local directory to the shared directory, so that you can share the contacts with other secondary handsets.

Before you begin:
Make sure the shared directory is available on your phone.

Procedure:
1. Tap  
2. If you want to select a contact from a specific contact group, tap the contact group first
3. Tap  after the desired contact
4. Tap New Entry
5. Tap  

Searching for contacts
In the local directory, you can enter search criteria to find your desired contact quickly.

Procedure:
1. Tap 📞
2. Do one of the following:
   - Tap Search. Enter your search criteria in the search field
   - Tap the desired letter (e.g., T) along the right side to jump to contacts whose names start with T or t

Viewing blacklist contacts
You can view contacts from the blacklist on your phone.

Procedure:
1. Navigate to 📞 > Blacklist

Editing a blacklist contact
You can update your blacklist contacts’ information.

Procedure:
1. Tap 📞 > Blacklist
2. Tap i after the desired contact
3. Edit the blacklist contact information
4. Tap ✓

Deleting blacklist contacts
You can delete one or all blacklist contacts. If a contact is removed from the blacklist, you can answer the call from the contact normally.

Topics:
• Deleting a blacklist contact
• Deleting all blacklist contacts

Deleting a blacklist contact
If you want to answer a call from a specific contact, you need to remove it from the blacklist.

Procedure:
1. Tap 📞 > Blacklist
2. Tap the desired contact
3. Tap Delete to delete the contact
4. Select OK

Deleting all blacklist contacts
You can delete all contacts from blacklist if you choose to answer calls from them.

Procedure:
1. Tap 📞 > Blacklist
2. Tap Setting > Select All
3. Tap to delete all contacts
4. Tap OK

Blacklist
Incoming calls from the blacklist are rejected automatically. You can store up to 30 contacts in the blacklist to block unwanted callers.

Topics:
• Adding a blacklist contact
• Viewing blacklist contacts
• Editing a blacklist contact
• Deleting blacklist contacts
• Moving a blacklist contact to the local directory

Adding a blacklist contact
You can add a blacklist contact to prevent their call from ringing through.

Procedure:
1. Navigate to 📞 > Blacklist
2. Tap +
3. Enter the blacklist contact’s information
4. Tap ✓
Moving a blacklisted contact to a local directory
You can move a blacklisted contact to a local directory. Incoming calls from this contact will not be rejected automatically.

Procedure:
1. Tap 📞 > Blacklist
2. Tap 🔄 after the desired contact
3. Select Local Directory from the Group field
4. Tap ✅

Remote phone book
If the remote phone book feature has been enabled by your system administrator, you can access your corporate directory directly from your phone.

Topics:
- Searching for remote phone book contacts
- Viewing remote phone book contacts
- Saving a remote phone book contact to the local directory
- Saving a remote phone book contact to the blacklist

Searching for remote phone book contacts
In the remote phone book, you can enter search criteria to find your desired contact quickly.

Procedure:
1. Tap 📞 > Remote Phone Book
2. Do one of the following:
   - Tap Search. Enter your search criteria in the search field
   - Tap the desired letter (e.g., T) along the right side to jump to contacts whose names start with T or t

Viewing remote phone book contacts
You can view the contact list of the remote phone book on your phone.

Procedure:
1. Tap 📞 > Remote Phone Book

Saving a remote phone book contact to the local directory
You can save any remote phone book contact to the local directory, to conveniently call this contact when you cannot access the remote phone book.

Procedure:
1. Tap 📞 > Remote Phone Book
2. Tap the desired remote phone book
3. Tap 🔄 after the desired contact
4. Tap Add
5. Select Local Directory from the Group field
6. Tap ✅

Saving a remote phone book contact to the blacklist
You can save any remote phone book contact to the blacklist on the phone, to prevent this contact from calling you.

Procedure:
1. Tap 📞 > Remote Phone Book
2. Tap the desired remote phone book
3. Tap 🔄 after the desired contact
4. Tap Add
5. Select Blacklist from the Group field
6. Tap ✅

Call history
The call history list includes missed calls, placed calls, received calls and forwarded calls, and each list holds 100 entries.

Topics:
- Call history icons
- Viewing history records
- Saving a history record to the local directory
- Saving a history record to the blacklist
- Adding a history record to the shared directory
- Deleting history records

Call history icons
Each icon in the call history indicates the corresponding call history status.

<table>

</table>

Remote phone book
If the remote phone book feature has been enabled by your system administrator, you can access your corporate directory directly from your phone.
Viewing history records
The history record saves call information, such as the caller’s name and number, local line and call duration.

Procedure:
1. Tap 📞 or navigate to Menu > History
2. Select the desired list
3. Tap ☑ after the desired entry

Saving a history record to the local directory
To identify someone’s call the next time, you can save a history record to the local directory.

Procedure:
1. Tap ☑
2. Select the desired list
3. Tap ☑ > Add
4. Edit the contact information
5. Tap ✔

Saving a history record to the blacklist
You can prevent someone from calling you again by saving a history record to the blacklist.

Procedure:
1. Tap ☑
2. Select the desired list
3. Tap ☑ > Blacklist
4. Edit the contact information
5. Tap ✔

Adding a history record to the shared directory
After you view your history record, you can add the entry to the shared directory.

Before you begin:
Make sure the shared directory is available on your phone.

Procedure:
1. Tap ☑
2. Select the desired list
3. Tap ☑ after the desired entry
4. Tap Add
5. Select Shared Directory from the Group field
6. Edit the corresponding fields
7. Tap ✔

Deleting history records
You can delete one or all call records from the call history list.

Topics:
• Deleting a call record
• Deleting all call records

Deleting a call record
You can delete any call record from the call history list.

Procedure:
1. Tap ☑ or navigate to Menu > History
2. Select the desired list
3. Tap ☑ after the desired entry, and then tap Delete to delete the record
4. Tap OK

Deleting all call records
You can delete all call records from the call history list.

Procedure:
1. Tap ☑
2. Select the desired list
3. Tap Settings
4. Tap Select All
5. Tap ☑ to delete all the records
6. Tap OK

System applications
The system applications are pre-installed on your phone and they cannot be uninstalled.

Topics:
• Managing applications and widgets
• Managing running applications
• File manager
• Gallery
• Recorder
• Calculator
• Clock
Managing applications and widgets
You can add widgets to the idle screen for easy use, and adjust the location of applications and widgets.

Topics:
• Adding a widget to the idle screen
• Resizing a widget
• Moving an application or widget
• Removing a widget from the idle screen
• Creating a folder
• Renaming a folder

Adding a widget to the idle screen
The phone provides widgets like an analog clock, a calendar, a digital clock, email and a photo gallery. You can conveniently add these widgets to the idle screen as preferred.

Before you begin:
If you want to add an email widget and you have not registered an app account, a wizard will be provided for you to set up the email account. If you want to add a photo widget, you need to choose the album or images to be displayed.
You cannot add this widget if there are no images in the photo gallery.

Procedure:
1. Long-tap the empty spot on the idle screen
2. Tap Widgets
3. Touch and hold to pick up a widget
4. Drag the desired widget to the destination spot on the idle screen

Resizing a widget
Some widgets, such as the calendar, digital clock and email, can be resized on the idle screen.

Procedure:
1. Long-tap the desired widget for about two seconds, and then lift your finger from the screen. The widget will be inside a white frame as shown:

2. Drag the border of the frame to adjust the size

Moving an application or widget
You can move an application or widget to a different spot on the idle screen or to a different idle screen.

Before you begin:
Before moving an application or widget, you should know the following:
• You can drag an application or widget to the rightmost of the third idle screen to add a new screen
• If there is only one application or widget on the screen, you cannot add a new screen
• The idle screen (except the Home screen) will be deleted automatically if there is no application or widget on it

Procedure:
1. Long-tap the desired item for about two seconds
2. Drag the item to the destination spot on the screen
Removing a widget from the idle screen

This procedure only removes the widget of the application from the screen. The application itself will not be uninstalled.

Procedure:

1. Long-tap the desired item for about two seconds. The Remove field will appear on the top of the phone screen.
2. Drag the item to the Remove field to remove it.

Creating a folder

You can create a folder to organize your applications. For example, you can place the same kind of applications in a folder.

Procedure:

1. Drag an application icon over another application icon.
2. Lift your finger when a folder frame appears around the applications.

A new folder containing the selected applications is automatically created.

The folder will be deleted automatically if there is only one application in the folder.

Renaming a folder

You can rename a folder to make it easier to recognize.

Procedure:

1. Tap the desired folder to expand the folder.
2. Tap the Unnamed Folder field.
3. Enter the desired folder name.
4. Tap Done on the onscreen keyboard.
5. Tap the blank area of the phone screen. The folder is renamed.
Managing running applications
You can tap 📲 to view and manage the list of recently used applications that are still running in the background.

**Procedure:**
Do one of the following:
- Swipe the desired application left or right to stop the running application
- Tap 🛑 to stop all running applications
- Tap the desired application to access the application

If there are no running applications, the phone screen will display the message “Your recent screens appear here.”

File Manager
File Manager is a tool that allows you to view, search, delete, copy or move photo, video and audio files. You can also share files via Bluetooth or email. It helps you to access and manage files in the internal SD card as well as USB flash drive.

**Topics:**
- Viewing files
- Searching files
- Copying files
- Cutting files (moving files)
- Deleting files
- Sharing pictures/videos/audio via Bluetooth

Viewing files
You can view photo, video and audio files on your phone.

**Procedure:**
1. Swipe left or right to go to the second idle screen
2. Tap 📲 to launch File Manager
3. Tap Photos/Videos/Audios in the Local Storage field
   If a USB flash drive has been connected to your phone, you can tap Photos/Videos/Audios in the USB Storage field to view the files stored in USB flash drive.
4. Tap the desired picture/video/audio to view
   You can also swipe down from the top of the screen to enter the control center, and then tap USB to launch File Manager to view the files if you have connected a USB flash drive to the phone.

**Tip:**
The menu keys and Android keys will disappear after five seconds, you may tap the phone screen to show them again

Searching files
By entering search criteria, you can easily find the desired files.

**Procedure:**
1. Swipe left or right to go to the second idle screen
2. Tap 📲 to launch File Manager
3. Tap the top right of the screen
4. Enter a search string of the file name
The phone screen shows the file whose name matches the search string. You can drag up and down to scroll through the searching results, and then tap the desired file to view.

Copying files
You can copy the files that stored in the USB flash drive to internal SD card, or vice versa.

**Procedure:**
1. Swipe left or right to go to the second idle screen
2. Tap to launch File Manager
3. Tap Photos/Videos/Audios in the Local Storage field
   If a USB flash drive has been connected to your phone, you can tap Photos/Videos/Audios in the USB Storage field to view the files stored in USB flash drive.
4. Select the check box before the desired file. You can also select the Select All check box to copy all files
5. Tap 📲
6. Tap the destination storage device
7. Tap ✅
   The files are cut successfully with a prompt.

Cutting files (moving files)
You can move the files to another desired path. Once you move the files, they will not be kept in the original storage device anymore.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Tap 📀 to launch File Manager
3. Tap Photos/Videos/Audios in the Local Storage field. If a USB flash drive has been connected to your phone, you can tap Photos/Videos/Audios in the USB Storage field to view the files stored in USB flash drive
4. Select the check box before the desired file. You can also select the Select All check box to cut all files
5. Tap ✅
   The following prompt will appear on the phone screen:

6. Tap the destination storage device
7. Tap ✅
   The files are cut successfully with a prompt.

Deleting files
You can delete useless files to make room for other files.

Procedure:
1. Swipe left or right to go to the second idle screen.
2. Tap 📀 to launch File Manager
3. Tap Photos/Videos/Audios in the Local Storage field. If a USB flash drive has been connected to your phone, you can tap Photos/Videos/Audios in the USB Storage field to view the files stored in USB flash drive
4. Select the check box before the desired file. You can also select the Select All check box to cut all files
5. Tap ✅. The phone prompts you whether to delete the files
6. Tap OK

Sharing pictures/videos/audio via Bluetooth
You can share files in the File Manager with other Bluetooth devices.

Before you begin:
Make sure the Bluetooth mode is enabled, and the Bluetooth device is discoverable.

Procedure:
1. Swipe left or right to go to the second idle screen.
2. Tap 📀 to launch File Manager
3. Tap Photos/Videos/Audios in the Local Storage field. If a USB flash drive has been connected to your phone, you can tap Photos/Videos/Audios in the USB Storage field to view the files stored in USB flash drive
4. Select the check box before the desired file. You can also select the Select All check box to cut all files
5. Tap 📀. The phone screen will display the message "Sending n file to "XXX"" (n represents the number of the files that are being sent)
6. Tap Bluetooth, and then select Always or Just once
7. If the Bluetooth is deactivated, it will prompt you to tap Turn on to activate the Bluetooth mode. The phone scans and displays the available Bluetooth device automatically. If there is no Bluetooth device found, navigate to > Refresh to search for the Bluetooth devices
8. Tap the desired Bluetooth device to share the pictures/videos/audio. The phone screen will display the message "Sending n file to "XXX"" (n represents the number of the files that are being sent)
9. Accept the request of transferring files via Bluetooth on the Bluetooth device
If the pictures are successfully transferred, the notification center will display the message “Bluetooth share: Sent files n successful, n unsuccessful.” (n represents the number of files that are sent successfully or unsuccessfully.)

You can tap the notification to view the detail information about the shared files.

**Gallery**
You can access the Gallery to manage many operations for the listed pictures and videos. You can also take pictures and videos with it.

**Topics:**
- Viewing pictures/videos
- Editing pictures
- Setting a picture as wallpaper
- Printing pictures
- Deleting pictures/videos
- Taking a picture/video
- Sharing pictures/videos via Bluetooth

**Viewing pictures/videos**
You can view the pictures/videos on your phone in different ways.

**Procedure:**
1. Swipe left or right to go to the second idle screen
2. Tap 📷 to launch the Gallery

By default, the album’s pictures/videos are displayed as thumbnails in the albums arrangement mode.

3. Optional: Tap Albums. You can tap Albums/Locations/Times/People/Tags to view the pictures/videos in different arrangement modes
4. Swipe left/right to view all albums if required
5. Select the desired album
6. You can do the following:
   - Tap the album name on top left of the phone screen. Select Filmstrip view or Grid view to view the pictures/videos in different modes
   - Tap and then tap Group by. Select a desired group type in the pop-up dialog box to view the pictures/videos in different arrangement modes
7. Tap a desired picture/video to preview the picture/video
8. For picture albums, you can tap 📌 > Slideshow to start a slide show of the pictures in the album

**Note:** The menu keys and Android keys will disappear after five seconds; you may tap the phone screen to show them again.
You can also select a desired picture/video and tap 📌 > Details to view the detailed information.

**Editing pictures**
You can edit the pictures in the Gallery.

**Topics:**
- Rotating pictures
- Adding a filter for pictures
- Adding a frame for pictures
- Cropping pictures
- Coloring pictures

**Rotating pictures**
You can rotate the picture as you want.
6. Do the following:
   - Tap **Crop** to resize the picture
   - Tap **Straighten** to straighten the picture
   - Tap **Rotate** to rotate the picture clockwise
   - Tap **Mirror** to flip the picture symmetrically
   - Tap **Draw** to draw the picture

7. Tap **Save**

### Coloring pictures
You can edit pictures to make them display better.

**Procedure:**
1. Swipe left or right to go to the second idle screen
2. Tap 📷 to launch the Gallery
3. Tap the desired picture
4. Navigate to 📷 > Edit >
5. Adjust the desired exposure, contrast, saturation and so on
6. Tap **Save**

### Setting a picture as wallpaper
You can set a desired picture as wallpaper to make your phone more personalized.

**Procedure:**
1. Swipe left or right to go to the second idle screen
2. Tap 📷 to launch the Gallery
3. Tap the desired picture album
4. Tap the desired picture
5. Navigate to 📷 > Set picture as
6. Do one of the following:
   - If you want to set the picture as your phone’s wallpaper, tap **Wallpaper** and then tap **Set wallpaper** on the top right of the screen
   - If you connect EXP50 to your phone, tap **Exp Background** and then tap **Set as exp background** on the top right of the screen

### Printing pictures
You can print the desired pictures in the Gallery.

**Before you begin:**
Before printing the picture, make sure your phone has been connected to the network printer. For more information, refer to the documentation from the printer manufacturer.

**Procedure:**
1. Swipe left or right to go to the second idle screen
2. Tap 📷 to launch the Gallery
3. Tap the desired picture album
4. Tap the desired picture
5. Navigate to > Print to print the picture

Deleting pictures/videos
You can delete any picture or video from the Gallery.
Procedure:
1. Swipe left or right to go to the second idle screen
2. Tap to launch the Gallery
3. Tap the desired album
4. Do one of the following:
   • Long-tap the desired picture/video
   • Navigate to > Select item
   Select the pictures/videos you want to delete.

You can also tap n items selected (n represents the number of pictures you selected) and then tap Select all to select all pictures.

5. Tap to delete the selected pictures/videos
   The phone prompts you whether to delete the pictures/videos.
6. Tap OK

Taking a picture/video
You can take a picture/video with the Gallery directly.
Before you begin:
Make sure you have inserted the camera to the phone.
Procedure:
1. Swipe left or right to go to the second idle screen
2. Tap to launch the Gallery
3. Tap on the top right of the screen
4. Optional: Tap , and then do the following:
   • Tap to turn on the camera grid
   • Tap to configure the camera timer
5. Swipe right, and then select Camera or Video
6. Tap to take a picture or tap to take video

Sharing pictures/videos via Bluetooth
You can share the pictures/videos in the Gallery via Bluetooth.
Before you begin:
Before sharing pictures/videos via Bluetooth, make sure the Bluetooth device is discoverable.
Procedure:
1. Swipe left or right to go to the second idle screen
2. Tap to launch the Gallery
3. Tap the desired picture album
4. Do one of the following:
   • Long-tap one of the pictures/videos
   • Navigate to > Select item
   Select the pictures/videos you want to share.

You can also tap n items selected (n represents the number of pictures/videos you selected) and then tap Select all to select all pictures/videos.

Deleting pictures/videos via Bluetooth
You can delete any picture or video from the Gallery.
Before you begin:
Before deleting pictures/videos via Bluetooth, make sure the Bluetooth device is discoverable.
Procedure:
1. Swipe left or right to go to the second idle screen
2. Tap to launch the Gallery
3. Tap the desired album
4. Do one of the following:
   • Long-tap the desired picture/video
   • Navigate to > Select item
   Select the pictures/videos you want to delete.
5. Tap to delete the selected pictures/videos

You can also tap n items selected (n represents the number of pictures you selected) and then tap Select all to select all pictures.
5. Tap ☰, and then select Bluetooth

6. If the Bluetooth is deactivated, it will prompt you to tap Turn on to activate the Bluetooth mode. The phone scans and displays the available Bluetooth device automatically. If there is no Bluetooth device found, navigate to > Refresh to search for the Bluetooth devices

7. Tap the desired Bluetooth device to share the pictures/videos. The phone screen will display the message “Sending n file to “XXX” (n represents the number of pictures/videos that are being sent)

8. Accept the request of transferring files via Bluetooth on the Bluetooth device
   If the pictures/videos are successfully transferred, the notification center will display the message “Bluetooth share: Sent files n successful, n unsuccessful.” (n represents the number of files that are sent successfully or unsuccessfully.)

   ![Recorder screenshot](image1)

   You can tap the notification to view the detail information about the shared files.

**Recorder**

You can use the recorder to record audio and manage the recording.

During recording, you can mark specific moments so that you can quickly find and listen to them later. You can record up to 12 hours in one file. The recording is saved in *.amr format with the name consisting of the prefix “record@” and a date and time stamp.

**Topics:**
- Recording audio
- Playing a recorded audio
- Pausing/resuming a playback
- Fast forwarding/rewinding a playback
- Stopping a playback
- Renaming the recording
- Deleting a recording
- Deleting all recordings
- Checking storage space

**Recording audio**

By default, the recorded audio is saved in the internal SD card. You can connect a USB flash drive to your phone, and the recorded audio will be saved in the USB flash drive instead of the internal SD card.

**Procedure:**

1. Swipe left or right to go to the second idle screen
2. Tap ☰ to launch the recorder
3. Tap ☰ to start recording
4. You can do one of the following:
   - Tap 🎧 to pause the recording
   - Tap 📱 to set a mark. The icon changes to 📱; the number will increase if you set more marks and there will be a red flag on these moments when playing
5. Tap ☰ to end the recording and save the recording
   The recorded audio will be displayed on the right list automatically.

**Playing a recorded audio**

You can browse and play back the recordings on your phone.

The recorded calls include a date and time stamp and the other party's number/IP address/name (or the number/IP address/name of the first person you called). For example, 20160302-1452-Tom was created on March 2, 2016, at 14:52 during a call with Tom. The recorded audio-only calls are saved in *.aac format and the recorded video calls are saved in *.mkv format.

You can view the recorded files in the recorder or File Manager.

**Tip:** You can also play back the recorded calls on the phone or on a computer using an application capable of playing .aac and .mkv files.

**Procedure:**

1. Swipe left or right to go to the second idle screen
2. Tap ☰ to launch the recorder
3. Tap ☰ before the desired recorded call to play the recorded call
   The length of the recording and a progress bar are displayed as the recording plays.
   You can press the Volume key 🎧 to adjust the volume of audio output.
Related topics:
- Switching among the handset, speakerphone and headset modes
- Viewing files

Pausing/resuming a playback
When you receive an incoming call while playing a recording, the recording is paused automatically. You can resume the playback after handling the call. You can also pause the recording manually at any time.

Procedure:
1. Tap 🎧 to pause playing the recording. The icon 🎧 appears on the phone screen
2. Tap 🎧 to resume the playback

Fast forwarding/rewinding a playback
While a recorded file plays, you can fast forward or rewind the playback at any time.

Procedure:
Drag the slider to fast forward or playback.
If you have set marks for the recorded audio, you can drag the slider to the position with a red flag to listen to the marked moments.

Stopping a playback
While a recording plays, you can stop playing it at any time.

Procedure:
Tap ⏪ to stop the playing.

Renaming the recording
You can rename the recording for better recognition.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Tap 🎧 to launch the recorder
3. Tap 🎧 after the desired recording
4. Tap Rename
5. Enter the desired file name
6. Tap OK

Deleting a recording
You can delete local recordings or call recordings from the recorder. The local recording is named with the prefix "record@" and a date and time stamp, while the call recordings are named with the date and time stamp.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Tap 🎧 to launch the recorder
   - The phone shows all recordings in the audio recorder list.
3. Tap 🎧 after the desired recorded audio
4. Tap Delete
   - The phone prompts you whether to delete the audio.
5. Tap OK

Deleting all recordings
You can delete all the stored recordings when you need additional space.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Tap 🎧 to launch the recorder
   - The phone screen shows all recorded files in the audio recorder list.
3. Tap 🎧
   - The phone prompts you whether to delete all the audio files.
4. Tap OK

Checking storage space
You can check the total space or available space of the phone or connected USB flash drive.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Status > Storage

Camera
The phone supports taking pictures and recording videos via camera.

The pictures/videos taken by the camera are saved in "*.jpg/*.mp4 format with the name consisting of the prefix "IMG/VID" and a date and time stamp in the internal SD card. You can view the pictures/videos in the File Manager.

Topics:
- Inserting the USB camera into the phone
- Taking pictures
- Recording videos
- Camera settings
Inserting the USB camera into the phone

Before using the camera, you should insert the USB camera into the phone.

The following illustrates how to insert the camera into the phone.

Note: The phone only supports the One Talk VZP59 original USB camera.

Taking pictures

You can easily take pictures with the camera when the phone is in the idle screen.

Before you begin:

Make sure you have inserted the camera to the phone.

Procedure:

1. Swipe left or right to go to the second idle screen
2. Tap to launch the camera
3. Optional: Tap to turn on the camera grid
4. Optional: Tap > to configure the camera timer
5. Tap > to start recording
   The recording time will appear on the top left of the phone screen.
6. Tap to stop recording
   You can swipe left to view all videos taken by the camera.

Camera settings

After you insert the USB camera into the phone, you can set the camera to get better photo effects.

Procedure:

1. Swipe left or right to go to the second idle screen
2. Tap to launch the camera
3. Swipe right, and tap on the top right of the phone screen
4. You can do the following:
   • Tap Resolution & quality to configure the resolution of the camera
   • Tap Advanced to configure whether to use manual exposure

Recording videos

You can easily record videos with the camera when the phone is in the idle screen.

Before you begin:

Make sure you have inserted the camera into the phone.
Calculator
You can use the calculator to perform simple or complex calculations.

**Procedure:**
1. Swipe left or right to go to the second idle screen
2. Tap 📐 to launch the Calculator

Clock
You can use the clock to set an alarm, check the time of other cities in the world and set a stopwatch and timer.

**Topics:**
- Alarm
- Clock
- Setting a timer
- Setting a stopwatch

Alarm
You can set an alarm on the phone to remind you of a task or appointment, such as joining a meeting.

**Topics:**
- Setting an alarm clock
- Editing an alarm clock
- Deleting an alarm clock
- Setting alarm parameters

**Setting an alarm clock**
To avoid forgetting important tasks, you can set an alarm clock.

**Procedure:**
1. Tap the digital clock widget on the Home screen
2. Tap ☐ on the top left of the phone screen
3. Tap ☐
4. Tap the desired number to set the alarm time
5. Tap ☐
   The alarm clock you have set is displayed on the phone screen.

6. You can do the following:
   - Select the Repeat check box, and then tap the repeat day of the alarm
   - Tap ☐. Select a desired ringtone for the alarm, and then tap OK
   - Tap the Label field. Enter a label for the alarm, and then tap OK

**Note:** If you have set the time format as 12 Hour, you need to select AM or PM when setting the alarm time.

Editing an alarm clock
According to your needs, you can edit the alarm clocks.

**Procedure:**
1. Tap the digital clock widget on the Home screen
2. Tap ☐ on the top left of the phone screen
3. Tap ☐
4. Tap the desired option to edit the alarm clock

Deleting an alarm clock
When you no longer need the alarm clock, you can delete it.

**Procedure:**
1. Tap the digital clock widget on the Home screen
2. Tap ☐ on the top left of the phone screen
3. Tap the desired alarm
4. Tap ☐ on the bottom left of the alarm to delete the desired alarm
Setting alarm parameters
You can set alarm parameters to make your alarm clock more personalized.

Procedure:
1. Tap the digital clock widget on the home screen.
2. Tap
3. Tap >Settings
4. You can do the following:
   - Tap the desired duration of the alarm bell from the Silence after field. The alarm clock will automatically stop after this specified period of time
   - Tap the desired snooze time from the Snooze length field, and tap OK
   - Tap the Alarm volume field, drag the slider to adjust the alarm volume and then tap OK
   - Tap the Volume buttons field, and then configure the desired function for the Volume key when the alarm is ringing
5. Other functions include:
   - Snooze: Press the Volume key when the alarm is ringing; the alarm will stop and ring after a specified period of time
   - Dismiss: Press the Volume key when the alarm is ringing; the alarm will stop
   - Do nothing: Press the Volume key when the alarm is ringing; the alarm will still ring

Clock
You can check the current time and date via the clock on the Home screen.

Topics:
• Adding clocks for other cities
• Configuring the clock display mode

Adding clocks for other cities
You can add clocks for other cities. Once these have been added, you can view the current time in multiple cities simultaneously.

Procedure:
1. Tap the digital clock widget on the Home screen. The phone screen displays the current date and time
2. Tap
3. Drag up and down to scroll through the cities
4. Select the desired city check box
5. Tap to return to the clock screen
   The clock for the desired city is displayed on the phone screen.

Configuring the clock display mode
You can switch between digital and analog display modes, and set the home clock and home time zone.

Procedure:
1. Tap the digital clock widget on the Home screen
2. Tap > Settings
3. You can do the following:
   - Select Analog from the Style field
   - Select the Automatic home clock check box
   - Select the desired time zone from the Home time zone field

Setting a timer
You can set a timer to keep you on track to finish something within a set time.

Procedure:
1. Tap the digital clock widget on the home screen
2. Tap
3. Enter the time by tapping the digits on the right of the screen. You can tap to delete the entered numbers
4. Tap . When the timer is running, you can do the following:
   - Tap +1 to add an additional minute
   - Tap to pause the timer
   - Tap to delete the current timer
     The timer beeps when the time is up. It keeps beeping until you tap to stop.
Setting a stopwatch
You can set a stopwatch to measure the amount of time that you spend on something.

Procedure:
1. Tap the digital clock widget on the Home screen
2. Tap
3. Tap
4. You can do the following:
   • Tap to pause the stopwatch
   • Tap to reset the stopwatch
   • Tap , and then tap Bluetooth or Email to share the record via Bluetooth or email
   • Tap to count a lap while the stopwatch is running

Sending files via Bluetooth

Customizing your phone
You can make your phone more personalized by customizing various settings.

Topics:
• Changing the administrator password
• Wallpaper
• Screen saver
• Changing the screen backlight and time
• Changing the language
• Changing the input method

• Time and date
• Phone lock
• Line keys

Changing the administrator password
By default, you require an administrator password to access the Advanced Settings menu. The default password is “admin.” For security reasons, you should change the default password as soon as possible.

Note: If you do not change the default password, the phone displays a warning icon in the status bar.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Advanced Settings > Set Password
3. Enter your old and new password information
4. Tap

Related topic:
Investigating warnings

Wallpaper
You can change the background picture that is displayed on your phone.

The phone comes with a default background picture. You can change it to another built-in picture, add personal pictures stored on a USB flash drive, or use a custom picture uploaded by your system administrator as the wallpaper.

Topics:
• Changing wallpaper on the idle screen
• Adding a wallpaper from a USB flash drive

Changing wallpaper on the idle screen
You can set one of your pictures as the background image on your phone’s idle screen.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Basic > Display > Wallpaper
3. Select Gallery or Wallpapers, and then select the desired image
4. Tap Set wallpaper
**Adding a wallpaper from a USB flash drive**

You can use a picture that is stored on a USB flash drive as the background image of your phone.

When the USB flash drive is connected to your phone, the pictures on the USB flash drive are shown in the album. You can set a picture as wallpaper using the Gallery or File Manager.

We recommend that you add a picture that can scale proportionally to fit the screen.

**Related topic:**
Setting a picture as wallpaper

### Screen saver

The screen saver starts automatically when your phone has been idle for the preset waiting time. You can stop the screen saver by pressing any key.

**Topics:**
- Changing the waiting time for screen saver
- Setting the screen saver type

### Changing the waiting time for screen saver

You can set the time the phone waits after no activity before displaying the screen saver.

**Procedure:**
1. Swipe left or right to go to the second idle screen
2. Navigate to **Settings > Basic > Display > Screen Saver**
3. Select the desired waiting time from the Screensaver Waiting Time field
4. Tap ✅

### Setting the screen saver type

You can manually set what type of screen saver your phone uses.

Your phone supports four screen saver types: Clock, Colors, Photo Frame and Photo Table.

**Procedure:**
1. Swipe down from the top of the screen
2. Drag the backlight slider

---

---

---
Time and date
You can set the time and date manually. The time and date formats are also variable.

Topics:
• Setting the time and date manually
• Changing the time and date format

Setting the time and date manually
If your phone cannot obtain the time and date automatically, you can set them manually.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Basic > Time & Date > General
3. Edit the date and time
4. Tap ✓

The time and date set on the phone will be changed accordingly.

Changing the time and date format
You can set the phone to display the time in 12-hour format or 24-hour format. You can also change the date format, including the options to display the day (D), month (M) and year (Y).

Note: Your system administrator can customize the date format.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Basic > Time & Date > Time & Date Format
3. Select the desired time format and date format
4. Tap ✓

Phone lock
The phone lock helps you protect your phone from unauthorized use.

Topics:
• Setting the phone lock
• Locking your phone manually
• Unlocking your phone
• Changing your phone unlock PIN
Setting the phone lock
What unauthorized users can do depends on the phone-lock settings. After setting, you can manually lock the phone or specify a wait time the phone automatically locks.
When your phone is locked, you can:
• Dial emergency numbers
• Reject incoming calls
• Answer incoming calls
• End the call
Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Basic > Phone Lock
3. Select Enabled from the Lock Enable field
4. Enter the desired interval (0 to 3,600 seconds) in the Auto Lock field
5. Tap ✓
Note: Ask your system administrator for the password if you cannot access the Advanced Settings menu.

Locking your phone manually
You can lock the phone manually before the phone is automatically locked.
Before you begin:
Make sure that the phone lock is set.
Procedure:
Long-tap the # key when the phone is idle.
The lock icon appears on the phone screen.
Related topic:
Setting the phone lock

Unlocking your phone
You can use an PIN to unlock the phone.
If you forget the unlock PIN, you can enter the administrator password to unlock your phone, and then automatically access the PIN change screen.
Procedure:
1. Tap the screen or tap the locked key. The phone prompts you to enter an unlock PIN
2. Enter the desired PIN (default: 123) in the Unlock PIN field
3. Select OK
   The lock icon disappears from the phone screen.

Changing your phone unlock PIN
The default unlock PIN is “123”. For security reasons, you should change the default unlock PIN as soon as possible.
Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Basic > Change PIN
3. Enter your old and new unlock PIN. The unlock PIN length must be between 3 and 15 digits
4. Tap ✓

Line keys
Line keys allow you to quickly access features such as recall and speed dial. The line key can also indicate the monitored status when particular features are assigned to the line keys.
You can assign predefined functions to line keys. You can also define a label for a line key feature which will appear on the phone screen.
Topics:
• Assigning functionality to a line key
• Changing the locations of the line keys
• Deleting a line key

Assigning functionality to a line key
You can assign functions to a line key, and then access this function quickly by tapping this line key.
Procedure:
1. Do one of the following:
   • When there is no line key configured, tap + on the Home screen
   • When there is at least one line key configured, tap on the bottom left of the line key list
   • Swipe left or right to go to the first idle screen, tap on +.
   Tap the desired line key
2. Select the desired key type from the Type field
3. Configure the settings for the corresponding key type
4. Tap ✓

**Changing the locations of the line keys**
You can change the order in which your line keys display on the phone screen.

**Procedure:**
1. Do one of the following:
   - Drag up and down to scroll through the line key list, if required
   - Tap ➡ on the bottom right of the line key list
2. Drag a line key to the desired location at which another line key is located
   For example, exchange the locations of line key 1 and line key 2:

   ![Image 1](image1.png)

   The following shows the locations of two line keys after exchange:

   ![Image 2](image2.png)

**Deleting a line key**
You can delete a line key when you no longer need the corresponding function.

**Procedure:**
1. Drag the desired line key to the Delete field

   ![Image 3](image3.png)

   2. Tap OK

**Audio settings**
You can change the basic audio settings on your phone.

**Topics:**
- Adjusting the volume
- Setting the ring tone
- Disabling the key tone
- Enabling touch tone
- Configuring a notification sound
- Enabling silent mode

**Adjusting the volume**
You can adjust the volume of ringer, media, and the audio during a call.

**Procedure:**
Press the Volume key to adjust the volume.

**Setting the ring tone**
You can set distinctive ring tones for groups or contacts in your local directory, so that you can identify the caller when your phone rings.

The ring tones are used according to this priority: Contact ring tone > Group ring tone > Account ring tone > Phone ring tone.
Setting a ring tone for a contact
You can select a unique ring tone for various contacts in your local directory. This helps you quickly identify callers according to the ring tones.

Procedure:
1. Tap
2. Tap the contact group first
3. Tap after the desired contact
4. Select the desired ring tone from the Ring field. If Auto is selected, the contact uses the ring tone according to the default priority
5. Tap

Disabling the key tone
If you disable the key tone, the phone will not produce a sound when pressing the keypad keys.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Basic > Sound > Key Tone
3. Turn off Key Tone
4. Tap

Enabling touch tone
If you enable touch tone, the phone will produce a sound when you tap an option on the phone screen.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Basic > Sound > Touch Tone
3. Turn on Touch Tone
4. Tap

Configuring a notification sound
The phone will produce a notification sound when receiving a notification (for example, incoming email notification).

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Basic > Sound
3. Tap the desired notification sound from the Notification Sound field
4. Tap OK
Enabling silent mode

If you turn on the silent mode, your phone won’t produce a ring tone, key tone, touch sound or notification sound from phone’s speaker.

Procedure:

1. Do one of the following:
   - Swipe left or right to go to the second idle screen, navigate to Settings > Basic > Sound
   - Turn on Silent Mode and then tap ✓
   - Press the Volume key to adjust the ringer volume to the minimum
   - Swipe down from the top of the screen and toggle Silent on

Note: You may not have permission to turn on the silent mode. Contact your system administrator for more information.

Bluetooth

Bluetooth enables low-bandwidth wireless connections within a range of 10 meters (32 feet). It performs best within 1 to 2 meters (3 to 6 feet).

You can activate Bluetooth mode, and then pair and connect the Bluetooth device with your phone. You can pair countless Bluetooth devices with your phone; however, only one Bluetooth device can be connected at a time.

You can also share files with friends via Bluetooth. You can pair and connect a Bluetooth-enabled headset, speakerphone, microphone or mobile phone to your phone. Pairing directions will be the same, whatever the device.

Topics:
- Activating Bluetooth mode
- Pairing and connecting a Bluetooth headset
- Pairing and connecting a Bluetooth-enabled mobile phone
- Configuring the phone audio feature
- Configuring the media audio feature
- Changing your phone’s Bluetooth name
- Disabling Bluetooth device discovery
- Renaming the paired Bluetooth device
- Sending files via Bluetooth
- Receiving files via Bluetooth
- Unpairing a Bluetooth device
- Disconnecting a Bluetooth device
- Deactivating a Bluetooth mode

Activating Bluetooth mode

You must activate Bluetooth mode before connecting a Bluetooth device to your phone.

Procedure:

1. Do one of the following:
   - Swipe down from the top of the screen
   - Swipe left or right to go to the second idle screen, navigate to Settings > Basic > Bluetooth

2. Turn on Bluetooth mode. The phone automatically scans the available Bluetooth devices in your area. The Bluetooth icon appears in the status bar

Pairing and connecting a Bluetooth headset

You can pair and connect a Bluetooth headset to handle calls on the phone.

Before you begin:
Make sure that the Bluetooth headset is discoverable.

Procedure:

1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Basic > Bluetooth
3. Tap to search for Bluetooth devices
4. Tap the desired Bluetooth headset to connect to your phone
   - The connection will be completed successfully when a prompt appears under the Bluetooth headset name.
   - The Bluetooth icon appears in the status bar.

Related topic:
Activating Bluetooth Mode
Pairing and connecting a Bluetooth-enabled mobile phone

You can pair and connect a Bluetooth-enabled mobile phone to answer calls on that phone.

You can only connect one Bluetooth device at a time. After connection, the phone will automatically find an available line key and assign that line key to Mobile Account. The Mobile Account key’s default label is “My Mobile.” If there is no available line key, you may assign it manually.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Basic > Bluetooth
3. Tap after the desired Bluetooth device name
4. Turn on Phone audio
5. Tap

Related topics:
- Pairing and connecting the Bluetooth-enabled mobile phone

Configuring the phone audio feature

After syncing the mobile contacts to your desk phone, the phone acts as a hands-free device for your mobile phone. The call is made through your mobile phone, but the audio is present and the call control is done by the desk phone.

If a Bluetooth headset is connected to the phone, you can choose to answer a call using the Bluetooth headset.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Basic > Bluetooth
3. Tap after the desired Bluetooth device name
4. Turn on Media audio
5. Tap

Related topics:
- Pairing and connecting the Bluetooth-enabled mobile phone
- Configuring the media audio feature

Changing your phone’s Bluetooth name

You can change the Bluetooth name for your phone to identify your phone to other Bluetooth devices.

By default, the phone is identified by other Bluetooth devices as One Talk VZP59.
Before you begin:
Make sure that the Bluetooth mode is activated.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Basic > Bluetooth > Edit My Device Information
3. Enter the desired name in the Device Name field
4. Tap ✓

Related topics:
• Activating the Bluetooth mode
• Disabling Bluetooth device discovery

Disabling Bluetooth device discovery
After the Bluetooth is activated, the phone is automatically placed in open discover mode to make it visible to other Bluetooth devices.

You can choose to disable this feature so your phone will not show as an available device on other Bluetooth devices.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Basic > Bluetooth > Edit My Device Information
3. Turn on Open Discover
4. Tap ✓

Related topic:
Activating the Bluetooth mode

Renaming the paired Bluetooth device
You can rename the paired Bluetooth device to make it recognized more easily.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Basic > Bluetooth. The phone screen shows the paired and connected Bluetooth device
3. Tap ☑ after the connected Bluetooth headset name
4. Enter the desired device name in the Rename field
5. Tap ✓

The renamed Bluetooth name will be displayed in the paired devices list on your phone. The Bluetooth device name displayed in the scanning list of other devices will not be changed.

Unpairing a Bluetooth device
After unpairing a Bluetooth device, the phone will not automatically reconnect to the device the next time you activate the Bluetooth. You will need to scan, pair and connect with the device again.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Basic > Bluetooth. The phone screen shows the paired and connected Bluetooth device
3. Tap ☑ after the connected Bluetooth headset name
4. Tap Unpair

Sending files via Bluetooth
You can use the Gallery or File Manager to share pictures, videos or audio with an available Bluetooth device in your area.

Related topics:
• Sharing pictures/videos via Bluetooth
• Sharing pictures/videos/audio via Bluetooth

Receiving files via Bluetooth
The available Bluetooth devices in your area can share pictures, audio, videos and documents with your phone. You can use the corresponding system application to view the files.

Procedure:
1. Share a file with the phone on your Bluetooth device. The phone will play a notification sound and prompt you whether to accept the incoming file
2. Tap Accept to start receiving the file. The phone displays the message “The file will be received. Check progress in the Notification panel.” The icon will be displayed in the status bar
3. Optional: Swipe down from the top of the screen. Tap the notification “Bluetooth share: Received file”

You can use the corresponding system applications to view the file.
Disconnecting a Bluetooth device
When you disconnect a Bluetooth device, it remains paired so that you can reconnect it to your phone.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Basic > Bluetooth
3. Tap the connected Bluetooth device
4. Tap OK

Deactivating a Bluetooth mode
You can deactivate Bluetooth mode when you no longer use a Bluetooth device.

Procedure:
1. Do one of the following:
   • Swipe down from the top of the screen
   • Swipe left or right to go to the second idle screen, navigate to Settings > Basic > Bluetooth
2. Turn off Bluetooth mode
   The Bluetooth icon disappears from the status bar.

Wireless network
The phone can be connected to a wireless network if Wi-Fi is available within the area.
You cannot use a wireless network and Ethernet simultaneously to connect phones to your network. Enabling wireless connectivity automatically disables the Ethernet port.

Note: Enabling Bluetooth may degrade your wireless network connection. For improved wireless network performance, you should disable Bluetooth when it is not in use.

Topics:
• Activating Wi-Fi mode
• Connecting to a wireless network
• Viewing the wireless network information
• Disconnecting from a wireless network
• Deactivating Wi-Fi mode

Related topic:
Deactivating Bluetooth Mode

Activating Wi-Fi mode
You can activate the Wi-Fi mode to connect your phone to an available wireless network.

Connecting to a wireless network
After you have activated the Wi-Fi mode, you can connect the phone to a wireless network.
When the phone is connected to a wireless network, the Wi-Fi icon will display in the status bar.

Topics:
• Connecting to an available wireless network manually
• Connecting to a wireless network using Wi-Fi Protected Setup
• Adding a wireless network manually

Connecting to an available wireless network manually
You can use the password provided by your system administrator to connect the phone to a secured wireless network.

Before you begin:
Make sure that the Wi-Fi mode is activated.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Basic > Wi-Fi. The phone will automatically search for available wireless networks in your area
3. Optional: To research the available networks, select ➔ Scan
4. Tap the desired wireless network (SSID) to connect to it
5. Enter the desired password in the Password field
6. Select Show password to make the password visible
7. Select Show advanced options to configure the HTTP proxy for the Browser
8. Tap Connect
   Once the connection has completed successfully, the message “Connected” appears under the corresponding SSID.
Related topic:
Activating Wi-Fi mode

Connecting to a wireless network using Wi-Fi Protected Setup

You can connect to the wireless network by using Wi-Fi Protected Setup (WPS) to make the connection easier.

WPS provides simplified mechanisms to configure secure wireless networks. WPS can automatically configure a wireless network with a network name (SSID) and strong WPA data encryption and authentication.

There are two supported methods in the Wi-Fi protected setup:

- **Push-button configuration (PBC):** The user simply has to press the WPS key on both the phone and gateway/router to connect
- **Personal identification number (PIN):** The user enters the PIN generated randomly by the phone on the gateway/router to connect

**Before you begin:**
Make sure that Wi-Fi mode is activated.

**Procedure:**
1. Swipe left or right to go to the second idle screen
2. Navigate to **Settings > Basic > Wi-Fi**
3. Do one of the following:
   - Select **> WPS** to use the PBC method, then long-tap the WPS key on your gateway or router
     Once WPS setup has completed successfully, the phone screen will display the message “Connected.”
   - Select **> WPS-PIN** to use the PIN method, then log into your gateway or router’s web interface, and configure it to search the clients. For more information, refer to the documentation from the gateway or router manufacturer
     Once WPS-PIN setup has completed successfully, the web interface of the gateway or router will display whether the connection is successful.

**Related topic:**
Activating the Wi-Fi Mode

Adding a wireless network manually

If your gateway/router has SSID broadcast disabled, it doesn’t appear in the scanning results. Then you must manually add a wireless network.

**Before you begin:**
Get the available wireless network information from your system administrator. Make sure that Wi-Fi mode is activated.

**Procedure:**
1. Swipe left or right to go to the second idle screen, navigate to **Settings > Basic > Wi-Fi**
2. Select **> Add**
3. Enter the desired value in the Network SSID field
4. Tap the desired value in the Security field
   - If you select WEP or WPA/WPA2 PSK, enter the password
   - If you select 802.1x EAP, tap the desired value in the EAP method field, and enter additional information
5. Select **Show password** to make the password visible
6. Select **Show advanced options** to configure the HTTP proxy for the Browser
7. Tap **Save**

**Related topic:**
Activating Wi-Fi mode

Viewing the wireless network information

You can view detailed wireless network information, such as profile name, SSID and signal strength.

**Procedure:**
1. Swipe left or right to go to the second idle screen
2. Navigate to **Settings > Basic > Wi-Fi**
3. Tap **Wireless Status**
4. Optional: Drag up and down to scroll through the list of wireless network information

**Disconnecting from a wireless network**

You can disconnect a wireless network connection from your phone.

**Procedure:**
1. Swipe left or right to go to the second idle screen
2. Navigate to **Settings > Basic > Wi-Fi**
3. Tap the connected SSID (the top one)
4. Tap **Forget**
   **Tip:** You can also disconnect from the wireless network by deactivating Wi-Fi mode.

**Related topic:**
Deactivating Wi-Fi mode
Deactivating Wi-Fi mode
You should deactivate Wi-Fi mode when you need to connect your phone to the wired network.

Procedure:
1. Do one of the following:
   • Swipe down from the top of the screen
   • Swipe left or right to go to the second idle screen, and navigate to Settings > Basic > Wi-Fi
2. Turn off Wi-Fi
   The Wi-Fi icon disappears from the status bar.

Maintaining your phone
When your phone is unable to operate properly, troubleshoot issues.

Topics:
• Investigating warnings
• Clearing the warning icon
• Rebooting your phone
• Resetting to factory settings

Investigating warnings
A warning icon ⚠️ is displayed in the status bar to remind you to change the default password as soon as possible. You can view details about the issue from the status screen.

Procedure:
Swipe down to navigate to the control center.
The warning detail is displayed in the Warning field.

Clearing the warning icon
You can temporarily remove the warning icon from the status bar. However, the warning message still is displayed on the status screen until the issue is fixed. The warning icon appears in the status bar again after rebooting the phone if the issue is not fixed.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Status
3. Tap the Warning field. The phone prompts you whether to clear the warning icon
4. Tap OK
   The warning icon ⚠️ is removed from the status bar. It is also removed from the Warning field.

Tip: You can also swipe left or right to temporarily remove the warning icon via the notification center.

Rebooting your phone

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Advanced (default password: admin) > Reboot > Reboot
3. The phone prompts you whether to reboot the phone
4. Select OK
   Tip: You can also long-tap the * key on the keypad when the phone is idle to reboot the phone.

Resetting to factory settings
If you have tried all of the troubleshooting suggestions and the issue still persists, you can reset your phone to the factory configuration.

This operation will delete all your personal configuration settings, and reset all settings to the factory defaults. Check with your system administrator before resetting your phone to factory settings.

Procedure:
1. Swipe left or right to go to the second idle screen
2. Navigate to Settings > Advanced (default password: admin) > Reset Config
3. Tap Reset to Factory Settings
4. The phone prompts you whether to reset the settings
5. Select OK
   The phone begins resetting.
   Tip: You can also long-tap the Redial key ⋅ when the phone is idle.
   After reset, the screen displays the message “Welcome Initializing...Please wait.” The phone will be reset successfully after startup.
   Note: Reset of your phone may take a few minutes. Do not power off until the phone has started up successfully.

Deactivating Wi-Fi mode
You should deactivate Wi-Fi mode when you need to connect your phone to the wired network.

Procedure:
1. Do one of the following:
   • Swipe down from the top of the screen
   • Swipe left or right to go to the second idle screen, and navigate to Settings > Basic > Wi-Fi
2. Turn off Wi-Fi
   The Wi-Fi icon disappears from the status bar.

Maintaining your phone
When your phone is unable to operate properly, troubleshoot issues.

Notice
The specifications and information regarding the products in this guide are subject to change without notice. All statements, information and recommendations in this guide are believed to be accurate and presented without warranty of any kind, express or implied. Users must take full responsibility for their application of products.

Technical support
For additional support information please visit the One Talk support site (verizonwireless.com/support/one-talk/) for the latest guides, FAQs, product documents and more.

Important customer information
To avoid electric shock, use caution when connecting cables. For example, do not connect safety extra-low voltage (SELV) circuits to telephone-network voltage (TNV) circuits. LAN ports contain SELV circuits, and WAN ports contain TNV circuits. Some LAN and WAN ports both use RJ-45 connectors.

To avoid electric shock, do not operate the product or connect or disconnect cables during electrical storms. To avoid electric shock, do not use this product in or near water.

To reduce the risk of fire or overheating, keep this product in well-ventilated areas, away from radiators or other heat sources. Do not block cooling vents.

The plug-socket combination must be accessible at all times because it serves as the main power-disconnecting device.

Use only the manufacturer-provided AC adaptor approved for use with this product. Use of another AC adaptor may cause a fire or explosion.

This product relies on short-circuit (overcurrent) protection installed in your home or office. Ensure that a fuse or circuit breaker no larger than 120 VAC, 15 A U.S. is used on the phase conductors (all current carrying conductors).

Unplug this product from the wall outlet and refer servicing to qualified service personnel under the following conditions:
1. When the power cord or plug is damaged or frayed
2. If liquid has been spilled into the product
3. If the product has been exposed to rain or water
4. If the product does not operate normally when the operating instructions are followed. Adjust only those controls that are covered by the operating instructions, since improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal condition.

WEEE warning
To avoid the potential effects on the environment and human health as a result of the presence of hazardous substances in electrical and electronic equipment, end users of electrical and electronic equipment should understand the meaning of the crossed-out wheeled bin symbol. Do not dispose of waste electrical and electronic equipment (WEEE) as unsorted municipal waste and collect such WEEE separately.

Warranty
The specifications and information regarding the products in this guide are subject to change without notice. All statements, information, and recommendations in this guide are believed to be accurate and presented without warranty of any kind, express or implied. Users must take full responsibility for their application of products.

Yealink Network Technology CO., LTD., makes no warranty of any kind with regard to this guide, including, but not limited to, the implied warranties of merchantability and fitness for a particular purpose. Yealink Network Technology CO., LTD., shall not be liable for errors contained herein nor for incidental or consequential damages in connection with the furnishing, performance, or use of this guide.

Important 911 emergency response information
If you call 911, emergency service responders will be sent to the registered location you provided when you provisioned this phone. An incorrect address could result in incorrect routing of 911 calls and dispatch of emergency personnel to the wrong location, so please contact us if your registered location is not accurate.
Data and voice functionality (including the ability to make and receive 911 calls) will not be available during a power outage, broadband connection failure or other service disruption. Neither Verizon Wireless nor any of its affiliates shall be liable for any service outage and/or inability to access emergency service personnel, nor shall Verizon Wireless or any of its affiliates be responsible for the acts or omissions of emergency response center personnel.

3. Connect the equipment into an outlet on a circuit different from that to which the receiver is connected
4. Consult the dealer or an experienced radio/TV technician for help

Important safety precautions
Please read the following important safety notices and instructions before installing or using the product.

• A DANGER warning refers to situations that could cause bodily injury
• A CAUTION warning refers to situations that could result in equipment malfunction or damage
1. Follow all warnings and instructions marked on the product
2. Unplug this product from the wall outlet before cleaning. Do not use liquid cleaners or aerosol cleaners. Use an antistatic cleaning pad for cleaning
3. Do not use this product near water
4. Do not place this product on an unstable cart, stand or table. If the product falls, it could be seriously damaged
5. This product should be operated using the type of power indicated on the marking label. If you are not sure of the type of power available, consult your dealer or local power company
6. Do not allow anything to rest on the power cord. Do not locate this product where people will walk on the cord
7. Never push objects of any kind into this product through cabinet slots as they may touch dangerous voltage points or short out parts that could result in a fire or electric shock
8. Never spill liquid of any kind into or onto the product
9. Do not attempt to service this product yourself, as opening or removing covers may expose you to dangerous voltage points or other risks
10. Refer all questions regarding servicing of this product to qualified service personnel

Danger-electric shock and fire
Electric current from power, telephone and communication cables is hazardous and could result in electric shock and/or fire.

Declaration of conformity
Hereby, Yealink Network Technology CO., LTD., declares that this phone is in conformity with the essential requirements and other relevant provisions of the Conformité Européene (CE) and the Federal Communications Commission (FCC). You can find the CE and FCC information from the label on the back of the IP phone.

CE mark warning
This device is marked with the CE mark in compliance with Radio equipment and Telecommunications Terminal Equipment (R&TTE Directive 1999/5/EC).

Part 15 FCC Rules
Any changes or modifications not expressly approved by the party responsible for compliance could void the user’s authority to operate the equipment.

This device is compliant with Part 15 of the FCC Rules. Operation is subject to the following two conditions:
1. This device may not cause harmful interference
2. This device must accept any interference received, including interference that may cause undesired operation

Class B digital device or peripheral
Note: This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:
1. Reorient or relocate the receiving antenna
2. Increase the separation between the equipment and receiver
